THE KLEMME TIMES

VOLUME 41 — KLEMME, IOWA, WEDNESDAY EVENING, JANUARY 6, 1937 — NUMBER 33.

Goodell-Klemme Game Here Friday, January 15

ARRANGEMENTS FOR GAME PLANNED AT GARNER IS DEFINITELY CANCELLED

Both Games Will Be Played According To Original Schedule

High School officials have found it necessary to go back to original plans for the Klemme - Goodell basket ball game, and the game will be played on the Klemme floor the evening of January 15.

It was announced in the paper last week that this game would be played at Garner, but that arrangement has been definitely cancelled.

At that time the game was scheduled for the Garner floor and there seemed to be a good chance that the return game would also be played there. Many Goodell people, however, feel that they are entitled to have the game in their own gymnasium, so both teams will use their home floors.

Klemme Gymn Remodeled

The Klemme gym floor has been refinished during the holidays and the baskets have been set out to make it as much like an official playing court as possible. The Goodell game will be the first one to be played here since this work was done.

Every effort will be made to provide seats for a capacity crowd on the night of the fifteenth. Nobody should stay away.

Is No. 1 Game On Schedule!

As far as Goodell and Klemme basketball fans are concerned the big games of the season are the annual basketball games between the two schools.

In the past few years a lot of friendly rivalry has sprung up between Goodell and Klemme, and when the basketball teams get together, it means just one thing . . . REAL BASKETBALL GAME!

SHAMROCKS PLAY AT HAYFIELD THIS WEEK FRIDAY

The klemme Shamrocks will go to Hayfield this week Friday evening for the first conference game after the holiday vacation when Little Shamrocks will play the first game scheduled to start at 7:30 o'clock.

MR. AND MRS. PETER JOSTEN SURPRISED ON ANNIVERSARY

Relatives And Friends Have Dinner In Their Honor

Mr. and Mrs. Peter Josten were pleasantly surprised on their 40th wedding anniversary Tuesday evening when a number of relatives and friends dropped in on them for six o'clock chicken dinner.

Those present were Anna, Rosie and Wm. Becker, Eugene Habermann; Alfred Josten and son; Edmund Josten; Fred Becker and family; Mr. and Mrs. Henry Josten; John Josten; Erick Josten; Mr. and Mrs. Ed. Becker: Rev Calvin Grosshuesch and family: Miss Ethel Barz and Miss Marie Schmidt.

Following the dinner a program was enjoyed, consisting of singing, piano numbers, a talk by Rev. Calvin Grosshuesch, and general visiting was enjoyed and games were played.

KGLO GLOBE GAZETTE RADIO STATION NOW OPEN

Fourth Iowa Broadcasting Station To Transmit On 1210 Kilocycles

Radio Station KGLO offices are now open for business at the Hand hotel in Mason City.

The transmitter for KGLO is located two miles west of Mason City on highway 18 and has a tower 290 feet high and a beacon on top of the tower visible from 10 to 20 miles on a clear night. Ten miles of copper wire have been buried in for grounding purposes.

Begin Broadcasting Jan. 17

KGLO, which will operate on a wave length of 1210 kilocycles, will begin broadcasting on or about January 17th.

ESTHER BUSEMAN IS BRIDE OF ARTHUR SCHLAWIN

Ceremony Performed At Klemme Reformed Parsonage

As The Times goes to press, the news reaches us of the marriage of Miss Esther Buseman and Mr. Arthur Schlawin, which took place this Wednesday afternoon, January 6th at 2.00 o'clock at the Reformed Church parsonage Rev. Calvin Grosshuesch officiated.

The Bride, who is a daughter of Mr. and Mrs. Henry Buseman, of near Klemme, wore a blue crepe dress with accessories to match She was attended by Miss Ada Wille as Bridesmaid.

The Groom is a son of Mrs Wm Schlawin. He wore a suit of dark gray and Mr. Franklin Buseman acted as Best Man.

Both of these young people are highly respected in the community and have a large number of friends with who The Times joins in extending hearty congratulations.

Mr. and Mrs. Schlawin left on a trip for Waterloo and other points for a visit, after which they will go to house keeping on the Schlawin farm east of Klemme, which they will operate this coming year.

FAMILY REUNION HELD AT THE HENRY LEWIS HOME

A family reunion of the Etchens was held at the home of Mr. and Mrs Henry Lewis when members of the family enjoyed a big six o'clock dinner on Tuesday evening, December 29th. Those present were Mr. and Mrs. George Platt, Klemme; Lewis Etchen of Kansas City; Mrs. Lillian Brooks and Mr. and Mrs. Gerald Brooks and Mr. and Mrs. Claytus Melcher, all of Clear Lake; Albert Etchen and family, John Etchen and family, and Mr. and Mrs. Fred Etchen, all of Klemme This was Lewis Etchen's first visit to Klemme in about eighteen years, and his visit here was the motive for the reunion.

VAGABONDS WILL PLAY DIAMOND BREAD MONDAY

The Klemme Vagabonds will play Diamond Bread of Mason City on the local floor next Monday night, January 11th. There will be one game and it is called for 8 o'clock sharp.

Beat Thornton

The Vagabonds beat Thornton 31 to 28 Monday night on the floor at Thornton in a rather ragged contest. Pinkerton of Thornton collected the scoring honors when he dropped six field goals and 5 gift shots for a total of 17 points.

Kilgore leading the Klemme scoring attack with 4 loopers.

TWO-HEADED CALF BORN IN KLEMME ON NEW YEAR'S DAY

Here's Something Barnum Would Have Made a Fortune With

Carl Heginger reports the first story of the year, and it happened right here in Klemme.

On New Year's day one of Carl's choice cows decided to relieve the milk shortage by contributing a calf to the world. But the calf was more than a calf, it was almost two calves. The new arrival had two heads but died shortly after birth The freak of nature was provided with four ears two mouths and four eyes.

Had the critter lived we presume Carl would have gone into the show business and would have made Barnum look like a back number.

Ed. Jacobs At Des Moines Hospital

Ed. Jacobs underwent a major operation at a Des Moines hospital last Thursday for the relief of a nerve disorder which has caused him a lot of pain the last few months. Ed. has not been well since he was Injured In an auto accident last winter. The operation at Des Moines was performed on his spine and it is hoped that it will result in restoring his former good condition. Ed. is getting along as well as can be expected at this time, but will be confined to the hospital for another week.

World's Youngest Mayor Guest of LaGuardia and New York

Municipal budgets and such were discussed by the mayor of the world's largest city and world's youngest mayor when Mayor LaGuardia of New York played host to 17-year-old Mayor Daniel Kampan of Boys Town recently. Left to right above are LaGuardia, Kampan and Father Flanagan, founder and director of Boys Town.

THE world's youngest mayor visited New York recently as official guest of the mayor of the world's largest city—and they talked about budgets!

Danny Kampan, Mayor of Boys Town, Nebr., is only 17 and the youngest mayor of a real city in the world. As mayor of New York, Fiorello LaGuardia controls the largest municipal budget in the world.

After being locked in private conference in LaGuardia's office for some fifteen minutes, the mayor of New York admitted newspapermen and photographers:

"Mayor Kampan and I have exchanged credentials" LaGuardia said. "We've decided this job of being mayor isn't all it's cracked up to be!"

"You said it!" chimed in the youthful Kampan.

Going to New York to take part in a national radio broadcast, the Mayor of Boys Town and Father Flanagan, founder and director of the nationally famous home for homeless boys there were accorded all the courtesies and honors extended by the metropolis only to world celebrities. They were met at the train by Mayor LaGuardia's official motor cavalcade with smartly uniformed motorcycle officers flanking all sides. With screaming sirens clearing their way through the heavy New York traffic, they were whisked to the city hall for the big public reception.

While the two mayors posed for a battery of photographers, Father Flanagan stood in the background smiling gently, his eyes serious and kindly. He founded Boys Town, ten miles west of Omaha in 1917. Since then 4,466 homeless boys of all races, colors and creeds—from the 48 states of the union have been made good citizens there.

Beseiged by reporters for a history of his famous home he said: "No boy is a really bad boy. If you take him off the streets you can stem the tide of Crime. No one wants to be a criminal. It's only the lack of opportunity that makes boys criminals."

Breathless before the honors and recognition extended his homeless boys by the great American metropolis Father Flanagan told newspapermen how Boys Town began 19 years ago with five boys, how today present Boys Town with its 360 acres of fine farm land and modern buildings was his dream come true. With pride he showed reporters a recent letter written him by J. Edgar Hoover, head of the nation's G-Men. Hoover wrote: "If Boys Town were just financially able to care for all the boys that need its help, crime would be dealt one of the most effective and crushing blows I can imagine."

While in New York, young Kampan was offered an opportunity to attend an eastern preparatory school, a scholarship in an eastern college and a career. He turned them down with thanks, and a smile:

"Thank you very much" he said "but I think I'll go back with Father Flanagan!"

SHAMROCKS PLAY BELMOND BRONCOS NEXT TUESDAY

The Klemme Shamrocks will test their skill against the Belmond Broncos in a double header basketball game next Tuesday night on the Belmond floor.

This is he first time the Shamrocks and Broncos have scheduled a game.

MASONS AND STARS TO HAVE JOINT INSTALLATION

There will be a joint installation of the Masonic Lodge and Eastern Star Chapter at Garner on the evening of January 13.

All Star officers are notified to rehearse Monday evening.

All Masons and Stars are invited to attend.

5 ANNIVERSARIES OF WEDDINGS OBSERVED AT PARTY IN GOODELL

GOODELL—Mr and Mrs. L. W. Wesenberg entertained at a bridge party Friday night, Messrs. and Mesdames Nels Back, Ralph Hofer, Albert Schlichting, D. M. Conlan and O F. Conwell in honor of each couples wedding anniversary within the past week.

With the aid of an iron hook, T J Shaw, professional snake catcher of Austin, Tex., has caught more than 10,000 live rattlesnakes bare handed, and he has never been bitten.

Epworth Leaguers Had Watch Party on New Year's Eve

A large group of young people gathered at the Methodist Church on New Year's eve to attend a watch party sponsored by the Epworth League.

The evening was spent in playing games and enjoying stunts, after which lunch was served.

Third Week in January Home Butchering Week

The third week in January will be observed as Iowa home butchering week.

The week an annual observance, is set aside to remind farmers it is their last chance to butcher if they want to be sure of proper temperatures for curing, according to C. W McDonald, extension meat specialist at Iowa State College.

Temperature plays an important part in curing meat correctly, Mr. McDonald said, and he pointed out that unless animals are killed at least by the end of the week observed, there is no assurance proper temperatures can be obtained for the curing process.

Many Iowa farmers need to butcher earlier than is their custom, Mr. McDonald said.

EXPENSIVE

During the past year 80 persons were arrested for violations of the game laws. A total of $16,480 in fines was imposed by the Courts. Sixty-one guns were ordered confiscated and turned over to the Conservation Commission.

Funeral Services Held Thursday For Farmer

FRANKLIN ORGANIZED U. S. POSTAL SERVICE

Was America's First Postmaster General Under British

One of the first official actions concerning mail service in the American colonies was an order by the General Court of Massachusetts, in 1639, which directed that letters to be carried overseas were to be left at the home of one Mr Richard Fairbanks, who would see them placed on board ship. Hence Fairbanks has been called America's first postmaster.

In 1672 a monthly mail service was established between Boston and New York, but it was soon discontinued and not resumed until about ten years later Between 1673 and 1691 beginnings in postal service were made in Massachusetts, Connecticut, Pennsylvania and also Maryland.

The Intercolonial Postal Union was started by private parties under sanction of the British crown in 1693, the post roads being made through the forests. Carrying letters from Philadelphia to Boston took six weeks, and in winter service was frequently interrupted.

In 1707 the British government took over the system. In 1737 Benjamin Franklin became postmaster at Philadelphia and did much toward improving the service, later becoming deputy postmaster-general of the British colonies. The postal system was a losing business and Franklin paid the deficits out of his own pocket for several years. He later served for a short time as postmaster-general for the colonies during the Revolution.

Franklin established post routes from Massachusetts to Georgia, with numerous cross routes, and appointed postmasters in all of the principal communities. Thus was the foundation laid for the splendid postal service which the United States now enjoys.

The first postmaster-general appointed by President Washington was Samuel Osgood, but the postmaster-general was not considered a cabinet officer until 1829 In that year William T. Barry was appointed to the office by President Andrew Jackson.

175 ARE IN HANCOCK SAFETY COUNCIL NOW

GARNER—Enrollments in the newly organized safety council in Hancock county total 175, Mrs J E. Tierney, who has charge of the desk established at the courthouse, reported Wednesday Mrs. C E. Barnes, county chairman,, announced the following town directors for Hancock county which include Mayor A. C. Johnson, Corwith; Mayor J .L. Lloyd, Britt; Mayor A. O. Christensen, Crystal Lake; Mayor Bode, Woden; Mayor Stille, Klemme; Supt. R. N. Fish, Goodell; Dr. Stewart, Kanawha, and James O'Connor, Garner marshall will serve Hayfield and Miller.

MARRIAGE LICENSES ISSUED AT GARNER

Marriage licenses were issued by Clerk Elmer Raw to August Schwab, 24, Wesley, and Ruth Geiselhart, 18, Blue Earth, Minn.; Elmer D. Marr, 21, Spirit Lake, and Pauline Brown, 21, Corwith: Maurice E. Swan, 23, Britt, and Vera M. Thornburv, 21, Kanawha: and Frank J. W Hrubes, legal, of Britt, and Elsie Wellek, of Garner, legal.

LOTS OF WEATHER!

The weather man in Iowa has had more or less of a headache trying to make a good guess. During the past week we have had almost everything in weather from balmy spring-like days to below zero chills, rain and snow, sunshine and cloudiness and the thermometer has jumped up and down from ten below zero to forty above and all within 24 hours!

"Aunt" Ticie Taylor, who lives in a cabin in the Ozark Mountains of Missouri, has baked two dozen biscuits, three times a day, for 65 years.

FRANK LOOCK, TWIN LAKE FARMER DIED TUESDAY NIGHT, DEC. 29th

Frank Loock, 73, died at his home in Twin Lake township Tuesday night, December 29th after being ill for several months.

Funeral services were held Thursday afternoon from the Loock farm home with Rev. Wm. Zabilka officiating and Arthur Wellemeyer, funeral director in charge Interment was made in the Garner cemetery where Frank was laid to rest beside his brother.

Obituary

Mr. Frank Loock was born in Pommern, Germany February 24th, 1864 and died at his home in Twin Lake township December 29th, 1936 at the age of 72 years 10 months and 5 days.

He came to America with an older sister, Bertha when he was 18 years old. He worked out for four years, saving his money and sending it to his parents so that they too might come to he United States. In 1886 his father, mother, two brothers, and two sisters came. After renting for four years they bought the farm in Twin Lake township on which Frank has lived for the past 46 years.

While his father, mother, and sister Bertha have all been buried from the family home and laid to rest in the Liberty township cemetery, Frank was laid to rest in the Garner cemetery beside his brother August, who was at one time a blacksmith at Hayfield.

One sister died in infancy in Germany.

Frank was confirmed in the Lutheran Church in Germany, and although he has never had his church affiliations transferred, he has supported the Methodist Church and appreciated its services He lived a quiet life with a simple and undemonstrative faith in Christ.

The only known relatives who survive him are his brother and sister, Robert and Mary at home.

Card Of Thanks

We Wish to take this means of thanking our neighbors and friends for their kindness and assistance during our recent bereavement. We also want to thank those who sent flowers on otherwise expressed their sympathy in the loss of our brother Frank.

Robert Loock
Mary Loock

FORMER HANCOCK COUNTY PUBLISHER DIED IN COLORADO

Howard Arfica, who was reared in Goodell and who learned the printing trade under Louis Griswold, then publisher of the Goodell Globe, died in his home in Limon, Colorado on December 26th

Mr Africa edited the Klemme Times along in about 1900 for a short time for Mr Griswold Later, about 1903 he purchased the Crystal Lake paper and later the Kanawha paper.

The Africa family moved to Limon, Colorado 11 years ago at which time Mr Africa purchased the Limon paper

Mr Africa died following a heart illness which had bothered him for some years. He and his wife had made plans to spend the winter in California visiting their son Louis Mr Africa is also survived by three daughters, Inza (Mrs Riedesel) of Miles City, Montana Bessie (Mrs Pershing) of Limon, and Mable (Mrs. Risley) Limon.

His surviving sisters are Laura Stockwell and Ida Eldred of Sheldon Iowa: Minnie Savogue and Blanche Dieger Goodell, Iowa: Eva McElhree Sergeant Bluff Iowa, and Flora Wood, Marshalltown, Iowa.

Mr Africa was 53 years old.

Son Critically Ill

GOODELL—Mr. and Mrs. Anton Boller received word that their son, Ed Boller, was critically ill in a hospital in Los Angeles, Cal., from hemorrages. Two blood transfusions have been given him.

Washington Digest

National Topics Interpreted

BY WILLIAM BRUCKART

NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington—On the eve of the opening of a new congress, the seventy-fifth, there is great hullabaloo and clamor about social and economic legislation and particularly about the alleged necessity for constitutional amendments giving congress more power to deal with these problems. Much of the noise emanates from minorities, highly organized pressure groups, and it is difficult, therefore, to tell exactly what the attitude of the country, as a whole, may be.

Hullabaloo and Clamor

There are those both in congress and out who contend that the overwhelming vote for President Roosevelt's re-election constituted a mandate for immediate action on a number of these highly delicate and difficult questions. There are others whose contention is that the great vote given President Roosevelt was, in fact, a tribute to his personal popularity and that it was in no way connected with the various problems that are now before the country in individual capacity. Whatever the answer to these contending forces, the fact remains that we are due to hear something of them on the floors of the house and senate in the next few months.

One of the things about which we are hearing many, many words at the moment is a proposal for an amendment to the Constitution prohibiting child labor. It is the argument that such an amendment should be annexed to the Constitution and that it should give congress additional authority to enact legislation setting forth the details of this new type of prohibition.

Yet, while all of this raving and raging is going on, how many people are there who are aware of the fact that a constitutional amendment doing this very thing has been pending before the states for a little more than twelve years? How many people are there who recall that this amendment has been ratified by twenty-four states? Whatever their recollection is, it is a fact and it remains a fact that to all intents and purposes, enough states have refused to ratify the amendment to kill it off.

William Green, president of the American Federation of Labor, being alive to what he considers the meaning of the recent huge vote for President Roosevelt, has attempted to revive the fight for ratification of that child labor amendment above mentioned. He has written to the heads of the various state and local labor groups urging them to work for favorable action on the amendment in the states that have heretofore rejected it.

* * *

This brings up a new legal question. Stated succinctly, the question is whether a state legislature that has once rejected a proposition to amend the Constitution can reverse itself and approve the resolution after having once killed it. Mr. Green contends that this is possible. The American Bar association takes a contrary view.

New Legal Question

So, we are confronted with a problem within a problem and one that is likely to be distorted and twisted and misrepresented by those interests that have sought for a long time to make the Constitution appear outmoded. To become attached to the Constitution, an amendment must be ratified under the terms of the Constitution itself, by three-fourths of the states. That is thirty-six. Since twelve more states must ratify, there is likely to be a hard drive to gain some of the remaining states and to bring about reversal of positions already taken. It nearly always happens in "drives" that there is much loose mouthings and many unwarranted and unjustified statements. It probably will be so in this instance and the country must be on guard to sift the truth from the propaganda and must be prepared to make up its mind whether it desires to place in the Constitution a hard and fast rule that no child under eighteen years of age may be allowed to work gainfully.

For the sake of the record, herewith is the language of the proposed amendment that is now pending:

"The congress shall have power to limit, regulate and prohibit the labor of persons under eighteen years of age. The power of the several states is unimpaired by this article except that the operation of state laws shall be suspended to the extent necessary to give effect to legislation enacted by the congress."

From these words, it will be seen that an attempt is made to give congress greater power over the rights of states to legislate for themselves. Such a purport brings up in my mind the old question of whether a state or the federal government shall be supreme. There certainly are times, there are circumstances and there are conditions in which the federal government alone can deal with problems better than states can deal with them individually. But after all, conditions are not the same in any two states of the Union and it seems to me that the states ought to give careful thought to any proposition that takes away from them forever whatever rights are left to them under the Constitution. They ought to be free as far as they may be to handle their own problems on the basis of local requirements. And this is written, let me emphasize, not in opposition to any proposal that would abolish child labor.

* * *

The country cannot know definitely until President Roosevelt delivers his message to the new congress, dealing with the state of the Union, exactly what his position is going to be on the so-called social welfare problems of the country. This is a general category and involves such things as the so-called social security legislation and legislation giving the federal government greater control over private business. The two phases go hand in hand and as far as I have been able to discover, it will be impossible to deal with one without in some manner dealing with the other.

Social Welfare

For example, the present social security statutes have a direct effect upon business through their taxation provisions. While basically they are designed to protect against the sufferings of unemployment and the destitution of the aged who are without resources, it can be readily seen that somebody must pay the bill. The Roosevelt administration's theory is that private employers, meaning business as a whole, shall be the logical source from which to draw the financial protection that is conceived to be necessary.

But in this theory there is involved very definitely the right of the federal government to enter into the fields that are now occupied or may be occupied by the states. It is largely a taxing proposition that the federal government must use if it is going to reach those classes able to pay. But the Constitution, federal laws and traditional practices of our people have built up certain lines of demarcation between federal and state rights. The question therefore becomes simply one that requires determination by the people whether they are going to allow the federal government to encroach further upon the fields that hitherto have been reserved for the states.

We hear much talk about a revival of NRA; a revival of it on a basis that will make it constitutional and one with provisions that will reach a greater percentage of business than was reached by the original NRA. Organized labor seems to be in favor of this proposition and naturally will exert considerable power in congress, but some lawyers among the representatives and senators tell me that they do not see how the purpose can be accomplished without a constitutional amendment.

On the basis of all of the information and opinion that I have been able to gather, my guess would be that before this session of congress is over something tangible in the way of a new consitutional amendment will be offered. It would seem, on the basis of the present trends, that it will be possible for the different schools of thought on this subject to get together only upon a constitutional resolution. My guess is, further, that it is utterly impossible for all of the groups and blocs to reach an understanding on legislation along these lines. Few of them are willing to compromise and without the attitude of compromise on highly controversial legislation, nothing except stalemates results. Some observers even now hold the belief that it will be impossible for any agreement to be reached within congress on any of these social welfare propositions simply because the range of views as to what is good for the country is so wide.

* * *

There are certain bits of evidence now to be seen that indicate a more determined position on the part of business itself. I think it could be said without equivocation that the business interests have been the target for political demagoguery in the last few years to a greater extent than ever in history. Of course, business has not come forth with clean hands. Yet, it is made to appear now that business has taken about all of the maltreatment to which it is entitled and it would seem, therefore, that the time has arrived for it to be given some consideration by the government which has supervision over it as well as us as individuals.

What About Business?

Unseen Light Helps Enforce Sanitation Laws in New York

It Reveals Quality of Mattress Materials

NEW YORK. — "Invisible light," the same kind that gives healthy tans, is helping the bedding division of the New York department of labor run down violators who stuff mattresses with second-hand material but tag them: "filled with new cotton."

"We are using the ultra-violet fluorescence as a principle test in the prosecution of such cases," David Himmelfarb of the laboratory told a meeting of the American Association of Textile Chemists and Colorists. The ultra-violet light quickly discloses to the inspector whether the cotton fibers and felts used in making mattresses are second-hand or new.

Traps Cheating Makers.

"This work has been developed in our laboratory in order to make sure that all mattresses sold in the state of New York are properly designated and that when the tag calls for new material, it shall be actually new material, because there has been practice of using second-hand material," he went on to say.

The unique test is based on the fact that when various textile fibers are exposed to the proper type of ultra-violet rays they each fluoresce in different ways, thus enabling them to be distinguished from each other. Fluorescence is the power of a substance to absorb certain wavelengths of light, usually invisible, and to re-emit it as visible light. Thus, new cotton when exposed to practically invisible ultra-violet rays glows with a purplish or violet light or fluorescence. On the other hand, if the cotton is old or second-hand it glows with ivory-white fluorescence. The differences in fluorescence, therefore, reveal the age of the cotton fiber to the tester.

With his mercury quartz arc lamp, provided with a filter that cuts out most of the visible ultra-violet rays, the tester directs streams of the invisible rays from the lamp onto the mattress stuffing and from the color of the light given off can draw pretty sure conclusions as to whether the stuffings are new or old fibers.

This test should be of great value to those many states which have laws requiring manufacturers to disclose to th purchaser, usually by an attached cloth label, the kind and nature of the filling material used in mattresses and upholstered furniture.

Mystery Gland in Bees Unlocks Cradle Doors

BERLIN.—Every worker bee carries a gland that is of no use to her but serves the coming generation. The existence of this gland, under the bee's lower jaw, has long been known, but nobody knew what it was used for.

Now Dr. Karl Dreher, of the Marburg Zoological institute, has found that this maxillary gland, as it is called, secretes a substance that dissolves the cocoons in which young bees develop, when they are ready to emerge.

This gland is indispensable for the life of the hive, as a matter of fact, because the young bees cannot break the cocoon cases themselves, and the jaws of the nurse-bees are too short and blunt to open them by biting. This is especially true for the queen-bee cocoons,

Plant "Missing Links" Discovered in Oregon

BEND, ORE.—Plant "missing links", closing a gap in the history of life on this continent, have been discovered in Oregon, and the discovery has been verified by Dr. Ralph W. Chaney of the Carnegie Institution of Washington.

The new-found fossils date from the Pliocene geologic epoch, which came before the Great Ice age. The beds were uncovered during the progress of recent highway construction. They are capped with approximately 100 feet of lava. The discovery verified a prediction made by Dr. Chaney many years ago, when he said that willows and poplars would be abundantly represented in beds of this age, wherever they were found. Many leaf-impressions of these trees are among the new fossil finds,

New Germ-Killing Oil Is Obtained From the Ti-Tree

It Destroys Bacteria and Promotes Healing

SINCE the early days of antiseptic surgery and of crude antiseptics, medical men have been looking for a substance that would kill bacteria—especially the germs that infest wounds—without harming the living tissue of the patient. Such a substance seems to have been found in an essential oil distilled from the Australian ti-tree.

Few people outside Australia had heard of the ti-tree until recently, but now surgeons are beginning to wonder whether the oil is to make their professional dream come true. Tested by the standard method, ti-tree oil was from eleven to thirteen times as effective as carbolic acid of the same strength in killing typhoid bacteria, yet it is non-poisonous.

It Promotes Healing.

Not only is it non-irritating to wounded human tissues, but it is claimed actually to promote the healing of wounds. It is said to dissolve and bring away pus without injuring the healthy tissue.

All other disinfectants and germicides irritate, if they do not destroy, human tissue to some extent, so that their application to a wound must represent a compromise between killing the bacteria and harming the patient. Ti-tree oil is being used by Australian doctors and dentists with remarkable success in treating skin diseases, septic wounds, abscesses, and pyorrhoea, according to the Medical Journal of Australia.

Used Also in Perfumery.

It is a pale lemon-colored, pleasant-smelling oil with an odor resembling nutmeg. This has caused it to be employed in perfumery, but its most refined uses will be in medical and surgical practice.

The chemistry of ti-tree oil has not yet been cleared up, so that it is not known to what the oil owes its peculiar virtue. Ti-tree oil seems, however, to have a more complex composition than many oils originating in Australia, that land of strange plants and animals.

The ti-tree grows only in a belt near the north coast of New South Wales, and its oil is so little known to the world that only one firm in London is handling it.

Interstellar Space May Contain the Element Titanium

CAMBRIDGE, MASS. — Discovery in far-off interstellar space of what is probably ionized gas of the element titanium, a find astronomers say is likely to prove of tremendous significance in learning the content and nature of these nearly vacuous regions, has been reported to the Harvard Observatory by the Mount Wilson Observatory in California.

The find was made by Dr. Walter S. Adams, director of the Mount Wilson observatory, and Dr. Theodore Dunham, a member of the staff, while they were conducting research on the ultraviolet part of the spectrum of the bright star Chi 2 Orionis.

Will Be of Vast Importance.

Harvard astronomers declared, "It seems probable that if the discovery of the interstellar titanium is confirmed it will give information concerning the content and nature of interstellar space that is of more importance than was the discovery of sodium and calcium in nearly empty space."

The star Chi Aurigae also shows the new titanium lines, Dr. Adams and Dr. Dunham reported, and it is probable, they added, that further research on the spectra of the hot stars will reveal the presence of this intervening matter in all directions from the earth.

Glass Wool Is Good Soil for Orchids

WASHINGTON — Hobby and professional interests are combined in a unique fashion by Dr. George W. Morey of the Carnegie Institution of Washington. Dr. Morey is a physical chemist in the institution's geophysical laboratory, specializing in the study of glass and glass-like compounds. As an avocation, he grows orchids.

Recently he has discovered that orchids can be grown to good advantage by rooting them in glass wool, a fluffy material made of matted threads of very fine spun glass, now widely used for a number of purposes, from house insulation to the weaving of fancy fabrics.

POULTRY

FEED HIGH; CULL POULTRY FLOCKS

Owners of Birds Urged to Keep Only Good Stock.

By Roy S. Dearstyne, Head of Poultry Department, North Carolina State College.—WNU Service.

The high price of feedstuffs is leading to a critical situation in the poultry industry. Small flock owners are especially hard hit.

But regardless of price, the poultryman cannot compromise with balanced feeding if he hopes to maintain the quality of his flock.

Very cheap mashes are usually low in digestibility and thus are costly in the long run.

If you have inferior birds in your flock cull them out and spend your mohey only to feed the really good birds. If you cannot afford to feed all your birds well, keep only those you can afford to feed.

If there has been a time during the past ten years when poultrymen had to cull very carefully, now is that time.

To meet high feed prices, the average production per bird in the flock must be increased, and this can be done by keeping only the highest producers.

The lesson of this year should be sufficient to prove to all poultrymen that a better breeding program for the future is imperative. If more attention had been paid to breeding in the past poultrymen would not be so bothered by high prices now.

And right now is the time to start breeding for the future. When mating the breeding birds, place the males in the pens in time to adapt themselves to new conditions before eggs are saved for hatching.

Be sure that only vigorous, healthy, standard males of good type are placed in the breeding pens. There should be one male for every 14 to 16 females of the American breeds.

Control of Coccidiosis With Sulphur Treatment

Practical studies looking to control of coccidiosis, dread disease of chickens, with use of a sulphur treatment have produced results that augur well for the country's poultry farmers, according to recent surveys by the agricultural research advisory bureau.

Pointing to the experiments successfully conducted by Dr. C. A. Herrick and C. E. Holmes, of the University of Wisconsin, the bureau declares that regular feeding of a mash mixed with sulphur gives evidence of providing a method of control for this scourge of the poultry raisers. During these tests it was found that different degrees of control could be obtained by varying the amount of sulphur fed. In the broiler section of the East where coccidiosis is widely prevalent a modification of the method used by Herrick and Holmes has been found effective.

B. F. Jarvis, poultry technician working independently in Maryland and Delaware, has found that 10 per cent of sulphur added to growing mash and fed a full day each week is effective in controlling coccidiosis in broiler flocks confined to houses. Other experiments point to the value of the daily feeding of two or three per cent sulphur in the mash as a method of control.

Grain to Develop Birds

In feeding grain the poultryman should bear in mind that birds will not develop normally on grain alone, and that a balanced developing mash should be before the birds at all times. Good results have been secured by having both grain and mash available to the birds at all times. Other poultrymen give a liberal feeding of grain in the morning and again in the evening. Both systems have given good results and the main thing to remember is that grain should be fed more liberally during the developing period than at any other time and that the grain mixture should consist of equal parts of yellow corn and wheat.

Substitute for Green Feed

A good grade of cod liver oil that has been tested for potency and vitamin content may be substituted in part for green feed, says a North Carolina State college poultry expert. One pound or one pint should be added to each 100 pounds of mash when the substitution is made or it may be fed on the grain instead of mixing with the mash when more convenient. Where possible, some cured alfalfa hay or lespedeza should be provided.

Imported Eggs Unsafe

Millions of pounds of liquid eggs are shipped into the United States every year from China, where poultry production is of nondescript character, and these are used mainly by bakeries and candy manufacturers—these imports despite the need of this domestic market for the domestic poultrymen. Now comes word that these imported eggs are a menace to health, even if cooked; cooking does not destroy all disease-producing organisms.

SUBSCRIPTION RATES

In Hancock County $1.50 per year
(In advance $1.00 per year)
All Iowa Subscribers $2.00 per year
Outside Iowa $2.50 per year

All subscriptions for papers going to points within the county are considered continuing yearly subscriptions to be discontinued only upon notice from subscribers or at publisher's discretion. All other subscriptions will be discontinued one month after expiration, if not renewed. But time for payment will be extended if arrangement is made by the subscriber.

THIS HUNTER NOT ARRESTED

He had no license nor did he have a "duck stamp." Neither did he have his gun "plugged" to accommodate three "shots." He had "shot" at least a hundred ducks, among them being two wood ducks and a flock of canvasbacks. He even made two "shots" after 4:00 p. m. To top it off he boasted about his "hunting" to the Conservation Officer and promised to give him a set of the pictures when they were finished.

Then he loaded up his gun and got into his car, all ready to take a "pot shot" along the highway.

This fine sportsman was not arrested—or was he? What do you think?

1,100 Cars Licensed

Approximately 1,100 cars had already been licensed in Hancock county since December 1st, County Treasurer Roy L. McMillin said on Tuesday. Licenses must be secured by February 1st.

Heated Laying House Will Mean Higher Yield of Eggs

Increased egg production during cold winter months resulting from artificial heating of the hen house will often pay for the cost of providing the laying flock with this comfort declares H. L. Wilcke head of the Poultry Husbandry Department Iowa State College.

While experiments have shown that there is little or no profit considering production over a yearly period, in the heated over the unheated pens, there is higher egg production during the cold months in the heated houses and higher egg prices in this period will pay for the comfort of the flock. A brooder stove encased in a metal frame is satisfactory as a heating unit.

COLD AND DROUGTH OF PAST TWO YEARS HARD ON WILDLIFE

The past two years have not been favorable to fish and game in the State of Iowa. The drought of 1934 brought about conditions which were very unfavorable. The dry weather dried up lakes and sloughs and caused low water stages in all of the streams, and this was not favorable to fish life. It also affected the growth of vegetation which provides food and shelter for game and wild life.

The winter of 1935-1936 was the most severe in the history of the State, causing heavy losses in fish game and other wildlife. The drouth of 1936 followed this severe winter and it, also, was very unfavorable to both fish and game.

Despite the averse conditions the program of improving fishing and hunting conditions has gone forward. The Conservation Commission feels that with intelligent handling of the wildlife resources and with the definite program which has been set up and is being carried out, additional opportunities for more recreation in the form of hunting and fishing will be provided for the people of Iowa.

According to the Conservation Commission, rabbits may be sold by the hunters to merchants for resale purposes, but only in quantities not to exceed the daily bag limit of 15 each day. The merchant may not have to exceed 30 in his possession at any one time, provided he also has a hunting license to show that he is in lawful possession of the game purchased.

SALE OF RABBITS

To ship rabbits or to transport in any manner for the purpose of sale is unlawful under the Iowa statutes. This rule holds true of all game.

Low storage stocks of butter low production and increasing consumer demand all indicate that even the curently high prices of butter are due for a rise during the winter, perhaps to the highest point for several years.

Gorillas Live in Groups; Have Fresh Bed Every Day

According to an authority in the Los Angeles Times, gorillas live in family groups. Mothers take care of the young and, it is believed that mates remain together until separated by old age or death. Gorillas eat bamboo shoots, wild celery and the buds of trees. An hour before sunset the family selects a favorable site in a bamboo shelter. Each animal sits down, pulls grass all about it in a circle, then gathers twigs to fashion the walls of its nest. Maybe two mates join together and build a double bed.

A mother, preparing a nest for herself and baby, builds a sort of bed and a half. Sleep comes with darkness. They are up with the sun, and start breakfasting on bamboo shoots. Traveling slowly, when tired they sit down and do nothing but stare into space, or possibly pick their teeth. A mischievous youngster offends a mother; she jumps at him, and he rushes up a tree and too far out on the branches for her to follow.

If a bold individual offends the head of the family, the old man pounces upon the offender, shrieking and screaming, others join in and it becomes a free-for-all brawl. The scrap ends as quickly as it started, the pack wanders on in search of wild celery—a change from the bamboo diet. Then as evening darkens and cools bedmaking begins anew, for gorillas are always moving and never sleep twice in the same bed.

Zircons, More Than Other Gems, Resemble Diamonds

Zircon is a native silicate of zirconium which occurs as rounded pebbles and as tetrahedral crystals with pointed ends. Zircon has a hardness of 7.5, and is usually brown and opaque, though some is transparent and beautifully colored. Because of their hardness, double refraction and rich colors, the transparent varieties of zircon have been highly prized as gems. In dispersive power, zircon is exceeded only by the diamond, according to a writer in the Indianapolis News. The red zircons are called hyacinth; those that are golden yellow, jacinth; while those that are colorless, a condition usually produced by heating, are known as jargon. Colorless zircon, more than any other gem, closely resembles a diamond. It is easily distinguished because the diamond is not double refracting. The most valuable zircons are obtained in Ceylon and New South Wales.

Excellent crystals are found in Norway, Russia and Canada. In the United States, zircon is produced most extensively in Florida, but is found also in North Carolina, New York, New Jersey and Colorado. The ordinary opaque varieties are employed for furnace and crucible linings, and in making the brilliant zircon light, which is similar to the limelight.

Oslo, Norway's Capital

Oslo was the ancient name of the capital of Norway, the city being founded, according to Norwegian tradition, in 1048 by King Harald Haardraade, and by the end of the Fourteenth century had become the chief city of the kingdom. In 1624 Oslo was destroyed by fire. King Christian IV immediately rebuilt the capital on the opposite side of the Aker river and named it Kristiana, or, in English, Christiania. But Oslo continued to be the name of a suburb on the east side of the Aker where the original city had stood. Soon after the World war a movement began in Norway to have the name of the capital changed back to its early form. This was done on July 11, 1924, by the Norwegian legislature, and after January 1, 1925, Oslo again became the official name of the capital.

Fort Schuyler

Fort Schuyler stands at the end of Throgs Neck, which juts into the Sound at its juncture with the East river. An irregular pentagon, it was designed in 1833, according to the French style then in vogue, for both land and sea defense. It was coupled with Fort Totten at Willetts Point as one of twin fortifications guarding the eastern waterway to New York. The builders hoped to preclude further invasions such as occurred when Lord Howe, using Throgs Neck as his base during the Revolution drove Washington out of New York to White Plains.

The "Old Curiosity Shop"

A store on the southwest corner of the square known as Lincoln's Inn Fields, in the heart of London, is designated as the "Old Curiosity Shop" and pointed out to tourists as the place made famous by Dickens. However, the book "The Real Dickens Land" by H. S. and C. W. B. Ward states that the shop in Dickens' novel cannot be connected with this one which has been visited by so many thousands of pilgrims from all parts of the world, for Allbut says that Dickens himself pointed out 10 Green street, Leicester Square, London (a shop long since rebuilt) as the actual original.

Used Merchant of Venice Plot

Robert Wilson, an actor and playwright who died in 1600 had previously used the plot of the Merchant of Venice in his play, the "Three Ladies of London," which appeared in 1584. Shakespeare's Merchant of Venice was written about 1594-98, the precise date being uncertain. It was not printed until 1600.

Poland Is Fifth Largest Country in All Europe

Occupying an area of 150,000 square miles, Poland is the fifth largest country in Europe and, with more than 33,000,000 inhabitants, ranks sixth in population. Warsaw, the capital, is at the geographical center of the continent and therefore easily and quickly accessible to every other important city, writes Theodore Irwin in the Chicago Tribune.

Warsaw, on the Vistula, is the seventh largest city in Europe. Here the modern mingles with the medieval to produce a city of contrasts. A landmark is the Old Market place, which looks exactly as it did four centuries ago. It stands in the old part of the town, the Stare Miasto, interwoven by picturesque back streets and gaily painted Sixteenth century houses. The Lazienki, built by the last Polish king, the renowned Fukier wine cellars which boast of vintages as far back as 1606; the National and Art museums.

Cracow, in the Southwest, is Poland's most characteristic city, uniting and representing the nation's Old world culture and architecture. Cracow chief pride is the Wawel, the ancient fortress-castle where for more than 600 years Polish kings and heroes were buried. At the Wawel there is a collection of Dutch tapestries valued at a million dollars each. In the court yard knights of old held their tournaments. Museums offer not only the art of Polish genius, but masterpieces by Leonardo da Vinci, Titian, and Rembrandt. A few miles to the south of Cracow are the old salt mines of Wieliczka which contain an underground city, 1,000 feet beneath the surface, and carved from the salt rock. Here are two large chapels, long corridors, streets, a ballroom, post office—all carved out of salt crystals—a subterranean lake, and a "population" of 1,700 miners. Year after year, in their spare time, the miners have worked at their salt sculpture.

Canals, Box Trees Famed in Holland's Water Towns

No traveler knows Holland unless he has seen at least one water-village. One of the loveliest, Aalsmeer, consists of one long, straight village street; in fact, no more than a narrow towing path, with a canal on either side. Small swing bridges connect the houses with this towing path, and many of them are entirely encircled by water, each one solitary, picturesque and prosperous. The villagers propel their barges by means of a pole, to take to market the box trees for which Aalsmeer is famous.

The box tree nurseries are most curious, for here the industry has existed for 200 years. In the rich peaty soil, the box trees are trained into every conceivable shape, balls, men, dogs, lions, sofas, chairs, ships and birds. It all looks as if some enchanter had waved his wand over a menagerie and turned all living things into box trees.

Answer and Reply

The distinction drawn from the meanings of the words answer and reply may be stated as follows: We answer a question but reply to a remonstrance. Answer is used also in the sense of acknowledge, as when one writes a letter in reply to a communication previously received. A reply is that which is said in answer to something, as to an attack or protest, but may avoid the issue; wqhence we get the expression, "The reply is no answer." To be an answer, says Literary Digest, the reply must be such as will cover the issue completely and so satisfactorily as to preclude further discussion.

Growing Money on Vines

Did you ever hear of money growing on a vine? Figuratively speaking, that is what happened when the new negro republic of Haiti came into existence in 1807. It grew its money, says Pathfinder Magazine. Henry Christophe, first president, ordered all gourds—used by the natives for bowls, bottles and other utensils—confiscated and soon had more than 200,000 in the treasury. He then placed an arbitrary value of 20 sous on each gourd and bought up the coffee crop with them and resold the coffee to European merchants for gold. Since then the gourde (e) (20 cents) has been the unit for Haitian currency.

Gods Depicted on Coins

From 112 B. C. on, various gods and goddesses are depicted on coins. The quinarii, about 101 B. C., bear the heads of Jupiter or Apollo, and all have Victory crowning a trophy, except in the case of a coin of M. Porcius Cato, which shows Victory seated. After this period there is an occasional head of Roma on the obverse of denarii, but a multitude of other gods and goddesses, such as Juno, Diana, Saturn, Bacchus and Apollo appear. The reverses are various types and almost defy classification and cover a maze of subjects, ranging from religion to architecture.

Impressions on the Retina

Although most impressions made on the retina of the eye remain only one-fiftieth of a second, this is sometimes far longer than the time the original image lasts. An excellent example, writes Bob Heberger, Rochester, N. Y., in Collier's Weekly, is the impression made by an electric spark which, when flashed on and off in one two-millionth of a second, remains on the retina 40,000 times longer than its actual duration.

"PLUGGED" GUNS EXPLAINED

A great deal of confusion is apparent regarding the Federal regulations for the taking of migratory waterfowl and the limitation placed on the number of shells which a gun my hold at one loading. The Federal laws require that migratory waterfowl may be taken with shot guns only and that such guns must not be capable of holding more than three shells at one loading. Guns capable of holding more than three shells shall have the magazine cut off or "plugged" in such a manner as to permit not more than three shells to be placed in the gun.

This law does not affect the guns which may be used in the taking of game other than migratory, as pheasants, quail rabbits or squirrels. The State laws do not prohibit the use of a gun capable of holding more than three shells when taking game other than migratory.

SEED PRICES MOUNTING WITH SUPPLIES LIMITED

All Kinds of Grass Seed Except Timothy Are Up; Carryover of Alalfa and Clover Small

The scramble to purchase the limited supply of grass seed continues in full swnig, agricultural economists at Iowa State College said this week.

Higher prices have attracted larger imports, but, with the exception of Canadian seeds, Imports are not adaptable to Iowa conditions.

Supplies of clover and alalfa seed are about one fourth smaller than in 1934 and 1935. The carryover of alalfa is believed to be somewhat below average, while that of alsike, red and sweet clover is much below average.

ALTER PLAN OF ASSESSING HERE

Farm land will be assessed in forty acre tracts with buildings assessed separately this year, and town lots and buildings will be assessed separately a well, so the assessors of the county—24 in number—were intructed in their meeting at the court house Monday.

Floyd Beckwith of Rockwell City, field man for the State Board of Assessment and Review, was present and explained some things to the assessors. The regular meeting of the asessors will be at the court house on January 4th, at 10 a. m.

BOTTLE PAPER PASSES

For more than a half a century the government has encouraged mariners and others to drop into the oceans bottles containing a paper showing the latitude and longitude and the date af its deposit in the sea. Special "bottle papers" were furnished for the purpose, requesting finders to return them to the hydrographic office of the navy department.

The object of this proceedure was to gain information concerning ocean currents, and many interesting stories are told by bottle papers returned to Washington. One of the longest journeys of a drifting bottle was by one dropped from the steamer Santa Maria off the west coast of Mexico on Dec. 11, 1934, and picked up two and a half years later on the Phillipine coast, having traveled about 8,000 miles.

But now, because of accumulated knowledge concerning ocean currents and the employment af more scientific means for increasing such knowledge, the hydrograpic office will discontinue the bottle practice, according to a recent announcement. However, there are still many of these bottles floating around the seven seas, and the papers mmay continue to be returned for years to come.

Only a few days ago one was received in Washington from Miss Ogoogovoki Tu'Ihalamaka, daughter of a native chief in Samoa, who had picked it up on the shore of her far-away island home.

A number from this community attended the "Fox" hunt held at Titonka New Year's day The hunt was sponsored by the American Legion and was attended by about 800 hunters This group was composed of men women and boys all equipped with a good club No guns were allowed They circled around a tract of land consisting of about nine sections After the hunters had formed a ring around this land they started to march toward the center of the circle When narrowed to about a half a mile there were four foxes in the ring, but the result was that Mr Fox was too sly and none were killed However, numerous fences were torn down and much stock was badly frightened and scattered into other fields.

The winter of 1936 has started off much like that of last year, the United States weather bureau officials note.

"Laziest Man in World" Lived in Ohio in 1790s

Peter Ruishour, a Frenchman who settled in southeastern Scioto county, in the 1790s, was called the "laziest man in the world" by everyone who was acquainted with him, according to a writer in the Cleveland Plain Dealer.

Along with others who were granted tracts of land in the French grant as reimbursement for lands they had lost at Gallipolis by Indian attacks, Ruishond was given a tract consisting of 217 acres.

With considerable effort he cleared only enough of his land to raise a few vegetables to provide himself with food, and he never married for fear his neighbors said, he might be compelled to clear more land and work steadily. Most of the time, when he wasn't doing just enough work to keep himself alive, he would sit and gaze at the stars, claiming that he could predict future weather conditions.

When he prepared food, he would really prepare food—enough to last him days so that he wouldn't have to repeat the operations every day. For example, he would live for weeks on beans that he had boiled in a large kettle to save himself the work of building a fire every day He would rather eat them cold than trouble himself with a fire.

When his cabin burned down, he was too lazy to rebuild it. He merely negotiated with a neighbor to keep him the rest of his life in exchange for the 217 acres of land. Ruishond lived out a peaceful, quiet, workless life, dying in 1823.

"Blackguard," "Cad" and "Idiot" Not an Insult

No doubt you would be annoyed if somebody called you a blackguard and a cad, but actually there is no reason why you should regard these words as being objectionable, asserts a writer in Tit-Bits Magazine

"Blackguard"—or "black guard"—was originally the name given to certain servants of King Henry VII's court, who wore black uniforms. True, these particular servants were of humble rank; but they were never considered to be unworthy people.

There is even less cause for one to resent the word cad although it is derived from cadaver, meaning a dead body. In olden times, students used to refer to those who lived in their university, but were not members of it, as being "dead" They were, that is to say, "cadavers"—or, for short, "cads."

We don't think it very pleasant to be called idiot, but here again we really should not mind. Back in the past, an idiot was not a foolish person, but merely one who was neither priest nor official. The word probably got its present meaning from a belief that an ordinary citizen could be be so intelligent as a clergyman or a man employed in some public office.

Naming Seven Seas

The original Seven Seas got their names from the ancients and are said to be mentioned in both Hindu and Chinese legends, says a writer in the Detroit News. The first was the "Sea of Salt Water," which surrounded India; the "Sea of Sugar Cane," surrounding Burma; the "Sea of Wind" in the region of the Malay peninsula; a "Sea of Clarified Butter" extended around the Sunda archipelago; the "Sea of Milk" surrounding Siam and Cambodia; the "Sea of Curds and Whey" washing the shores of southern China, and the seventh sea was the "Sea of Fresh Water" along the shores of northern China and Mongolia.

Natural Bridges

There are several natural bridges. A famous one is in Virginia. Three very large ones, designated as national monuments are in Utah. The largest of these is 222 feet high; 65 feet thick at the top of the arch, the arch itself is 28 feet wide with a span of 261 feet. The height of the span is 157 feet. Natural Bridge in Virginia is privately controlled. It is 212 feet high with a span of 90 feet The bridge spans Cedar creek, tributary to the James river.

Oldest Botanic Garden

The oldest botanic garden in the New world is the principal attraction on St. Vincent, in the Windward islands. It was established in 1763, and it was to obtain breadfruit tree specimens for it in 1787 that the British naval vessel, the Bounty, sailed to the South seas, where the famous mutiny took place. Eventually Captain Bligh of the Bounty returned to St. Vincent with 530 choice specimens for the garden.

An Understanding of Life

There are some things that we had better not experience. The price is too great, the results too disastrous. If we wish to understand life we should avoid the ways that lead to the destruction of health, happiness, and inner peace which make life worth while. What is the good of an understanding of life that cuts under the very foundations of life itself?

Courtesy

Don't be afraid to thank people for the favors and kindnesses they show you. Remember it is the only way in which they are repaid and it is very discouraging to the thoughtful persons to never reap any word of appreciation. Speak right up with that "Thank you!"

It will cost more to produce farm crops and livestock in 1937 than during 1936 economists believe

The buying power of the net income of farmers as a group is the highest it has been in 17 years, the United States Bureau of Agricultural Economics observes.

OLDSMOBILE CHEVROLET

It's the 200th Anniversary of Three Famous Revolutionary Figures

By ELMO SCOTT WATSON

JANUARY, 1737.

To the majority of the citizens of the English colonies in North America that month meant the beginning of a new year, nothing more. They could not have realized that it was to be made significant for them because of the births of three boys during its 31 days.

In that year these citizens were loyal subjects of His Majesty, King George II of England. But by the time another 50 years had passed, they and their sons were to be engaged in an armed rebellion against his son, and outstanding among the "rebel leaders" would be these three boys born in the first month of 1737.

The first had made his appearance on January 10. The place was a farm home near the town of Litchfield, Conn., and he was the first-born of 14 children in "a bold, domineering and clever family." He was given the name of Ethan—a Hebrew name signifying "strong." And strong he grew to be, for this boy was Ethan Allen, who was later to be characterized as "the Rob Roy of a Wilderness Commonwealth," "the Robin Hood of New England" and "the Strong Boy of the Revolution."

Two days later in the home of a clergyman in Quincy, Mass., was born another boy who was to bear the name of his father and his grandfather, also a clergyman. This boy, however, would not follow in the pious footsteps of his elders. Instead he would be taken into the counting house of his uncle, be adopted by that relative, fall heir to a large fortune and become a great and wealthy merchant of Boston. And on a July day in 1776 he would be the first to sign his name to an immortal document of human liberties and sign it "so large that King George could read it without his spectacles." That name would be John Hancock.

The scene changes now from New England to Old England. On January 29 in the home of a Quaker stay-maker in the little town of Thetford in Norfolk another boy is born. He will become a preacher and a dissenter, a writer of verse and prose, a republican and a radical, and a severe critic of the government and political customs of his native land. As such he will be welcomed to the British colonies in America as the dispute between them and the Crown grows more bitter and in 1776 he will issue a pamphlet bearing the name "Common Sense." In that pamphlet he will advocate absolute independence of the colonies from the Mother Country. The effect of this pamphlet is "so powerful, instantaneous and general" that John Hancock will soon have his chance to flourish his pen and write his bold signature to the document which incorporates the sentiments expressed in "Common Sense." For the author of it was that third boy born in January, 1737—Thomas Paine.

JOHN HANCOCK

* * *

So these were the three famous Revolutionary figures whose two-hundredth birthday anniversaries we celebrate this month, Ethan Allen, the frontiersman, John Hancock, the merchant, and Thomas Paine, the pamphleteer. Their backgrounds, their characters, their careers were all as different as those of three men could possibly be. But they had more in common than the fact that all were born in the same month of the same year. All were patriots; all labored mightily in the same cause, though their motives for doing so differed widely; and all risked their lives and everything else that man holds dear to bring about a new order of "life, liberty and pursuit of happiness" in a New World.

Men Not Statues.

Their names are familiar to most Americans who have read of their deeds in the school histories. But lack of space (plus the inclination of most school book historians to make Revolutionary war heroes pieces of statuary rather than flesh-and-blood human beings) has prevented our learning there many other interesting details about the men themselves.

We know that Ethan Allen "thundered on the portal of all earthly kings at Ticonderoga" and demanded its surrender "in the name of the Great Jehovah and the Continental Congress." We know how John Hancock, warned by Paul Revere, fled from Lexington that April night in 1775 before the British redcoats arrived, thereby making it possible for him to write his signature with its historic flourish a year later. We know that Thomas Paine wrote "Common Sense" and the "Crisis" and some of us have recited those thunderous words from the latter—"These are the times that try men's souls—".

But what else did they do to distinguish them from other men? What of their subsequent

THOMAS PAINE

careers? Were those incidents which are preserved in the school books the only ones worthy of mention? In partial answer to those questions are offered these "footnotes to history" to help you recall on this, the two-hundredth anniversary of their birth, these three notables in the history of America's struggle for liberty.

* * *

When Ethan, "The Strong," grew into young manhood, he found Connecticut too narrow a sphere of action for his tremendous energies. After farming a bit, mining a bit and wandering from place to place, he finally landed in the region into which he fitted so perfectly. It was the frontier country between New Hampshire and New York known as the "New Hampshire Grants." There he acquired nearly 100,000 acres of wilderness lands by grants from the New Hampshire provincial government. But this territory was also claimed by the province of New York who tried in vain to colonize it, for it was already held by "squatters" called "the Green Mountain Boys."

A Name of Terror.

Before long the name of Ethan Allen was a name of terror to settlers who dared come there with their New York grants and to the officials whom Governor Colden sent to survey the lands and try to enforce New York's title. Cabins were offered as "burnt sacrifices to the Gods of the World," and the settlers driven out with instructions to "Go your way now and complain to that Damned Scoundrel, Your Governor. Damn your Governor, Laws, King, Council and Assembly." In despair, the officials of New York proclaimed Ethan Allen an outlaw and placed a price on his head. Ethan retaliated with a similar proclamation against the governor of New York. So the war of words, and from time to time a more serious war of action, continued.

Then came the outbreak of the Revolution and Ethan Allen, embarking upon what was ostensibly a patriotic expedition but what was in reality a move to safeguard the frontiers of his wilderness commonwealth in case of war between Canada and the United Colonies, marched with his "Green Mountain Boys" and with Benedict Arnold against Ticonderoga. There, on the early morning of May 10, 1775, he uttered the phrase which won him an imperishable place in American history.

An Anti-Climax.

The capture of Ticonderoga was a brilliant achievement but, unfortunately for Allen's future fame, the remainder of his Revolutionary war career was a sad anti-climax. Later he organized a filibustering expedition into Canada with the object of capturing Montreal, but after a short and almost farcical campaign he was captured by the British. Kept as a prisoner of war until 1778, he then returned to his wilderness commonwealth, by now organized under the name of Vermont but still not a member of the Colonial family.

There he rose to even greater power as a sort of an uncrowned king. His hatred for New York was as strong as ever; for New Hampshire he had an aversion almost as great as for the other colony and for the Continental congress, in whose name he had sworn at Ticonderoga, he had profound contempt.

This congress, refusing to deal with Allen's "outlaw administration," steadfastly declined to consider adding Vermont to the United Colonies. So Allen began negotiations with the British for annexation of Vermont to Canada under British dominion with a certain measure of independence reserved. For this he has been branded by some historians as a traitor, although his "treason" is doubtful in light of the fact that the congress had cast Vermont loose to shift for its own independent existence.

Ethan Allen's turbulent career came to an end in the roistering manner in which he had lived. In February, 1789, he died on a load of hay while returning from a joyous drinking party on an island in Lake Champlain. A year later New York gave up its claim to the Vermont lands and recognized the independence of that colony. In 1791 it was taken into the United States as the first to be admitted after the 13 original colonies. And when Vermont came to honor her two greatest men by placing their monuments in Statuary hall in the National Capitol in Washington, the first one chosen was Ethan Allen.

* * *

In striking contrast to the career of that "frontier roughneck," was the career of John Hancock, scion of two generations of clergymen, a graduate of Harvard college, a cultured, polished gentleman whose heritage and training assured him a leading place in the affairs of the colony. Choosing a business career instead of the ministry, he showed a conscientious devotion to his work which would have assured his success even if he had not inherited a fortune from the uncle who adopted him. For seven o'clock in the morning found young John Hancock at his desk in his foster-father's counting house and even after he became the "great Boston merchant" he still observed those early hours.

Some of the modern school of "debunking" historians have made much of the fact that, just before the Revolution, Hancock was engaged in smuggling goods into the country to evade the British excise taxes. They have pointed out that there were 500 indictments against him for this offense and that "if convicted the penalties would have been 100,000 pounds, twice the value of all his property." In this fact they see the motive for his encouraging the revolt against the crown.

But it might also be pointed out that, when the best method of driving the British from Boston was under discussion at a patriotic club in that city, he declared "Burn Boston and make John Hancock a beggar, if the public good requires it." Furthermore, in the autumn of 1776, when congress gave Washington instructions to destroy Boston if it should be necessary to do it in order to dislodge the enemy, Hancock wrote to the commander of the Continental army saying that, although he was probably the largest property-owner in the city, he was "anxious the thing should be done if it would benefit the cause." Certainly that does not sound like a man whose main concern was private gain.

A Soldiering Statesman.

As for Hancock's other services after the outbreak of the Revolution and especially after he had become famous as the first and only signer of the draft of the Declaration of Independence which was first published, he was a member of the Continental congress from 1775 to 1780 and again from 1785 to 1786, serving as president from May, 1775 to October, 1777. We do not ordinarily think of him as a soldier, yet the fact is that, as major-general of the Massachusetts militia, he commanded the contingent from that state and served valiantly in the expedition against the British in Rhode Island in 1778

After the close of the Revolution he was a member of the Massachusetts constitutional convention and in 1780 he became the first governor of the new state of Massachusetts. He held that office until 1785 when James Bowdoin was elected in his place. But Bowdoin's weakness in handling the famous "Shay's Rebellion" made the people of the state regret the change of chief executives and in 1787 Hancock was again elected. He soon improved the conditions in regard to taxes and seizure of property for debt which had been responsible for the rebellion and until his death in 1793 he was reelected governor regularly each year.

The importance of Thomas Paine and his pamphlets to the Patriot cause is too well known to need much comment here. It will be remembered that the first number of the "Crisis" (that one which begins with the immortal "These are the times that try men's souls, etc.") was read by Washington's orders to each regiment in the Continental army and they did much to relieve the despair, that was so prevalent in the army during the trying winter of 1776.

Payne's Other Services.

But writing these pamphlets, important though they were, was not the only contribution which Paine made to the cause of American liberty. After serving a short time in the army as aide to Gen. Nathanael Greene, he became secretary of the congressional committee of foreign affairs but lost this position in 1779 through charges made against him by Silas Deane, commissioner to France. Then Paine became clerk of the Pennsylvania legislature and while holding this place made an urgent appeal to the people for money to relieve the distress of the ragged, starving Continentals in Washington's army. Moreover, he subscribed his entire year's salary to the fund that was thus raised.

In 1781 Paine was associated with Col. Henry Laurens in a successful effort to obtain loans from France and Holland and a grateful nation voted him the sum of $3,000, the state of New York gave him a large farm in Westchester county and Pennsylvania again made him clerk of the legislature. But Paine was not yet ready to settle down to the quiet enjoyment of life in the new nation which he had helped found. The fight for human liberty was still being waged in other parts of the world.

He went back to England and in 1791 published his "Rights of Man" in reply to Burke's "Reflections on the French Revolution." For this he was outlawed by the court of the king's bench, so he went to France where the Revolution had overthrown the Bourbons and where he was hailed as a hero. In fact, he was elected to the National convention but his republicanism was not strong enough to please the Jacobins. So when he opposed the execution of King Louis XVI and urged instead that the monarch be exiled to America, the Jacobins expelled him from the convention.

Saved by Chance.

When Robespierre came into power Paine was thrown into prison where he was kept for a year in constant fear of death.

ETHAN ALLEN

Listed among those who were to mount the steps of the guillotine, he escaped that fate by a strange freak of chance. One morning the keeper of the prison went along the corridor placing chalk marks on the doors of those who were to be executed that day. It so happened that the door to Paine's cell was open and pushed back flat against the wall of the corridor. In the darkness of the gloomy old prison the keeper failed to notice this and put his chalk mark on the inside of Paine's door. Thus when the door was finally closed the guards passed it by when they came to lead the other prisoners to their doom.

Paine was finally released through the efforts of James Monroe, United States minister to France, and resumed his seat in the convention. Eventually he returned to the United States and died in New York in 1809. He was first buried on his farm at New Rochelle but a few years later William Cobbett, the English radical, removed his bones to England with the hope of increasing enthusiasm for the republican ideas of which Paine had been the principal exponent. But that hope failed to materialize, and eventually the bones of this English - American - French revolutionist found their last resting place in France.

Molasses, Cheap Live Stock Feed

Can Be Fed Either Diluted or Undiluted, Sprinkled on the Hay.

By Prof. E. S. Savage, New York State College of Agriculture.—WNU Service.

Cane molasses is a good feed for livestock, and is the cheapest feed on the market. Farmers are urged to become familiar with it and to learn to use it.

Molasses is hard to distribute, but it is planned to have it widely available in drums this winter. Reports from a hurried study of the New York milk shed indicate that retail prices for molasses in drums may be from $21 to $26 a ton.

Cane molasses is about one-fourth water and has in it more than 56 per cent of total digestible nutrients. The principal constituent is about 55 per cent total sugars which give molasses its feed value. A ton of molasses, or 171 gallons, has about three-fourths the value of corn when properly used in the ration.

The following amounts may be used for stock with excellent results along with other feeds:

Seven to nine pounds a day for horses and mules; two to three pounds for dairy cows; three to four pounds for beef cattle; one to two pounds for hogs; and a half-pound for sheep and lambs. These suggestions as to amounts are conservative, and every feeder should try to use the maximum.

It can be fed either diluted with hot water or undiluted. If diluted, the molasses can be sprinkled over the hay, silage or grain. If undiluted, a paddle or big spoon spreads it on the roughage or grain in the manger. A mixture of one-half molasses and one-half water will not freeze.

Roughage such as corn stalks can be cut or shredded and sprinkled before feeding with diluted molasses; or a stout, shallow box about four feet square with flaring sides about six inches deep, put up on strong, well braced legs, makes a good self-feeder in the yard. A barrel of molasses can be placed end-up in the feeder and a shingle placed under it so that the molasses flows out slowly.

Dry Period 31-60 Days Found Best for Jerseys

Perhaps no definite answer can be made as to the exact time a cow should rest between periods of lactation, for much depends upon the condition of a cow when she is through milking and how well she recovers from her work, states a writer in Hoard's Dairyman.

Arnold and Becker of the Florida Agricultural Experiment station found that a dry period of 31 to 60 days was necessary for Jerseys to produce maximum milk yields. A dry period of longer than 91 days appeared to result in lower milk production. When cows were dry less than 30 days, there was an indication of an earlier decline in milk yield than those receiving a longer rest period.

In practice it has been stated that a cow should rest from a month to six weeks and this research by the Florida Experiment station indicates that this is about the right period for cows to recover in order to secure the best flows of milk.

Built Straw Silo

When the hot July Sun seared Frank Canfield's cornfield, ruining a promising crop on which he had counted to feed out a bunch of cattle, he felt blue. Mr. Canfield, who farms east of Des Moines, Iowa, reports the Country Home Magazine, began figuring the best way to use his fodder crop which was good. He had a big pile of baled straw and that gave him an idea; build a silo of straw bales! He lost no time building a huge round silo and filling it to the brim with his blasted corn crop. Now he finds that a straw silo has several advantages. The walls go down as the silage recedes, and there is no pitching up as with a pit silo. Pliers, pitchfork, and a little headwork are providing his hungry cattle with both bed and board.

Mastitis

Mastitis may be regarded as any abnormal condition in the cow's udder. Whether this condition is such that it can be transmitted to other cows depends on the nature of the trouble and perhaps more on how far it has progressed. Young animals are not so likely to be affected as are older ones, particularly those of high production. It is not unusual for good dairy cows to have a swollen or congested udder for several days after calving. The milk at such times is not always normal. This does not mean that the cow has infectious mastitis. — Hoard's Dairyman.

Grafting of Trees

Grafting is a method by which a superior tree is made to develop on inferior stock of the same genus. The cambian layer of the graft, that is, the layer of tissue between the bark and the wood, must fit together accurately, so grafting is a skilled job for an expert. Since the peach and plum are both of the same genus, says a writer in the Detroit News, a peach graft may be made to grow on a plum tree, or the other way round.

Home Heating Hints

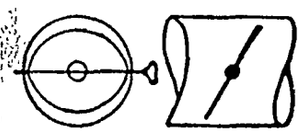
By John Barclay
Heating Expert

How to Check "Chimney Loss," Greatest Waste in Home Heating

WHAT is "chimney loss"? Well, that's a term we heating experts have for heat that goes up the chimney and is wasted.

Yet it's really a simple matter to save money by reducing this loss—convert "chimney loss" to "useful heat," as we call it. Here's the remedy:

Next time you refuel the fire, move the handle of the turn damper (that disc or plate-like damper inside the smoke pipe) 1-16th of an inch toward the closed upright position. Then, if the fire keeps



Soctional View Side View
Turn Damper in Smoke Pipe

on burning too freely, turn the damper another sixteenth of an inch. Repeat this operation until you find the correct adjustment—one that will deliver the greatest amount of useful heat with the least "chimney loss."

Once you have found this ideal adjustment of the damper, mark the position on the smoke pipe with a piece of chalk or something that can be plainly seen, and leave the damper set at that mark.

Bear this in mind: The nearer the turn damper is set to the closed position the smaller the "chimney loss" and the greater the volume of "useful heat" that goes to properly heating your home. And, of course, the lower your fuel bills.

My Favorite Recipe

By Mrs. Gifford Pinchot

Rissoto a la Minanaise

Put into a saucepan 1 tablespoonful of good butter, 1 small onion, 1 green pepper chopped fine, and let it simmer five minutes, then add 1 quart of good bouillon, 1 cupful of rice, 6 large mushrooms, 1 cup chopped tomato and ¼ pound ham; salt, paprika and Worcestershire sauce. Simmer 30 minutes, then add grated Swiss and Parmesan mixed. Put into hot serving dish and cover with tomato sauce.

contribute to your Alkaline Reserve because they contain an ALKALINE FACTOR 5¢

Courage Essential

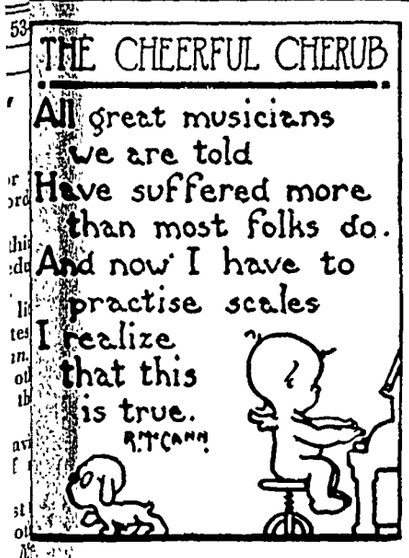
Courage is on all hands considered as an essential of high character.—Froude.

Don't Irritate Gas Bloating

If you want to really GET RID OF GAS and terrible bloating, don't expect to do it by just doctoring your stomach with harsh, irritating alkalies and "gas tablets." Most GAS is lodged in the stomach and upper intestine and is due to old poisonous matter in the constipated bowels that are loaded with ill-causing bacteria.

If your constipation is of long standing enormous quantities of dangerous bacteria accumulate. Then your digestion is upset. GAS often presses heart and lungs, making life miserable. You can't eat or sleep. Your head aches. Your back aches. Your complexion is sallow and pimply. Your breath is foul. You are a sick, grouchy, wretched, unhappy person. YOUR SYSTEM IS POISONED.

Thousands of sufferers have found in Adlerika the quick, scientific way to rid their systems of harmful bacteria. Adlerika rids you of gas and cleans foul poisons out of BOTH upper and lower bowels. Give your bowels a REAL cleansing with Adlerika. Get rid of GAS. Adlerika does not gripe—is not habit forming. At all Leading Druggists.



THE CHEERFUL CHERUB
All great musicians we are told Have suffered more than most folks do. And now I have to practise scales I realize that this is true.

Period Influences Superb Fabrics

By CHERIE NICHOLAS

FORMAL gowns for the midwinter social season are said to be the most sumptuous and extravagant seen at any time since pre-war days. The "dress-up" movement is growing more and more so with each passing hour. From style centers come reports that an astonishing number of formals are selling this season and that the call for handsome afternoon gowns in rich metallics, velvets and laces is reaching far beyond the usual.

Gorgeous, glinting, gleaming, sparkling and arrestingly colorful are the fabrics and laces that are fashioning the luxury apparel noted at fashionable gatherings. Then, too, the trend to greater elegance is expressed in the emphasis placed on luxurious accessories, on flattering little dinner hats and elaborate evening headdress.

Even more thrilling than the elegant materials and the vainglorious accessories that distinguish this season's formal modes are the various period influences that mark their styling. Designers, seeking inspiration for the costume creations, are delving into fashion lore of centuries past as they never delved before. The picturesque Tyrolean and Dalmatian mood is expressed in terms of colorful embroidery, which is generously used at present, and in other intriguing details that are adding greatly to the gaiety of current fashions. Boleros are flourishing in the mode both day and night, and in the evening the latest is to throw a lace mantilla over head and shoulders and wear a red, red rose for corsage—fashion has gone as picturesquely Spanish as that!

One of the most outstanding gestures toward recapturing styles of the past is the reincarnation of the lovely Empire gowns taken from the days of Josephine and Napoleon. The stately and very beautiful dresses worn by the standing figures in the illustration bespeak the new Empire move as interpreted by designers in the style apparel creator group of the Chicago wholesale district. In these gowns we see the modern woman transformed into a glamorous true-to-tradition Napoleonic type. The silhouette, as you see, achieves a fashionable figure launched with a new profile of erect carriage and imperious dignity, accenting a high bust and waistline, flat diaphragm, deep decolletage, short puff sleeves and long graceful skirt.

Superb lame weaves gleaming with gold and silver and striking color are used for these gowns. The gown to the left is of an eye-catching metal brocade in an alluring tangerine color. Handsome lame in a vivid emerald green fashions the center dress, with narrow green-metal ribbon accenting the high bust line.

The spirit of embellishment and splendor, in keeping with the new luxury trend, has invaded the lace realm also. Very lovely Chantilly laces have their floral patternings outlined in metal threadwork, while some laces add a decorative touch of embroidery or perhaps are starred with sequins, pearls and such. A dinner and evening ensemble stressing the vogue for the jacketed formal gown is attractively expressed in metallic-outlined Chantilly as worn by the seated figure in the picture. The neckline of the dress is square and the jacket ties softly with a bow. Which is the same as telling you when you buy lace for your frock it is not enough, you must allow an extra length for a jacket. In this way it serves a twofold purpose—with the jacket informal enough to wear to the simple dinner party, without the jacket a gown formal enough for the most pretentious evening occasion.

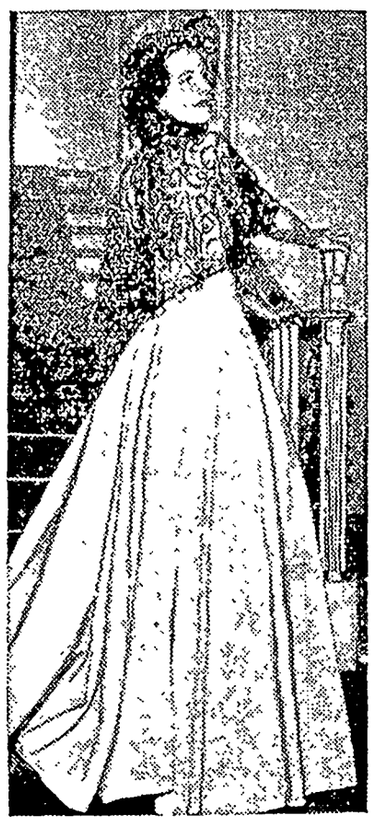
LACE MANTILLA

By CHERIE NICHOLAS



White metallized silk moire for a picturesque wide - skirted formal evening frock with a Spanish mantilla of black silk lace gracing shoulders and head, here indeed is the costume-ideal for the debutante to wear to mid-winter festivities. Such grand silks as we have with us this season! The silk moires are beloved indeed and they are lovely in white or colors. White shot with silver is supremely chic. And the new silk brocades! One can't describe them for their beauty is beyond word pictures. These brocades are stunning for princess evening coats that button down the front.

HATS NOT BECOMING TO AVERAGE WOMAN

The selection of becoming hats promises to be more difficult than ever this season. Seldom has there been such a generous choice, as far as actual style trends go, but most of the numerous different shapes prove unbecoming to the average woman.

Height still reigns supreme, although many milliners have tried to retain the more moderate, rounded and shallow crown. The tall crowns, still shaped like inverted flower pots, prevail on every type hat, but the turban. Some of these felts seem to be inspired by early Pilgrim days in America, while others look more like modern Alpine hats with taller crowns.

Adding Accessories Gives New Effects to Costumes

If you know your fashion arithmetic you will discover that one costume can be made into two by the addition of the right accessories. Take those black suits, for example, which have a modest bit of Persian lamb trimming on collar, cuffs and pockets. It doesn't matter whether the jacket is short or long, or whether it is fitted or swagger—the choice of a blouse, hat and gloves determine the ensemble's perfection.

For afternoon and informal evening needs there are elegant blouses of metallic fabrics and satins, while for tailored needs the shirtwaist blouse with studs is the smartest you can find. Light gloves, dark gloves or bright gloves have their advantages as do hats of felt or velvet.

Skirts and Sleeves

While there are exceptions to this rule, in most cases plain sleeves are used on dresses when the skirt is flaring, and full sleeves on dresses having narrow skirts.

BRISBANE

THIS WEEK

Competent Mrs. Simpson
If Edward Has a Son
The Latest Gang Killing
Goose and Gander

"Mrs. Simpson purchases villa on the north coast of Africa, looking out on the blue Mediterranean, for her 'royal honeymoon' with the former king of England."

Arthur Brisbane

Here you see the capable young American woman; she buys the honeymoon villa; if she married an American she would have expected him to buy it.

This incident helps to explain how Duke Edward came to rely on the Baltimore girl.

The former English King Edward in his "instrument of abdication" declared his "irrevocable determination to renounce the throne" for himself and his descendants. All very fine now, but suppose Edward should have a son, and the son should grow up, a man of power and ambition, as he might, with an American mother. He would by inheritance be the rightful occupant of the throne of England, and might reasonably say that his father could not deprive him of his right before he was even born. That might be embarrassing if in troublous times a weak English king or a nervous queen were on the throne.

Europe will turn from important matters to read about the latest American gang killing. Joseph Scaduto, aged twenty-eight, was shot down two months ago while having his shoes polished in New York city. Night before last his brother Dominic, who had hurriedly moved from New York, was with 13 other men in a Chicago pool hall.

Three gunmen entered, herded the 14 into a back room, motioned to Dominic Scaduto to step out from the crowd and stand against the wall. He did so, and was riddled with bullets. The executioners were old for their trade, thirty-six to thirty-nine; young killers, usually, do that work.

New York city ordered $126,795 worth of typewriters, union labor complained that manufacturers were "unfair," and the purchase was stopped.

As far as New York city was concerned that was done to get votes; no New York citizens are involved in the alleged "unfairness."

If all makers of typewriters signed an agreement not to sell a typewriter to New York city for 50 years, and never to repair one, that would not embarrass the city; for the courts would punish that as conspiracy. What is sauce for the goose is not sauce for the gander.

H. G. Wells, who has influence in England, was "brought up in a simple, sentimental, low - church English home." Referring to the archbishop's slurs on Mrs. Simpson, he writes: "I learned to think the proper treatment of men who insinuate shameful vague things they cannot specify or substantiate about a woman is horse-whipping."

The archbishop of Canterbury hardly expected all this, or half.

Doctors announce a new compound that kills "sinus germs in the blood stream," a most important announcement. The new compound, called prontosil, is non-poisonous to the patient, kills the germs that cause sinus trouble, and may kill other disease germs. The transfusions of new fighting blood, sometimes not used often enough or early enough in medical practice, may be replaced by chemical compounds that will pursue various disease germs in the blood stream, helping the white corpuscles.

Congressman Fish of New York wants members of the Republican national committee to abdicate, that a liberal Republican party may be built up.

Does anybody imagine that a "liberal" Republican party could have held back the political Johnstown flood last November?

If the Republican party turns liberal now, it may find in 1940 that it has done so just in time to miss carrying an election that conservatism might have carried.

The world would like to know more about the Baroness Eugene de Rothschild, hostess of the duke of Windsor, former king.

She was Miss Catherine Wolf of Philadelphia, has been three times married, and when the king amuses himself with bowling in her castle, she beats him, and all the other men players. Plenty of energy there.

Our good neighbor Chile, anxious to keep gold at home, decided to restrict "luxury importations" and unwisely included automobiles, including trucks, among "luxuries."

As a result Chile's industries face heavy losses, her network of modern highways will fall into decay.

Simple, Elegant, Practical

TIME and Sew-Your-Own fashions march on. Today's trio have the simplicity, elegance and practicality so vital to the up-to-the-minute well-groomed woman—and so within reach of the modern, progressive members of The Sewing Circle.

Pattern 1812—Little Miss Two-To Five can manage her own dressing with the aid of this frock that buttons down the front. She will be the picture of daintiness too, with such clever aids as princess lines, puff sleeves and an intriguing little collar. The one piece step-in is the essence of practicality—a great boon to the youngster's comfort. This ensemble is available in sizes 2, 3, 4 and 5 years. Size 3 requires 2⅝ yards of 35 or 39 inch fabric and ⅜ yard contrasting.

Pattern 1998—This new dress "belongs" in almost any company. Its great simplicity will endear it to homemakers, and business women alike. It is a combination of charm, good lines and youthfulness. You'll want two versions of this style—one with short sleeves, the other with long. Pique, silk crepe or velveteen will serve nicely as the material. It is available in sizes 34, 36, 38, 40, 42, 44 and 46. Size 36 requires 4⅞ yards of 35 inch material, with long sleeves 4⅞ yards.

Pattern 1938—Daytime distinction takes on a new meaning in this super - styled frock. The squared shoulders, swing skirt and peplum fulness are the important details which give it such perfectly balanced finesse. Yet not one part of it is difficult to cut or to sew. This is a dress which is adequate for every occasion—save the strictly formal.

Available for sizes 14 to 20 (32 to 42 bust). Size 16 requires 4½ yards of 39 inch material. The collar, jabot and belt in contrast take ⅝ yard.

Don't miss these grand numbers. A detailed sewing chart accompanies each pattern to guide you every step of the way.

Send for the Barbara Bell Fall and Winter Pattern Book containing 100 well - planned, easy - to-make patterns. Exclusive fashions for children, young women, and matrons. Send fifteen cents in coins for your copy.

Send your order to The Sewing Circle Pattern Dept., 367 W. Adams street, Chicago, Ill. Patterns 15 cents (in coins) each.

Son—If you can reach it.

Better Than Gas

The boy and girl were out in the highway when the car broke down. He didn't seem to mind and wanted to make love. "My kisses will put new life in you," he said.

"Then for goodness sakes get out and kiss the car," she replied sweetly.—Florida Times-Union.

Compensates

Visitor: "You don't mean to tell me that you have lived in this out-of-the-way place for over thirty years?"

Inhabitant: "I 'ave."

"But, really, I can't see what you can find to keep you busy."

"Neither can I—that's why I like it."

DOLLARS & HEALTH

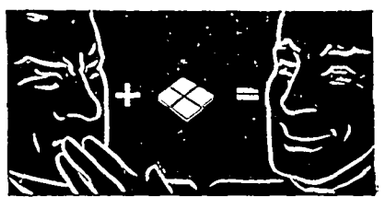
The successful person is a healthy person. Don't let yourself be handicapped by sick headaches, a sluggish condition, stomach "nerves" and other dangerous signs of over-acidity.

TAKE MILNESIAS

Milnesia, the original milk of magnesia in wafer form, neutralizes stomach acid. Each wafer equals 4 teaspoonfuls of milk of magnesia. Thin, crunchy, mint-flavor, tasty. 20c, 35c & 60c at drug stores.

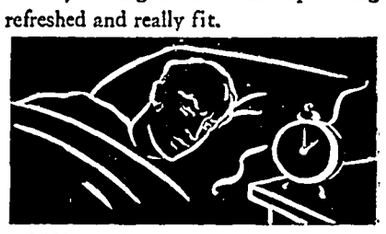
HEARTBURN?

Its surprising how many have heart burn. Hurried eating, overeating, heavy smoking, excessive drinking all lead to heartburn. When it comes, heed the warning. Your stomach is on a strike.



SLEEP SOUNDLY

Lack of exercise and injudicious eating make stomachs acid. You must neutralize stomach acids if you would sleep soundly all night and wake up feeling refreshed and really fit.



MILNESIA FOR HEALTH

Milnesia, the original milk of magnesia in wafer form, neutralizes stomach acids, gives quick, pleasant elimination. Each wafer equals 4 teaspoonfuls milk of magnesia. Tasty, too. 20c, 35c & 60c everywhere.

THE KLEMME TIMES

VOLUME 41 — KLEMME, IOWA, THURSDAY EVENING, JANUARY 14, 1937 — NUMBER 3

New Mason City Station, KGLO To Open Jan. 17th

DEDICATION OF NEW STATION WILL BE SUNDAY, JANUARY 17

MASON CITY—Radio station KGLO will hold its dedicatory program Sunday afternoon, January 17, at 1 o'clock, it was announced today by F C Eighmey, station manager, from the studios in Hotel Hanford.

Highlighted on the initial program will be greetings from prominent figures in the ranks of officialdom, radio and the press with a background of music by a specially organized orchestra including a number of Mason City's finest musicians

At 2 o'clock KGLO listeners will hear the NBC concert Hall of the Air and from 2:30 until 3:30 the station will be linked with the Iowa Broadcasting company stations, WMT at Cedar Rapids and Waterloo and KSO and KRNT at Des Moines, with the IBC giving a special dedicatory program for KGLO.

Included in a broadcast from WHO at Des Moines at 3:30 will be the Harold Fair WHO orchestra, the Stringfellows, quartet, Lem and Martha, Mabel Moss Madden Al Clauser and his Oklahoma Outlaws, Louisiana Lou, Ed Morley, Stan Widney and Jack Kerigan.

From 4 until 4:30 Sunday afternoon WOI at Ames will become a part of the dedicatory broadcast, the program then emanating from Ames. The Iowa State glee club will sing, a few numbers will be given on the Memorial Union organ and Ilza Niemack, noted Charles City violinist, will play a few specialties.

Next the program will revert to the Mason City studios where Marianne at the organ will be heard with Peggy Seneff Miss Senneff a former Columbia Broadcasting system star, has been a member of the Phil Snitalny and the Hour of Cham program

At 5 o'clock the first of a series of regular news broadcasts from KGLO will be given These broadcasts, to be given 5 minutes each hour, will be Uuited Press bulletins, the Globe-Gazette this week having become affiliated with the United Press, the second largest news-gathering organization in the world

From 5:05 until 6 o'clock the Mason City high school national championship band will give a concert by remote controll from the Wagner-Mozart music hall here. At 6:15 Decker Bros Snorts Review presents Al Mitchell, Globe-Gazette sports editor, as sports commentator

At 10 o.clock KOIL of Omaha will join in a salute to KGLO to complete the state-wide salutation to KGLO, newest of Iowa's radio stations KGLO's studio orchestra will play two programs during the evening hours

VAGABONDS WILL PLAY FERTILE INDIANS

The Klemme Vagabonds will play the Fertile Indians on the local floor next Monday night, January 18. There will be only one game, but it should be a good one as the competition is believed not to be so stiff as in other games The game is called for 8:00 Be there.

HANCOCK HIGHWAYS NOW PATROLLED DURING NIGHT

Highways in Hancock county are now being regularly patrolled at night since Friday, Jan 1, when Officer Clair West, formerly of Klemme, and Officer Al Sturzing of Denison, with headquarters in Algona, cover the route Officer Claude Benedict will continue working during the day time out of Garner.

Iowa was admitted to the union ninety years ago, on Dec. 28, 1846 One of the greatest States in the union—in point of productiveness, along nearly all lines.

SHAMROCKS DROP THRILLER TO BELMOND BRONCOS

Nip and Tuck Battle All The Way

The Belmond Broncos bucked their way through a lot of basketball Tuesday night and were finally victorious over the Klemme Shamrocks by a score of 28 to 27 in an overtime battle

Klemme looked good in the opening minutes of play and ran up a lead of 10 to 2 early in the first quarter They immediately went into a slump however, and failed to score again until Belmond had gone into the lead 14 to 10 The first half ended 16 to 15 in favor of the Broncos.

The second half was as hotly contested as any game could be Both eams battled hard for every point they got, and at the end of the regulaion playing time the score was tied at 26 all When the overtime period was half over, Peterson, hotshot Bronco forward looped in a shot from beyond the free throw line and this proved to be the margin of victory Keeper was fouled with less than a minute to go, and he made good on his gift shot, but the necessary field goal to win the game could not be scored.

Klemme scoring was evenly divided, with Schuldt, Keeper and Jorgenson getting 6, 7 and 8 points respectively, and Grosshuesch and Kaduce getting 2 and 4 respectively. Peterson and Obricht, Belmond forwards, proved to be the big threats for their team, getting five field goals apiece.

In the preliminary game, the Little Shamrocks lost by a score of 17 to 11.

FEED THE BIRDS

Attention is called to the citizens of Klemme that owing to the ice and snow, the birds that remain with us through the winter are unable to obtain food and water. Instead of burning table scraps put them out where the birds can find them You will be more than paid for your effort by the feathered friends that will make a pleasant chatter while feeding on the scraps usually thrown in the furnace.

Charles Rosner of Brooklyn, N. Y found $75 in a shoe he was repairing and returned the money to his customer who had used the shoe as a savings bank.

Congress Faces A Double Opportunity

By RAYMOND PITCAIRN

National Chairman Sentinels of the Republic

Since its first session back in 1789, the Congress of the United States has contributed to the world the American principle of Government by the People

Through almost a century and a half it has remained one of the greatest Representative Legislatures on earth

That is something for its members to remember during the session now in progress.

For the present Congress of the United States faces a double opportunity It can translate into action the will of the public, and it can continue to prove to the world that Government by the People offers the surest road to the continued well-being of a nation and its individual citizens

At this time such a demonstration could prove of immense value to both the Old World and the New.

To Europe it could emphasize the significant facts that nations rattle the sabre less violently and men live in greater happiness where Public Opinion, rather than Dictatorship, rules

At home it could remind us that under the American form of government, authority resides in our elected representatives — not in the hordes of appointed Bureaus and Commissions which through recent years have increasingly expanded in size, in power, and in arrogance

During past weeks official Washington has strongly indicated an intention to curtail both in numbers and in power our growing army of Bureaucrats.

If the 75th Congress backs up that promise it can win the widespread approval of the country But this will not end the achievement. **It can also take a significant step in strengthening throughout the world the principle of Government by the People — a principle on which our Nation was founded and has risen to greatness.**

RESULT OF OVERLOADING

Kansas City, Mo.—Laden with an overloaded tonnage of steel, here is what happened to the highway of an outer-belt road leading into Kansas City. The right rear wheel cannot be seen as it is completely submerged in the concrete slab.

So many highway accidents have occurred in this state and the need for data which may be used as a basis for determining the special road costs incurred by trucks is so great that state highway departments are now conducting surveys in several states to determine a fair charge against the trucks for the use of highways. While thousands of motor trucks daily bring about destruction of highways shown in the above illustration, it is pointed out that pleasure cars and light farm and delivery trucks stand an unjustifiable share of costs of high way upkeep.

Goodell Basketeers Play Here In Important Conference Tilt

BIG GAME OF THE SEASON FRIDAY NIGHT AT KLEMME

Goodell Game Is Here

The big game of the season is at hand Goodell high with a record of four victories and no defeats in conference competition, comes to Klemme Friday night of this week to do battle with Coach A L. Kingery's fighting Shamrocks The local team also has a clear record in Seven eagles games, so he contest Friday night will be a battle for the conference leadership

Goodell looked impressive in a 28 to 16 victory over Kanawha last Friday night, while Klemme was forced to remain idle when the Hayfield game was cancelled on the account of weather conditions The Shamrocks saw action again at Belmond Tuesday night however, and will be in the best of condition for the Goodell game

Fans should remember that previous arrangements to hold this game at Garner have been cancelled, and the game will be played in the Klemme gym Seating capacity will be stretched to the utmost to give everyone a chance to see he game The season's record crowd is expected

VAGABONDS BOW TO DIAMOND BREAD CAGERS

Alumni Girls Down High School Sextet

Overcome by superior ball handling, and height the Vagabonds dropped a rather ragged game to the strong Diamond Bread quintet from Mason City Although the boys showed their best passing of the season they just couldn't hit the hoop, and consequently came out on the short end of a 55 to 18 score The bakers got off to an early start, and led 23 to 7 at the half time.

McDonald was high for the winners with seven field goals and two charity tosses for a total of 16 points. O Stokesbary led the Vagabonds with 9 points.

Alumni Girls Win

The alumni girls led by Ranney who ran wild, making 7 field goals the first half, downed the high school girls by a score of 32 to 18 The score at the half was 22 to 3 for the alumni After the intermission the high school girls, led by Kluckhohn, went to work and chalked up a few of their own, even out scoring their opponents the the last half. However they were unable to close the gap created earlier in the game, and went down to defeat.

How love brings out the craziness in people explained by Professor Laird, the eminent psycologist, in The AMERICAN WEEKLY, the magazine distributed with NEXT SUNDAY'S CHICAGO HERALD AND EXAMINER.

"DO WE WANT ELECTRICITY? YOU BET" SAYS ELLSWORTH FARMER

How badly does a farm family, previously with electricity in its home but now without, want to be on a line again?

If anyone wants to find out, just ask Scott M. Brinton, Ellsworth farmer, or watch him at a Rural Electrification meeting such as a recent one at Webster City conducted by Harold Beaty, extension agricultural engineer from Iowa State College

Determinedly Brinton is working for an REA line past his farm because, as he says, it means more to his family than a mere matter of dollars and cents

And Brinton even though he is at present without electricity on his farm is not working in the dark when it comes to electricity, because from 1919 to 1932 he lived on a farm with electricity

"When we moved to our present place and had to give up electricity my wife said she couldn't stand it" he said She missed not only light but also an electric iron and washing machine and a number of other appliances

But the family has staved on, looking forward to some day seeing electricity come to them again bringing with it light for the house and barns power for household appliances and farm machinery and comforts the family has missed since 1932.

"You bet we want electricity again," said Brinton

118 COUPLES WERE LICENSED TO MARRY IN 1936 IN HANCOCK

Increase Of Over 55 Over Last Leap Year Noted In Office Of County Clerk

Leap year, 1936, proved to be a popular year for marriages in Hancock county records kept by County Clerk, Elmer Raw showed Tuesay One hundred and eighteen licenses were sold during the year, the number being one more than that sold in 1935 and an increase of 55 over the 63 sold last lean year, 1932.

While marriage rates were increasing in the county, the divorce rates slackened and only eight divorces were granted in Hancock county district court during 1936 as contrasted with 13 in 1935

Eleven licenses to wed were sold during the last month of 1936 as compared with 12 sold in December 1935

First marriage license of 1937 was issued Tuesday by Mr Raw for Arthur H Schlawin, 30, and Esther Buseman, 23, both of Klemme.

ASSESSORS LEARN OF NEW DUTIES AT ANNUAL MEETING

John A. Love and Ole G. Peterson Are Reelected To Offices

John A Love of Garner was reelected chairman and Ole G Peterson of Britt secretary at an annual meeting of all assessors in towns and townships of Hancock county which was held at the court house

All country property will be divided into forty acre tracts for assessment in 1937, and buildings in both town and country will be valued separate from land, it was explained at the meeting

Assessors will also make a survey this year to find out the extent of the damage to the 1936 corn crop by heat and drouth Farmers will be asked to estimate the number of bushels of corn they might have received from acerage cut for silage, cut for fodder or hogged or grazed down if it had been husked.

In addition to this special survey, assessors will make their usual enumeration of all crops raised in Iowa in 1936 a well as the number of livestock on farms as of January 1, 1937.

Following is a list of the assessors.

NEARLY HALF OF FORMER 4-H CLUB MEMBERS NOW FARMING

What are the 4-H club boys and girls of 1914 to 1928 doing today?

The question is answered in a study of the present occupation of former 4-H boys and girls in the 13 north central states by R A Turner senior agriculturist in the Extension Service of the United States Department of Agriculture Washington D C Iowa is included in the north central group

Of 537 boys from whom information was secured 240—or practically 45 percent—are engaged in farming Another 9 percent are engaged in commercial agricultural activities and work closely allied with agriculture Eleven percent are engaged ni extension work, 7 percent in teaching and 3½ percent in other professional pursuits More than nine percent are engaged in commercial work not related to agriculture

More than 11 percent are still in college or doing post-graduate work

Of the 337 girls included in the study, 124—or 37 percent—are engaged in homemaking Practically 10 percent are in college and 5 percent are still at home Twenty-one percent of the former 4-H girls are teaching, 11 percent are in extension work an 4 percent are in other professional activities. About 6½ percent of the girls are in clerical or other commercial work.

WAS PROMINENT MAN IN ACTIVITIES OF SURROUNDING VICINITY

Funeral Services Were Wednesday Afternoon

William F Greimann, 85, resident of Hancock county for 58 years and former member of the county board of supervisors, died Monday morning at his home five miles southwest of Garner. He was elected supervisor on the democratic ticket in 1905, when draining of swamp lands in the county was just begining He served one term, three years. His son, Ben F. Greimann, now serving his first term as supervisor, a democrat, is the first person in the history of the county to succeed a father to the office Mr. Greimann was trustee of Lbt. township for many years. He was first a member of he Methodist church but later joined the Reformed church in Lbt. township near his home He was vastly interested in horticulture and had a large orchard of fruit bearing trees on his section farm.

Born in Germany, Aug. 28, 1852, he came with his parents to Clayton county, settling here in 1879, he returned to his boyhood home where on February 3, 1881 he was married to Miss Dora Lau and lived continuously on the same farm They celebrated their golden wedding six years ago Thirteen children were born Eleven children and his wife, Dora, thirty-eight grandchildren and two great grandchildren and many relatives survive him. The children are William F. Jr. Goodell Henry C. Garner; Mrs. Robert Gesswein, Chicago; Mrs Daisy Lemke, Klemme: Ben F. Mrs. R H Schlawin, Mrs Carl Swanson Aaron all of Garner; Mrs Albert Etchen and Mrs Fred Etchen both of Goodell and Ruben on the home place Nellie, who was Mrs August Ollerman, died near Garner in 1904 Ruth died at two years of age

Funeral services were held Wednesday afternoon at Peace Reformed church in Lbt township, preceded by services in the home at 1 o'clock in charge of the Rev William Huenemann Interment was in the cemetery near the church

ELL AND LIBERTY LEADERS MEETING HELD TUESDAY

Adequate Cost of Meals Was Subject Covered

Ell and Liberty held their local leaders meeting Jan 12, at the home of Mrs A H Greimann 20 leaders and Miss Zollinger were present The ladies are studying "Foods and Nutrition", Course 4 this year This was the second lesson of the course and covered "The Cost of Adequate Meals" Mrs Verner Stromer led the discussions on this subject The ladies learned that money could be saved by careful planning of gardens and by preparing different foods at home The following luncheon was prepared and served by the ladies: Cheese and bacon sandwiches, buttered salsify, cinnamon apple salad and lemon cake pudding

The music sub-project for this lesson was the "Green Sleeves Folk Game" and the "Festival March" by Wagner

The third lesson will be given at the Verner Stromer home, either Feb 9 or Feb 16 This lesson will be on meats

SATURDAY MARKED COLDEST DAY THUS FAR THIS WINTER

Mercury Dins To Twenty Below

Saturday morning at 8 o'clock the thermometers in Klemme had hit the low mark of 20 degrees below zero, the coldest recorded thus far this winter Nearly a foot of snow fell in this section of the state Thursday night and roads were blocked in many places.

Those who might have noticed saw two beautiful sun-dogs in the sky late Friday afternoon At times the sun-dogs were brilliantly colored. Their appearance means continued cold weather.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C

Washington.—The Capital city has returned to normalcy. It is not the normalcy of January, 1935, or the years immediately preceding, but the normalcy of the year in which that quadrennial spectacle, an inauguration of a President, takes place. But Washington's normalcy is a condition that comes in cycles and it matters not how the wheel of life turns, those who are resident here get used to it and of necessity they take the condition in regular stride.

Back to Normalcy

That sounds like Washington residents are blase. And they are to a greater extent than residents of most cities. But paradoxical as it may seem, native Washingtonians and a certain percentage of those in the political field become so excited that they lose all sense of proportion on occasions such as an inauguration ceremony. The answer seems to be personal vanity—a desire to be "out in front" and to "show off" by having important places in parades and having their names and pictures in the newspapers.

But there is another side of this Washington normalcy. It is the side of the political powers who have little concern about the District of Columbia as such or what goes on therein unless those affairs strengthen the position these political powers hold among their constituencies "back home."

Hence, under the dome of the great Capitol building, there is all the activity of a bee hive. The old timers among the legislators have learned to proceed with caution and to develop their plans slowly, but the newer members of the house and senate are all agog, each one with his own pet idea for saving the nation; each one with a varying conviction about his own importance as a member of the national legislature, and each one determined not to overlook a single opportunity to show the folks back home that their representative or their senator has become a national figure.

Then through the corridors, the halls, committee rooms and offices there are the hurrying feet of newspaper correspondents, representatives of this interest or that, messengers and lowly members of the Capitol's vast staff of carpenters, cleaners and chore workers. They are, of course, important only as they make the Capitol habitable but they are an inescapable part of the picture—of Washington normalcy.

* * *

"Downtown" Washington has another picture. In the executive departments, in the bureaus, commissions and agencies of which scores have come into being under the Roosevelt New Deal, there is intense activity. Policy makers of these various units make plans, study, confer, propose or reject ideas for consideration of the new congress and the administration heads. These fellows are less concerned about the folks back home than are the legislators. Their chief concern usually is perpetuation of their jobs, development of their units or agencies into places of such importance that the country cannot do without them. There is a personal interest hardly less to be condemned than that of the self-seeking politician.

All Is Activity

On top of all of these—the governmental activities of the government — there is still another normalcy in Washington: It is the social side. Of course, all Washington society springs and has its being in White House reflection. From the great mansion at 1600 Pennsylvania avenue, there radiates every kind and condition of a social engagement. Outstanding among these obviously after the inauguration of a President is the Chief Executive's dinner to his cabinet. A reception to the Supreme Court of the United States and the other members of the judiciary follows. In rapid order come receptions to the legislators, to the army, navy and marine corps, to the foreign diplomats resident here and all of these are interspersed with smaller official dinners in the great state dining room at the White House.

In various sections of the city and in the hotels dinners, receptions, cocktail parties continue in ceaseless chains. And if the brutal statement must be made, the truth is that nearly every one of them has a purpose above and beyond personal enjoyment, but the selfish interest is quite frequently so deeply concealed that those who are being "cultivated" may not realize what the objective is.

* * *

These random observations have been presented chiefly to show the gloss and the glamor that is self-imposed upon the hundreds of persons who combine to make up what we know as government. They play as they have a right to play.

Gloss and Glamor

They must have diversion. Frequently this diversion serves useful purposes for the country as a whole because through personal contact those charged with responsibility many times gain information, understanding, of the problems with which they must deal in official positions.

And so it is that, as Washington returns to normalcy, we have a congress — the seventy-fifth — beginning its labors with perhaps a confusion as great as any in recent years with the exception of that which opened the first term of the Roosevelt administration. In my own mind, I doubt that the confusion of 1933 was as great as it is now because in that period of emergency, the important wheelhorses of government were concerned with only one thing, namely, quick enactment of policies that would help in bringing order out of the economic chaos in which we found ourselves.

The current congress gets down to work, however, in a different atmosphere. Agencies of the government time after time have held lately that the emergency is over; that policies considered now must be considered on a permanent basis and that if there is to be a new order, the make-up, the consistency, of that new order must be examined with the idea of fitting the various pieces into a compact and workable whole.

* * *

It is in this atmosphere, therefore, and under the circumstances of an overwhelming landslide of votes by which President Roosevelt was returned to office that the administration must take stock of what has happened in the last four years and must analyze the prospects as far as the future discloses them.

Time to Take Stock

Probably the most serious long range problem confronting the country involves the relationship of government and business. For weeks, I have sought information and views of individuals concerning the real crux of this problem because it has so many different phases. From all of this research I am inclined to the opinion that the fundamental question to be answered is that peril that faces the portion of our people that have passed the age of forty-five.

It may seem like a broad statement to pin down the relationship of government to business to that one question of what to do with workers above forty-five but I verily believe that is the crux.

It will have to be treated briefly in these columns but nevertheless it seems to me that all of the growing howl about "social security" centers on this one point. It centers there because politicians and starry-eyed wishers have made so much noise about the government looking after the aged that a natural reaction has taken place in industry and, in consequence, there is a growing disinclination among employers to take on workers past forty-five.

Under the whip of competition and in an effort to offset the costs of the present social security program, manufacturers everywhere have been looking for methods by which they can substitute machines for human workers. Where that was impossible, they have turned to younger workers so that the increase in protection per worker, according to the best calculations, is not all due to the use of machinery. Greater efficiency has come from the employment of people able to go at high speed throughout the working period.

This development has been in progress in the manufacturing industries for at least 20 years but it has received its greatest impetus in the last three or four years since it became evident that the federal government was going to force upon commerce and industry protection for the older employees.

Federal Reserve board figures reveal that 16 years ago, nearly 70 per cent of all gainfully employed workers were in the basic industries while 30 per cent were employed in the professions and service groups mentioned above. Five years ago, 60 per cent were in the basic industries and 40 per cent in the professions and service industries while at the beginning of 1936, about 57 per cent were in basic industries and the professions and service groups embraced about 43 per cent.

From this it will be seen that an enormous transformation has been taking place in the type of work that people do. It represents, of course, changes in our national life, practices and traditions but who is there to say when and where this trend will halt. Equally, what government authority can be able to say that social security laws enacted now will be applicable and workable by the time the Roosevelt administration ends?

BURGESS

ONCE EVERY FOUR YEARS

By ELMO SCOTT WATSON

IT TAKES place every four years.

It marks the end of one era and the beginning of another in our history.

It is the symbol of a change which may vitally affect the lives and fortunes of millions of Americans.

But, particularly, it is a colorful, dramatic spectacle which, more nearly than any other event experienced in a democracy, resembles the pomp and pageantry of ancient customs.

For all these reasons, every four years, the eyes of the United States are centered on Washington, D. C., where a new President is inaugurated or the incumbent in the White House takes the oath of office a second time.

* * *

Inauguration day this year will be an historic event. The principal reason is this:

As the result of the ratification of the twentieth, otherwise known as the Norris or "lame duck," amendment to the Constitution, Inauguration day is being held on January 20 instead of the traditional March 4. So to Franklin Delano Roosevelt, exponent of the "New Deal," falls the distinction of being the first President to be inducted into office under a new deal in Inauguration days.

Washington weather, traditionally capricious, may be worse on January 20 than it usually has been on March 4. But capital observers are wagering that "Roosevelt luck," which has included "lucky breaks" when weather conditions might affect his career, will hold and that the skies will smile on his second inauguration even more than they did on his first.

Whether they are true prophets in that respect remains to be seen. But it is rather certain that their prophecies in regard to the size of the crowd which will jam the streets of the capital on this day of days in our national history will be accurate, possibly erring only on the side of an underestimate. Last November Roosevelt was re-elected by the greatest vote of confidence any American had received since the time of George Washington.

A few days later he returned to the capital and was acclaimed by a crowd of 200,000, an unprecedented tribute in blase and ordinarily unemotional Washington. So there is every reason to believe that January 20 will see a hegira of Americans to Washington which will break all previous records and a celebration of the event in keeping with its historic importance.

Of course, President Roosevelt has expressed a desire for a "simple inauguration." He did that when the question of plans for the event were first broached. But that doesn't mean that he will have it. Other Presidents have made the same request and invariably it has not been granted. For the American people, and more particularly those of Washington, want their "big show" every four years and they usually get it.

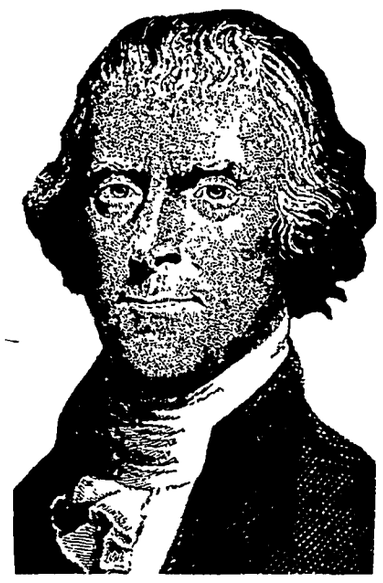
"Jeffersonian Simplicity?"

The President not only asked for a "simple inauguration" but he is also reported to have said that he favored "Jeffersonian simplicity." The only difficulty with that phrase is that the two words are contradictory—when applied to an inauguration. For, despite the belief of most Americans in the familiar tradition about the inauguration of Thomas Jefferson, who was the first President to take the oath of office in the city of Washington, the fact is that it was not so simple and unostentatious.

That tradition is based upon a single paragraph in a book written by John Davis, an English traveler, who was in Washington when the Sage of Monticello became President. That paragraph said:

"His (Jefferson's) dress was of plain cloth, and he rode on horseback to the Capitol without a single guard, or even a servant in his train, dismounted without assistance and hitched the bridle of his horse to the palisades."

Davis evidently wrote that account from hearsay, rather than from eye-witness evidence. For



THOMAS JEFFERSON

historians have dug into contemporary newspaper accounts and have learned that instead of riding horseback to the Capitol, he merely walked a few blocks from Conrad and McMunn's hotel, where he was staying, to the scene of his inauguration. The reason why he did not go from the White House to the Capitol, as became the custom in later years, was due to the fact that John Adams, angered by his defeat for re-election and still harboring resentment over the bitter things said about him during the campaign by Jefferson's followers in the Republican party, had already left the city for his home in Massachusetts. In doing this he broke the precedent which Washington had established—of the outgoing President being present when the incoming Chief Executive took the oath of office. Adams was not the only one, however, who thus ignored that official courtesy.

The English traveler's description of the simplicity of Jefferson's costume was accurate enough, but that was about the only fact in his account of the inauguration that was. For instead of being a quiet affair it was the occasion for considerable jubilation and ostentation, not at all in keeping with the idea of "Jeffersonian simplicity." According to one of the Washington newspapers, the National Intelligencer:

The Cannons Boom.

The City of Washington presented a spectacle of uncommon animation, occasioned by the addition to its usual population of a large body of citizens from adjacent districts. Shortly after dawn, there was a discharge of artillery and about 10 o'clock, the Alexandria company of riflmen, with the company of artillery, paraded in front of the President's lodgings.

At 12 o'clock, Thomas Jefferson, accompanied by a number of his fellow citizens, among whom were many members of congress, repaired to the Capitol. His dress was, as usual, that of a plain citizen. He entered the Capitol under a discharge from the artillery."

This news story then tells how Chief Justice John Marshall administered the oath of office, how Jefferson delivered his inaugural address and then started again for his hotel, followed by a great throng of people. It then continues:

As soon as he withdrew a discharge of artillery was made. The remainder of the day was devoted to the purposes of festivity, and at night there was a general illumination."

From all of this it would appear that even if President Roosevelt's request for an inauguration of "Jeffersonian simplicity" were honored, his induction into office wouldn't be such a quiet affair. Nor would it be that if he followed some of the precedents established by that other great Democrat, Andrew Jackson. Incidentally, it is reported that the President has also suggested that the reviewing stand, from which he will view the inaugural parade should be patterned after the Hermitage, Jackson's old home near Nashville, Tenn., and if this is done it will give a touch of Jacksonian atmosphere to this year's inauguration.

The People's Triumph.

But it is doubtful if the spirit of the day will remotely resemble that of the time when "Old Hickory" took office. Certainly, the scenes of that inauguration more than a century ago are not likely to be repeated. Jackson also asked for a "simple inauguration." But how different was the one he got! His election over John Quincy Adams had been a triumph for the "common peepul" and they were determined to make the most of that fact. So they swarmed into Washington by the thousands.

Jackson's arrival in the city was greeted by booming cannons, rolling drums and a storm of shouting. A cavalry company met him in the environs of the capital and escorted him to the National hotel to the accompaniment of booming cannon, rolling

ANDREW JACKSON

drums and wildly-cheering citizenry. The general had declared that he wanted no escort as he walked down Pennsylvania avenue to the Capitol. But he got one anyway. Fifteen veterans of the Revolution, all of them more than eighty years of age, had met that morning and sent a letter to Jackson, asking for the honor of serving as his bodyguard. He couldn't very well refuse such a request from these venerable patriots so he accepted their invitation and they surrounded him as he made his way to the place where Chief Justice Marshall was waiting to swear him into office.

Again history repeated itself. For a Federalist Adams,—John Quincy, this time—enraged over defeat and smarting from the lash of campaign canards, again refused to be present when his Democratic successor took the oath. But his absence probably wasn't noticed by the people who were there to shout themselves hoarse for their idol, "Old Hickory" Jackson.

After the ceremony he started to leave the Capitol and found himself jammed tight in a mob. When a path was finally cleared for him he mounted a horse and started up the avenue for the White House. Behind him streamed the mob — some on horses, others in carts or carriages but most of them on foot.

Jacksonian Riot.

Arriving at the White House, this throng staged one of the most remarkable scenes in the history of this country. Here is what a woman observer of that day wrote about it:

The majesty of the people had disappeared and a rabble, a mob of boys, negroes, women and children scrambling, fighting, romping, took its place. No arrangements had been made, no police officers placed on duty, and the whole house had been inundated by the mob.

Cut glass and china to the amount of several thousand dollars had been broken in the struggle to get refreshments; punch and other articles had been carried out in tubs and buckets, but had it been in hogsheads it would have been insufficient. Ladies fainted, men were seen with bloody noses.

The windows were thrown open and tubs of liquor, alias punch, placed outside, and thus the house was cleared of the mob. It was estimated that 20,000 persons composed it."

If the Jackson inauguration in 1829 was a triumph for the people, the inauguration of a new President in 1841 was another and was accordingly, although not so riotously, celebrated. Under Van Buren, Jackson's successor, the Democrats had "gone high hat" and the Whigs, staging their dizzy "hard cider and log cabin" campaign, had elected their frontiersman candidate, Gen. William Henry Harrison. During that campaign many marching clubs had been formed and it had been one of almost continuous processions.

So when it came time to induct Harrison into office the marching clubs were on hand and there were so many of them and so great was the enthusiasm that they generated that after they had finished escorting the new President to the White House, to which he rode on a white horse, they tramped up and down Pennsylvania avenue for hours afterwards. This was the beginning of the inaugural parade idea, which steadily increased in favor, especially after the Civil war, and which has given the pomp and pageantry flavor to Inauguration day. It will, no doubt, be much in evidence again when Franklin D. Roosevelt takes the oath of office on January 20, a new date in the history of the American Presidency.

A Trio for the Younger Set

THREE more intriguing numbers than these would be hard to imagine—even in this day of rampant fashion and scintillating style! It's a trio that the younger set in The Sewing Circle will be enthusiastic about too, for first consideration is given them in—

Pattern 1996—This excellently styled jumper dress is one the tot of six and the lass of fourteen will sing long and loud over. It is a guaranteed delight for both mother and daughter because it's the simplest thing to sew and the most intriguing frock a child ever had. The puff of the sleeves and the flare of the skirt place a pretty accent on youth. Available for sizes: 6, 8, 10, 12 and 14 years. Size 8 requires 1¾ yards of 35 inch material for the jumper and 1⅜ yards for the blouse.

Pattern 1202—There's subtle loveliness about this new dress for all occasions It makes a grand thing of simplicity—a brilliant success of the new silhouette. Buttons, bold shiny ones, add classic chic to the back. And in the matter of sleeves there's an opportunity to choose for oneself. Sheer wool, challis, taffeta or silk crepe will be a likely material for this dress. Designed for sizes: 12, 14, 16, 18 and 20. (30 to 38 bust). Size 14 requires 2¾ yards of 54 inch fabric. With long sleeves 2⅞ yards.

Pattern 1936—This is the season for smocks, although not the 'hunting season,' thanks to today's new model, pictured here. This ideal smock obviates any further search, for indeed, in simple words it is the McCoy! Imagine the fun of having a smock that reflects one's own taste in its every detail—yes, even to the size and color of the scarf and buttons. Designed in sizes: 32, 34, 36, 38, 40, 42 and 44. Size 34 requires 4⅜ yards of 39 inch material. The bow requires 1⅛ yards of ribbon.

A detailed sewing chart accompanies each pattern to guide you every step of the way.

Send for the Barbara Bell Fall and Winter Pattern Book containing 100 well-planned, easy-to-make patterns. Exclusive fashions for children, young women, and matrons. Send fifteen cents in coins for your copy.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

QUIT

TRADE MARK

The pleasant and quick way to make coughs *quit* is a Smith Brothers Cough Drop. (Two kinds—Black or Menthol—5¢.)

Smith Bros. Cough Drops are the only drops containing VITAMIN A

This is the vitamin that raises the resistance of the mucous membranes of the nose and throat to cold and cough infections.

TALK IT OVER WITH US

Buying Wisely

In these days people are buying wisely. They study values more closely than ever before, they compare prices. The buyer today studies advertising carefully, and the seller can use advertising and obtain better results than when money is more carelessly spent. Advertising nowadays pays—both buyer and seller.

IOWA SCHOOLS DEPENDENT AIMOST ENTIRELY ON PROPERTY TAX

Legislation Before Assembly Now To Secure More State Aid For Schools

Among the important items of legislation to be brought before the Iowa General Assembly now in session will be the proposal to secure more state support for schools This proposed legislation should be of particular interest to the taxpayers of Klemme, because our local school receives no financial aid from the state at the present time Our revenue comes almost entirely from tax on property in this district.

The research bureau of the Iowa Department of Public Instruction has made a study of the state support of our schools in comparison with that of other states Some of the reasons for a change in the present system as pointed out by the bureau are as follows.

Iowa ranks forty-sixth out of the forty eight states in the percent of school revenue derived from state sources This percent varies from 1 9% in Kansas to 93 1% in Delaware The average for all states is 26 0% Iowa provides 2 2%

The remaining school revenue (approximately 98%) comes from property tax Possession of property does not necessarily indicate ability to support schools, and the benefits derived from schools are not determined by the amount of property one owns When it becomes difficult to pay taxes on property, the schools are the subject of most of the criticism.

Some districts are much more able than others to pay high taxes, but all are in need of adequate educational systems Some districts can raise as much revenue by a levy of one mill as others can by a levy four or five times as great but that does not mean that the educational needs of these districts are different

Various proposals have been made as to just how far the state should go in the support of its schools but most students of the quetion agree that the state should guarentee a certain minimum of education then let local districts extend their facilities above that according to their own ability Districts with a low assessed valuation, however would be given larger amounts than wealthier districts

Taxpayers and patrons of education as well will watch closely the developments on this legislation

AGAIN

Again the Consevation Commission pleads with hunters and others to refrain from shooting large birds Any large bird is a target for a gun regardless of the good or harm the bird may do Almost daily a report is received of the shooting of a hawk or an owl. Numerous birds which are an actual benefit to mankind are being shot down To some any large bird is harmful or dangerous This is not true and should be remembered by everyone tempted to shoot such a bird.

It is interesting to note that in certain European countries which have been pracitcing a system of game management for long periods of time and where much game can be found, that all hawks and owls are not only given complete protection but they are reared and distributed to state forests to provide a proper balance of biological control in forest production as well as game production. An overbalanced population of rodents in a forest will prevent a natural reproduction of trees It will also deprive game of its food. To provide control of these destructive rodents, hawks and owls are raised and released in these forests

For the same reason there is the great possibility that the ruthless desruction of hawks and owls in Iowa is very unadvisable

Henry Sunshine and Miss Violet Storm were charged with intoxication before a Chicago court on the same day!

Hindus in Singapore Do Penance in Odd Manner

The Feast of Thipusum, a Hindu ceremonial, takes place every year in Singapore, notes a writer in the Chicago Tribune.

White clad Hindus go slowly down the street, stopping every few yards to voice a weird chant. In their midst is one of their countrymen, carrying on a form of pennance. He is clad only in short white trousers, but wears a string of huge wooden beads with a fantastic charm at the end of it. Over the upper part of his body and his head is an ungainly wooden structure dangling with other charms and partially supporting dozens of spears. The business ends of these spears are thrust into his body from the waist up. He fairly radiates them.

Small silver needles are stuck into his arms up to his shoulders. A peculiar contrivance holds his tongue half way out of his mouth, while instruments somewhat like hatpins are stuck in each side of his face at the root of the tongue. Drawn behind him is a small cart, harnessed to his body by fishhooklike arrangements thrust into his hips. The strangest part of it is that there is never sign of any kind of bodily or mental distress.

There may be a dozen such groups on the streets of Singapore each day during the feast period, which lasts a week. When the pennance is done the groups return to the temple, where the curious paraphernalia are removed In each case the worshiper is given a mouthful of lime juice. He then proceeds apply on his way, apparently much better for his experience.

Romans Used Taxis and Measured Miles Driven

When Pertinax, on December 31, A. D. 102, succeeded Commodus as emperor of Rome, he held an auction of the effects of his murdered predecessor

In an inventory of the goods we read —"Carriages which have contrivances to measure the distance over which they are driven and to count the hours spent in the journey"—the first mention of taximeters, says a writer in Answers Magazine.

What the contrivance was we can't tell, for the next mention of anything of the kind is in 1652, attributed to a member of the Royal society and known as a "chariot way-wiser"—waywiser, from the German wegweiser, guide or indicator It is described as having "three circles, one pointing to the number of rods, another to the miles—very pretty and useful."

Later, in 1846, an engineer at Putney, Von Uster, patented a meter which, though crude, was very similar in principle to our own.

Anyhow, the fact remains that two thousand years ago the poor passenger felt the need for the protection of a taximeter.

Raccoons Intelligent

Raccoons are considered among the more intelligent of the wild animals. They have an insatiable curiosity in their surroundings and often display unusual interest in bright objects of any kind, such as pieces of tin or metal. They are among the more courageous in the animal kingdom and often give a good account of themselves when attacked by dogs One of the marked health-bestowing habits of the "coon" is his sunbath When the weather is bright and warm, the coon and his entire family, if they be large enough, climbs from his home in a hollow tree and the group distributes itself in the highest perches. Here they sprawl, basking in the warm sun-light and warm their fat bodies.

"By Jiminy" Expression

The constellation Gemini is an interesting group of stars, and one which, strangely enough, was not known to the Chaldeans and other early eastern peoples as the twin brothers we know today, but rather as the two kids. The two bright stars in Gemini, Castor and Pollux, were believed by the ancients to be harbingers of fair weather when they appeared in the sky The two gods, the twins Castor and Pollux, heroes of the Argonautic expedition, immortalized in the twin stars in the sky, were greatly revered by the Roman legions, whose soldiers swore a favorite oath, "by Gemini" That ancient oath has come down to us as the expression "By Jiminy."—Hayden Planetarium Bulletin.

Clever Indian Salesmen

The Indians who sold Manhattan Island to Peter Minuit in 1626 for some firewater and $24 worth of trinkets were smart boys. They did not own it. They were Canarsies, Montauks and Rockaways from Long Island—just in town for a visit So Peter had to buy it again from a tribe "uptown." The real salesmen, however, writes Miles Cahan, New York city, in Collier's Weekly, were the Raritans, who sold Staten Island to the Dutch six successive times.

Weather Wisdom

Here are a few facts about the weather: A blue sky, with bright white clouds, early in the day will not last. Heavy rain may be expected before the evening. A fleecy sky is a good omen. When cattle seek shelter, follow their example. A halo around the sun or moon foretells bad weather A good hearing day is a sign of wet. When hills are capped with cloud, rain is not far away. A new moon often brings a change of weather.—Pearson's Weekly.

American Library Given for the Use of Indians

The earliest known printed book is the "Diamond Sutra," a Buddhist scripture, printed in China in 868 by Wang Chieh, the first known printer of a book. One copy of this book is known to exist. The earliest known library was a collection of clay tablets in Babylonia in the twenty-first century B. C.

In the United States, the earliest known library was one given in 1621, for use of the Indians at Henrico, Va. The first university library in the United States was the one founded by John Harvard in 1638. The first public library was established in Boston in 1653.

Originally printers performed all the functions of publishers. Probably the first publishers, in the present sense of the profession, were the Elzevirs.

The founder of the house of Elzevir, Louis, published his first book at Leyden in 1583. Elzevirs—for such are their books known—were published until 1712.

Elzevirs were good textually, legible and inexpensive; they were sturdy rather than elegant, and typically the books were of small size (12mo to 32mo), and were prepared especially for the impecunious scholar. The house of Elzevir had agencies all over Europe and published in many languages, including Latin, Greek and French — From the Pleasures of Publishing.

Vancouver, B. C., Had Two Names in Earlier Times

Before the coming of the railway Vancouver, B. C. was a tiny settlement, known as Gastown, after a somewhat disreputable character named Gassy Jack, who sold liquor to the loggers and fishermen, and also as Granville, the designation chosen by one of the earliest inhabitants who had claimed most of the waterfront as his own.

The name was changed to Vancouver in honor of the young British midshipman who had sailed under Captain Cook on his third voyage of discovery into the Pacific and who subsequently did a great deal of exploring on his own account. Vancouver was one of the first white men to glimpse the great landlocked harbor that today welcomes the flags of every maritime nation.

Like many another pioneer city, Vancouver went through the ordeal of fire shortly after its birth. Flames swept the entire community, but the disaster served only to stir the imagination of her people and hasten reconstruction along bolder and more carefully planned lines.

Odd Postage Stamp Error

One of the most interesting stamp errors in existence is the regularly issued five para stamp of Egypt, sold in 1875. From 1867 until 1875 the stamps of Egypt were printed by V. Penasson in Alexandria (the 1866 set was made in Genoa by Pellas Brothers), but in that year the manufacture of postage stamps was taken over by the government, which installed a printing plant at Boulao The printers, all native Egyptians, were ignorant of the European inscriptions and numbers, so when a die for the five para stamp was made they reckoned only with the Arabic, adding the figure "5" in each corner last. In doing this they inverted all four "5s" and the word "Para" The printing of these stamps was so unsatisfactory that the next set was ordered from De La Rue, in London, in 1879.

Abraham's Gardens

Gardens are recorded in ancient accounts of the journey of Abraham from Ur of the Chaldees to the Land of Canaan, says the New York World, gardens that flourished in approximately 2000 B C The record is, as follows "When the caravan stopped for a long time in one place the women cultivated the soil. They raised lettuce, onions, radishes, beans, lentils, cauliflower, cabbage, carrots and beets. The seeds they carefully saved and carried from place to place. Sometimes when they found a new root they planted it. In larger fields they raised wheat, rye and barley to feed their cattle and make bread for themselves The men could not help much in cultivating the soil because they had to care for the herds, hunt and fight."

Home of Wild Sheep

Wild sheep of many species occupy mountains in most of Asia, Southern Europe and Northern Africa. Asia has by far the greatest number of species and individuals, and scientists believe it to be the region where wild sheep originated. They must have been fairly early migrants to North America, however, probably crossing from Siberia to Alaska long before the first human beings to populate the New World came over by the same route.

Appropriate School Sign

Of all the building signs in existence that indicate by symbols the kind of goods sold or the sort of service rendered by the establishment, writes Edward J. McGowan in Collier's Weekly, the one that would probably take the prize for simple originality is nailed on the front of a schoolhouse in Punaauia, Tahiti. It reads: "2x2—4."

HOT PACK CANNING IS PREFERRED FOR MEAT

Precooking Shrinks Meat and Saves Jar Space; Also Hastens Processing

Jars that are only half full of canned meat can be avoided by use of the hot pack method recommended by Miss Ruth Cessna, extension nutritionist at Iowa State College, and used by canning specialists.

Meat packed cold will shrink when cooked in the jars, wasting jar space and leaving an unattractive pack. Precooking and packing hot will shrink the meat before it is put in the cans. Hot packing also lessens the time needed for processing.

When glass jars are needed, meats should be precooked in the oven or in broth or water before packing. Precooking by frying is not recommended because it makes the meat hard and dry and gives it a disagreeable flavor.

For oven precooking meat should be cut in one pound pieces and cooked in a moderate oven until the raw meat color has almost disappeared at the center. The meat is cut into smaller pieces—two or more to each container—packed closely, covered with pan drippings or boiling water and processed.

The meat may be precooked to the same stage in boiling water or preferably broth at a simmering temperature for 12 to 20 minutes. when the meat will have lost about one-third of its weight. The meat is cut into smaller pieces, packed tightly, covered with broth and processed.

For precooking in tin cans or wide-mouthed glass jars, the meat is packed cold, and the cans placed in a boiling bath coming within 2 inches of the top The bath is covered and contents of containers heated to 170 degrees Fahrenheit, or until the meat has pracically lost its raw color, then the jars are sealed and processed This exhausts air from the jars.

"Head space" or space at the top of the jar is important. A half-inch should be allowed in glass jars.

225-POUND HOG USUALLY BEST SIZE TO BUTCHER

The weight and finish of butcher hogs have much to do with the quality of the meat obtained, declares F J. Beard, meat specialist of the Animal Husbandry Department of Iowa State College.

Hogs below 180 pounds in weight will yield inferior quality meat largely because their flesh is immature, Mr Beard observes, while hogs weighing more than 250 lbs are likely to produce cuts with too large a proportion of fat to lean. Hogs weighing around 225 pounds will give the best balance between fat and lean' Beard believes.

Hogs that are to be slaughtered should be kept off feed several hours before they are killed as this practice makes dressing much easier.

SNOWER IN

We've been snowed in. The drifts
piled up hill high
Between the house and sugar maple grove
We drew the calla near the kitchen stove
How glad we were the shed was
full of dry
Cordwood—oak means a fire that's
steady-warm.
And though John's ears were nipped by frost the day
When, coming from the barn, he
lost his way—
A strange experience on one's own
farm!—
And for each sill, there was a wintry feather,
We made out we had food, the radio,
New seed catalogs to read together
And quiet hours for talk . . . . Tonight the snow
Is over There's no wind. The aftermath's
Clear pink. Tomorrow we will shovel path's.

—Ethel Romig Fuller

BEE TREES BESTED

Grover Stringfellow owns a small two story house in town of Rose Hill and not many months ago he noticed the bees working about the place but he did not think anything in particular about it. But later he found that the bees had become so numerous in two of the second story rooms that they had to quit using them as bed rooms. The bees went on working, however, and not long afterwads Stringfellow noticed that the honey was dripping down through the parlor ceiling and on the floor Then he removed the floor in the two upstairs rooms and found the space between floor and ceiling literally packed with honey He has now determined to remove the weatherboarding and get out all of the honey he can.. He is sure that one side of the house is fiiled there, too.

Mr. and Mrs. Charlie Perkins and daughter, Wilma of Britt and Mr. and Mrs. George Stokesbary were entertained to an oyster supper at the Clint Stokesbary home Sunday evening.

SCHOOL NEWS

Grades 7 and 8

This week we have finished up the work for the second semester

On Friday five members of our class were absent.

Keith Stille, Harold Swalve and Gertrude Groosheusch received 1-00% in spelling this week.

Grades 3 and 4

We have been reviewing for our final examinations this week. On Thursday and Friday we will write these tests.

The fifth grade completed their study of Health Habits This is only a one semester subject This second semester the sixth grade have health and cleanliness.

Mr. Patet made us a lovely cupboard for our room. We intend putting books in it and having it in our reading corner. We thank him very much for making it.

Grades 5 and 6

We want to thank the janitor for taking care of our plants during vacation It seemed nice to find them as pretty as they were when we left before Christmas.

Patty Kudie and Ruth Bell earned a rating of 100% in spelling this week. Almost everyone had a better score than on previous lessons.

We have been having division drills in fourth grade arithmetic Each day we have reviewed 15 different combinations Our scores would equal 15 if we had 15 combinations right The following people made a score of 15 each day Duard Lewis, Edward Barz, Junior Buntenbach

As a summary of their unit on clothing, the third grade pupils are making a booklet during their free time

We learned two new songs during our music periods this week They are both about winter play

The fourth graders have begun work in a new reader It is one of our room library series.

Grades 1 and 2

1-2 Grades

Before vacation Roger Ridder brought a sweet potato vine to school When we came back to school on Monday there were three long sprouts The longest one is nearly five feet long We are anxious to see how much it will grow

Rose Schaeffer has been absent all last week

On Thursday we made snow man posters.

The second graders made new spelling booklets for January

We are having a wheat experiment Each child has a little dish with some wheat seeds planted in it We are going to learn all about wheat and why we should eat a hot cereal for breakfast

STILL HOLDS RECORD

The "Ever Man's Class" of the Christian church Sunday school at Marshalltown taught by the pastor at one of the down town theatres seems to still hold the record for any Sunday school class in Iowa It has just closed its third year and during the year just ended on the best Sunday had a total attendance of 355 men During the whole year this class had a total attendance of 6,300 men It is said that at various times delegations of interested men from Sunday schools from almost every part of the state have visited the class to discover if they can the means used in making this class so popular

With barns closed to winter winds, the problem of producing high quality milk is made more difficult because milk readily absorbs barn odors.

$290,972 COLLECTED ON MARGARINE TAX

1936 State Department of Agriculture Revenue Sets Record

Thomas L. Curran, state secretary of agriculture, reported that 1936 revenue of the state department of agriculture was the highest in the state's history.

Collections of license fees and taxes by the department totaled $551,314 during the year while 1935 collections were listed as $486,501, the deparment reported.

The largest single item, the report said, was olemargarine taxes which totaled $290.972 The tax represented sales of nearly six million pounds of olemargarine during the year It was the highest collection for any year since the tax was imposed.

The department said that relatively high butter prices caused the increased olemargarine sales.

Other major items of revenue included mixed feed inspection fees and gasoline pump inspection fees.

LIFE IS TOO SHORT

Life is too short to hold the grudge against one
Who may have been repentent all these years,
Too short for malice, silent or outspoken,
That brings thy brother to the fount of tears.
Let us forgive as we would hope to be forgiven,
Let us remember trival things as naught·
Let not these clumsy hands break quivering heart strings—
Life is too short.
—From G. R. Bulletin Board.

HIS BEST PREACHER

Martin Luther in his autobiography, says "I have one preacher that I love better than any other on earth: it is my little tame robin which preaches to me daily I put his crumbs upon my windowsill, especially at night. He hops to the sill when he wants his supply From thence he always hops to a little tree close by and lifts up his voice to God and sings his carol of praise and gratitude. He is the best preacher that I have on earth."

A woman having the reputation of being unusually prudent stopped at a neighbor's house to borrow the use of the telephone

She called the butcher

"You needn't send up that five cents worth of cat meet. The cat caught a mouse.

The Sioux City, Iowa, Humane Society, with its very excellent annual report, sends out a blotter with these very clever lines.

"Be kind to all dumb animals,
And give the birds a crumb,
Be kind to human beings, too,
They're sometimes rather dumb."

The People Who Are Afraid

By RAYMOND PITCAIRN
National Chairman Sentinels of the Republic

Over much of the Old World today we are witnessing a swift and disturbing rise to power by self-appointed leaders of the People Who Are Afraid

Afraid of what? Afraid of freedom. Afraid of themselves and their own capacities Afraid of machines and their influence. Afraid of assuming responsibility for their own thoughts, their own efforts, their own lives Afraid of the future

That's why they are willing to turn to forms of government which offer to relieve them of that responsibility **That's why they are eager to scrap their own indentities for unsupported promises of security offered by Fascism or Communism or the various other isms which now tear Europe**

To the average American worker, proud of a national heritage of courage and self-reliance, this surrender to transient fears may seem a strange and remote thing But the prophets of defeatism, both at home and abroad, are not convinced of the American's attitude Hopefully they continue to seek converts here

Their way should be a hard one The American tradition remains one of freedom and achievement

The American people are not afraid of liberty, or they could never have written a Declaration of Independence and a Bill of Rights. They are not distrustful of their capacities, or they could never have conquered a continent. They are not fearful of machines, or they could never have produced a Fulton or an Edison. They do not dread the future, or they couldn't continue the bold and ambitious plans for national progress so typical of the American spirit today.

Europe and its cynics may continue to chant their swan songs of despair. But of America we still say with the poet

"I do not know beneath what sky
Nor on what seas shall be thy fate;
I only know it shall be high,
I only know it shall be great."

In such an outlook there is no room for fear.

Safety in auto driving is 99 percent common sense; accidents 99 percent thoughtless hurry.

Radio and Foghorn Combine to Give Safety to Liners

New Equipment of the Lighthouse Service

WASHINGTON — Up and down the Atlantic coast, from Fowey Rocks light near the tip of Florida to West Quoddy Head light on the northernmost part of the Maine coast, oceanside inhabitants recently heard the mournful wail of foghorns going day and night, in clear weather and foggy, for about a week.

To the layman the foghorn's roar may have seemed like a useless waste of energy and a considerable annoyance, but from the experiment the United States lighthouse service here was able to report the performance of its new distance test equipment. Ocean liners can tell, with this new dual sound and radio equipment, their distance and direction from a given lighthouse or lightship even in the most pea-soup-like fog.

Fog Is Foiled.

The idea behind this aid to marine navigation is the fact that science has found a way to circumvent the often freak apparent directions of sound signals in fogs. In the old days a foghorn blast might appear to come from straight ahead when, in reality, the sound source was many points to the port or starboard.

With the new equipment a ship's master merely has to time the arrival of the foghorn's roar in his pilot house and he can quickly work out his distance from it within the length of his vessel.

Synchronized with the emission of the sound signal is a characteristic radio signal from the lighthouse or lightship. The latter arrives practically instantaneously, while the sound signal takes 5.5 seconds to travel a nautical mile. The captain, by radio, thus knows when the sound starts, and with his stopwatch can time its arrival. The system has an accuracy of 10 per cent at the worst, which sounds like a lot but is really only a tenth of a mile, or 528 feet. Most of the passenger liners on the ocean and many freighters exceed 600 feet in length.

Moreover, with his radio loop aerial, the navigator can tell his direction from the radio beacon and its synchronized sound source.

Lighthouse Revolution.

Radio, in fact, has produced a revolution in lighthouse keeping from the days when it was rightly called the world's loneliest occupation. More and more radio telephone communication is bringing the lighthouses that dot the nation's coast line into quick and close touch with the happenings in more ordinary walks of life. The communication services of the coast guard and navy are links in this chain.

Under the direction of I. L. Gill, signal engineer in charge, the radio beacon service has been worked out with ingenuity that at once brings increased safety to shipping and almost automatic equipment which makes it possible for non-technically trained personnel to maintain the stations.

In the same way the radio direction-finding equipment aboard ships at sea has been so designed that it can be operated by officers on the bridge without the services of a trained radio operator.

Maya Breadnut Urged for South Florida

WASHINGTON. — Breadnut trees, close botanical relatives to the famous breadfruit trees of the South Sea Islands, are suggested as desirable for cultivation in southern Florida, by Dr. O. F. Cook of the United States Department of Agriculture.

The trees recommended by Dr. Cook come from Yucatan, and were known and used by the Maya people who built America's highest native culture centuries before white men came. Southern Florida is climatically very similar to the breadnut's native land, and geologically it is almost identical, being underlain with a porous coral-limestone formation.

The Maya breadnut tree has a large, starchy seed which is gathered for food for human beings, and is relished also by live stock. Roasted or boiled, it tastes very much like the Spanish chestnut.

Even more important, Dr. Cook suggests, may be the use of its leaves as pasture for cattle, which often have a hard time picking up a living off the thin grasses and other ground vegetation in Florida.

Helium Gas Produced Artificially by Three English Scientists

Obtained From Boron by Neutron Stream

"THE world is made of 92 different kinds of building blocks," said the chemist of the 19th century. Now there are over 330 recognized varieties. The chemistry of yesterday recognized just 92 kinds of atoms—"chemical elements"—and woe betide him who was bold enough to suggest that one kind might be changed into another.

But the gay nineties brought many strange things, and the strangest of all, to chemists at least, was the discovery of radioactivity by the French scientist Becquerel in 1896. For this was later proved to mean that the chemical elements are not all endowed with eternal life as was hitherto supposed. Those atoms which are called radioactive do not live forever but sooner or later blow up—and what is left is another kind of atom.

The transmutations of which the ancient alchemists dreamed — and which chemistry had definitely ruled out as impossible—were found to be going on all about us.

Man Couldn't Control It.

But man had no finger in this. There is nothing on earth that anyone can do to prevent a radioactive atom from changing into another kind, or to make it do so at any particular moment. But it was soon found that the high-speed particles which shoot out when an atom explodes could disrupt other atoms and change them into another kind. If the shades of any alchemists had been present at these experiments their satisfaction must have been immense. No longer does science regard their objective as utterly ridiculous.

The actual amount of material transmuted in these early experiments was just a few atoms—no way to produce elements artificially in usable quantities was in sight. But for many years now improvements in technique have been developing. And recently a report has come from an English laboratory that a chemical element has been produced artificially in amounts large enough to measure by ordinary methods.

Helium Made From Boron.

Drs. F. A. Paneth, E. Glueckauf and H. Loleit, at the Imperial College of London, have succeeded in experiments taking about a month, in producing artificially a few ten-millionths of a cubic centimeter of the gas helium—that light, non-inflammable gas with which the United States government fills its dirigibles.

This exceedingly small amount of transmuted material might not seem to the layman as anything to get excited about. It does, however, represent the passing of another milestone in modern alchemy. For enough man-made helium was formed to generate a pressure that could be measured

The raw material in the process was boron, one of the constituents of ordinary borax. And the transmuting agent analogous to the "philosopher's stone" of old, was a stream of neutrons—particles similar to the nucleus of the hydrogen atom except that they carry no electric charge.

Tough Steaks Tamed by Papaya Juice From the Tropics

CINCINNATI, O. — Civilized man is at last going to have a chance at a cooking aid that South Sea Islanders have enjoyed for centuries. A commercial company here is preparing to put up the juice of the papaya tree in retail-size bottles, for home use in tenderizing tough cuts of meat.

The juice of this tree, sometimes called the melon tree because of the shape of its tasty fruit, contains a vegetable analogue of pepsin, that has the power to digest proteins. For a long time this substance, known to the pharmacist as papain, has been a standard ingredient of indigestion remedies.

Engine in Knapsack Powers Farm Worker

BERLIN.—A knapsack gasoline engine, which is carried strapped to the back of the operator, is being made here to reduce the physical labor and speed up the output of the agricultural worker engaged in light farm tasks. Power is transmitted through a flexible cable

The engine runs at 3,000 revolutions per minute at which it gives off one horsepower.

The miniature power plant drives a new type of rotary cultivator which covers a strip as wide as 11 inches.

POULTRY

GRASSHOPPERS AS POULTRY MENACE

Feared in 1937; Are Host for Three Parasites.

By J. D. Mizelle, Parasitologist, College of Agriculture, University of Illinois.—WNU Service.

Warnings of a possible heavy infestation of grasshoppers in 1937 hold a menace to poultry flocks as well as a field crops.

Grasshoppers have been found to be the intermediate host for at least three poultry parasites, chief of which are tapeworms and round worms.

Poultry losses cost Illinois farmers approximately $4,000,000 annually. And 20 per cent of the annual poultry mortality, as judged by autopsy findings, is caused by tapeworms which spend a part of their life cycle in such intermediate hosts as grasshoppers, houseflies, stableflies, dung beetles, ground beetles, earthworms, snails, slugs, ants and crustacea.

It has also been found that poultry becomes infested with roundworm parasites by eating grasshoppers, earthworms, cockroaches, snails, pill bugs, waterfleas and dung beetles. However, few parasites are able to develop directly without spending a part of their life within an intermediate host.

While proper sanitary measures will not prevent the grasshopper menace, good poultry management will go far toward the control of parasites with both direct and indirect life histories.

Poultry owners will find that it pays to have clean, well-constructed houses and equipment, clean yards and ranges, clean, well balanced feed and water. It is also important to dispose of diseased fowls and see that houses, troughs and watering utensils are kept clean. These measures combined with any other steps that will destroy intermediate hosts or prevent their access to farm flocks will cut down the heavy annual poultry loss and raise egg and meat production.

Poultryman Advises How to Treat Colds in Birds

To get rid of colds that have started in a poultry flock the first thing to do is to isolate all birds showing signs of a cold, states a North Carolina State college expert. As this trouble is usually caused by drafts and dampness together with poor ventilation, poor feeding, and overcrowding, the next thing is to look for and eliminate the cause.

Check carefully on the feeding schedule and give the flock Epsom salts at the rate of one-half pound to each three gallons of water. Keep a good germicide in the drinking water while there is evidence of the trouble. The house and utensils should also be disinfected. Where the trouble is well established it is not economical to treat the individuals and these should be destroyed. Where commercial sprays for colds are used the directions should be carefully followed.

Poultry Notes

The principal cause of blindness in hens is worms.

* * *

Be sure to feed the old hens plenty during their molt.

* * *

A new British machine tests and grades 3,000 eggs an hour.

* * *

Young turkeys, or poults, require more attention than nearly any other fowl.

* * *

It takes from 4 to 12 weeks to tell whether a baby chick is male or female.

* * *

The first indication of a hen quitting is a comb starting to dry up and old feathers easily pulled out.

* * *

A Leghorn hen in Japan is credited with a world record in egg-laying. According to reports this hen allowed herself only four holidays and shelled out 361 eggs in 365 days.

* * *

Have plenty of nests. Nests are easily built but too often neglected. tion.

* * *

Putting all the pullets into the same laying house at the same time is not always a good practice for the poultryman.

* * *

The bureau of animal industry says that it costs the average mid-western poultry plant 2½ cents a pound to dress poultry. This cost depends partly on the volume of the business done.

* * *

The average egg production of hens in the United States in 1934 was 76.7 eggs.

* * *

Nevada's poultry and egg co-operatives report business increased 366 per cent during the 1935-56 marketing season.

* * *

When turkeys eat feathers the vice may be controlled by feeding clover, alfalfa, or soybean hay. A supply of fibrous grains, such as oats, barley and buckwheat, helps to curb the habit.

Casual Clothes in Tailored Wools

By CHERIE NICHOLAS

CASUAL clothes were never more attractive than they are at this very moment. Planned to perfection in colorings as well as textures, and beautifully styled and tailored as they now are, whether you're planning either a resort, cruise or stay-at-home wardrobe it's your casual clothes in the new stunning woolens that are sure to fit into the picture in the most fashionable and comfortable way.

Your frocks will be in lightweight or sheer wool and will slip nicely under your warm coats for northern and cruise wear, as well as being admirably adapted to active coatless days in the sunny south. Your coats and suits will be in wool in varying weights according to the climate you choose—but no matter what type you select, you can be sure of the requisite amount of warmth with no fear of the tired feeling that comes from a coat of burdensome weight.

For wear all day, every day, in any climate, lightweight wool frocks are styled on practical and jaunty lines as they have never been styled before. Bright and dark colors in gypsy, in Tyrolean peasant high shades, in plaids, in monotones are good for immediate wear for travel or town while pastel tones are recognized as becomingly appropriate for warm resorts. Pictured to the right is a happy little frock in plaid cashmere wool. Clever use of the striking pattern slims the body lines in flattering effect. A slide fastener closing from neck to hem is smart and young and a boon to the girl who must make a nine o'clock class, keep a business appointment or appear on deck at an early morning hour. A mannish little velveteen tie loops at the front in a jiffy and a sporting leather belt marks the trim waist.

For wear over frocks of this type with your trig little suede or felt hat there are broad-shouldered woolen top coats with the same nonchalant poise as frock and headgear. Warm, and weather resistant, they are smart and becoming and are charmingly appropriate for town, country or travel be they with or without fur. Whether these coats be belted or flared or swinging wide in a swagger line they are cut with freedom for wear over wool frocks or skirt-and-jacket combinations.

The chic of the casual topcoat is illustrated in the model to the left in the picture. Here a gray chevron wool (gray is high-style this season) has a flaring lapel collar and pocket tabs of soft gray krimmer. The flared skirt hips in at the waist under a sturdy leather belt.

Wool and fur ensembles are also most excellent all-purpose choices as well. Very smart indeed are swagger fur coats and capes lined in tweeds and monotones to match accompanying wooler frocks or skirts. A beautifully styled triple-purpose wool ensemble is shown centered in the foreground of the group. Here a slender skirt of rough textured nubbly wool in a rich gold color is topped by a matching fitted jacket which may be worn with or without a blouse. As you see, a fingertip length warm swagger coat in the same wool fabric slips over all. It has modish fulled shoulders and a tuxedo collar of luxurious brown beaver. Masterfully tailored, it is good style for town or country, northern winters or cool days in southern climes.

© Western Newspaper Union.

GYPSY HEADDRESS

By CHERIE NICHOLAS

A handkerchief of red silk chiffon edged with sequins worn over the hair in gypsy fashion to protect milady's wave flavors of romance and the picturesque, does it not? Ever so smart this season! Young girls are quite excited over the idea and novelty silk headdress handkerchiefs are the call of the hour now that the party season is on full blast. The latest also is to border the hemline of the yards-and-yards around the skirt of the black mousseline evening dress with multi-colored bands of silk taffeta. See the gown in the picture. It is an Alix creation. The fact that the black mousseline is posed over a white organdy petticoat stiffened with horsehair and that gypsy colorings are featured makes this a costume of unusual distinction.

VELVET LEADS WAY IN STYLE INTEREST

By CHERIE NICHOLAS

Velvets have a way with them this season. They are not only crush-resistant but they seem to like the crowd. They certainly have gone places, done things and looked right smart. Now, they have stepped right into the midwinter festivities. Velvet wraps, gowns, and little jackets, velvet lounging pajamas for the leisure hours of winter sports.

Velvet nighties and robes of washable velvet, pajamas, hostess gowns and bed jackets, lovely velvet mules and sandals, boudoir quilted pillows and bed covers of delicate shades of velvet.

Men have dressing gowns, smoking jackets, and collar boxes of velvet in rich, dark shades.

Little girls may have velvet dresses just like mother's, and little girls get the same satisfaction out of their velvet dresses that mother gets out of hers. They feel dressed up and they love it.

Smart velvet coats for little boys as well as little girls with tiny velvet berets to match, are to be found and they do look well.

The older woman finds velvets for every hour of her day, and this year we have our velvets properly styled, not only for every hour of the day but becoming clothes for women of every age.

Turbans for Evening Are Proving Popular in Paris

Turbans are proving immensely popular in Paris for evening wear. They are practical for last-minute invitations where a woman has not time to have an original coiffure arranged by a hairdresser. Silver or gold lame is the most popular material for the evenings turbans, although many are made of silver and dressed exactly like real hair. Little velvet caps, exactly matching one's gown, also are shown in the newest collection.

For Smart Costume

Bordeaux red and black are combined for a smart woolen costume.

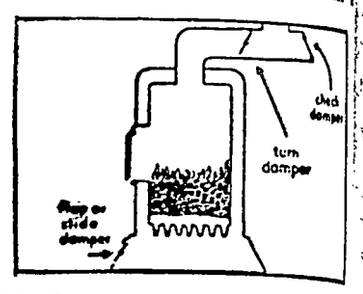
Home Heating Hints

By John Barclay, Heating Expert

Getting Fire to Burn Briskly to Produce Quick Heat on Cold Mornings

WHAT a joy and comfort it is to get your home heated quickly on cold mornings! And how easily it can be done!

Shake the grates gently. When a red glow appears in the ashpit, stop shaking. Next, open the ashpit damper and close the check damper until the fire burns briskly. Should fresh fuel be necessary, feed it on the fire in a thin layer. Give it time to burn well and heat the house, then add a full charge of coal. When the gases have burned off, reset the dampers for normal burning.



This same rule applies should the fire get very low and almost burn itself out at any time. Be careful not to smother it with too much coal. Open the ashpit damper and close the check damper. When the fire again is burning brightly, shake the grates gently until the first red glow appears in the ashpit, add a full charge of fuel, allow the gases to burn off, reverse the dampers—close the ashpit damper and open the check damper. That's the way to save fuel and cut down trips to the cellar.

Gild Their Teeth

The ladies in old Japan and also of today, to some extent, gild their teeth, and those of the Indies paint them red. In Greenland the women color their faces with blue and yellow. However fresh the complexion of the Muscovite may be; she would think herself ugly if she was not plastered over with paint. The Chinese used to have their feet as diminutive as those of the she goats. In ancient Persia an aquiline nose was often thought worthy of the crown.—Chicago Tribune.

Keep your body free of accumulated waste, take Dr. Pierce's Pleasant Pellets. 60 Pellets 30 cents.

Living Our Careers

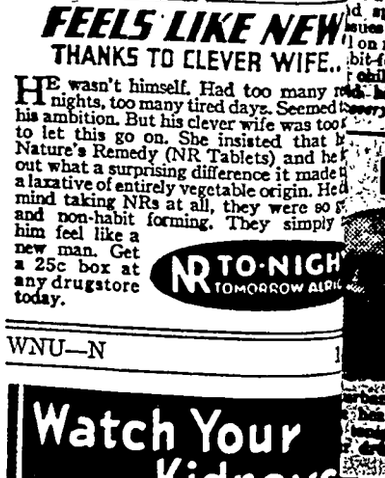
Speaking of careers, life is a career. Study every step.

ONLY LUDEN'S MENTHOL COUGH DROP will do these 3 things... and all for . . . 5¢

1. Clear your head
2. Soothe your throat
3. Help build up your ALKALINE RESERVE WHEN A COLD STRIKES!

Three Necessary Things

To become an able man in any profession, there are three things necessary — nature, study and practice.—Aristotle.



HE wasn't himself. Had too many restless nights, too many tired days. Seemed to lack his ambition. But his clever wife was too wise to let this go on. She insisted that he try Nature's Remedy (NR Tablets) and he found out what a surprising difference it made. NR is a laxative of entirely vegetable origin. He didn't mind taking NRs at all, they were so gentle and non-habit forming. They simply made him feel like a new man. Get a 25c box at any drugstore today.

NR TO-NIGHT TOMORROW ALRIGHT

WNU—N

Watch Your Kidneys

Be Sure They Properly Cleanse the Blood

YOUR kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes need their work—do not act as nature intended—fail to remove impurities that poison the system when retained. Do not

Then you may suffer nagging backache, dizziness, scanty or too frequent urination, getting up at night, puffiness under the eyes; feel nervous, miserable—all upset.

Don't delay? Use Doan's Pills. Doan's are especially for poorly functioning kidneys. They are recommended by grateful users the country over. Get them from any druggist.

DOAN'S PILLS

Crochet Tot Snug and Warm Three-Piece Set

Pattern 1097

Miss Five-to-Twelve will be snug, warm and proud in a hand-crocheted cap, scarf, and muff-set of plain crochet, with picot-stitch trim. Pattern 1097 contains directions for making the set in 5 through 12 year size (all given in one pattern); illustrations of it and of all stitches used; material requirements.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle Needlecraft Dept., 82 Eighth Ave., New York, N. Y.

Write plainly your name, address, and pattern number.

If You're Told to "Alkalize"

Try This Remarkable "Phillips" Way Thousands are Adopting

On every side today people are being urged to *alkalize* their stomach. And thus ease symptoms of "acid indigestion," nausea and stomach upsets.

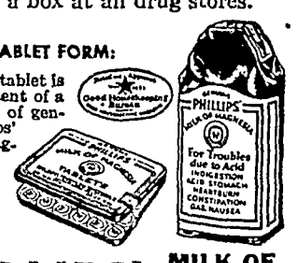
To gain *quick* alkalization, just do this: Take two teaspoons of PHILLIPS' MILK OF MAGNESIA 30 minutes after eating. OR — take two Phillips' Milk of Magnesia *Tablets*, which have the same antacid effect.

Relief comes almost at once — usually in a few minutes. Nausea, "gas" — fullness after eating and "acid indigestion" pains leave. You feel like a new person.

Try this way. You'll be surprised at results. Get either the liquid "Phillips" or the remarkable, *new* Phillips' Milk of Magnesia Tablets. Delightful to take and easy to carry with you. Only 25¢ a box at all drug stores.

ALSO IN TABLET FORM:

Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.



PHILLIPS' MILK OF MAGNESIA

Conscience Better Guide

One's conscience often knows better than his brain.

CHECK THAT COUGH BEFORE IT GETS WORSE

Check it before it gets you down. Check it before others, maybe the children, catch it. Check it with FOLEY'S HONEY & TAR. This double-acting compound gives quick relief and speeds recovery. Soothes raw, irritated tissues; quickly allays tickling, hacking. Spoonful on retiring makes for a cough-free sleep. No habit-forming, stomach-upsetting drugs. Ideal for children, too. Don't let that cough due to a cold hang on! For quick relief *and speeded recovery* insist on FOLEY'S HONEY & TAR.

FARMER BOY

ONE of the best known medical men in the U. S. was the late Dr. R. V. Pierce of Buffalo, N. Y., who was born on a farm in Pa. Dr. Pierce's Favorite Prescription has for nearly 70 years been helping women who have headache and backache associated with functional disturbances, and older women who experience hot flashes. By increasing the appetite it helps to upbuild the body Buy of your druggist. New size, tabs., 50c, liquid $1.

"Quotations"

—▽—

The whole secret of life is to be interested in one thing profoundly and in a thousand things well.—*Horace Walpole.*

Do not cast your heart before the world; the world is an ill-trained hound which does not retrieve.—*Victor Cherbuliez.*

The thing that impresses me is the reverence that Americans show for great men and great deeds.—*Emil Ludwig.*

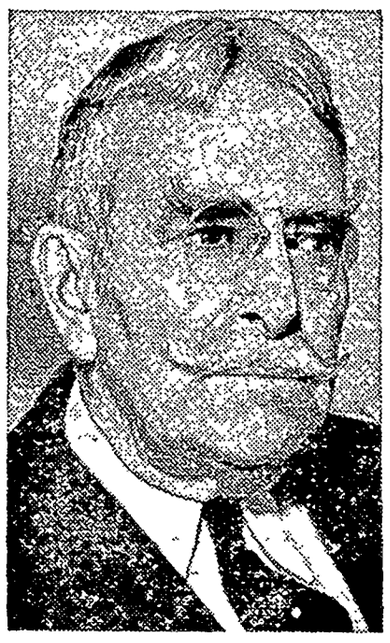
Poster for Boy Scouts' Jamboree

Howard Chandler Christy (left), noted artist and illustrator, pictured as he presented to Congressman Sol Bloom of New York, his poster of the "Ideal Boy Scout." The poster will be placed in every post office throughout the nation, as well as in other public buildings, in connection with the Boy Scouts' Jamboree of 1937, to which scouts will come from all over the world.

COLLEGE TRUSTEE

Mrs. John Appleton Clark, twenty four years old, of New York city, who was recently elected a member of the board of trustees of Sarah Lawrence college. She is a member of the class of 1932 and the first of the college's alumnae to be elected to the governing board. Mrs. Clark is also believed to be the youngest member of a college governing board in the country.

POLAR HERO HONORED



Brig. Gen. David L. Brainard, the last survivor of Greely's tragic expedition to the Arctic in 1881-84, who was recently named by the American Polar society to be its first honorary member. The Polar society presented General Brainard with a scroll on his eighteenth birthday recently.

Wins $2,000 Argentine Air Trophy

Dewane L. Wallace, Wichita, Kan., (center) receives the $2,000 Argentine trophy, major prize award of the ninth annual All-American air maneuvers at Miami, Fla., recently. Wallace won the 25-mile race for planes with motors of 500-cubic inch displacement. Awarding the prize are the original donors, Mr. and Mrs. A. A. Silva, of Argentina.

Kelley of Yale Receives "Most Valuable Award"

With members of his family as proud witnesses, Yale university's grid star, Larry Kelley, was presented with the John W. Heisman trophy, symbolical of the designation "best all-around player of the 1936 football season." (Left to right) Lawrence W. Kelley, father; Larry Kelley; Walter Conwell, president of the Downtown A. C., who made the presentation; Mrs. L. W. Kelley, mother, and Virginia Kelley, sister.

The Mark "Sterling"—

Fascinating History of the Term and Its Meaning Wherever Applied

THE name sterling silver has a fascinating history. The name originally was Easterling, but in the progress of time became contracted to sterling. The Easterlings were a group of men who, in the Twelfth century, came to England from Camden in Europe, a place to the east of England and from this geographical fact gained their name. The men formed a guild to uphold standards of excellence in their work, and to protect themselves from robbers and pirates.

The high standards pertained also to the coinage with which they paid those with whom they dealt. So unvarying was this money, and of such pure silver, that it became a gauge of excellence for all silver. The proportion of pure silver to the alloy was enormous, being at the ratio of 925 silver to 75 copper in each 1,000 parts. This same ratio pertains even today in all sterling silver.

Sterling Standard.

So adamant is this ratio, that no deviation of it is permissible under the name sterling. Severe penalties are laid down by our federal statutes for infringements of this ruling. So when you see the word sterling on the silver you already have or on pieces you are buying, you know the articles are of the finest grade of silver. The silver may be marked 925 fine, or 925-1000, for all these markings indicate the same thing —sterling silver.

The term solid silver is not synonymous with sterling silver since the proportions may not be 925 fine. Solid silver is a more flexible term permitting more alloy.

Plate and Plated Silver.

The word plate, when applied to silver was once a guarantee of pure silver, but now the word is so associated with plated silver, that the name, silver plate, has lost its high standing. It is recognized in its true sense of sterling, by a comparative few persons, those only who know its rightful significance, and are versed in names of silversmiths, recognizing wares as true plate or as plated silver thereby.

So absolute is the maaning of sterling as the highest grade possible in comage or silverware, that the word has become synonymous of worth and value whether applied to silver, material things or to character.

Still Coughing?

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid nature to soothe and heal the inflamed membranes as the germ-laden phlegm is loosened and expelled.

Even if other remedies have failed, don't be discouraged, your druggist is authorized to guarantee Creomulsion and to refund your money if you are not satisfied with results from the very first bottle. Get Creomulsion right now. (Adv.)

Here's Simple Way to Ease a Cold

Two Quick-Acting, Quick-Dissolving Bayer Aspirin Tablets with a Glass of Water

The modern way to ease a cold is this: Two Bayer Aspirin tablets the moment you feel a cold coming on. Then repeat, if necessary, according to instructions in the box.

At the same time, if you have a sore throat, crush and dissolve three BAYER tablets in one-third glass of water. And gargle with this mixture twice.

The Bayer Aspirin you take internally will act to combat fever and the pains which usually accompany colds. The gargle will act as a medicinal gargle to provide almost instant relief from rawness and pain. It is really marvelous; for it acts like a local anesthetic on the irritated membrane of your throat.

Try this way. Your doctor, we know, will endorse it. For it is a quick, effective means of combating a cold. Ask for Bayer Aspirin by the full name at your druggist's — not for "aspirin" alone.

George Stille Loses Eye

George Stille was taking the track from a Caterpillar tractor Saturday afternoon, when a piece of steel chipped off the master pin and flew into his left eye He was taken to Spencer to the hospital where he was operated on Sunday afternoon, and the eye removed

Kermit and J. J Stille drove to Spencer Sunday evening for a visit with George. They report that he is doing as well as could be expected

PLENTY OF GOOD SEED CORN THIS YEAR, ROBINSON SAYS

There is sufficient seed corn in Iowa to take care of its 1937 needs, in the opinion of Joe L. Robinson, Farm Crops Department, Iowa State College

While certain sections of the state, because of more severe drouth conditions on grasshopper infestations did not produce sufficient seed for the 1937 corn crop, more seed was probably saved in other regions where a normal or partially normal crop was raised. This will result in a movement of seed corn from the northern and eastern to the southern and western parts of the state.

The cerified hybrid seed, amounting to about 100,000 bushels, has practically all been sold, Mr. Robinson states.

Germination of the 1936 seed corn has been uniformly good, data at the Iowa State College Seed Laboratory, under the direction of R H Porter, extension Plant Pathologist show The germination tests as a whole have been well over 90 percent strong, Porter declares. Many of the samples have run as high as 95 and 98.

Seed which has been tested and found good, should be kept properly stored There is little danger of seed corn getting to dry, and it should be kept out of the reaeh of mice or rats.

Do you know that one-third more children under five years of age die from burns than from automobile accidents? Furthemore, do you realize that accidental burns cause more deaths in children of this age than any single disease? It is a strange paradox and an unflattering one that we save children from diptheria only to have them burned to death.

75 MEN NOW AT WORK ON 2 COUNTY PROJECTS

Seventy five men are working on Hancock county's two private work relief projects at the present time, County Engineer said Tuesday

Five miles of road have been graveled up to January 1, the engineer said.

The two WPA projects started in Hancock county in November are also continuing to operate, county officials said.

NEW LICENSES

The new license year for hunting, fishing and trapping censes starts on April 1 All licenses expire on March 31, 1937 license forms will be furnished all County Recorders and are selling licenses some time March. the Conservation Commission announced

A Light all Night for 1c

Yes, you can burn a light all night for a penny! (And even less in many cases.) And what a lot of safety and comfort that one cent buys.

The cheapest burglary insurance on earth.!

The cost of one fall in the dark could easily pay for your all-night light bill for ten years.

Burn an all-night light for a comfortable, carefree satisfying sleep

Central States ELECTRIC COMPANY
ELECTRICITY DOESN'T COST—IT SAVES!

FELCO

Order Grass Seed Now!

On account of weather conditions you can understand that there is a short crop of all grass seed and not much of it good quality. Markets are strong and there will be no good seed left at the end of the season.

We purchased a reasonable supply early, we cannot buy too heavy as we do not know what our patrons will use. So now we urge you to come in and place your orders at least for the part that you know you will need The seed we have contracted will be our usual high quality and we are afraid that we cannot get as good a seed on late orders is the reason we urge you to order now.

Goodell High School Wins "Battle Of The Century"

LED BY ZIELIE, GOODELL WINS IN FAST BALL GAME

Shamrocks Lead Three Quarters Then Strike Bad Slump

(By High Staff Sports Writer)

If a boy named Zielie had stayed at home, the story might have been different; but, as it was, Zielie came along with the Goodell High School team last Friday night and dropped six field goals and two free throws into what proved to be the wrong basket, (for Klemme) and the Shamrocks lost another hard-fought battle to their traditional rivals by a score of 33 to 31. The game had all of the thrills the public could ask for, and the only disappointing feature was the outcome Klemme fans had felt that this was the year to get even for past scores but saw their hopes shattered in the final seconds of the game when Boller, Goodell forward, slipped into the open to score the goal that broke a 31 to 31 tie.

Shamrocks Lead Three Frames

The Shamrocks, led by Jorgenson, who accounted for eleven of the Klemme points, were ahead in the game for three quarters, but were unable to ward off the heartbreaking scoring drive put on by the visitors in the final period of play. The locals led 11 to 2 at the end of the first quarter; 19 to 11 at the half, and 26 to 22 at the end of the third period.

Keeper, Lemke and Schuldt were constant scoring threats for the locals and accounted for eight, seven and five points respectively Kaduce was held scoreless for the first time this season, but made valuable use of his height on both offense and defense.

Little Shamrocks Win

The Little Shamrocks upheld the honor of the home town by soundly trouncing the Goodell seconds by a score of 31 to 10. Grosshuesch was going strong, and he accounted for six field goals. Kluckhohn and Trampel got three apiece.

Both teams are pointing for the return engagement with Goodell in February.

Following is the box score of the first team game:

SHAMROCKS—31	Kingery, Coach		
Player	FG	FT	PF
Jorgenson, f	5	1	3
Lemke, f	3	1	1
Grosshuesch, f	0	0	0
Kaduce, c	0	0	3
Schuldt, g.	2	1	4
Keeper, g.	3	2	1
Totals	13	5	12

GOODELL—33	R. Fish, Coach		
Player	FG	FT	PF
Zeilie, f	6	2	0
Boller, f	3	1	0
Dawson, c	0	2	0
Dennis, g	2	0	2
Hofer, g	1	0	4
Burke, g	2	0	1
Totals	14	5	7

SEVEN EAGLES STANDINGS

In the Seven Eagles Conference play last week Goodell jumped into the Conference lead by defeating the Shamrocks, who until then were tied with Goodell for first position Kanawha downed Woden 31 to 20, while Crystal Lake defeated Hayfield 32 to 13.

This week Thursday Goodell invades Hayfield, and Friday Klemme goes to Woden and Crystal Lake goes to Kanawha.

STANDINGS	Won	Lost	Pct.
Goodell	5	0	1.000
Klemme	3	1	.750
Kanawha	3	2	.600
Crystal Lake	2	3	.400
Woden	2	3	400
Hayfield	0	4	000

Fish meal and cod liver oil if fed in large amounts to fattening poultry cause an undesirable flavor.

HIGHLIGHTS OF THE BASKET BALL GAME

The biggest crowd of wild, enthusiastic fans ever to see a basket ball game in Klemme saw Goodell defeat the Shamrocks here Friday evening.

Every available spot was taken, chairs and ladders were used to gain vantage points, and believe it or not one of Klemme's heavyweight business men was standing on top of the drinking fountain in the hall!

We certainly hand it to Goodell for having a bunch of loyal followers. Rev. and Mrs. Harry Herlein and Toky Ahrenkeil drove from Des Moines to see the game, and Mr and Mrs. Joe Kissinger came clear from the other side of Spirit Lake That's mighty fine loyalty of Goodell's former residents-

Similar to last years game . . . Goodell pulled the "chestnut out of the fire" and looped the deciding basket in the last seconds of play!

Most of the fans of both towns looked like they had worked harder than the players! Referee Grant said it was the fastest game he ever officiated. And, was he ALL in!

And in the exitement even a coach forgets and runs out to go in a huddle with the team, thereby drawing a technical . but it didn't effect the scoring

Even in the heat of battle opposing players found time to kid each other and keep up a friendly feeling and both teams showed themselves as possessed of good sportsmanship

A mighty fine bunch of boys were playing their best on the floor Friday night.

At least one Goodell fan got a big kick out of Klemme's defeat and mailed a post card to The Times, with the following message:

"Extra! Extra! The game of the Century — Outstanding game of Seven Eagles Conference has become history — Rememper this game was planned to be played at Garner but was played on Klemme court. Goodell 33, Klemme 31. Ha! Ha!

Well, we can take it.

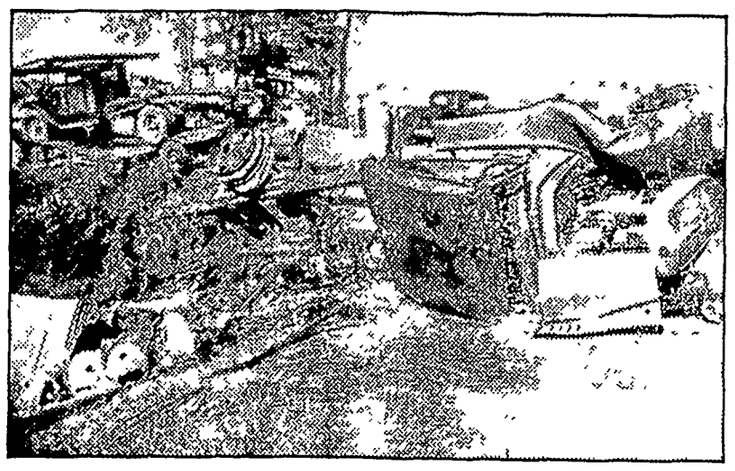
VAGABONDS SCALP FERTILE INDIANS IN BASKET TUSSLE

The Klemme Vagabonds, independent basket ball team, defeated the Fertile Indians here Monday night by the score of 40 to 20.

'Everyman's Fair,' Says Whalen

NEW YORK, (Special).—Grover Whalen, President of the Fair Corporation, announces that official support and foreign participation in the New York World's Fair of 1939 are reaching new "highs", and that here is an already obvious opportunity for every state to display advantageously its accomplishments and future possibilities an to join in making it one hundred percent "Everyman's Fair."

DYNAMITE AND OIL



Atchison, Kans.—Trapped in the crushed cab of their truck and showered with ignited gasoline, two drivers were burned to death, when colliding with another transport loaded with dynamite five miles southwest of here What is left of it, after the fire, is in the foreground of the picture.

It is such disasters as this, endangering the lives of the mo ing public generally that induc the National Safety Council to co sider rigid legislative measures fo safety This includes maximum hours of service by drivers, inspec tion of the vehicle particularly a to the carrying capacity of the bo in relation to the chassis, inspection of brakes, lights and tires.

Klemme Girl Selected To Go On Southern Tour With Choir

DOLORYS COOK WILL GO ON TOUR WITH COLLEGE CHOIR

Miss Dolorys Cook, daughter of Mr and Mrs. J. J Cook of near Klemme, who is a fresman at Morningside College, Sioux City, will leave January 26th on a concert tour through the south.

Miss Cook is a member of the Morningside College Choir composed of sixty students They will sing at fifty concerts and their trip will take them to Nebraska Oklahoma and Texas. The choir travels in two Grayhound Buses and will be on the tour for about three weeks.

SKATING POND PROVES VERY POPULAR FOR WINTER SPORT

The skating pond which has been built on city property north of the Reformed church, has proven to be about the most popular venture ever undertaken by the Town.

With plenty of sub-zero weather, the ice is getting in good condition and with the surface reflooded occasionally the pond should be one of the best in North Iowa

Carl Anderson, manager of the Iowa Union Telephone Co., provided poles and installed the light brackets, and the Central States Electric Co. strung the wires so that the pond is lighted at night

HELLO, FOLKS

Mr. and Mrs. Eddie Medaus are the parents of a baby girl born to them Friday. They now have two children, both girls. Miss Ethel Netland is assisting with house work and helping care for the new baby

BEST TAX COLLECTIONS REPORTED FOR HANCOCK

GARNER—County Treasurer McMillan reports 98 per cent of taxes paid, which is at least 2 per cent better than any previous year Mr McMillan also said that practically all farm taxes were paid and that only town property was delinquent

CARD OF THANKS

We wish to thank our many friends and neighbors for their sympathy, kindness, foral offerings and service so generously given us during our recent bereavement caused by the death of husband and father.

Mrs. Wm. F. Griemann, Sr.
and family.

Mystery and intrigue in Tibet. Don't miss the opening installment of Talbot Mundy's thrilling new serial, "The Thunder Dragon Gate," in The AMERICAN WEEKLY, the magazine distributed with NEXT SUNDAY'S CHICAGO HERALD AND EXAMINER.

Obituary

William Frederick Greimann, son of Frederick William Greimann and his wife Anna Maria Elisabina Holdbhugge, was born August 28,1851 in Emigloh, Westphalen, Germany He was babtized in infancy in the Lutheran church In 1854 when he was but three years old, he came with his parents to America After an ocean voyage of eight weeks they landed at New Orleans From there they came by steamboat up the Mississippi River to Guttenberg, Clayton County, Iowa Here they were received byrelatives, and they established their home in this county For us it is interesting to hear the stories that these old people tell of the hardships of early pioneer life, but they were not so pleasant and easy to endure In 1868 Mr Greimann was confirmed in the Lutheran church at Clayton Center, Ia

At the age of 26 he came to Hancock county with his brother, Fred and one sister, and they settled on a farm one and one-half miles south of Garner In 1881 he was married to Dora Lau and settled on a farm about three miles south and one mile west of Garner He made this his home the rest of his life, residing there for nearly 56 years. Here they labored and toiled together again enduring the hardships of pioneer life God blessed this home with thirteen children, two of which preceeded the father in death, namely Nellie and Ruth The other children are William F, Henry c, Dora, (Mrs Gesswine), Daisy, (Mrs. Henry Lemke), Ben F., Esther, (Mrs R H Schlawin), Louisa, (Mrs Albert Etchen), Aaron S., Hulda, (Mrs Fred Etchen), Martha, (Mrs Carl Swanson), and Ruben M. Dora, (Mrs. Gesswine) lives in Chicago The other children all live in the vicinity of Garner and Klemme

Mr Greimann's life was a busy and active one. He served this community for a time as township trustee and also as county supervisor. He was a member of Peace Reformed church in Ell Town from the early beginning Here he attended the services and had his children instructed in the Christian religion. In later years he was no longer privileged to attend these services because of failing health which often confined him to his house A number of weeks ago a severe cold or flu set in and caus his strength to decline more rapidly Good care by loving hands could not restore his waning strength. His hour of departure had come and God called him out of this life on Sunday evening, January 10th, 1937, at about 10·15 o'clock He was privileged to reach the high age of 85 years, 4 months and thirteen days.

Surviving him and mourning his death are: his grief stricken wife, the eleven above named children, thirty-eight grand-children, two great-grand-children, one brother and three sisters, and many other relatives and friends The brother is Henry Greimann, Blue Earth, Minnesota; and the sisters are: Mrs. Harnack, Benson, Iowa, Mrs. William Katter, Garner, Iowa; and Mrs. Obermiller, Garnavilla, Iowa.

May the Lord comfort the comfortless with his holy word.

Sees Need For Telephones In Rural School Houses

A Tribute To WILLIAM F. GREIMANN, SR. By Arthur Wellemeyer

Fifty-nine years ago William F Greimann came to Liberty Township, and three years later purchased a farm of raw prairie land and there he lived continuously until January 10th, 1937, when after a brief illness, at the age of 85 years, his long, active career came quietly to a close.

Nature was kind to Mr Greimann when she gave him a strong, healthy body, 6 feet tall She also gave him an abundance of optimism, and a big generous heart There was something big about Mr Greimann. When he purchased a farm, it was a big farm When he built a home it was large and convenient. When he planted a grove, it was abundantly large. His orchard was big His family of children was large He was kind and loving in the home, and generous and fair in dealing with his fellow men There was nothing small about Mr. Greimann and the community is glad that he lived so long.

DUARD LEWIS SURPRISED ON NINTH BIRTHDAY

Duard, son of Mr and Mrs Henry Lewis was nine years old Saturday, and in honor of the event his mother successfuly carried out a surprise party for him Saturday afternoon The Misses Barz and Azeltine, grade teachers, and the pupils in grades three and four were guests.

Games were played during the afternoon and supper was served at five o'clock. Thirty four were present.

Duard received many fine gifts and among other fine gifts was a telegraph outfit from his parents. In a comparatively short time Duard has become quite an expert "on the wires."

Mrs. Vincent Astor
Winthrop W. Aldrich

NEW YORK (Special).—Mrs. Vincent Astor, society leader and civic worker, has been appointed Chairman of a National Women's Advisory Committee for the New York World's Fair of 1939. Winthrop W. Aldrich, Chairman of the Chase National Bank, is heading the men's National Committee. Together they will enlist more than 10,000 committee workers in a nationwide campaign to arouse interest in and create support for the New York Fair. Grover Whalen, President of the Fair Corporation, has announced that State Chairmen will be named later and that every state will be brought into active participation in the New York Fair, making it truly national.

TELEPHONES A NECESSITY IN RURAL SCHOOL HOUSES

The news story telling of telephones being installed in rural schools in Sac county has caused more or less comment here, and a number of farmers are interested in the proposition.

A telephone in a rural school is a necessity, rather than a luxury and is a great cmonvenience for parents as well as pupils and teacher In times of bad weather. storms, school ground accidents and other emergencies the telephone will more than pay for itself.

The Times understands that a movement is being promoted in one of our rural districts to install telephones in the schools We believe it is a step in the right direction The cost of the service is small, and no doubt a number of schools in the vicinity of Klemme will be equipped with telephones. We are watching the development with interest.

CO-OPERATIVE OIL ASS'N HELD ANNUAL MEETING MON.

Theannual meeting of the Hancock County Co-Operative Oil Aswas held at Garner Mondey afternoon with bout 150 stock holders present.

The report showed that the company had a very successful year and the business amounted to $105.118 42. The company handled 50 car loads of gas, 7 car loads of kerosene, 21 car loads of tractor distilate, 3 car loads of lubricating oils and 13,012 pounds of grease.

Otto Pringnitz was re-elected director, and Albert Barz was elected director in place of Lou Grell

Herman Paul is manager of the Klemme station.

GARNER WOMAN HURT IN FALL ON STREET; ICE IS BLAMED IN AUTO CRASH

GARNER—Mrs. Alvin Graham 5 miles southeast of Garner, fell Wednesday night on an icy street, fracturing her arm. She was attended by a local physician and taken to her home Previous to this the same doctor treated Mrs. Irvin Van Raden for cuts and bruises after the car driveen by her husband was struck by a Hancock county gravel truck on highway No 69 3 miles south of Klemme The Van Radens are from Freeport, Ill Their car was badly wrecked and they are detained here for repairs They had been visiting in Western Iowa and were on their way home Ice on the highway, it is said, caused the accident. Louis Knoke was driving the truck.

SAFETY COUNCIL OFFERS RECOMMENDATIONS

W Earl Hall of Mason City is the chairman of the Iowa Safety Council Among its recommenations are the following·

A law requiring a idistinctive marking for school buses.

An increase of age from 15 to 16 years for the granting of driver's licenses.

A minimum spacing of 300 feet between trucks traveling in caravan style.

A more rigid law against passing on hills.

A jail sentencee for driving while license is suspended.

A stiffened penalty for driving while intoxicated.

A compulsory report of accidents to the motor vehicle department as well as local peace officers.

An increased regulation of bicycles on streets and highways.

A law permitting cities and towns to provide speed limits above the state maximum.

A constitutional amendment prohibiting the diversion of taxes and other funds intended for highway construction, maintainance and safety.

Scenes and Persons in the Current News

1—Dr. Frederico Laredo Bru being sworn in as president of Cuba, following the ousting of President Miguel Gomez. 2—Leon Trotzky, former Soviet leader who has been given an exile haven in Mexico. 3—Chinese National army that threatened civil war before the release of kidnaped Marshal Chiang Kai-shek.

PRODIGY OF PIANO

Ruth Slenczynski, eleven-year-old prodigy of the piano, who, when she made her debut in New York at the age of eight, could barely reach the pedals of the piano, is shown above as she stretches her fingers—two notes over an octave.

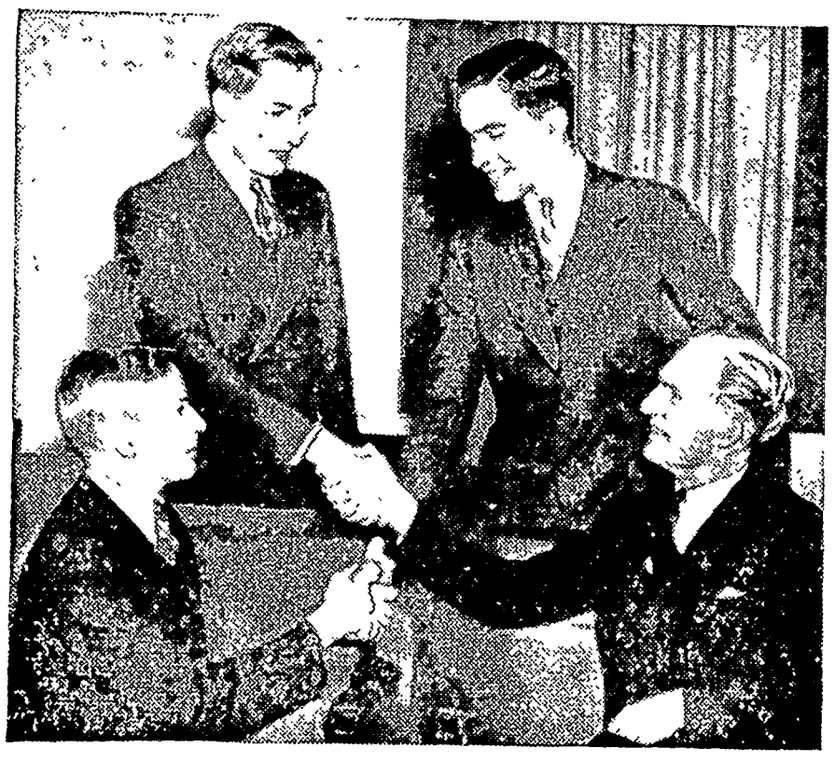
Wins Chicken-Eating Championship

Using a two-handed, harmonica style technique with devastating effect, Mrs. Edna Mae Potter is pictured as she ate her way to win the Los Angeles county champion chicken eater trophy, feature of a poultry show. Consuming 45 pounds of a roaster-dressing combination, she defeated four men for the prize.

Madamoiselles Vie in Cross Country Race

Shapes of all sizes, blondes and brunettes, tall and svelte, short and stumpy—the annual cross country race at St. Cloud, near Paris, France recently was open to all. Here you see the field charging over a stretch of rough terrain. Mlle. Fanchon was the victor.

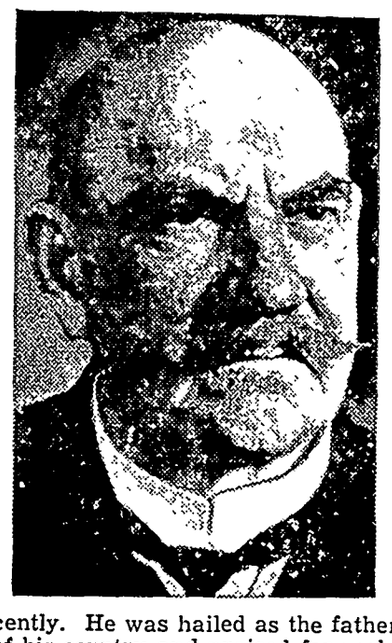
Winners of Rhodes Scholarships



Congratulations are in order and the four lucky ones felicitate each other as the camera clicks. They are four collegians selected for Rhodes scholarships from the middle Atlantic district. Standing are Harvey Wellman (left), of Perry, N. Y., student at Cornell university, and Nelson Leonard, of Mt. Vernon, N. Y., a student at Lehigh. Sitting—Robert Hartman, of Plainfield, N. J., attending Yale, and James R. Gardner, of Baltimore, Md., of Swarthmore.

75th Birthday of Finnish President Widely Celebrated

President Pehr Evind Svinhufvud of Finland whose seventy-fifth birthday was celebrated throughout the country with great enthusiasm re-



cently. He was hailed as the father of his country and praised for making a protracted fight for the constitutional rights of Finland against czarist Russian oppression.

Study Silversword to Solve Hawaii's Botanical Puzzle

Rare, Beautiful Plant Interests Scientists

WASHINGTON. — Silverswords, among the rarest and most beautiful of Hawaiian plants, constitute one of the world's prize puzzles in botany. Scientists of the Bernice Bishop Museum in Honolulu and of the Carnegie Institution of Washington, under the leadership of Dr. David D. Keck, have lately been making a new effort to get more definite facts about this spectacular plant's kinships and origin for it is believed that through such data new light may be shed on the still greater scientific riddle of Hawaii's unique forms of plant life, unlike anything else in the world.

The silversword forms a ball-like cluster of narrow, sword-shaped leaves, white with a silvery coating of hairs. From this basal rosette there shoots up a three to six-foot flower stalk, thickly beset with blooms. The plant is a member of the huge botanical family known as the Compositae, which includes such familiar things as sunflowers, dandelions, artichokes, thistles, goldenrod, and lettuce.

Not American Ancestry.

It has hitherto been considered more nearly related to the tarweeds, found on the Pacific coasts on both Americas, but Dr. Keck's researches now indicate that it is not, and that the silversword is more nearly related to the tree-like composites of Hawaii, a very remarkable group of plants whose nearest kindred are found far southwestwards across the Pacific, in Polynesia and the Australia-New Zealand region. The elimination of an American ancestry of the silverswords, and their assignment to an origin in a diametrically opposite direction, is considered an important step in plant geography.

Modern Baking Is Freed From Trial and Error Method

LONDON.—How to tell what kind of bread a variety of flour will make before starting to bake it is told in recent researches by two British physical chemists, Drs. P. Halton, of the Research Association of British Flour Millers, and G. W. Scott Blair, of the physics department of Rothamstead experimental station.

The "shortness" of a dough determines many characteristics of a finished bread or cake. By determining this ease of tearing of the dough in a mechanical way it is hoped to bake even better products than those that "mother used to make," without depending on the highly trained judgment of an experienced baker.

Scientists have attacked the problem by learning something about the fundamentals of baking. They have found that a short dough—one that tears easily—has long, heavy fibers.

Novel Test Devised

To determine shortness accurately, they use an instrument that tells how easily dough will flow through a nozzle when the pressure that pushes it is increased. Using this tester, they find that they can make the dough shorter by adding lard, iron chloride, or a phosphate, and less short by adding amino acids. Most peculiar of these acids is cystine, which makes the dough fibers hang together by hooking the long, thin molecules in strands like a series of rope ladders.

The tests are more sensitive than are those of the baker, and more accurate. Furthermore, they are resulting in changed flour characteristics so that the finished product can be rigorously controlled.

Molasses Has High Nutritional Value

CALCUTTA. —Molasses, cheap by-product of the sugar industry, has a higher nutritional value for human beings than the pure crystalized sugar that is sought as the principal product, declare Drs. J. C. Pal, N. M. Roy and B. C. Guha of the Calcutta Institute of Medical Research. They state that molasses has a notably high content of vitamin B, and C, and of calcium, phosphorus, and iron.

Breakfast the Event for Which People Are Most Often on Time

Studies in Punctuality Made in a College

BREAKFAST is an attraction to which the average person is most often on time. To band and choir rehearsals he is late about half the time. Business appointments are met punctually about three-fourths of the time.

These are not guesses or estimates. They are based on stopwatch measures made secretly of the students at Ripon college by Dr. George J. Dudycha and the few members of the faculty, sworn to secrecy, whom he took into his confidence. The stop was kept hidden. Notes were made in code. In general, the peculiar behavior of a man who insisted on making notes at breakfast, at football games or entertainments as well as at class was dismissed without comment and with little notice by the students.

Not only do the different situations call for a more or less strict adherence to punctuality, but they also call for a greater or less amount of promptness or lateness, Dr. Dudycha found.

Earliest of Entertainments

The crowd gets together earliest at entertainments (where the best seats are at a premium?). They come moderately early to breakfast and vespers. They manage to get there just on time for an eight o'clock class or a business appointment. They are generally slightly late to extra-curricular activities.

Nevertheless, despite all this variation in punctuality for specific situations, a significant association was found between an individual's promptness, or lack of it, on the different occasions. There really is a general trait of punctuality or of tardiness, Dr. Dudycha concludes in his report to the Archives of Psychology. The laggard may not be late on all occasions, he may show up early for breakfast quite often, but still in general it may be said that he is chronically tardy.

The punctual student is likely to be more intelligent than the ten o'clock scholar. The less neurotic students and those who are more self-sufficient tend to be more punctual.

How Nerve Messages Are Transmitted by Electricity

NEW YORK.—New light on how you think—the electrical means by which messages are transmitted through the nerves of the body—was presented to a meeting of the American Physical society here.

Drs. Kenneth S. Cole and Howard J. Curtis of the department of physiology of Columbia university's College of Physicians and Surgeons described the new experiments on this most-baffling of scientific problems. They said:

"The exact mechanism by which a nerve transmits its message is not understood at the present time, but it has long been known that a nerve impulse is in part at least electrical in nature.

Measuring Electrical Properties.

"In order more fully to understand the process of excitation it is necessary to measure the electrical properties of the nerve in the same way as it is necessary to measure the electrical properties of a wire before its current carrying ability can be predicted. This paper reports such measurements on resting nerves. It was found that the membrane surrounding the individual nerve fiber offers a high resistance to the passage of an electrical current, which means that the ionic carriers of electricity find difficulty in getting through this membrane.

"On the other hand, its electric capacity, that is, its ability to store up electrical energy, is high. Thus an electrical current can pass into (or out from) a nerve fiber without causing it to lose any of its dissolved salts which are essential to the life of the cell. Work is now in progress to determine the change, if any, in these properties when the nerve is in a state of excitation."

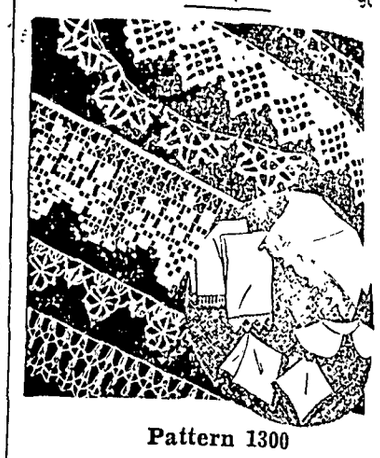
Soviet Geologists Find New Mineral Deposits

MOSCOW.—More than 800 geological parties have been in the field exploring Soviet Russia's mineral resources and crustal structure.

Half of them mapped the layers of the earth, while 80 were engaged in exploration. Other parties surveyed deposits already discovered.

Discovery of large deposits of high grade borates in the Lake Inder district is expected to free the Soviet Union from dependence in this respect upon foreign countries. New deposits of coal, lead and zinc ores, rare metal ores and bromine-containing salt were also reported.

Lots of Variety in Crocheted Edgings



Pattern 1300

Wonderfully dainty edgings, the laciest of borders, can roll off your crochet hook if you have pattern 1300. You can crochet an inexpensive bit of dress-up for collar and cuff set, lingerie, hankies towels, sheets, cases and napkins. The top edging simulates tatting but is easier and quicker to do. Even a beginner will find this pattern simple to follow. Pattern 1300 contains detailed directions for making the edgings shown; illustrations of them and of all stitches used; material requirements.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle, Needlecraft Dept., 82 Eighth Ave., New York, N. Y.

Write plainly pattern number, your name and address.

Foreign Words and Phrases

A propos de rien. (F.) Apropos of nothing; without relevancy.

Crux criticorum. (L.) The puzzle of critics.

En rapport. (F.) In touch; well versed in a subject.

Fuit Ilium. (L.) Troy once stood; i. e., Troy is no more.

Truth makes the face of that person shine who speaks and owns it.—South.

Don't Sleep on Left Side, Crowds Heart

GAS PRESSURE MAY CAUSE DISCOMFORT. RIGHT SIDE BEST.

If you toss in bed and can't sleep on right side, try Adlerika. Just ONE dose relieves stomach GAS pressing on heart so you sleep soundly.

Adlerika acts on BOTH upper and lower bowels and brings out foul matter you would never believe was in your system. This old matter may have poisoned you for months and caused GAS, sour stomach, headache or nervousness.

Dr. H. L. Shoub, New York, reports: "In addition to intestinal cleansing, Adlerika greatly reduces bacteria and colon bacilli."

Mrs. Jas. Filler: "Gas on my stomach was so bad I could not eat or sleep. Even my heart seemed to hurt. The first dose of Adlerika brought me relief. Now I eat as I wish, sleep fine and never felt better."

Give your bowels a REAL cleansing with Adlerika and see how good you feel. Just ONE dose relieves GAS and constipation. At all Leading Druggists.

A FAMOUS DOCTOR

AS a young man the late Dr R. V. Pierce practiced medicine in Pa. After moving to Buffalo, N Y, he gave to the drug trade (nearly 70 years ago) Dr Pierce's Favorite Prescription. Women who suffer from "nerves," irritability and discomforts associated with functional disturbances should try this tonic. It stimulates the appetite and this in turn increases the intake of food, helping to upbuild the body. Buy now! Tabs. 50c, liquid $1.00 and $1.35.

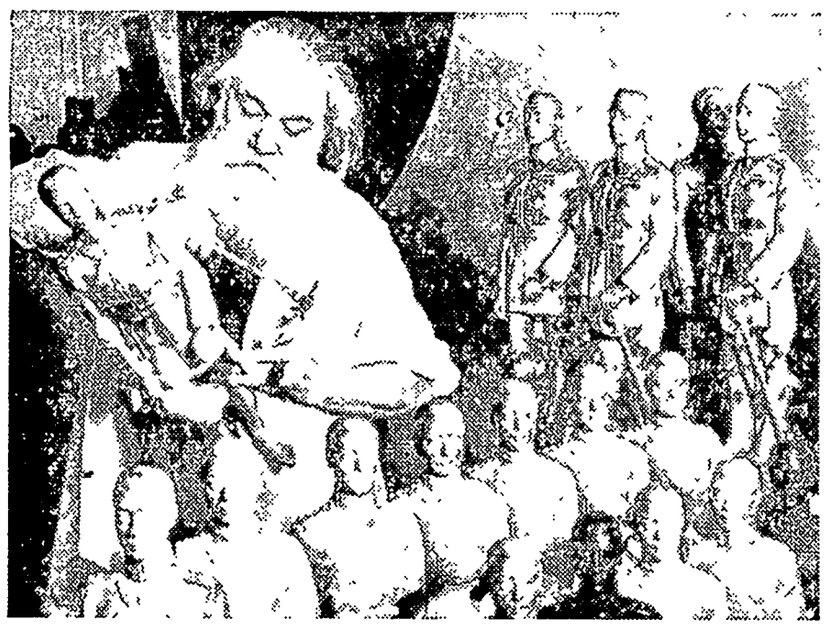
AFTER YOU EAT?

After you finish a meal can you be sure of regular, successful elimination? Get rid of waste material that causes gas, acidity, headaches. Take Milnesia Wafers for quick, pleasant elimination. Each wafer equals 4 teaspoonfuls of milk of magnesia. 20c, 35c & 60c at drug stores.

Skiing Draws Winter Visitors to Lake Placid

A group who are enjoying the popular winter sport at Lake Placid, N. Y. Left to right: Miss Edith L. Januschek of Peiping, China; Miss Nancy Page Carveth of Niagara Falls, N. Y.; Dorothy Trumbridge of Brooklyn, N. Y.; Jean Stanhope of New York city; Victoria Nebeker of Los Angeles; Nancy Perkins of Baltimore; and Marie Carveth of Niagara Falls, N. Y.

Big Demand for Windsor Souvenirs



Professor Steinberger is seen at work in his London studio on statuettes of the duke of Windsor, for which there is now a tremendous demand. Thousands of such statuettes had been made for Edward's coronation, and when he abdicated London business men groaned in anticipation of writing off terrific losses on stock that they could not sell. Instead of diminishing, the demand for the Edward figures has increased.

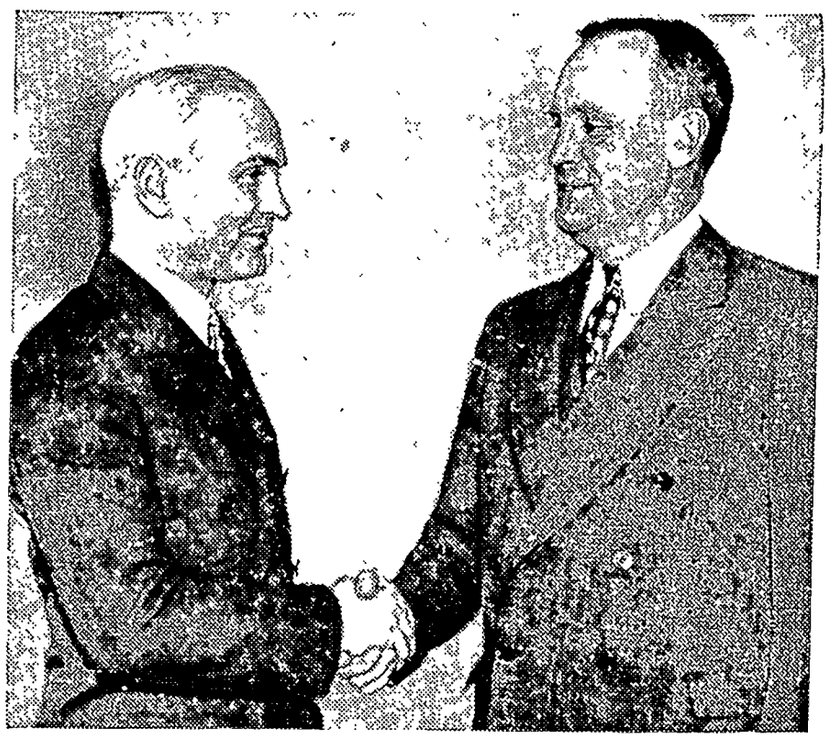
HELPS UNEMPLOYED

Baron Nuffield, who is Sir William Morris, head of a vast manufacturing organization including automobile plants, export companies, a publishing house and affiliated subsidiaries, donated $10,000,000 to stimulate employment in Great Britain's "depressed areas."

EX-PRIVATE IS GENERAL

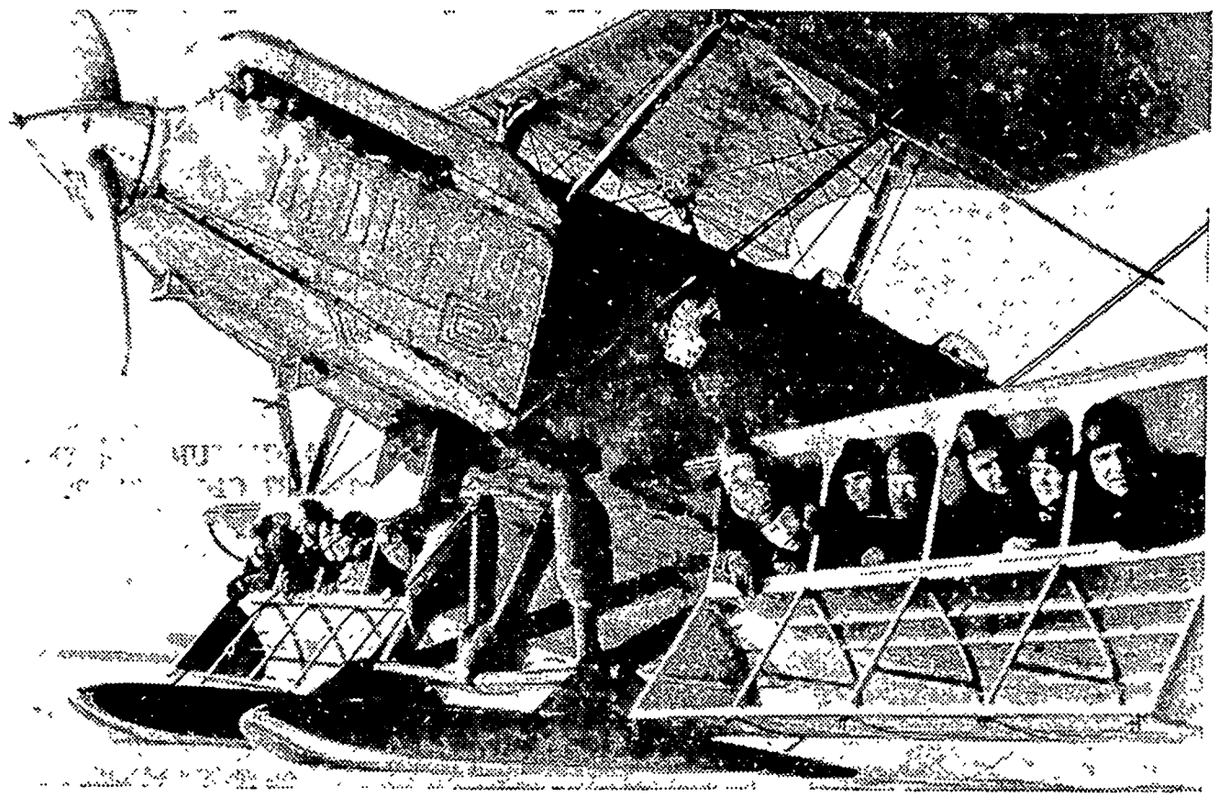
Once a soldier, always a soldier, is an old army belief, but once a private, now a general, is a paraphrase that fits Brigadier-General Kenyon Joyce, whose new rank was announced recently by President Roosevelt. General Joyce, once a ranker, now commands the "President's Own" third cavalry troop at Fort Myer, Va. During the World war he won the D. S. C., Order of the Purple Heart, Croix de Guerre and the French Legion of Honor.

Bernie Bierman Made Coaches' Prexy



Bernie Bierman, left, of Minnesota, new president of the National Football Coaches' association, is greeted, and welcomed to his post by Tuss McLaughrey, of Brown, the "passing" president. Bernie was elected at the annual convention of the coaches in New York city recently.

Trick Accommodations on New Soviet Plane



An interesting photo, showing the arrangement of accommodations in the new Soviet army two-seater plane. Berths are arranged below the wings as shown. In recent tests, 16 persons were carried in this manner, including pilot and co-pilot.

Creosote Makes Stronger Posts

Preservative Treatment an Aid in Making Inferior Material Last.

By J. E. Davis, Extension Forester, University of Illinois.—WNU Service.

Even willow and pin oak fence posts can be made to last 15 years or more if given a preservative treatment with coaltar creosote.

If fence posts are treated with preservatives, inferior species removed from the farm woodland in improvement cuttings may be utilized and the more valuable species left to grow timber. Treating is not a difficult operation, and a treating plant can be set up easily at little expense. Cost of material for treatment varies from 6 to 10 cents a post.

Since green or split posts will not do for treating, the posts should be cut a year in advance, peeled and stacked loosely off the ground to season thoroughly. The 100-gallon drum in which creosote is obtained can easily be made into a post-treating tank by cutting out the head and setting the drum on a brick or stone base so that a fire can be built beneath it. A good thermometer that will register up to the boiling point is the only other essential equipment.

After 20 to 25 four-inch posts are in the drum, enough creosote is added to bring the level to about three feet. The creosote is then heated to 190 to 300 degrees Fahrenheit, with this temperature maintained for five hours and the creosote kept at the three-foot level. The fire is then drawn and the tank completely filled with creosote. After cooling for ten hours, the posts are removed, the upper ends dipped in the creosote, then stood up to dry and the process repeated on another group of posts.

Species of trees providing posts that require treatment are pines, hickories, maples, poplars, willows, red oak, black oak, pin oak, sycamore, gum, American elm, ash, basswood, buckeye, ironwood and birch. Species providing moderately durable posts which are improved by treatment are red elm, black cherry, butternut, sassafras, arbor vitae and tamarack. Those durable without treatment are hedge, black locust, mulberry, red cedar, white oak, post oak, burr oak, honey locust and catalpa.

Terracing Is Effective in Controlling Erosion

Terracing is the ultimate and most effective method of controlling erosion on cultivated fields, asserts a writer in the Missouri Farmer. A combination of terracing and contour or strip farming reduces the soil losses to a negligible amount. No part of a terrace gradient should exceed 0.4 foot in 100 feet and the total length of a terrace should never exceed 2,000 feet. Flatter grades and shorter lengths are much better. None of the terrace slopes should ever be steeper than one foot vertical rise to four feet horizontal run. The top terrace should always be constructed first, and the others in consecutive order, down the slope.

The provision of suitable outlets for terraces is very important. Artificial outlets are usually more satisfactory than natural channels as they can be so constructed as to prevent channel erosion. The essential steps in gully control in order of importance are: stopping head growth, prevention of floor scouring and side erosion, and filling of the gully. A diversion ditch above the head of the gully will often stop head growth; otherwise an engineering structure at the gully head is essential.

Ration for Colts

Colts that have been weaned ordinarily will develop satisfactorily on a daily ration of three-fourths of a pound of grain per 100 pounds of live weight, with good quality roughage being offered free choice. The amount of grain to feed in a particular case, says Wallace's Farmer, depends upon how rapidly one wants the colt to develop. Colts that are fed a relatively heavy ration, however, tend to develop unsoundnesses of feet and legs.

Hybrid Hogs Better

According to the results of an eight-year experiment at the University of Minnesota, cross-bred litters wean earlier, are larger in number of pigs farrowed, and grow faster, thus reducing the time required for the pigs to reach market weight. The experiment, reports a writer in the Indiana Farmer's Guide, showed a reduction in feed costs of the cross-bred over the pure-bred lines.

Stringless Celery

It is time to stop growing celery with strings in it, says Cornell Agricultural college. Experts have tested these strings and found that one of them is capable of holding the weight of a half gallon of water. A breeding plan to eliminate the string is described by one of the professors of the Agricultural college. Crossing various strains of celery, he explained, already has proved that undesirable qualities can be replaced.

Simple, Practical Frocks

WHERE, oh where is the feminine wardrobe that wouldn't take on momentum through the addition of just these three simple, wearable frocks? Surely like the Model T, it would be hard to find. And the thrilling thing — the important feature — is that these frocks are planned and patterned exclusively for the modern woman who sews—for you, a member of The Sewing Circle.

Pattern 1914 is a house dress with a future. It is young and practical. The new notched collar, ending as it does in twin scallops below the yoke line, gives the waist front balance and brightness. The bodice is slightly fulled to make this a comfortable style to work in as well as one that is attractive to look at. The skirt is slim lined and simple—as you would have it. Use dimity, dotted swiss or gingham for this number. Designed for sizes: 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires 3⅞ yards of 35 inch material.

Pattern 1989 is the polite young model caught with its back this way, perhaps the better to show off the beautiful shoulders and chicest - of - chic descending lines. You'll run-up this frock in short order but you'll wear it endlessly and with that happy confidence which only a style with distinction can give. Make it of raspberry wool crepe and trim the collar, cuffs and hem with royal blue. Pattern 1989 comes in sizes 14, 16, 18 and 20 (32 to 42 bust). Size 16 requires 3 yards of 54 inch material with 5 yards of braid for trimming.

Pattern 1206 is a most attractive newcomer to the blouse 'n' skirt category. An alliance of this sort brings glamour and romance to the gay wearer. Gold or silver metallic cloth, or, perhaps shimmering satin for the blouse with a skirt of velvet will make a million dollar outfit. Make it yours in a couple of hours. It is available in sizes 14, 16, 18 and 20 (32 to 42 bust). Size 16 requires 2⅛ yards of 39 inch material for the blouse and 2⅛ yards for the skirt. The blouse with long sleeves requires 2⅜ yards 39 inches wide.

A detailed sewing chart accompanies each pattern to guide you every step of the way.

Send for the Barbara Bell Fall and Winter Pattern Book containing 100 well - planned, easy - to-make patterns. Exclusive fashions for children, young women, and matrons. Send fifteen cents in coins for your copy.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Patterns 15 cents (in coins) each.

Household Questions

To clean windows and mirrors rub them with cold starch, let it dry and then wipe off with a soft cloth. This will clean as well as give a brilliant polish.

* * *

Have you ever thought of using oiled silk for bathroom curtains. It comes in a wide range of suitable colors as well as a lovely silvery tone.

* * *

Chamois leather gloves should be mended with fine wool instead of cotton. This does not tear the leather so easily.

* * *

Should soup, vegetables or gravy have been made too salt, simply add a small quantity of coarse, brown sugar to them, stir well, and the dish will become palatable again.

* * *

Sauce will sometimes go lumpy, however carefully you make it. If it does, pour it through a strainer to get out all the lumps. The strainer should first be heated with boiling water so that the sauce will run through more easily and also keep hot while it is being done.

* * *

In removing basting threads cut them every few inches and do not pull a very long thread out at one time, as you are very apt to leave holes in the goods.

* * *

To wash net curtains successfully, soak in cold water to get rid of smoke and dust before putting them into warm soapy water. Do not rub; squeeze and knead the net, then rinse well in warm water, fold and put through the wringer. Iron lightly the way of the selvedge and on the wrong side.

PRESIDENTS COME FROM VARIED WALKS IN LIFE

More han two-thirds of the presidents of the United States have used the legal profession as a stepping stone to the White House Franklin D Roosevelt, who was re-inaugerated January 20, is the 22nd lawyer to hold the highest office in the gift of the American people.

Strangely enough the next highest number of presidents were contributed by the farm, three farmers or planters having become chief executives. Only six other professions or occupations are represented in the roll of presidents —an educator, engineer, tailor, soldier, public official and journalist Not a single business man so far

The 31 presidents we have had represented five political parties Republicans lead with 13. Nine have been Democrats, two Federalists, three Whigs and four Republican-Democrats as they were known then

Twelve states have contriuted all our presidents Virginia still leads as the birth state the birth state of eight of them. Next comes Ohio with seven, New York, North Carolina and Vermont two each, while South Carolina, New Hampshire, Pennsylvania, Kentucky, New Jersey and Iowa have been the mothers of one president.

Only seventeen presidents have been active church members but all have had leanings toward or taken part in nine different denominational organizations. The Episcopal church leads with 10 presidents who were its communicants. Second are the Presbyterians who claim seven. The Methodist and Unitarians have contributed four each, Dutch Reformed two and the Congregationalists, Babtists, Quakers and Disciples of Christ one each

Serving as president of the U. S. is a mankilling job, although President Roosevelt so far has seemed to thrive on it. However, few presidents enjoy long life after their terms are ended. Herbert Hoover is the only ex-president alive today President's wives on the other hand usually survive their husbands by several years. At present the widows of six presidents, Benjamin Harrison, Grover Cleveland, Theodore Roosevelt, William H Taft, Woodrow Wilson, Calvin Coolidge, and, of course, the wives of Herbert Hoover and Franklin D Roosevelt are still living.

—Cappers Weekly

French Farmers Maintain Their Family Cemeteries

Like India's towers of silence, where the Parsees place their dead before they are removed to their ultimate burial place, so have the farming districts around Poitou and Saintonge in central France a strange burial custom, notes a United Press correspondent.

The attention of a visitor in these regions is attracted by the clumps of four cyprus trees set out in a square some twenty-five to thirty feet apart which dot the landscape. Few know that here are the private family cemeteries of the French Protestant farmers. The districts of Poitou and Saintonge always have been the strongholds of Protestantism in France and ever since the days of Catholic persecution the Protestants have buried their dead on their farms.

The people of Poitou are affable and readily permit strangers to pass through the farms to little family cemeteries which usually are situated some fifty yards behind the house. A space about the size of a large room, enclosed within a thick hedge, a cyprus tree at each corner, is the last resting place of those who have labored on the farm.

On passing the hedge the traveler finds half a dozen humble graves, a wooden cross here and there. Tombstones are rare. The cemeteries never grow in size, for the newest grave is dug in the dust of the oldest.

NEWSPAPER NAMES

The first newspaper in this country was named News Letter and the second Gazette. The Columbia University press recently reviewed the developement of newspaper names in a brief history of the newspaper profession.

Best known perhaps, are the group names which indicate speed of news transmission and freshness of content, as Courant, Mercury, Courier, Mesenger, Mail, Clipper, Packet, Journal (daily), Post, Telegraph and the like. Others are defenders of public rights or assailants of wrong, like Blade and Scimitar. Similar in significance are Sentinel, Advocate, Guardian, Tribune, Monitor and Free Press. Patriotism and party loyalty are expressed by such names as Democrat, Republican, Patriot, Citizen. The idea of being all-seeing, all-knowing is conveyed by titles like World, Sun, Star, Globe, Argus, and Observer, and of similar tenor are the names Beacon, Light, Camera, Mirror and Graphic

Kentucky has its unigue and forward looking newspaper titles. If Mail, Telegraph, Telephone and Dispatch suggest qoickness, What can beat the Fulton Wireless? if one looks for completeness there is the Richmond Pantagraph Whitesburg claims a Mountain Eagle and Lebanon the Marion Falcon The Republicans have an organ in the Log Cabin of Cynthiana The prize of them all, however, for novelty is the Hyden Thousandsticks, the origin of whose name none but a printer could know —Louisville (Ky) Courier-Journal

One reason why no one has ever found the mythical pot of gold at the end of the rainbow is that a rainbow is not a mere bow, but a complete circle and therefore with out an end. As a Weather Bureau official explains aviators high over the earth see a rainbow as a circle, and the plane seems headed toward its center.

The number of milk cows on farms is about two percent less than a year ago.

NEWS FROM GOODELL AND VICINITY

Ed Hemingway and family were Mason City callers Monday

Mrs. Henry Brede has been ill with the flu this past week.

Many Radio fans listened to the program from KGLO Sunday. It was very good.

Orthnel Johnson's baby is still quite ill His mother came to help care for it.

Mrs. John Rust is caring for Mr. and Mrs. Harm Rust who are both quite ill at this writing.

The Wilmer Burk family were Sunday dinner guests at the Bill Lester home near Clarion.

Friends from here attended the funeral of George Mickesh which was held in Belmond and was attended by a large crowd

Rev. and Mrs. Herlein of Des Moines were calling on old friends here. They also attended the Goodell-Klemme basket ball game.

Supt. and Mrs. Kissinger and Kay of Superior, came Friday night to see the Big Basket Ball game in Klemme. Mr Kissinger was formerly coach in Goodell high school.

Mr and Mrs. Jay Griggs received word Saturday night that their daughter Lela had that day submitted to a tonsilectomy operation in Methodist hospital at Des Moines.

John Harris was fined $10 in Berrington, N Y, for driving a truck which was minus tail light, springs, brakes, exhaust pipe, hood, headlights, fan belt, flooring, and had a tomato-can carburetor and only three tires.

SCHOOL NEWS

Grades 7 and 8

Those who have had a perfect attendance this semester are Arlene Buseman, Lucille Hartbeck, Billy Zabilka, Allen Barz, Frederick Bell, and Harold Swalve.

Those who were exempted from some of their semester tests because they had a B average are Marjorie Lemke, Jacqueline Kudje, Ellen Kilgore, Dorothy Baack, Gertrude Grosshuesch and Shirley Johnson.

Grades 5 and 6

The following people have been neither absent or tardy for the first semester in grade six· Billy Grosshuesch Eugene Haberkamp, and Dean Merkel.

Eunice Larsen was the only one in the fifth grade with a perfect attendance for the first semester

Last Wednesday Phyllis Klotzback had a birthday and in the afternoon brought candy treats to school. We all wished her a happy birthday

The following people have handed in their dental cards Eugene Haberkamp, Robert Reed, Elwyn Jacobs, Eugene Johnson, Corrine Merkel, and Betty Jean Etchen

Grades 3 and 4

The third grade has the unit on food in their geography study The study of milk is being made first Last week we looked up reading materials about milk that we could use for our information.

Most of the week in fourth grade was spent in reviewing for our semester tests

Patty Kudje rated 100% on all of her spelling tests last six weeks period The following people had an average of "B" or above: Edward Barz, Betty Blickenderfer, Junior Buntenbach, Ewald Grosshuesch, Duard Lewis, Herbert Swartz, Ruth Bell, Caral Bock, Mavis Meyers, and Esther Tiggeman.

Grades 1 and 2

Our wheat is growing. Some of the trays have seven plants and some have only three or four.

Dean and Ruth have been absent this week.

The second graders had a number of tests on Friday.

Edward Grosshuesch had a birthday party on Friday.

COUNCIL PROCEEDINGS
November 9th, 1936

Meeting called to order by Mayor Stille, with Kirkwood, Goll, Priebe and Etchen members of the council present.

FARM LINE SERVICE

•

WE HAVE had many years experience in meeting and solving farm line problems and in furnishing service to rural communities adjacent to our transmission system.

WE NOW HAVE in operation over 800 miles of electric farm lines serving over 1900 customers.

More Than 200 New Customers Added In 1936

WITH OUR SERVICE you have no liability to pay the bills of others and you are in no way obligated to maintain and repair the lines or make up the shortages which occur in the operation as would be the case in any association or group you may join to obtain service.

THE EXPENSE OF maintenance and repair can be tremendous in the event of lightning, sleet storms, tornadoes and other unforeseen casualties and has been a very troublesome problem to co-operative farm lines. Recently several co-operative farm lines have been given to us by the owners with the understanding that they could go on our regular contract.

OUR FARM LINE SERVICE contract has many advantages. Let us explain them to you. Call or write our nearest Division Office.

An Old Arctic Hero Receives a New Honor

By ELMO SCOTT WATSON

RECENTLY a new honor was paid to the nation's oldest living polar explorer by his fellow-adventurers into the Arctic and Antarctic wildernesses, most of whom were still unborn when he made his first bid for fame more than half a century ago. He is Brig. Gen. David L. Brainard, U. S. A., retired, the last survivor of Gen. A. W. Greely's Lady Franklin Bay Arctic expedition of 1881-84. On his eightieth birthday the American Polar society, of which he is the oldest active member, elected him its first honorary member "in recognition of his contribution to polar exploration" and presented him with a scroll in commemoration of his achievement.

On this scroll was inscribed a map showing the route taken by Lieut. James B. Lockwood and Brainard, then a sergeant in the army, which enabled them on May 13, 1882, to reach the then farthest point north latitude 83 degrees, 24 minutes and 30 seconds, on the northern coast of Greenland. This surpassed the record which British explorers had held for 275 years and their record stood for 13 years when it was surpassed by Nansen in the Arctic sea in the Eastern hemisphere.

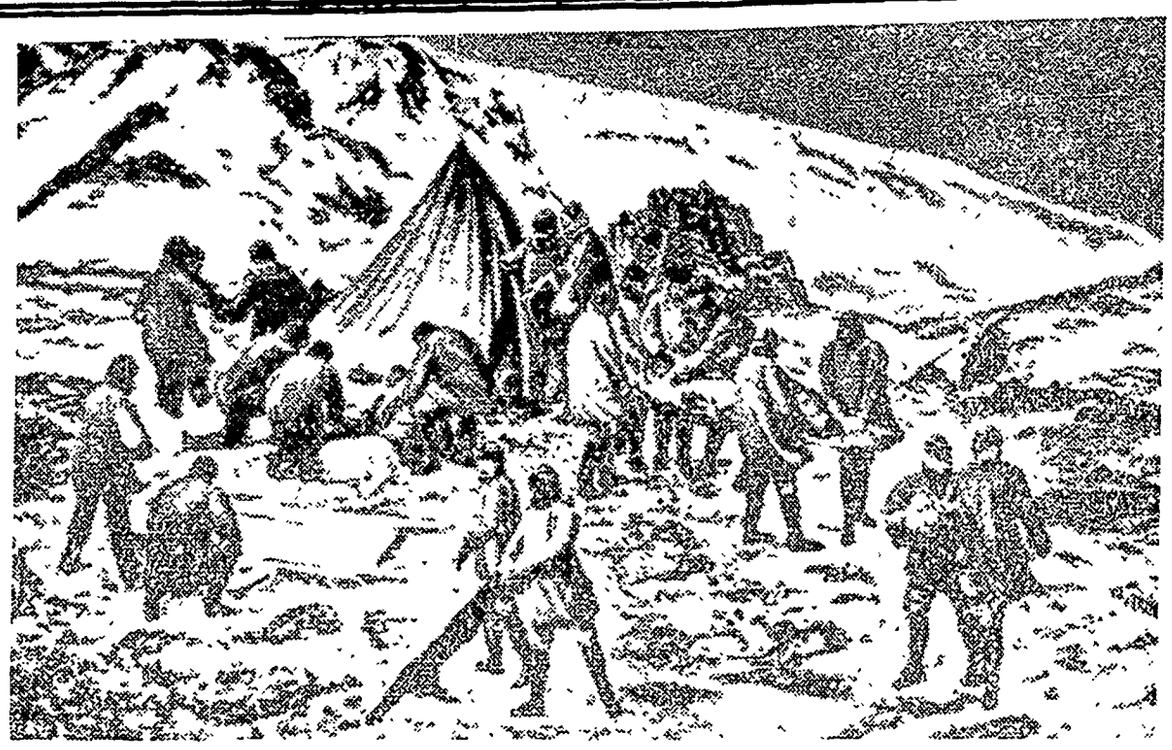
* * *

General Brainard, who has the additional distinction of being one of the few living retired generals to have risen from the humble rank of "buck private," now lives quietly in Washington after 42 years' service in the army, the first ten of which he served in the ranks. He was born in Norway, N. Y., on December 21, 1856 and when he was nineteen years of age enlisted in the Second United States cavalry. His first fighting experience was against the Indians on the Great Plains of the West and during an engagement with the Sioux on May 7, 1877 at Little Muddy creek in Montana he was seriously wounded. This was the battle in which Gen. Nelson A. Miles narrowly escaped death at the hands of the Sioux chieftain, Lame Deer. Later in that year Brainard was serving under Miles when that famous Indian-fighter corralled Chief Joseph and his fleeing Nez Perces in the Bear Paw mountains and forced their surrender. In 1878 he served in the campaign against the Bannock Indians and after eight years with the cavalry transferred to the signal corps.

This change led to his assignment as first sergeant in the polar expedition sent out by the United States army as the result of an international conference at Hamburg, Germany, in 1879 and at Berne, Switzerland, in 1880. The United States joined with Great Britain, Norway, Sweden, the Netherlands, Russia, Germany, Denmark, and Austria in establishing a ring of widely-separated outposts, all within the Arctic Circle, to record a complete series of meteorological and magnetic observations simultaneously.

Departure of the "Proteus"

In August, 1881, the expedition set up its base, Fort Conger, on Lady Franklin bay, 1,000 miles north of the Arctic Circle and 230 miles north of the last Eskimo settlement. It was commanded by First Lieut. Adolphus W. Greely of the Fifth cavalry with Second Lieutenants Frederick F. Kislingbury of the Eleventh infantry and James B. Lockwood of the Twenty-third infantry as seconds in command. These with Octave Pavy, assistant army surgeon, eight sergeants, including Brainard, two corporals and nine privates, and two dog-drivers, Jens Edward and Frederik Thorley Christiansen, comprised the personnel of the party.



RESCUE OF THE SURVIVORS OF THE GREELY EXPEDITION

On August 26 this little group of white men and two Eskimos stood on the shore of ice-locked Lady Franklin bay and watched a little steamer push its way cautiously through a "lead," a dark streak of open water which ran irregularly across the surface of the frozen sea. The steamer was the "Proteus" which had been held in the ice there for six days while Captain Pike waited in vain for a chance to cleave a path through the ice so that he could start south towards civilization.

The departure of the "Proteus" marked the beginning of what has been aptly called "one of the supreme adventure stories of the world," a story of almost unbelievable human grit and endurance which forms one of the brightest pages in the annals of the American army. For two years this party was as much lost from contact with their fellow men as if they had been on another planet, and when finally the third attempt to rescue Greely succeeded, of the original twenty-five there were just seven left alive and one of these died within twenty-four hours. The other eighteen had perished of starvation or accident after a series of adventures marked by incredible suffering and incredible heroism.

The official records of the Greely expedition were made public soon after Commander W. S. Schley (Admiral Schley, of Spanish - American war fame) had brought its survivors back to the United States on the "Thetis," but it was not until nearly half a century later that the heroic human side of the story became known. For more than forty-five years the diary of Sergeant Brainard, one of the seven survivors, lay unused in an old trunk. About ten years ago it was brought to light and published by the Bobbs-Merrill company under the title of "The Outpost of the Lost."

At that time there were but two survivors of the expedition—its commander, Greely, then a major-general, retired, and the man who had served as a sergeant under him, Brainard, a retired brigadier-general. So it was especially appropriate that his old commander, who once called Brainard "the most remarkable of a number of remarkable men of that expedition" should write for Brainard's book a "salutation" to remind the two survivors of how "together with our comrades we faced for nine months the prospect of death day by day and were harassed by the sight of our associates perishing of starvation or from vicissitudes in the polar field."

When the "Proteus" sailed away on August 26, 1881 it was agreed that the ship was to return the next year, if possible, to carry the expedition away. But if that were not possible another relief expedition would be sent for them in August, 1883. In case it should fail, Greely's orders were to leave Fort Conger not later than September 1, 1883 and "retreat southward by boat until the relieving vessel is met or Little Island is reached," or until a sledge party from the Little Island base was met.

Relief Ship Fails.

As a matter of fact the "Proteus" failed to reach them in August, 1882. But, says Brainard's book, "The first year had not passed disagreeably, and it is doubtful if anyone regretted the experience, future uncertainty thrown into the bargain. The entire party had had the distinction of spending a winter farther north than any Arctic explorers had ever wintered, with the exception of an English outfit that had wintered on shipboard. Moreover two of their number had set a new Farthest North record in the centuries-old race to the pole.

"That first winter there was weather in which Medford rum froze solid and the kerosene oil had to be thawed out before the lamps could be lighted. At first there had been plenty to do, and the work was intelligently organized by the commanding officer and tackled with zeal by the men . . . But in a few weeks cold and darkness put an end to practically all outside work except the instrument tending near the station. The monotony of the Arctic night produces strange effects on white men. They become melancholy, sleepless and very irritable. . . . Every diversion twenty-five minds could think of was tried out and dropped. "Checkers are all the rage now," wrote Sergeant Brainard, the faithful diarist. "But nothing lasts like long, loud arguments."

However, "the second winter was harder to bear than the first," and on June 17, 1883, Sergeant Brainard wrote that although "it is a few weeks too early for a relief ship, we cannot keep our eyes from wandering hopefully to the south." But again they were disappointed and they began their tragic retreat.

On August 9, 1883, they set out in small boats through a "lead" which had finally formed in the ice after they had waited for it for several days. Their course was through Kennedy channel, which was filled with grinding floes of ice upon which Greely's force camped when there was no open water through which to push the boats. Whenever they could use the boats they hugged the coast of Grinnell Land through Kane sea. Early in September they were forced to abandon their boats and for thirty - four days they were adrift on floating ice. Finally they managed to reach Smith sound and landed south of Cape Sabine, north of and opposite Littleton island, which was two hundred and fifty miles away. It was near here that the first year relief ship had been forced to turn back and far south to Cape Sabine, the second year rescue ship had been crushed in the ice and all provisions lost.

Their Terrible Suffering.

The record of their stay at Cape Sabine is one long story of terrible suffering. Here for eighteen months they lived on two months' rations. The simple record of Sergeant Brainard's diary reveals the horrors of those days as can no extended description.

On October 2 he writes:

"I took an inventory of the commissary stores last evening and found only 35 days full rations of bread and meat remained. These rations can be extended to 50 days, if we subject ourselves to a greatly reduced diet, but the suffering will be extreme in this low temperature where a man requires from two to three times the normal diet. Also, we have some very hard labor ahead of us incident to the building of winter quarters."

March 4, 1884:

"Lieut. Greely reduced the bread issue to eight ounces per man."

Occasionally members of the party were able to shoot a fox to supplement their rations. But as the weary weeks passed the inadequate food, severe cold and the conditions under which they lived took their toll. One by one eighteen of the members of the party including Lieutenants Kislingbury and Lockwood died.

On the evening of June 22, 1884, Sergeant Brainard lay in the little fly tent which had blown down upon him and his six comrades. Beside them lay the dead body of another. But they were too weak to move it or even try to raise the pole of the tent. Suddenly a voice called out "Greely, are you there?" Brainard raised himself in his sleeping bag. He knew that voice! It was the voice of Norman, first officer of the "Proteus" in 1881.

"It's Norman!" he shouted in a weak voice. He crawled from beneath the tent and Norman thrust a hardtack in his hand. A moment later Lieutenant Colwell came running over the hill.

Brainard was sitting on the ground gnawing at the hardtack, but as he saw an officer approaching, the old habit of the regular army sergeant asserted itself. He tottered to his feet and attempted to salute! But Colwell clasped his hand and they went together into the tent, there to rouse the dazed Greely and to tell him that the ship "Thetis" had arrived with relief at last.

* * *

In 1886, two years after his return from the Arctic, Brainard was commissioned by President Cleveland as a second lieutenant in the Second cavalry in "recognition of his distinguished and meritorious services" with the Greely expedition. He was successively promoted to higher ranks and was commissioned a brigadier general in the National army on October 2, 1917, made a brigadier general in the regular army on July 25, 1918 and retired from service two days later.

In 1885 the Royal Geographical society awarded him its Back Grant for his Arctic work and in 1926 the American Geographical society presented its Charles P. Daly gold medal to him.

In 1929 the Explorers club of New York awarded Brainard its Explorer's Medal and in 1933 he was presented with the Purple Heart decoration by the secretary of war. The honor conferred upon him recently by the American Polar society comes as a climax to the career of one of the most remarkable characters in all American history.

THE LAST SURVIVORS OF THE GREELY EXPEDITION

At the left is Maj. Gen. A. W. Greely, who died in 1935 at the age of ninety-one, and at the right is Brig. Gen. D. L. Brainard who is still living in Washington at the age of eighty.

UNCOMMON AMERICANS

By Elmo Scott Watson

© Western Newspaper Union

First Woman Painter

YOU'LL look in vain for her name in the average encyclopedia or dictionary or American biography. Common as is the name of "Johnson" in our national annals, Henrietta Johnson is the least known of all of them.

In this era of the "emancipated woman" all fields of human endeavor are open to feminine invaders. But it was very different 200 years ago. In those days woman's place was very much "in the home" and she might not leave it, even for excursions into the arts. But it was in that field that Henrietta Johnson distinguished herself and by doing so she placed posterity everlastingly in her debt. For she was America's first woman painter.

We know her name but little else. The date of her death is recorded in the St. Philip's church register in Charleston, S. C., and that is the only established date in her history. By the social code under which she lived, "a lady's name should never appear in public print but twice: first to announce her marriage and again to announce her death." Since she never married that leaves us only the date of her death—March 9,1728. When and where she was born and whose daughter she was is an unsolved mystery.

We know that she was a pastel painter and in this medium she did work that rivalled that of some of the famous French masters. We know that she was painting these pictures between 1707 and 1720, since the few surviving examples of her art were made during that period. And that is a fact which gives her work importance. For in her day the scheme of an hereditary American aristocracy was being tried out in Carolina and the people whose portraits she made were colonial officers and representatives of the landed gentry whose great plantations surrounded Charleston.

One of the notables she painted was Col. William Rhett, colonel of the provincial militia, receiver-general of the Lords Proprietors and the man who, in 1718, captured the famous pirate, Steve Bonnet—a feat which would make the name of Rhett forever famous, even if some of his descendants hadn't done so in the more recent history of South Carolina.

Just how many portraits Henrietta Johnson painted is not certain, but the known examples of her work that have survived for two centuries are so few that they command prices which compare favorably with those paid for the works of the "old masters" of Europe. Quite aside from their artistic and historic value, they possess a high "rarity value"—because they came from the brush of America's first woman painter.

"Typhoid Mary"

WHEN her Irish parents brought her to a priest in New York city one day, he christened her Mary Mallon. But on hospital records in the East she became only a number, or more specifically, "Carrier No. 36." For she was the famous "Typhoid Mary."

Back in 1904 there occurred mysterious outbreaks of typhoid fever in certain sections of Westchester, Long Island and other districts around New York city. Examination of food and water failed to give any clues to the origin of the bacilli which were causing it.

But Dr. George Soper, a sanitary engineer in the municipal health service, remembered a German bacteriologist had proved that some people, while immune themselves to typhoid, carried the germ and gave the fever to others. Tracing the outbreaks he found that an Irish cook named Mary Mallon had, in every instance, been employed in the stricken household. He learned also that Mary, at the first hint of each illness, fled from her job.

Finally the health authorities caught up with her and in 1907 she was detained and, against her will, given an examination. She was found to be infected with millions of typhoid bacilli. She went to court to gain her freedom but lost her suit. Finally in 1910, she was freed.

However, typhoid epidemics began again and in each case Mary Mallon was found to have been the cook. Again she was confined in a hospital. Eventually she became resigned to her fate, was given a laboratory job and then furnished a little cottage of her own on North Brothers island, where she lived in semi-imprisonment for 21 years.

She died a few years ago—but not from typhoid. First there was a stroke of paralysis from which she rallied. During the next three years she gradually failed and finally, when she was sixty-six years old, Death opened the door for the frail gray-haired little woman and "Typhoid Mary's" long imprisonment was ended.

Uncle Phil Says:

That Little Difference

It is just the little difference between the good and the best that makes the difference between success and failure, between artists and the artisan.

Much better does apple sauce taste out of a barrel in a grocery than stewed and on the table.

Those who get up early in the morning think everybody else should; but those who get up late don't usually move in that direction.

If you can't agree with the tastes of the people, you escape much lonesomeness.

Difficult Rebuilding

Rebuilding a ruined character or a ruined career is a much more difficult matter than building one. It takes more courage, more patience and more ability. But it can be done every day.

Scolding may not mend matters, but laughing doesn't make the baby cry.

Cheerfulness should be cultivated, but the cultivated kind is better than none.

GENUINE
QUICK-ACTING
BAYER ASPIRIN
1¢ A TABLET

Bayer Tablets Dissolve Almost Instantly

In 2 seconds by stop watch a genuine BAYER Aspirin tablet starts to disintegrate and go to work. Drop a Bayer Aspirin tablet into a glass of water. By the time it hits the bottom of the glass it is disintegrating. What happens in this glass . . . happens in your stomach.

For Amazingly Quick Relief Get Genuine Bayer

You can now get Genuine BAYER ASPIRIN for virtually a little at any drug store.

Two full dozen now in the pocket tin, for 25¢! Try this package. Enjoy the relief of this article now without those troubles.

Do this especially if you want quick relief from a bad case of neuritis or neuralgia pain. The illustration above, and the BAYER ASPIRIN words are registered.

And ask for it by its full name BAYER ASPIRIN—not just the name "aspirin" alone when you buy. Get it next time you need relief.

National Topics Interpreted
by William Bruckart

ashington. — When President evelt took office for his first term, one of the outstanding observations that he made was to the t that the American people red fear" and of this condition born instability. It was a re- sable statement and the truth may not now even be denied. curately presented one of the amental influences disturbing rican life and if that psychology I have been completely swept , I believe things would have different now.

About Money

I remember, I commented at time upon the new President's rk. Subsequently, I called at- on to the conditions of admin- tion policy under the New Deal were necessarily causing a con- tion of that "fear of fear" in- l of calming the nation's es.

Mr. Roosevelt closes his first and begins his second tenure, ieve it is entirely proper again dvert to his significant and ful observation of 1933. We look at this picture only in spect, regrettable as it is that annot see into the future. It l then seem to be an entirely issible thing to do to examine asis of Mr. Roosevelt's obser- n and see what has been done rect the condition about which mplained.

hall not attempt to go into the us phases of the four-year Indeed, I think it is neither able nor necessary to analyze tions beyond those that are , fundamental, in our national mic and political structure. that reason, and because of t developments of adminstra- olicy, I am writing something money in this report to you.

Scripture quotation is: "The of money is the root of all In treating of the subject of y from our practical stand- "the love of money" takes y ite an unusual definition. For, I point out in candor, there has been a national admin- ion, so far as my research that has so thoroughly loved pending of money. I believe oosevelt himself enjoys it but oosevelt is not the chief of- of his administration in this l. The two men whose rec- tand out with an absurd will- s to throw money around as to throw pebbles when I boy on a Missouri farm are Hopkins, Works Progress ad- rator, and Secretary Wallace, Department of Agriculture. uite convinced that Mr. Hop- the worse of the two. My sion is based on a conviction r. Hopkins is the more waste- am afraid that when the his- this great depression is set n the cold light of facts as ill appear a quarter of a cen- om now, Mr. Hopkins will place in that spotlight that t do credit to the hundreds le who have the real welfare poor at heart.

* * *

latest development concern- Hopkins in his public state- ment that there must be at least three-quarters of a billion new money riated for his relief work. nt Roosevelt previously had would ask congress for only billion. It is difficult to rec- hese two statements or the therefor. Some slipshod as taken place or else Mr. again is indulging in his sport of spending and wast- ayers' money.

Money Relief

the figures reveal that re- rations, as managed by Mr. , are costing about $165,- a month. If Mr. Roosevelt to use only $500,000,000 for urtailment in sharp fashion ke place. If no such cur- t is intended, even the Hop- ure is too small.

we are brought face to face ith a question: What is to policy? I hear more and iscussion as congress gets ay that some definite state- ght to be made, some com- t given, so that the nation ow what it is proposed to do of this money and how it is to be used.

ntally, Mr. Roosevelt re- poke rather curtly to some departmental heads about nting bills. He thought they o large and that money be saved in that direction. it happens governmental bills amount to no more rop in the bucket when com- the waste that goes on in mous relief set-up of which pkins is the head. It has own too many times to need ion here.

Mr. Roosevelt has taken the departmental printing wever, I would like to make estion that there is no valid ny longer for excluding re- opriations from the regu- nates of expenditures as in- the annual budget. Like her items, the relief totals may have to be revised later, but that does not excuse the rather careless practices that have grown up in the calculation of relief expenditures. It does not exclude the necessity for a real protection against heedless spending nor does it prevent the formulation of intelligent policies.

Individually, I do not quite understand why the administration should fuss about a few millions of printing bills and toss out half a billion or three-quarters of a billion, as the case may be, with reckless abandon when such tossing is done without any evident continuity of sound policy.

* * *

I referred to Secretary Wallace's spending proclivities. Mr. Wallace has been going about the country lately talking of the necessity for soil conservation and the payment of a subsidy to farmers to accomplish that end. He has been talking about money in sums as large as a billion dollars a year for crop insurance—a program in furtherance of Mr. Wallace's "ever normal granary" idea.

Wallace Talks Money

In theory, there is much to be said in favor of spreading unpredictable losses of farming through insurance. A large part of the distress found in agricultural regions is due to the destruction of crops by causes over which the farmers have no control. If the consequences of these hazards could be minimized by adjusting losses over wide areas, and by using the surplus of one year to offset the shortage of the next, one major farm problem would be solved. But, as matters now stand, there is a natural tendency to regard this move with a skeptical eye. This is necessary because, like so many theories, the Wallace crop insurance, ever normal granary plan seems to omit the one element that is necessary to be included. If this proposition is to be successful, there simply can be no doubt that it must have almost unanimous support. It does not have it and never will. The reason is that it calls upon the government to pay part or all of the cost and human nature inevitably resents taking from one to give to another.

Mr. Wallace's ideas were adopted by the President's crop insurance committee. That committee was supposed to have the interest of agriculture at heart. Its recommendations indicate that it had not only such an interest but an even greater interest, namely, making sure that the farmers were given everything.

From all of the discussions that I have heard, I believe it is quite apparent that the committee went too far. It went so far, indeed, that it is arousing resentment from the consumers who think that they will have to pay the bill. Therefore, by proposing a program that is too extreme, the crop insurance committee and Mr. Wallace have forced a cleavage between producer and consumer and that is likely to result in a renewal of warfare between these two segments of our national life. It will cause a revival of an age-old quarrel instead of a healing of old wounds.

No one can deny that the farmers, as a class, have not been getting their fair share. From the attitude of many thinking farmers, however, I rather believe that agriculture would prefer to have a farm aid program which would permit it to produce and sell to the cunsumers under harmonious conditions and regulations rather than get too much and earn the hatred of the masses who are to buy the farmers' output.

To advert to the original theme, Mr. Wallace likes to pass out money. He knows, as all others in public life know, that the government will be generous with agriculture and I am afraid that fact has caused the otherwise genial secretary of agriculture to lose his perspective—to forget that he is fostering a program that will change traditions and practices on the farms of America as surely as the sun shines.

Farmers are human as everyone else is human. Some of them, like some of us, who must exist among modern cliff dwellings of concrete and steel, entertain a fear that a policy of government payments equivalent to a dole, may have the effect in the end of destroying rather than saving the business of agriculture.

Our Early Watches

The first watches were produced in all sorts of fanciful designs, with cases shaped like crosses or shells or mandolins, says a writer in the Washington Star. A peculiar fashion was that of a watch-case shaped like a skull, to remind the owner when he looked at it that time was fleeting and death was drawing near. The lovely and unlucky Mary Queen of Scots had a skull-shaped watch, and in view of her death on the headsman's block it was gruesomely appropriate. Cavaliers had swords and poniards with little watches set into the hilts.

POULTRY FACTS

DAMP HOUSES ARE DISEASE BREEDERS

Poultry Contracts Colds and Other Disorders.

By H H Alp, Extension Poultryman, University of Illinois.—WNU Service.

Just as humans have more colds and pneumonia during periods of damp weather, so damp poultry houses during winter months favor the development of roup, bronchitis and other respiratory diseases of chickens which affect the efficiency of poultry production.

One of the most common causes of dampness in poultry houses is wet litter. Wet litter is in turn caused by too many birds in the house, floor mixture and leaky roofs.

Birds are overcrowded in houses having less than four square feet of floor space to each fowl. Unless a poultry house is equipped with mechanical ventilation, and few of them are, crowded pens will soon become damp.

Cement floors which have no subfloor of gravel, crushed stone or similar material will usually sweat sufficiently to make wet litter a problem. In some houses spillage from water pails and poor surface drainage are factors along with leaky roofs.

In addition to these causes the poultry flock itself voids and exhales enough moisture to be a factor in the problem If dropping boards are left uncleaned for two weeks, experiments have shown that for each 100 birds there would be approximately three to four barrels of water left in the house during this period.

While it is impossible to keep poultry houses absolutely dry, flock owners can help by cleaning off the dropping boards at least every other day. Frequent changing of the litter is another chore generally justified by the results obtained in more efficient production.

Keeping windows open to provide fresh air aids in keeping down dampness, and artificial heat is needed in many instances. Many poultrymen have found that heat from brooder stoves has helped in houses where colds and roup have been troublesome.

Good Management Brings More Eggs, Expert Says

During the winter hens cannot keep up a high egg production unless they are properly managed, according to C. F. Parrish, extension poultryman at North Carolina State college. Feeding, he points out, is perhaps the most important item. No hen can be expected to do her best unless fed the proper grains, mashes, and green feeds.

Then the poultryman must pay strict attention to the housing problem. Poorly constructed and drafty houses are not conducive to high egg production. The houses must be comfortable or the birds will suffer and a consequent decline in the number of eggs will be noted.

Inferior birds should be culled from the flock. These poor producers, if allowed to remain, will bring the average of the flock down sharply.

Culling Laying Flock

Culling is almost a continuous process and should be practiced throughout the year. For the laying flock, however, says a North Carolina State College authority, the most rigid culling is done toward the end of the laying period which, under normal conditions begins in midsummer and continues through the fall months. Watch the flock carefully and cull out these birds that go into a molt during the warm season. It is sometimes stated that when a flock, especially in the summer months, falls below 30 percent production it is time to cull the entire flock. However, the price received for eggs, the price of feed, and the feed cost per dozen eggs will determine the time and intensity of culling.

Total Feed Eaten Counts

Whether it be the all-mash method, hopper feeding of grain and mash, or hopper feeding of mash and hand feeding of grain, the important thing is the total pounds of feed eaten each day. My standard is not less than 30 pounds of total feed a day to each 100 Reds or Rocks, and slightly less for Leghorns. You can get the results with any of the methods, says a poultry expert writing in the Boston Globe.

Protect the Poultry House

If the poultry house is badly exposed to north winds, banking it with a wall of straw or corn fodder will give added protection even if it is insulated inside. If lack of time, inclination, money, or uncertain tenure makes inside insulation out of the question, remarkably effective results may be obtained through the use of liberal quantities of corn fodder or straw be packed to the eaves and kept in place by boards or fencing.—Wallaces' Farmer.

On Judging Characters—

Some Views to Hold in the Reading of Modern Books

THE desire to belittle the characters of those who have been held in high esteem for years, even for generations, is only excelled in these times by the determination to make heroes of those whose reputations have been unsavory. There is, of course, in all things a happy medium. No one is all good. No one is all bad But it is the predominance of virtue or vice which sets its stamp on persons' characters, and causes them to be estimated good or bad accordingly.

Writers of biography are seldom readers. One of the greatest difficulties is in really getting at the truth about persons whether they be dead or alive. Biographers, living in the same period as those of whom they write, are unable to make delineations free from personal ideas or estimations, especially if the person about whom they are writing is known to them.

Individual View Point.

It is for readers to make their own discoveries. They have this privilege and they should take it. Get acquainted with the facts as much as possible through perusing more than one biography. Get more than one other person's point of view. There are great men. There are little ones To learn a few derogatory things about the former does not make them unworthy natures The balance remains still for virtue. To find out good qualities in poor characters is delightful, but so long as flagrant misdeeds can merely be mollified and not erased, the person has to stand the brunt of his own deeds

Well Tempered Judgment.

In reading biographies and in studying human nature it is well always to bear in mind that extenuating circumstances are present. Rarely are they absent totally There are certain situations which exist, and complications which arise to influence action. Knowing these we become less harsh in adverse judgments, or more laudatory in favorable estimations according to how the character acts We learn to detect the difference between the desire to undermine a fine character or to establish a poor one as good.

Able Men

To become able men in any profession, there are three things necessary—nature, study and practice.—Aristotle.

The Road of Truth

There may exist different conceptions of beauty; everyone has his own personal opinion, but there can be no question about the truth of the feeling of beauty. That is real and palpable. There can be no two truths, and from this I recognized that there is only one road that leads to the attainment of beauty. That road is Truth. — Feodor Chaliapin, in "Man and Mask."

Firestone
GROUND GRIP TIRES

GROUND GRIP TIRES bring a new freedom to the farmer—freedom to go anywhere, any time, in any weather. No longer do bad roads, snow and thaws mean isolation.

In deep snow, mud or sand, Firestone Ground Grip Tires go right through without spinning or stalling — you can always get to town.

The Firestone Ground Grip Tire was developed to overcome the difficulties of winter transportation on the farm. Firestone engineers, working under the personal direction of Harvey S. Firestone on his Columbiana, Ohio, farm, tested and proved the Ground Grip Tire under the worst possible weather and road conditions. This tire is so different in design and so superior in performance that a patent on it was issued by the United States Patent Office. The heavy rubber lugs of the tread are without equal for traction. They take hold and keep going where other tires get stuck — and you don't need chains.

Don't let bad roads and bad weather keep you isolated this winter. See your nearby Firestone Implement Dealer, Firestone Tire Dealer or Firestone Auto Supply and Service Store today.

Listen to the Voice of Firestone featuring Richard Crooks — with Margaret Speaks, Monday evenings over Nationwide N. B. C. Red Network

THE GRATEFUL MESSENGER

Sarah Joyner

Last winter when I fed the birds
I had no thought of pay;
But yesterday a cardinal
Woke me at break of day.

He lighted on a lilac tree
And turned his head to me,
Singing a song that filled my heart
With lyric melody

I wish you might have seen that bird
Swell out his crimson throat,
He lifted up his crested head
And sounded every note.

He sang a song of hope and joy
And acted well his part,
This grateful messenger who left
His song within my heart.

Both consumtion and prices of dairy prodducts are expected to increase the coming year.

One night recently a somewhat intoxicated motorist drove up to a Chicago filling station and asked an attendant to look over his car, which he said was "dragging awfully bad and all the tires must be flat." The trouble was not hard to find. He was dragging along another car whose front bumpers had become locked with the rear ones of his own.

Because his wife slept with two dogs and a cat and forced him to seek other sleeping quarters, Chester Alexander of Miami, Fla., sued for divorce.

Winter Is Not Over!

REMEMBER LAST WINTER, when we needed fuel and it was almost impossible to get it?

Our coal bins are full now, but a severe spell of weather would soon cause all the coal we have in stock to go.

If our customers would keep a few weeks supply in their bins, and we still do our part toward keeping our stock we need not fear a coal shortage, even in the worst winter.

LET'S COOPERATE.

hamrocks Win From Woden And Corwith

AMROCKS IN SMASHING VICTORY OVER WODEN

ke Sets Pace By Garnering Thirteen Points

oach A. L. Kingery's Sham- go basketeers climbed back into win column last Friday night an impressive 39 to 15 win Woden. The outcome was better most of the team's followers ected, because Woden had put a hard scrap in their game here ier in the season, and the Wo- floor is considered a handicap nost visiting teams.

illy Lemke set the pace for the mrock basket-makers by cag- six field goals and a free throw a total of six points. Gerdes practically unstoppable for first three quarters of the e. Jorgenson and Kaduce were far behind with eleven and points respectively Schuldt Keeper were kept busy patrol- the back court and did not time to score many points.

elm was the chief point getter Woden with three field goals a total of six points. Gerdes, was high point man in the e here, was able to get only basket before he was forced of the game on fouls.

lemme's second team, led by sshuesch and Paul, defeated Woden reserves by a count of to 14. The Little Shamrocks d their opponents as scrappy when they met before, and were ed to give their best though- the game.

ollowing is the box score of first team game.

SHAMROCKS TAKE LOP-SIDED TILT FROM CORWITH

Schuldt Leads Scoring With 12 Points

The Klemme Shamrocks won a double-header from Corwith on the local floor Tuesday night. The first team downed their opponents by a score of 37 to 16, and the second team held the visiting reserves to a single field goal to win by a count of 15 to 2.

The guards, who had taken a rest from scoring activities in last week's game with Woden, came to the front to drop in more than their share of the points. Schuldt scored five field goals and two free throws to lend the scoring for both teams with a total of 12 points. Keeper his running mate, caged four goals from the field to contribute 8 points. Jorgenson, at his forward post, was good for 9 points, and Kaduce at center broke through for six. Lemke was held scoreless in contrast with his performance at Woden, but Paul, who entered the game in the last half, got a long field goal to complete the scoring. Nall led the visiters' scoring with six points.

Grosshuesch again monopolized the scoring for the little Shamrocks with nine of his team's fifteen points. Ruben shot them from all angles. Paul and Trampel scored the other six points for their team.

Following is the box score of the first team game.

The Merit System Versus Spoils

By RAYMOND PITCAIRN
National Chairman Sentinels of the Republic

Increased efficiency in all governmental activities.

Economy for the taxpayer

Purposeful careers for public employes

Elimination of the Spoils System.

These are a few of the goals sought by increasing numbers of taxpaying citizens who demand that the Civil Service or Merit System now in partial effect replace the Spoils System in all but the topmost federal jobs

America can achieve these benefits —if Congress does its part. The way is open

A White House message has urged expansion of Civil Service to include all employes except Secretaries. Undersecretaries and those in similar policy-making offices Several members of Congress have introduced measures to broaden extension of the Merit System idea

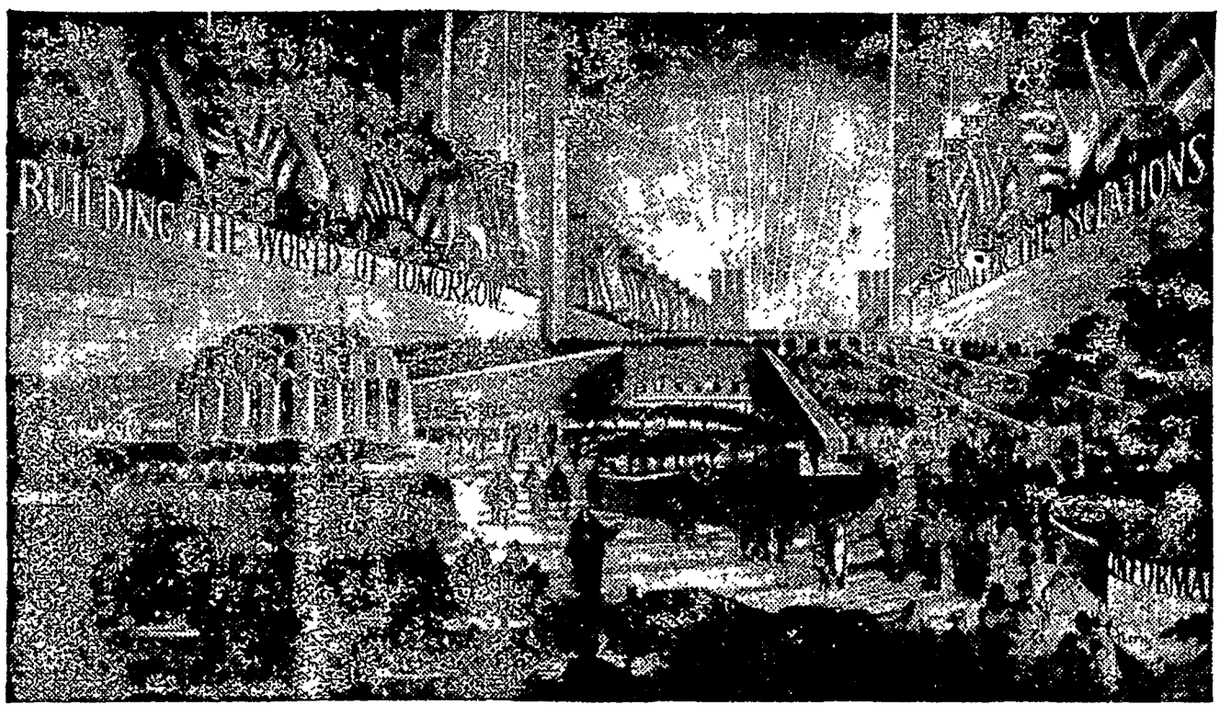
But will they be put into effect? That's a different question

Heavy political barricades must first be overcome For a complete application of the Merit System would strip politicians of their greatest asset the control and doling out of jobs Naturally many politicians will oppose it Naturally they will fight any step which extends the policy of selecting public servants on the basis of how well they can do their work instead of the basis of how many votes they can deliver for the politicians on Election Day

There stands the basic issue whether the Federal payroll which costs the taxpayers more than a billion dollars annually, shall be for the benefit of politicians who control appointments or of the public who foot the bill

It's up to Congress to decide The choice should not be a difficult one.

THROUGH BROAD AND BEAUTIFUL ENTRYWAYS VISITORS WILL PASS TO THE NEW YORK FAIR



NEW YORK, (Special).—Forty thousand persons an hour —visitors from every state and every nation—must be accommodated in comfort at but one of the entryways to the New York World's Fair of 1939, according to arrangements the Fair Corporation is completing to handle a maximum daily attendance of 800,000. The artist's drawing, as reproduced above, calls for a magnificent double-decked entryway with underpasses, overpasses, pedestrian walks, bus terminals, comfort stations and bridge connections assuring comfort while providing an area of architectural splendor. Shown is a ramp leading from the exposition grounds toward the I.R.T.-B.M.T. subway terminal, at a point where it is necessary to cross over the Long Island railroad tracks and to avoid undue congestion of pedestrian traffic. Shown in the left foreground is a domed restaurant within a fountain basin and a concourse bordered by grown plane-trees, and, nearer, an open-air cafe and an information kiosk. Along the flanking walls the artist has delineated the Fair's world concept which looks to the building of a peaceful, happier World of Tomorrow.

SHELTER HOUSE BUILT FOR MUNICIPAL ICE RINK

The usiness men of Klemme subscibed toward a fund to be used for building a shelter house for the municipal skating rink It is needless to say that those using the rink are very grateful for the interest the business men have shown in providing a comfortable place to put on skates, and to warm up and rest out of the wind and cold

The shelter house was built by the Northern Lumber Company who were generous in donating part of the work The buildnig is heated and lighted and Marshall George Buseman tends to the fire and keeps it warm mfor the skaters.

Sees Ceremonies Of Inauguration

KLEMME LADY IN WASHINGTON DURING ROOSEVELT INAUGURAL

Mrs P M. Wilson returned Sunday morning from a visit of several weeks in Washington, D C with her daughter, Gladys and husband, Bob Risser and infant son

Mrs Wilson saw President Roosevelt take the oath of office saw many of the prominent political leaders of the nation, witnessed the inaugural parade, and saw many other things of interest in connection with the inauguration

While in Washingon Mrs Wilson visited the Capitol and saw the Senate in action and also saw the United States Supreme Court in session.

Mrs Wilson spent some time in taking in the sights around Washington the evening before the inaugural and was quite impressed with the many and beautiful decorations.

She says that every available vantage point along the march of parade was built up with bleachers, that even house roofs were used and every window available was rented She says that every where one looked about all you could see was umbrellas as it rained most of the day

On her return journey home, Mrs. Wilson barely entered the flood district. She says that at Pittsburg water came up to the tracks on one side, and that there were miles of water as far as she could see.

Jacob Wenz Died At County Home Tuesday

FUNERAL SERVICES WILL BE HELD FOR JACOB WENZ

Inmate of County Home Died Tuesday Morning After Illness

Obituary
(Courtesy Wellemeyer)

Jacob Wenz was born in Durlach, Germany, the oldest of a family of five children born to his parents Jacob Wenz and Caroline Volk, who were farmers in Germany.

When Jacob was one year old the family moved to America, settling in Clayton County, Iowa

Jacob Wenz grew up to be a strong man physically, but mentally he was always a child in school he made no progress. His mother, a bright and intelligent woman, told him many of the beautiful bible stories, some of which he remembered, and these helped him when grown to know right from wrong She also tried continuously, even after he was grown, to teach him to read and write, but all to no avail. He therefore grew up to be one of the few men of the community to sign his name with an "X."

In 1874, at the age of 15, he moved with his parents to Hancock County, Iowa, and then for 57 years he worked as a farm hand, working on many different farms in this community Although handicapped he did his best He never earned big wages, but he succeeded in making a living for himself during all these many years, which is more than some brighter men have done He was never married.

About twenty years ago a cancer appeared on his lip, but it was removed and made him no trouble.

At the age of 72, he gave up active work and retired to the County Home. Here Mr. and Mrs Rhiems were kind to him and he spent his last years in contentment. He always spoke well of the County Home.

His health began to fail during the heat of last summer and he continued to be sickly until the end came. Tuesday morning, January 26. 1937. He reached the age of 78 years, 5 months and 11 days.

He leaves two sisters and one brother—Mrs. William Wright, Britt, Iowa; Mrs. John Swalve, Ocheydan, Iowa; and William Wenz, Klemme, Iowa.

Funeral services for Mr. Wenz will be held in Klemme at the Wellemeyer Funeral Home on Thursday afternoon at 1:30 o'clock Rev Calvin Grosshuesch will preach the sermon

Interment will be made on the family lot in the Klemme Cemetery beside his parents and his brother, August.

Moved Out Of Flooded District

FORMER KLEMME GIRL AND FAMILY REPORTED SAFE IN FLOOD DISTRICT

Mrs John Bock received a telegram Sunday evening from her daughter, Mrs Lyle Burr of Louisville, Kentucky, in which Mrs. Burr stated that they had left their home in Louisville for Lexington, Ky, about eighty miles from Louisville Mrs. Burr and daughter are at Lexington, but Mr. Burr who is manager of a large store in Louisville returned to the city to assist in relief work

The Burr family reside in a comparitively high location in the city, but water had entered the basement and was creeping upward toward the first floor. Furniture was moved to the upstairs rooms before departing.

Mr Burr's store at last reports was nearly submerged and stock was given over for relief purposes

GARNER FARM HOUSE DESRTOYED; BLOCKED ROADS HALT FIREMEN

GARNER—Fire destroyed the Frank Fromanek, Sr farm house on the farm operated by his son, Ed and daughter, Lillian, who narrowly escaped in night clothin day The place is about six miles northwest of Garner on the Hayfield road with the buildings built quite a distance from the main road Snow blocked roads prevented fireman or neighbors from giving assistance. The origin of the fire is unknown but thought to have been caused by an overheated stove. Nothing was saved. The loss is covered by insurance.

Will Handle Line Of Power Tools

KLEMME YOUNG MAN ENTERS BUSINESS AT TOLEDO, OHIO

Harold Jost Buys Interest In Jobbing and Wholesale Business

Harold Jost left last week Thursday for Toledo, Ohio, where he will enter business. Harold has purchasd an interest in a buiness conducted by his cousin.

The Jost cousins will job and wholesale wood and metal working machinery, handicraft supplies of all kinds, model supplies, motors, etc Their establishment is known as the Hobby & Home Workshop Supply Co. and they handle such well known lines as Delta, Boyce-Crayne, Walker-Turner, Atlas and other well known lines of power tools They also handle a full line of hand tools, craftsmens supplies, etc.

Harold stated that in addition to jobbing and wholesaling supplies, they will move the establishment to uptown headquarters and will also conduct a retail store and may also branch into manufacthring small articles and novelties

Harold is getting into a line of work which he has always been greatly interested in. He has shown fine ability along mechanical and electrical lines and that line has been more or less of a hobby with him.

Harold is a fine young man and the writer is sure that we express the wish of the community when we say "Good Luck!"

ED. BUNTENBACH INJURED IN AUTO ACCIDENT MON. P. M.

Ed Buntenbach was injured in auto accident on the highway between Burchinell and Mason City Monday afternoon, and is in Mercy hospital recovering from the effects of a broken nose and scalp wounds.

Mr. Buntenbach's car was struck on the highway when, according to Mr Buntenbach, a car coming from a side road failed to stop and crashed into the side of his car demolishing it and injuring Mr. Buntenbach.

Conference Game Here This Friday Evening

The Kanawha Bulldogs will invade the Shamrock court in a double header basket ball game Friday night. The Shamrocks defeated the Bulldogs decisively in an early season game, but the Bulldogs have shown great improvement since then and the game here Friday night is expected to be close.

New Judge

Henry N. Graven of Greene has been appointed by Gov. N. G. Kraschel to succeed the late Judge Joseph J. Clark on the district court bench. He will make his home in Mason City. Judge Graven has been engaged in the practice of law at Greene with his brother James since 1921. For the past several months he has served as legal counsel for the state highway commission, under the attorney general. Judge Graven is a World war veteran and he has been active in Lutheran church affairs.

Scenes and Persons in the Current News

1—Gen. Emilio Kleber, commander of the loyalist forces defending Madrid. 2—Ceremony in Calcutta at which George VI was proclaimed Emperor of India. 3—Speaker William H. Bankhead who presided at the recent opening of the seventy-fifth congress.

Nation Hails President's Birthday

These two youngsters who have been helped in their fight against infantile paralysis, joined with Col. Carl Byoir, general director for the President's Birthday ball, in wishing the Chief Executive a happy January 30. Funds collected at the national birthday parties assist many such children throughout the country.

SHE'S EXPERT MARKSMAN

Mrs. Alice Bull, Seattle rifle shooter, was announced by the National Rifle association in Washington, D. C., to be the only woman in the United States ever to place in the national association known as the "President's Hundred." Mrs. Bull has the honor of being nineteenth in this group and last year she placed second among 1,445 competitors in the "Members match."

WINS SCIENCE AWARD

Dr. Wendell M Stanley, chemist of Princeton, N J , who recently received the $1,000 prize of the American Association for the Advancement of Science for discovering the nature of viruses that cause influenza, infantile paralysis, and colds.

Duce's Son Plans Trans-Oceanic Flight

An excellent camera study of Premier Benito Mussolini of Italy as he discussed with his son, Bruno, the latter's plans for a trans-Atlantic flight. The youth, a member of the Italian air force, hopes to establish a new record with a special Breda plane.

Passengers Sail Strikebound Ship From Hawaii

When the 31 members of the crew of the British steamer Limerick struck at Honolulu in sympathy with American maritime strikers, six passengers enroute to New Zealand on the steamer took over the jobs and the Limerick left on schedule.

UNCOMMON AMERICANS

By Elmo Scott Watson

"Garrison Finish"

"THAT was a garrison finish!" you exclaim when the home team, which has been trailing for most of the game comes from behind to win in the last minute of play. And when you say that you are perpetuating the fame—not of a baseball or a football player, but of a jockey!

Edward H. Garrison was his name and he started life as a blacksmith's helper in New Haven, Conn. Then he began hanging around the racetracks and occasionally was given the job of exercising one of the thoroughbreds. It wasn't long until he was a full-fledged jockey, who made it a practice to hold his mounts in during the greater part of a race because he mistrusted the staying power of a "front runner." Then he began to boot and whip as they came down into the stretch where, as he said, "the money is."

In 1886 one of these "come-from-behind-to-win" drives carried an outsider, Dutch Roller, owned by James R. Keene, to victory in the Great Eastern handicap at Sheepshead Bay, N. Y., and after that a "Garrison finish" became a by-word on the turf. But more famous than that was Garrison's victory on Boundless in the $60,000 World Fair derby in Chicago in 1893.

When the entries in this race went to the post, Garrison began to stall. On one pretext or another, such as fixing his straps and his saddle, he managed to delay the start of the race for an hour and 42 minutes! He spent most of this time on the ground, thus taking the weight off his horse, while the other horses were fidgeting and wearing themselves out under the weight of their riders.

When at last they were sent away to the excited cheers of 100,000 spectators, Boundless' jockey trailed the field for almost the entire race. Then there was another "Garrison finish" and Boundless, a 15 to 1 shot, came home the winner of $60,000—or rather $59,000 for the judges fined Garrison $1,000 for his part in the delay at the post.

"Snapper" won, lost and partly regained a fortune in racing. He quit as a jockey in 1897 and later served as an official at numerous tracks in the South. His last days were spent in Florida where he died a few years ago at the age of sixty-two.

John Smith T.

HIS name was John T. Smith. But that was too common. So, in order to make people remember his name he began signing it "John Smith T." As such it has come down in history, albeit the figure of the man who bore it is a shadowy one. We know that he was famous in the early days of Missouri as a duelist and land speculator and that he caused considerable trouble for Moses Austin before that worthy went to the Southwest to play an important role in the history of the Republic of Texas.

Historians are beginning to suspect that John Smith T. was deeply involved in the Burr conspiracy, as was another John Smith—a United States senator from Ohio who missed being expelled from the senate by just one vote. But how prominent John Smith T. was in that misguided adventure is still unknown and he is remembered chiefly because he was uniquely successful in escaping oblivion when "Fate tried to conceal him by naming him Smith!"

At least four others who attempted to thwart Fate thus are recorded in the rolls of the United States army. J. Allen Smith of Pennsylvania changed his name to J. A. S. Izard when he entered the United States Military academy at West Point but when he was graduated in 1825 he resumed his real name. One of his classmates was Joseph Brice Smith, who was graduated as Joseph S. Bryce, became a second lieutenant and resigned from the army in 1832 At the outbreak of the Civil war he became a captain of volunteers and in 1865 was brevetted a major for gallantry during the war. In 1830 a William Smith entered West Point as "William D. Fraser" but he was graduated under his right name He rose to a captaincy and was brevetted a major in 1848 for "meritorious service" during the Mexican war.

The fourth Smith who changed his name rose the highest in military life. He was Morgan Lewis Smith, who for some unknown reason enlisted in the army in 1845 under the name of Martin L. Sanford and served as private, corporal and sergeant during the next five years. The outbreak of the Civil war found him using his real name again. He became colonel of the Eighth Missouri infantry in 1861 and was made a brigadier-general of volunteers in 1862, holding that rank until he resigned in 1865.

Offers New Opportunities

THE modern woman who sews is really an enviable person. She has at her finger-tips an endless array of fashions from which to choose for her own and her daughters' wardrobes. Today's trio affords her new opportunities in several size ranges; in fact, there's something here for the mature figure, size 42, right on down to the tiny tot who just manages to fill "age 4."

Pattern 1987— This diminutive frock is for Miss Four - To-Twelve. Its easy lines, flaring skirt, and pretty sleeves are perhaps second only to its thru'-the-machine-aptness, so far as the woman who sews is concerned. But this is all too obvious to mention. Better cut this pattern twice for all 'round practical reasons. It's intriguing in taffeta—a winner in gingham and linen. It comes in sizes 4, 6, 8, 10, and 12 years. Size 6 requires 1⅞ yards of 39 inch material plus ⅜ yard contrasting.

Pattern 1211— It is a smart frock like this that will turn the most immune young lady into an ardent seamstress almost over night. And rightly so, for it's plain to see how becoming are its princess lines, how flattering the wide shoulders and slim waist, yes, and how spicy the swing skirt. A pretty and colorful motif can be had in the use of velvet for the buttons and belt. Monotone broadcloth, black or royal blue, with the collar and cuffs of white linen, is a startlingly chic material for this model. It is available in sizes 12 to 20 (32 to 40 bust). Size 14 requires yards of 54 inch fabric yard of 39 inch contrasting

Pattern 1210— Which would have, Madam, an artistic or a glamorous house coat pattern allows you to make interesting choice and the you'll need to make either models illustrated here house coat has become kind's most desired attire; so rather than be the minority, why not talents to this princess you'll have it complete few hours and think of the less days it will stand good stead as a really ing wardrobe asset. It is in sizes 14 to 20 (32 to 42 Size 16 (in full length) 5⅞ yards of 39 inch materi 3¼ yards of bias piping yard contrasting materia pocket.

Send your order to The ing Circle Pattern Dept., 1020, 211 W. Wacker Dr., Ch Ill. Price of patterns, 15 cent coins) each.

Style-Correct 'Comfy' Snow Clothes

By CHERIE NICHOLAS

IF YOU would be graceful "lady of the snows," you must be comfort-wise as well as fashion-wise. Warm and cozy but light as a feather, the new lightweight woolens are the big news in winter sportswear this season together with a decided vogue for gay Tyrolean "picture" costumes.

Wool gabardine, wool covert cloth, snow cloth and the finely knitted snow-tested woolens are safe and happy choices, for they keep the wind at bay and are snow-shedding and waterproof. Ideal for tailoring, they keep their lines and fit under the most strenuous circumstances. Be sure that your winter sports clothes are all wool, because this is the only way to be certain of adequate warmth without an ounce of extra weight to impede action. Two pair of wool socks, one short and one long enough to turn back over the tops of your ski shoes, also wool cap, scarf and gloves are advisable from a purely common sense standpoint. From a style basis these details give opportunity to dramatize every ski and skate suit, so choose the smartest dashing items you can find—most especially of Tyrolean, Norwegian and Dalmatian influence in colors and embroideries.

The smiling snow enthusiast to the left in the picture is perfectly clad from both a comfort and style viewpoint. This smiling queen of wintry realms is sporting with pride a new spectator coat of weather-resistant wool, soft and fleecy as a warm woolen blanket. Swagger in cut with neck and comfortably full sleeves, it is buttoned smartly up the front in bright gold. A striking blanket stripe bands the sleeves and the bottom of the coat, also making the distinctive yoke set in for broad shouldered effect.

Picturesquely Tyrolean in feeling is the "suspender" skating costume centered in the group. A cable knit sweater, in fanciful stitch, with flattering high neck is in soft white wool with matching toboggan-type cap, mittens and socks. Black wool gabardine flares in a widely pleated skating skirt and is caught at the snugly fitting waistline by decorative woolen suspenders done in colorful and authentic Tyrolean design.

To the right a classically tailored Austrian type ski suit is shown. It has a stunning, expertly tailored, double breasted gray wool gabardine jacket. Back-belted and snugly buckled, it stays nicely in place over high-built trousers in smooth suede-like black wool. A becoming gabardine soft-crowned cap fits well down on the head.

It is not only that modern snow clothes present an exciting variety of styles, but they are built on professionally correct lines. Current collections include any number of classically tailored types with simple mannish effect. Styled in dark monotone shades they depend on bright accessories for color accent. Then there are the feminine outfits with emphasis on combinations of fabric and colors together with cunningly devised details.

To pink-cheeked winter sports fans now dotting ski trails and snowy hills all over the countryside, crowding skating rinks or the old mill pond, it is of the utmost importance that sports clothes be snow-worthy and completely adequate. Look to it that your snow clothes be warm and wind-resistant. Be sure, too, that they are freely cut for plenty of action. Beware of gaps. Let sock upon sock, scarf and sweater added to sturdy costume, dependable slide fasteners and other strong and stout gadgets make you feel "sure" even should you find yourself head-first in a snow drift.

© Western Newspaper Union.

FRINGED WOOLEN

By CHERIE NICHOLAS

In the fabric realm fringed woolen is one of the successful novelties of spectator sports frock in one of the amusing new fringed woolens. It is a deep oxford gray with blue and gray fringed tufts woven right into the fabric. Silver buttons and a wide leather belt are nice outdoor accents.

VEILS FOR SPRING, MILLINERY EDICT

By CHERIE NICHOLAS

Paris milliners are saying for spring "a veil with every hat." And wait until you see the veils! Of course you may choose the modest little eye-screening affairs if you wish and they really are practical and will maintain their vogue the season through. However, they do not tell the whole story of veils, for in the new varieties there are most dramatic veils, some almost shoulder depth. Many tiny hats, especially the pill-box type, are individualized with clever veils, the wide mesh effects being especially good. The newer French veils also favor scrawly thread embroideries tracing fanciful patternings.

Lowered Necklines Will Be Welcomed by Many

Those among women of fashion that have been doing penance in wearing high unflattering necklines just to be stylish will welcome the good news that incoming dresses for spring assure a return to becoming soft lines. No longer will the throat have to be swathed in high drapes and fitted bands. The new trend is to square necks, and pointed ones also. This, together with short youthful sleeves, presents a very promising outlook.

Gay Boutonniere

A pompon chrysanthemum is the most brilliant of all boutonnieres. Both men and women wear it.

Seedless Peppers and Tomatoes Can Be Produced

Results of Treatment With Four Acids

ANN ARBOR, MICH. — Seedless tomatoes and peppers have been induced to form in unpollinated flowers by treating the fruit-producing parts, or ovaries, with any one of four different organic acids, Dr. Felix G. Gustafson of the University of Michigan has reported to the National Academy of Sciences through that body's official proceedings. Similar results were also obtained with the fruits and seedpods of a number of other vegetables and garden flowers.

While no immediate commercial application is contemplated, it is interesting to note that in the tomatoes at least the seedless specimens had very small seed-spaces—indeed in some of the smaller ones the flesh was completely solid. Immediate commercial exploitation is regarded as impracticable at present because each flower requires individual operation by a skilled botanist. The real significance of the experiments is the proof that fruit production without pollination is possible through the use of growth-promoting substances.

Four Acids Are Used.

The chemicals used by Dr. Gustafson were indole-propionic acid, indole-butyric acid, indole - acetic, acid, and phenylacetic acid. All of these have been used by a number of botanical researchers to promote the growth of stems, leaves, etc., on dormant plants and parts of plants. One, indole-acetic acid, has been found in extracts of plants and has been called heteroauxin because it acts in promoting growth like auxin, the natural growth-promoting substance.

Method of The Experiments.

In the experiments, the stigma or natural pollen-receiving surface was cut off and the growth-promoting acid preparation smeared on the cut surface. From there it diffused into the unpollinated ovary and caused the development of all parts except the fertile seeds themselves. In some of the species used, seeds did develop, but when they were cut open they were found to be hollow, without the tiny embryo plant necessary for germination. In other cases, as in the seedless tomatoes, the fruits grew and ripened normally and did not contain even hollow seeds.

In all the experiments, parallel controls were carried through. This was done in two ways: by pollinating companion flowers to the ones under treatment, and by keeping others both untreated and unpollinated. The pollinated flowers developed fruits or pods with seeds, as was expected, while the unpollinated ones simply died and dropped off.

Dr. Gustafson sums up the results of his numerous experiments in two sentences: "The significance of these experiments seems to be that definite substances, which are not specific, cause the ovary of a flower to develop into the fruit. These substances seem to be closely related to the auxins."

Hydro-Electric Plant Built Under Water

BERLIN.—A hydro-electric power plant built entirely under water is the new and unique boast of the town of Rostin in Pomerania. There is no powerhouse on the bank, no visible structure anywhere; everything lies in midstream below the dam, and the electricians come and go through tunnels.

The underwater powerhouse is a by-product of a flood problem set by the Persante river. Its early spring freshets, bearing rafts of battering ice, formerly flooded many acres of fertile land. To reclaim this land the river's meandering course was straightened and shortened, and a low dam was built near Rostin.

The dam suggested power development, though no great head of water was available. Furthermore, if a powerhouse of conventional type were set up it would be a target for the spring ice jams. So the powerhouse was set on the river-bed on the downstream side of the dam, with its roof gradually sloped to permit flood-water, ice, and any floating debris to slide harmlessly over the top.

In order to exploit fully the low head of water, the axes of the turbines are not set vertically as in most hydroelectric installations, but are almost parallel with the direction of the current

Your Cells "Drink" Moisture Like Genuine Topers

Pinocytosis Is Shown in Motion Pictures

YOU use, as daily conversational commonplaces, a lot of big scientific words that once were rated as jawbreakers: automobile, aviation, telephone, radio-activity, molecule, electron, protoplasm, chromosomes.

Add now pinocytosis. The word means "drinking by cells," and it may possibly be the key to the secret of how the billions of cells in your own body stay alive and in good working order.

The phenomenon was discovered by Dr. Warren H. Lewis and his associates of the Carnegie Institution of Washington and the Johns Hopkins university, working in Baltimore Motion pictures showing vividly, even dramatically, how it works formed a prominent part of the annual exhibition of the Carnegie Institution at its Washington headquarters.

Maybe All Cells Drink.

The "drinking" cells observed and pictured by Dr. Lewis are the normal macrophages, or big clean-up cells that keep the blood free of debris, and the abnormal cells of one type of cancer. It is possible, however, that other cells—perhaps all cells—carry on this "drinking" process.

When a cell drinks (or conducts pinocytosis) it first throws out a sort of ruffle of its marginal protoplasm. This ruffle closes around a drop of fluid and draws it in. Then a new ruffle forms and draws in another drop. The drops are engulfed rather actively and rapidly, a whole series of them being kept on the move toward the more central part of the cell all the time.

In the deeper protoplasm, near the cell's nucleus, the drops dwindle and finally vanish—it might not be too wide of the mark to say they are digested.

Do Not Increase In Size.

But the cells do not grow bigger. They must therefore eliminate much of what they thus swallow. It probably passes out of them in undetectable fine fluid currents, for no emerging droplets have ever been seen.

Which sets up two very interesting possibilities, Either the body cells in general gulp droplets, "digest" and incorporate into themselves the complex food and other large-sized molecules in solution in them, or the macrophages and possible other special "eater" cells perform a pre-digesting function for the rest of the body's vast cellular commonwealth.

Special Place in "Heaven" Arranged for Egyptian Dog

BOSTON.—A dog so highly honored by an Egyptian Pharaoh over 4,500 years ago that the king personally arranged for the dog's place in "heaven," has been discovered by American Egyptologists.

The new hero of dog history is revealed by the Harvard University-Boston Museum of Fine Arts expedition exploring a cemetery near the Pyramid of Cheops, at Giza.

In the cemetery the expedition found an inscription telling of the dog's burial, in its own tomb, with its own coffin given by the king, and all the trappings of a human being's fine funeral in the style of Egypt's Sixth dynasty. The dog's name was Abuwtiyuw.

The dog's tomb and the mummy itself have not yet come to light, Prof. George A. Reisner, director of the expedition, reports.

Incense, But No Bones.

No meat bones, such as dogs delight in, were mentioned in the king's orders for the burial. But the dog that had guarded a king was given fine linen in great quantity, and incense, and perfumed ointment.

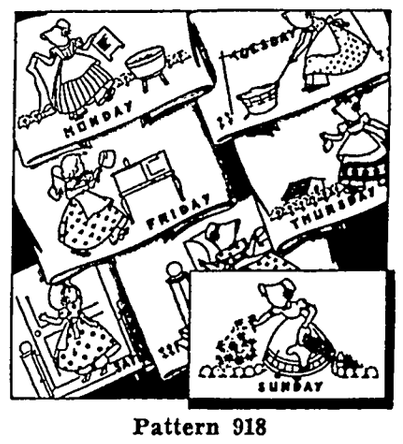
By having the animal buried like a human being, Professor Reisner explains, the Pharaoh made it possible, according to Egyptian belief, for the dog to enter the after-life as an honored spirit before the great god, Anubis, and to continue in attendance on his majesty.

Northern Birds Are Moving to Germany

BERLIN.—Mass invasions of Arctic and sub-Arctic birds have been sweeping over Germany and adjacent countries recently. Most numerous are rough-footed buzzards, rough-footed owls, pine-jays, oak-jays, and silktails or Bohemian chatterers.

Causes for this migration are difficult to surmise. The rough-footed buzzard is known to increase in numbers when there is a "lemming year", affording plenty of food, and then must migrate or perish when the hordes of lemmings disappear. Migrations of pine-jays have always been taken as an indicator of a bad crop of pine seeds in Siberia.

Busy Sunbonnet Girls



Pattern 918

They're never without their sunbonnets, these seven diminutive maidens who make light of their own chores, and yours, too. See how pretty they're going to look, embroidered on a set of seven tea towels? Stitches are of the easiest—mostly outline, with lazy daisy, running stitch and some French knots. Keep them in mind for gifts. Pattern 918 contains a transfer pattern of seven motifs averaging 5 by 7½ inches; illustrations of all stitches needed; color suggestions and material requirements.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle Needlecraft Dept., 82 Eighth Ave., New York, N. Y.

Write plainly your name, address and pattern number.

Uncle Phil Says:

Leaving No Stain

Let us seek so to live that our bygone year may, to use Cowper's beautiful expression, leave "no stain upon the wing of time."

Following precedent is always good for those whose bursts of wisdom are doubtful.

We all know how much we like a man when we hear he has just died. Let's tell him a little of that before he does.

Features of Gentility

Two main features of gentility are propriety and consideration for others.

Dignity is beautiful to contemplate, but it needs to be employed with skill.

A man has an ideal of the girl he could love, but never in his imagination does he fashion the friend he'd like. When he makes a friend, the friend is right there in the concrete.

Rejoice in Friend's Success

Allow no shadow of envy to mar the sunshine of a friend's success.

If one knows a mean story on himself, let him remember it when he is tempted to tell a mean story on someone else—and refrain.

The swan knows how to use its neck; that is why it is beautiful. The giraffe doesn't and is grotesque.

First Hot-Air Balloon

The first hot-air balloon was made by Joseph Montgolfier, who reasoned that if hot air would go up a chimney it might push up a balloon. With a sheep, a duck and a rooster on board, his paper balloon made its first ascension at Paris in 1783. A few months later two men, Pilatre de Rozier and the Marquis d'Arlandes, made a trip.

Discovery of hydrogen as a lifting gas made the hot-air balloon obsolete before it got a real trial.

CHEST COLD HAD HIM IN AGONY

Found Amazing RELIEF from PAIN

No need to suffer agony of muscular aches and pains! Thousands report wonderful soothing relief with Hamlins Wizard Oil. Just rub it on—rub it in. Acts quick. Relieves that terrible soreness. Loosens up stiff, achy muscles. Has a pleasant odor. Will not stain clothes. At all druggists.

WHEN THE PAPER COMES FROM HOME

When you are miles away from all your loved ones and you feel you'd like to go
Back home again to see them once again, you'd really like to know
What all your friends are doing while in distant lands you roam;
It is then that you appreciate a paper sent from home
It is such a comfy feeling when you sit with logs ablaze
And see through modern items the scenes of other days;
It is hard to find expression in a jingle, rhyme or poem
Of the thoughts that come a-stealing when the paper comes from home
As you read you take a journey to your old home town again
All your friends are there to greet you as you step from memory's train;
It's a sacred sort of feeling and you like to be alone
With the fire and your memories when the paper comes from home

Safety Slogans

You don,t have to be a mechanic to tell whether or not your brakes are working Any car driver can test his bakes

If you can't see through your windshield, don't drive.

A good place to park your car when the streets are icy and slippery is at home in the garage.

Most accidents are caused by some one being in too big a hurry. In nine cases out of ten hurry is unnecessary

Klemme Red Cross Mails Check For $150.00 For Relief of Flood Victims

KLEMME GOES OVER THE TOP IN DRIVE FOR FLOOD RELIEF

The people of Klemme again showed their big heartedness in dollars adn cents when they responded to the Red Cross appeal for flood relief.

Mrs. George Lawhorn, local Red Cross chairman, this evening stated that she is mailing out a check for $150.00, and expected more to come in. She reports that the Klemme school alone contriuted $33.91 and the balance was made up from donations from citizens of Klemme.

Mrs. Lawhorn was assisted in the drive by Mrs. W. H. Galbreth and Mrs. A. H. Dulmes.

Anyone who wishes to help out in the cause may give their donation to Mrs. Lawhorn and she will see to it that it is sent in for flood relief.

REAL ESTATE IS RAISING IN IOWA

Omaha, Neb.—Marked by a sharp upturn at the close of the year, sales of Iowa farms set a new record at the Federal Land Bank of Omaha during 1936, Charles McCumsey, president, reported to the bank's board of directors recently.

He reported 330 farms sold by the land bank during the year just ended for considerations totaling over $1,918,000—a new record in the bank's 20-year history.

Fifty-one of the 1936 sales were recorded during December.

Throughout the bank's entire territory—Iowa, Nebraska, South Dakota and Wyoming—real estate sales for 1936 also hit a new all-time high, totaling 468 and amounting to over $2,692,000

Insalled Thursday

GARNER—The Rebekah and Odd Fellow lodges held joint installation Thursday night. Mr and Mrs John Maddick of Kanawha, district deputy grand master and district deputy president respectively, with members of the drill team from Kanawha, installed Miss Velva Carothers and John T Gatchell will head the lodges this year.

GARNER MAN AGAIN INSURANCE EXECUTIVE

FORT DODGE, IA.—C. H. Nelson of Garner, Ia,. was re-elected president of the Farmers Elevator Mutual Insurance association at the annual meeting here Saturday Other officers are F C Behm, Logan, Ia., vice president; W P Moeller, Rock Rapids, Ia.,, treasurer, and D E. Edison, Fort Dodge, secretary.

HANCOCK UNITS HOLD CRYSTAL LAKE SESSION

CRYSTAL LAKE—The Hancock county American Legion Auxiliary met in the local hurch basement with Mrs LaVerne Stewart, county chairman, presiding Units of the county represented were Britt, Corwith, Kanawha, and Crystal Lake it was voted to send Mrs. LaVerne Stewart and Mrs. Edna Enfield, county chairman and secretary, to the president's and secretarie's conference at Des Moines Feb. 22. A short play, "One Born Every Minute," was put on by Hattie Daniels and Mrs Clifford Riggle under the direction of Mrs. Sid Riggle The next meeting will be held at Corwith in February.

GASOLINE IS USEFUL IN KILLING MOTHS

If moths get into stuffed furniture, good soaking in gasoline will kill the moths and eggs as well Needless to say, the soaking should be done out of doors or at least somwhere away from all possibility of fire.

"Well now I know times are getting better," announces one of our friends, "as soon as my wife sees a luxury in a neighbor's home it becomes a necessity in ours.

observes that he always likes a good sport but he believes it pays to have just enough meaness about you to keep people treating you well.

The Marshall Field stores in Chicago are installing new elevators and escalators at a cost of nearly $3,000,000 The new elevators will travel about twice as fast as the former ones, and are equipped with every known safety device. The Field establishment is not the largest, but it is believed to be the finest of its kind in the world.

In contrast with the frightful loss of life and limb thru automobile acidents is a recent report to the effect that the Louisville & Nashville railroad has killed no passenger on its lines in the last 18 years. The effectiveness of safety precautions on modern railroads is one of the marvels of the age.

Police Efficiency

The efficiency of police in a large city was demonstrated recently when a Klemme lady lost her purse, containing both money and railway tickets. The lady had taken out small change for a telephone call and either laid her purse dwn or it was snatched from her. Anyway she notified police immediately, and in a short time her purse was returned to her, the coppers having caught the man who claimed he had found the purse But it's a good idea to hang onto your purse anytime in a large city, where crooks are always on the lookout for easy money Police are not always as efficient as they were in this particular case

HIGHWAY PATROLMEN MOURN MRS. MILLER' WEAR BLACK ON ARMS

DES MOINES—State highway patrolmen wore black arm bands Monday in honor of Mrs. Alex Miller, founder of the patrol, who died Sunday

The official mourning is to extend for a period of 30 days.

It was the second time highway patrolmen have worn mourning bands. The uniformed force honored in similar fashion Oran E. Pape, who was killed by a young gunman last spring.

WILES CAFE

SCHOOL NEWS

Grades 7 and 8

The Literary Review Club met this week and elected new officers. Lorraine Buntenbach was elected president; Charles Bock, vice president, and Garland Brinkman, secretary After the election reports on the favorite character of the book read were given

Those who received 100% in spelling this week are Ellen Kilgore, Melvin Coobs, Arlene Buseman, Harold Swalve, Dorothy Baack and Jacqueline Kudje

Grades 5 and 6

Grade six began their study on feudalism At the end of this unit they plan on making a castle

For sixth grade arithmetic we have begun our work on percentage

In fifth grade geography this year we study the United States Miss Barz brought us a puzzle map that we enjoy putting together. This helps us to learn the location of the states.

There have been quite a few absences in our room this past week due to illness. We hope that soon all will be able to be with us again

Grades 3 and 4

The following people were neither absent nor tardy during the first sememster Esther Tiggeman, Robert Tiggeman

Those having an average of "B" or above in all of their subjects the first semester are. Ruth Bell Patricia Kudje, Marjorie Hartbeck, and Edward Barz.

The third graders are making a movie of the story of milk.

The fourth graders wrote original poems and stories during Language periods this week They are two story books. Our Ow Bedtime Story-Book will contain true stories about themselves. Our Desert Bedtime Story-Book Will contain their make-believe desert stories

The fourth graders are working on a project about Desert Life The class was divided into two committees One committee planned and made an Oasis Town, the other planned and made a Nomadic Camp The children were responsible for materials, dividing the work up evenly and the original plans of the villages. They are very proud of their work and their interest seems never-ending

A new plan for progress in arithmetic is being tried out. This plan is similar to our spelling method The work perods each day are to lead up to the final testing on Friday Each child will have his own progress chart and a class chart will be kept on the bulletin board.

Grades 1 and 2

The second graders are making a frieze of the story "The Cave Boy"

One day we made pictures of igloos The best ones were put up on the bulletin board

The first graders are having spelling now Most of the children got "A" on Friday

'TONIC' IS SOLD FOR SEED CORN

Iowa Farmers Are Warned Against 'Racket'

Iowa agricultural authorities warned Iowa farmers Saturday against being "victimized" by what they said was a new seed corn racket.

They said a product, which salesman claimed is "an extract from hybrid seed corn," is being sold to "unsuspecting farmers for as high as $12 50 a bottle"

Salesmen have declared, the authorities said, the "extract," used to treat ordinary seed corn, would make the "resulting crop resistant to grasshoppers and chinch bugs"

University of Illinois farm crops specialists and entomologists have reported to Iowa officials the "product originated in Iowa, at present is coming to light mostly in western Illinois.

In Des Moines the state agriculture department warned Iowa farmers "to watch out for the racket" They repeated part of the Ill warning which asked that "farmers offered any of the spurious product should notify their nearest authorities."

OLDSMOBILE CHEVROLET

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington.—If the first legislative act of the new congress is to measure its efficiency and its value as the policy making branch of our government, there is no other conclusion than that our legislative body has sunk to a new low in its history. Of course, congress should not be judged by the mess it made in rushing through a resolution barring further shipment of airplanes and engines to Spain but on every side I hear criticism of the lack of common sense used in that instance.

Plane Embargo

To recall some of the details, when congress convened there was a wild and surging wave demanding that the United States remain neutral and avoid entanglement in the Spanish crisis. Everywhere and on a million tongues was heard the cry that the United States should take no chances; it should take all of the stitches m time that are necessary to make certain that we will not get involved in a circumstance on European soil that threatens to become another 1914.

It has been and is quite evident that the people of the United States are committed to a policy of peace, a policy of neutrality. European developments have proceeded so slowly that even the merest tyro has foreseen the ultimate clash between communism and fascism about which I wrote in these columns some weeks ago. In other words, the European situation has developed after a manner that would enable preventative plans to be laid on this side of the Atlantic ocean.

But congress, in attempting to insure our neutrality, did probably the most unneutral thing it could have done. In so doing, I believe the consensus is that both house and senate demonstrated again the inability characterizing congresses of the last few years to appraise a complete picture. It yielded to what it believed to be the public demand giving thought to the future.

Let us analyze briefly what happened. The congress convened, as I have said, with an almost unanimous demand from the country for a definite and workable neutrality policy, It convened with two or three individual business units seeking to deliver shipments of airplanes and engines to the so-called loyalist troops in Spain. The exporters of these war material sensed quick action by congress that would destroy their contracts. Naturally, they put on all speed to get the planes and engines out of this country ahead of an embargo. Congress, like so many boys in a college football match, fell into the spirit of competition, a race.

* * *

Well, the answer is that Robert Cuse succeeded in getting his planes and engines on board ship and away from New York and beat in the race by twelve hours, a fact which congressional leaders knew when they enacted the resolution of embargo.

Beats 'Em to It

So, it appears to be almost inexcusable that men of brains should have rushed a piece of legislation on through its channels containing an entire absence of neutrality in its very language.

The resolution that was to prevent Mr. Cuse and several others from shipping airplanes and engines to Spain not only laid down the embargo which was its purpose but it laid down that embargo specifically against Spain.

Now, to those not versed in international law, it may not be immediately evident how dangerous such a precedent is. International law requires (and it is accepted everywhere among all nations) that there shall be no discrimination among nations unless those nations are declared to be belligerents Spain has not been so declared. The war in Spain is a civil war insofar as it relates to any other nation officially. Of course, it is a well known fact that troops from communist Russia and nearly-communist France are helping the so-called loyalist government in Spain. It is equally well known that fascist troops from Nazi Germany and fascist Italy are supporting the rebel liberal General Franco in Spain. These facts would seem to make the war in Spain something more than a civil war, which, indeed, it is, but as far as the United States is officially concerned, the war in Spain remains civil strife. And yet our congress in the worst display of low grade intelligence witnessed in a long time, specifically places Spain in the category of a nation at war with another nation and says in a statute that certain commodities may not be shipped to that nation.

To state this problem another way, it would have been exceedingly simple to have made the legislation apply to all nations and thereby to avoid embarrassment. There was time after the race with Mr. Cuse was lost to have made the correction of a mistake which should never have been made in the first place. But congressional leaders were swept overboard by the big wave and as far as I am concerned have demonstrated again their lack of ability to keep their feet on the ground.

I do not know what it presages in the way of future legislation. It may be that after the excitement has died down, congress will again debate legislation and work out proper laws but the start certainly has been inauspicious.

* * *

Attention ought to be called just here to the differences that have arisen and promise to cause difficulties between the executive branch of the government and some of the legislators Mr. Roosevelt, as President, seems to feel that he should have plenty of power to deal with problems like the Spanish situation and export of arms without consulting congress. A good many New Deal Leaders in congress feel the same way. But there are many who disagree with that idea. There is pronounced sentiment at the Capitol in favor of legislation that would definitely prohibit the exporting of arms and munitions of war but including definitions and guide lines for those in the executive branch of the government to enforce.

Some Differences

It is too early yet to tell what form the permanent legislation will take because of the circumstances just outlined. With the top heavy New Deal majority in congress, it would seem the better guess to predict that Mr. Roosevelt will have his way but on the other hand, until such an issue becomes clear cut one cannot tell very far in advance how the two schools of thought will solve their problem and whether the United States will be committed further to the one man control that would necessarily result from granting additional descretionary power to the President in a matter of this kind.

There seems to be no doubt anywhere that sooner or later one of the nations whose troops is participating in the Spanish civil strife will commit an overact, an act of war. Some hot-headed individual in command of a ship or an airplane or troops guarding a border will take a pot shot that will wipe out a life or two and wipe out peace at the same time just as occurred when the comparatively insignificant Austrian Archduke was shot in 1914. There can be no question that the United States must follow an international policy under these circumstances that is most cautious.

* * *

Dr. Rexford Guy Tugwell, the famous dreaming brain truster No. 1 of the Roosevelt administration, has returned to private life — to an executive position with a molasses firm. Before he left his post as Undersecretary of Agriculture, however, the famous professor signed an order that is designed to curb lobbying by former employees of the Department in whose administration he had a hand.

Tugwell's Last Act

The aim of this order was an obviously worthy one because it was designed to prevent former officials or employees of the Department of Agriculture from using new connections with commercial groups from obtaining information or using influence not of the best sort from a public standpoint With that order, there can be no quarrel.

I find among astute observers in Washington, however, no serious supposition that the order would operate to deprive Dr. Tugwell himself or any other former official of high standing from access to members of the Department's staff. It just does not work out that way. It never has and it never will, despite the wholesome character of the good professor's plans.

The truth is that while such an order may make lesser officials more cautious and thus put a few obstacles in the way of petty lobbying, it is thoroughly ineffectual in preventing the use of influence or the obtaining of information from that Department or any other in the government.

The difficulty with this situation is that government offices are being used as a stepping stone to more lucrative jobs. The government does not offer ambitious and able men a security of tenure. Men who demonstrate ability in governmental positions sooner or later are offered jobs with great big salary checks attached and they would be less than human if they did not consider such proposition when they know that in the course of human events a great turnover will take place in their own department and they are swept aside by reversal of public political action.

POULTRY

FINDS $1.04 COST TO RAISE PULLET

Blames High Mortality for Loss to Poultrymen.

Supplied by the New York State College of Agriculture.—WNU Service.

Raising a pullet to the laying age of 20 weeks now costs $1.04, according to accounts kept by 38 poultrymen in co-operation with the department of farm management at Cornell university. This pays the way from a day-old chick to the laying age.

In reaching the laying age, the chick needs 12 pounds of grain and 19 pounds of mash. About 46 per cent of the total cost is for feed, 14 per cent for labor, 25 per cent is the original cost of the chick; and the remainder for use of buildings, equipment, fuel, interest, and other costs.

Poultrymen had a better year in 1935 than in 1934, the economists say. The improvement was due mainly to better prices for eggs. Returns for each hour of labor averaged 48 cents and represent the best showing since 1930.

It cost 27 cents to produce a dozen eggs in 1935, or two cents a dozen less than in 1934. This reduction in cost, together with a four-cent improvement in price, made possible an average profit of three cents a dozen.

Production on these cost-account farms averaged 146 eggs to the hen, or about 44 more eggs than the average for the state. One-fourth of the birds died or were lost or stolen during the year. High mortality, say the economists, is one of the most important causes of failure in the poultry business.

Sex of Baby Chicks Is Told by Their Markings

A practical method of determining sex of baby chicks, although limited to Rhode Island Reds, has been developed by poultry specialists of the United States Department of Agriculture.

In a study of more than 1,100 Single-Comb Rhode Island Red Chicks, T. C. Byerly and J. P. Quinn of the Bureau of Animal Industry were able to tell the sex of 81 per cent correctly. Female chicks were marked with spots and stripes of black down on the head or back. Males lacked such markings.

A total of 524 chicks had black markings. Of this number 444, or 84.9 per cent, were females. Of the unmarked group 450, or 77.8 per cent, were males. Thus the poultrymen were able to distinguish the sex of 894 chicks, or 81.2 per cent, correctly. A similar sexing study of 663 chicks in a commercial flock of Single-Comb Rhode Island Reds showed the same general results.

Sexing of chicks is comparatively recent in origin. Commercial poultrymen, especially in the far West, have shown much interest in its development. The method used by many hatcheries was introduced by the Japanese, and has grown rapidly.

To Avoid "Grass Eggs"

Hens that eat too heavily of green feed often produce eggs having dark yellow yolks, often resembling red more than yellow. These are called grass eggs, says Pathfinder Magazine. Laying poultry showing such tendency should be confined until noon each day and supplied with a good mash placed in open hoppers. Poultry experts say hens having all the mash they want seldom eat enough green food in the afternoon to give their eggs this reddish color.

In the Poultry Yard

The ordinary duck is not expected to lay more than six months.

* * *

Pullets that are decidedly undersized for their age may well be culled, as they seldom become good layers; the same may be true of pullets that are very large and coarse.

* * *

In general, the gander is larger, bolder and more masculine in carriage than the goose.

* * *

Many poultrymen dip eggs in a thin, white mineral oil which seals the pores of the shell and helps retain the fresh quality of th egg.

* * *

The flock is entitled to clean, sunny, well ventilated quarters this winter, without drafts, kept free from lice and mites. Then, given a good ration, we have a right to expect eggs enough for profits.

* * *

Do not feed your hens on any one given feed. Variety is always advisable.

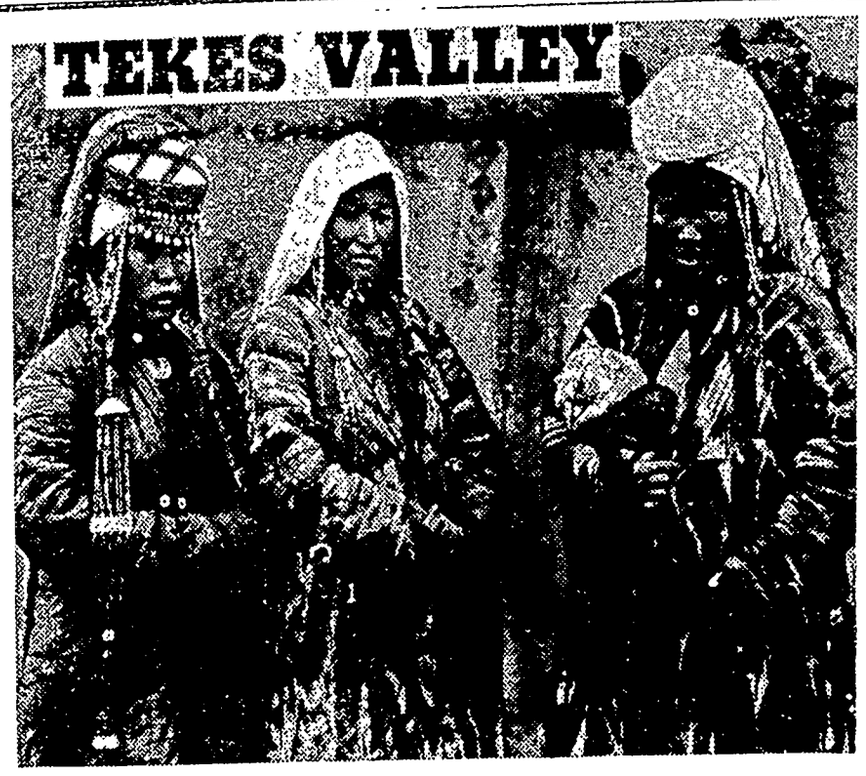
* * *

A poultry calendar, with hints for every month of the year, has been prepared by the New York State college of agriculture.

* * *

Old eggs are known by their shadows. Poultry experts at Ohio State university say the eggs whose yolks throw a distinct shadow when the eggs are candled are no longer fresh.

TEKES VALLEY



Young Ladies of Central Asia.

Prepared by the National Geographic Society, Washington, D. C.—WNU Service.

BEYOND Bukhara and Samarkand, Central Asia, lies Tashkent; and from Tashkent eastward stretches an ancient silk caravan road to Cathay. It winds across steppes, mountains, and the Chino-Russian boundary until it runs past the glamorous Central Asian metropolis of Kuldja (or Ningyuan) in Sinkiang, whose bazaar is a riot of color and whose community is an amazing mixture of tongues.

Here, in the winter, old-style Russians in gay troikas race to and from all-night parties; solemn processions of Mongol lamas parade through the streets on horseback; and long-robed Chinese and Turkish merchants shout and gesticulate in the crowded market places.

In summer lumbering oxcarts replace racing troikas and, from the streets which have become dust ponds, clouds of fine sand swirl aloft to hover over the city like a pall. Then life in Kuldja becomes unbearable and the populace, by horse, wagon, and on foot, packs off for the mountains.

And so it was that, after spending seven winter and spring months in the snows and dust of Kuldja, a traveler found himself in mid-June two days by horse south of the city, half lost in the mountains and searching for the famous Tekes valley.

His trail was winding up the bottom of a deep ravine. The steep slopes were bare of trees, but covered with an unbelievably rank growth of grass and weeds. This vegetation formed walls of the narrow trail, cutting off his view of everything save a thin band of sky above and a short patch of trail before and behind.

Suddenly a horseman emerged from the overgrowth onto the trail in front. He was a Kalmuck, a nomad from one of the Central Asian tribes of Mongols; his dark skin, high cheekbones, and brimless, domed felt hat made that certain. Apparently he had been watching the traveler from some vantage point and was accosting him for a purpose.

Kalmuck Points the Trail.

They rode together up the trail for a short distance without speaking. Among nomads silence is a prelude to greeting. It is a fine point in their social etiquette.

"Where are you going?" As he turned back in his saddle to speak, his expression was decidedly unfriendly.

"To the Tekes valley," was the reply.

"What is your business in the Tekes?"

"I visit Sayjan Beg, the chieftain of the Kirghiz."

The man drew rein and swung his horse around, his face a complete transformation. Where before had been sullen distrust, there was now smiling friendliness.

"This trail does not lead to the Tekes," he explained. "If you follow it you will be lost in the mountains and have to spend the night in the open." Then he gave elaborate directions for retracing steps and picking up the right trail.

"And carry greetings from the Kalmucks to the chief of the highland Kirghiz," he called as they parted.

Following his directions, at the first fork beyond an old sheep corral, the stranger dismounted to examine the muddy trail It was even as he had described; there were many tiny tracks made by a flock of goats which had recently passed up the slope to the right. From there the trail led over a series of hogbacks until suddenly it came out on the crest of the last ridge

Below lay the goal the traveler had been aiming at for three years—the Tekes, the valley of valleys, the nomad paradise of Central Asia.

Above the opposite valley wall, the foothills of the Celestial mountains leveled off to a great plain which stretched away to meet the snow line. On that undulating plateau were those far-famed highlands which the traveler had come to see.

Paradise for the Nomads.

Even in distant Istanbul one hears tales of how the nomads migrate to these Tekes highlands, bringing with them their flocks and herds to spend the summer months in a veritable earthly paradise for Mohammedans, drinking the famous mare's milk, feasting on mutton, sporting, loving, and marrying.

Far across the valley in one of the recesses could be seen a scattering of brown huts amid a black splotch of trees. It fitted the description given by Kuldja friends; it must be the winter quarters of the nomads, the home of Sayjan Beg, chieftain of the Kirghiz. The horseman seized the bridle rein and picked his way down the perilous zigzag trail.

"So you are a real American!" exclaimed Sayjan Beg, the Kirghiz chieftain.

He was seated cross-legged on a sedir (deep Turkish couch) reading the introduction the visitor had handed him.

The visitor had to explain to him his coming to the Tekes. His Tatar cousins had been fellow students at Robert college, in Istanbul. While at the school they had captured his fancy with tales of their home city, Kuldja, and the Tekes valley. When the boys returned home, they had given him a warm invitation to visit them.

Sayjan Beg was strangely cast for a nomad chieftain, small, thin-boned, and delicate; yet, as one came to know him, his littleness was forgotten and one was conscious only of his wiry strength and vitality. He had unbounded nervous energy and a regal manner, coupled with a quick, decisive way of uttering commands. One suspected Russian blood somewhere in his strain, for his skin was much lighter than that of the Kirghiz about him.

Chief's Head Always Covered.

Perched on his head was the embroidered velvet Moslem cap, for he considers it a breach of etiquette to be seen with uncovered head, either indoors or out. Buttoned tight about his neck was a clean, white Russian shirt, while the rest of his costume was made up of a corduroy coat, Russian riding breeches, and knee boots of excellent black leather obviously imported from Soviet Russia.

Tribal headquarters were soon crowded with Kirghiz. News passed swiftly around the village that a stranger who had lived in Istanbul was visiting the chief; so the more important tribesmen had come to pay their respects to both the chieftain and his guest. Sayjan Beg and the visitor were sitting on sedirs opposite each other, while the onlookers sat Turkish fashion on the floor or stood about, leaning against the walls.

On this first evening and subsequently, sitting cross-legged around camp fires, the guest found the nomads had rather old-fashioned ideas about geography. To them the world is flat and no amount of explaining can alter their conceptions. The earth is surrounded by "the great sea," while the sun circles about the earth.

They have heard of Russia, China, Iran (Persia), Turkey, Kashmir, Hindustan, Tibet, Afghanistan, and the mysterious far-away England. But America means nothing to most of them; in fact, the guest was invariably taken for a Russian unless he explicitly told them that he was a Ferengi—an Asian word of ancient origin derived from the word "Frank" and used to denote all western Europeans.

Dwellers in the Valley.

During a lull in his cross-examination by the circle of nomads, he questioned the chief about the different peoples living in the valley.

"There are two main races here in the Tekes, nomadic Turks and Mongols," he said. "We Turks are represented by the Kirghiz and Kazaks, two great tribes whose customs, language, and religion (Mohammedan Sunni) are almost identical, in fact, in the time of Genghis Khan we undoubtedly were one tribe.

"However, we now have distinctions: our dialects are slightly different; the Kirghiz women wear a unique headdress, and through the years we Kirghiz have been more successful in amassing wealth. We come from Issyk-kul (Warm Lake), across the border in Russian Kirghizistan, while the Kazaks have migrated from the dry steppes of Kazakistan, in southern Siberia.

"The Kalmucks, or Mongols, in the other end of the valley have lived for centuries, with only a few interruptions," he continued, "a law unto themselves, with their Tibetan religion, Mongolian language, and unspeakable customs. They have always dispensed their own civil and, to a large extent, criminal justice."

My Favorite Recipe

By Mrs. Calvin Coolidge

Pineapple Salad

Place on a lettuce leaf a slice o Hawaiian pineapple; cover wi salad dressing; over this pres through a potato sieve crea cheese; place a preserved cher on top.

Dressing for salad—Six tabl spoonfuls of pineapple juice, level tablespoonfuls of sugar, be ter size of walnut. Heat in doub boiler, add 2 beaten eggs an cook until it coats the spoo When cold add the whippe cream.

Remember the Birds

Do you remember the birds cold weather, with food on a fee ing tray, or at least scattered the ground, and perhaps a lum of suet nailed or wired to a pos Many do; there is no form of wi ter charity more appealing self-rewarding. But remember give them water, too. Bird ne water constantly, and when the usual sources freeze up they oft suffer cruelly from thirst. Be su you warm the water—mak it hot as your own coffee or te Then it will stay unfrozen quite a while and give more your feathered guests a chance drink.—Science Service

To Alkalize Acid Indigestion Away Fast

People Everywhere Are Adopting This Remarkable "Phillips" Way

The way to gain almost incredible quick relief, from stomach condition arising from overacidity, is to alkalize the stomach quickly with Phillips' Milk of Magnesia.

You take either two teaspoons of the liquid Phillips' after meals; or two Phillips' Milk of Magnesia Tablets. Almost instantly "acid indigestion" goes, gas from hyperacidity "acid-headaches"—from overindulgence in food or smoking—and nausea are relieved. You feel like over; forget you have a stomach.

Try this Phillips' way if you have any acid stomach upsets. Get either the liquid "Phillips" or the remarkable, new Phillips' Milk of Magnesia Tablets. Only 25¢ for a big box of tablets at drug stores.

ALSO IN TABLET FORM:

Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

PHILLIPS' MILK OF MAGNESIA

In Moderation

Common sense also lies in expecting too much.

AT LAST
A COUGH RELIEF—THAT ALSO SPEEDS RECOVERY

Remember the name! It's FOLEY'S HONEY & TAR! Double-acting. One set of ingredients quickly soothes, relieves tickling, hacking, coughing . . . coats irritated throat linings to protect you from coughing. Another set reaches deep to bronchial tubes, loosens phlegm, helps bring up a cough due to a cold *and speeds recovery*, giving quick relief and *speeded-up recovery*, ask your druggist for double-acting FOLEY'S HONEY & TAR. Ideal for children, too. Get a bottle today.

WNU—N

Rid Yourself of Kidney Poisons

DO you suffer burning, scanty or too frequent urination; backache, headache, dizziness, loss of energy, leg pains, swellings and puffiness under the eyes? Are you tired, nervous—feel all unstrung and "blue"? Don't know what is wrong?

Then give some thought to your kidneys. Be sure they function properly for functional kidney disorder may permits excess waste to stay in the blood and to poison and upset the whole system.

Use Doan's Pills. Doan's are for kidneys only. They are recommended the world over. You can get the genuine, time-tested Doan's at any drug stores.

DOAN'S PILLS

Household Questions

A felt blackboard eraser is best in cleaning the top of the kitchen stove. If grease gets on the stove it should be rubbed over the top of the stove while it is still hot. The eraser is much more satisfactory than a cloth and it keeps the hands from getting soiled.

* * *

After putting water and soap into washing machine let it run for a minute or two to dissolve soap before putting in clothes, if you wish the best results.

* * *

Chilled, diced oranges mixed with pineapple and sprinkled with coconut make a delicious dessert.

* * *

Wash chiffons in a soap solution. No rubbing will be required, just rinsing up and down. Don't have the water too hot.

* * *

Never put soda and water into an enameled saucepan that has been burned. Although it will remove the burned particles of food it will make the pan more likely to burn again the next time it is used. Use salt instead of soda. Fill the pan with cold water, leave until the next day and then slowly bring to a boil.

* * *

The best way to ventilate a room is to open a window at the top and bottom or one window at the top and another at the other side of the room at the bottom.

* * *

Chairs and sofas upholstered in leather will last and retain their appearance much longer if you apply regularly a mixture of one part vinegar and two parts boiled linseed oil, well shaken together. It not only cleans the leather, but softens it and at the same time prevents its cracking. Apply a little on a soft rag and polish with a silk duster or piece of chamois.

Sir John Heathcoat-Amory, whom she met on the links at Hoylake last year. Many golfing friends attended the ceremony.

Mail Planes Used to Reseed Burned Forest Land

One of the former mail planes used by the government which is now being used to scatter seed over burned-over forest land. The compartments once used for mail have been rebuilt as seed bins with trap doors in the bottoms which can be released by the pilot. The planes carry about 800 pounds of seed.

Refurbishing the Home—

Make an Inventory of Things to Be Replaced During the New Year

THE desire to start fresh at the beginning of a new year appeals to homemakers in connection with their home furnishings. There are two ways of bringing the desire into effect. One is by getting new things to replace worn out ones or to fill a hitherto long-felt need The other is to refurbish the things already possessed. The combination of these two methods is the most practical way to instill that wanted appearance of freshness into rooms.

Making the Inventory

In order to do this successfully it is important to appreciate just what we have and what we have not. We can take an inventory of what requires doing over or replacing and we can also jot down the new things we would like to get. By doing this we realize the degrees of importance attaching to each part of the job. This suggests a tabulating of the memoranda collected so that we attend to the matters of most importance first, and gradually work through them to those of lesser significance. Also it makes us realize that many of the things we desire can be taken care of at little or no cost.

Refurbishing.

For example, a sofa cushion may need recovering. We know it, and have known it for some time, but have done nothing about it. When we determine to tackle the task, we may find we have something in the house that will be excellent to use, or, if not, we will be on the lookout when we go shopping to discover some material that is suitable and at a price we can afford.

New Things.

When it comes to getting new things, new lamp shades, new furniture, and any of the many articles we most need, the clearance sales offer opportunities to get splendid values at reduced prices. We should take advantage of such sales, thereby making our homes more attractive for months, and perhaps years to come

Large Tips

The world's largest tips or gratuities are those given to croupiers in gambling casinos by players who have won large sums of money. For example, in 1929 at the Le Touquet casino in France, these tips, presented to a comparatively small number of table managers, amounted to $65,000 a week.—Collier's Weekly.

A FARMER BOY

ONE of the best known medical men in the U. S. was the late Dr. R. V Pierce of Buffalo, N. Y., who was born on a farm in Pa Dr Pierce's Favorite Prescription has for nearly 70 years been helping women who have headache and backache associated with functional disturbances, and older women who experience heat flashes. By increasing the appetite this tonic helps to upbuild the body Buy of your druggist. New size, tabs., 50c, liquid $1.

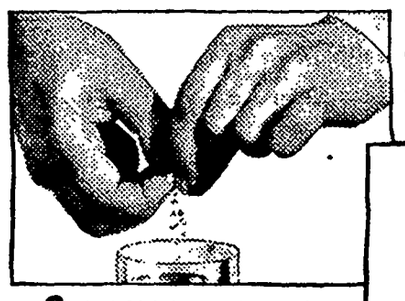
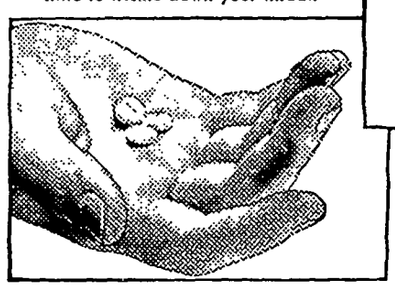
Sore Throat Pains DUE TO COLDS Eased Instantly



1. Crush and stir 3 Bayer Aspirin tablets in ½ glass of water.

2. GARGLE thoroughly — throw your head way back, allowing a little to trickle down your throat.



3. Repeat gargle and do not rinse mouth, allow gargle to remain on membranes of the throat for prolonged effect.

Just Gargle This Way with Bayer Aspirin

Here is the most amazing way to ease the pains of rawness of sore throat resulting from a cold we know you have ever tried.

Crush and dissolve three genuine BAYER ASPIRIN tablets in one-third glass of water. Then gargle with this mixture twice, holding your head well back.

This medicinal gargle will act almost like a local anesthetic on the sore, irritated membrane of your throat. Pain eases almost instantly; rawness is relieved.

Countless thousands now use this way to ease sore throat. Your doctor, we are sure, will approve it. And you will say it is marvelous.

Get the real BAYER ASPIRIN at your druggist's by asking for it by its full name — not by the name "aspirin" alone.

The followig officers and teachers were installed and took up their duties at the Peace Reformed church.

Supt. of Sunday school, Ben V. Greimann; secretary and treasurer, Curtis Greimann; the teachers are Harold Haberkamp, Lola Goll, Mrs. Oscar Greimann, Mrs. Fred Greimann, Erma Huenemann, Evelyn Lenz and Mrs. Ray Haberkamp

Fred Klinge, Jr., and Chas. Goll are the newly chosen elders and Henry Klinge was reinstalled as deacon having served the past year.

ROAD WORKER AT GARNER SUFFERS CRUSHED FINGER

GARNER—Harry Quintus, employed at county road work, suffered a crusher middle finger on the right hand when it was caught in a chain Thursday afternoon. He was brought to a local physician who found it necessary to amputate it at the first joint.

This problem of highway safety would be quickly solved if you could convince motorists that the car to watch is the one behind the car ahead.

Why Taxes Are Higher

IN HANCOCK COUNTY

Three Reasons WHY Your 1936 Tax Is Higher Than The 1935

1936 Tax	$605,917.59
1935 Tax	543,486.67
Total Added Tax	$ 62,430.92

The question is asked so many times, why are my taxes higher than last year We have checked the totals and have tried to show in a short way where this additional tax goes.

The following items make up the main part of this extra tax.

1936 Road Levy is	$100,383.43
1935 Road Levy was...	62,588.43
Additional Tax . .	$ 37,795.00
1936 Emergency Tax .	$ 20,000.00
1935 Emergency Levy	10,000.00
Additional Tax	$ 10,000.00
1936 Ad'nal School Tax	$ 14,635.92

R. L. McMILLIN

County Treasurer

GARNER, IOWA

WHEN YOU BUY YOUR NEXT CREAM SEPARATOR BE SURE IT'S A . . . .

De Laval

There are many good reasons why the DE LAVAL is Americas leading cream separator There are many reasons why that once a DE LAVAL user always a DE LAVAL user.

Our best recommendations are the satisfactory results that dairymen right in our own community are getting from their De Laval If you are in the market for a new separator, be sure to come in and see our line We have a separator to suit your special requirements

Remember: If you are not getting ALL the cream from your old separator you are wasting enough cream to soon pay for a new De Laval

SUPPLIES FOR THE DAIRY. . .

We carry a complete line of Milk Pails, Cream Cans, Dairy Brushes, Milk Strainers, Filter Discs, etc.

PRICES REDUCED ON BURPEE CANNERS. . .

We have just received a bulletin announcing new, lower prices on BURPEE CANNING MACHINES and PRESSURE COOKERS Come in and see these fine outfits at reduced prices.

THE KLEMME TIMES

LUME 41 — KLEMME, IOWA, WEDNESDAY EVENING, FEBRUARY 3, 1937 — NUMBER 37

Merten Tells Of Work Accomplished Past Year

ROAD NOTES
y C. F. Merten, County Engineer.

ollowing is a brief summary he 1936 highway expenditures ancock County taken from the ual report and claim register of County Engineer.

Expenditures For Road Construction

uilding seven wooden bridges	$4554.30
rading thirty five miles of local roads	22,190.45
ling and intakes	241 24
ight of way	1514 37
ravel pits	5350.00
ngineerng	3577.30
otal Construction	**$47,039.19**

Expenditures For Road Maintenance

rface and roadbed	$26,854.10
ridge maintenance	4215.09
ow removal	10,568 95
uipment and tools	25,239.30
ling and draining assessments	1986.89
ravel pits	305.00
ngineering	639.15
otal Maintenance	**$69,808.44**
rand Total Construction and Maintenance	**$116,847.44**

The wooden bridges were conucted with treated piling and mber with the exception of the earing surface and handrail hich are plain lumber. In some ses an asphalt mat was added to e wearing surface to increase its fe. Their combined length is 260 et with an average cost of $17 - per foot. Treated timber will st about 50 years and bridges of is material can be built at one- th of the cost of concrete bridges.

Grading costs include contract sts, dynamite, culverts, and la- r. The average 1936 cost was 43.00 which is slightly higher an we have paid during the last w years. The gravel surfacing is done with local trucks and re- f labor. Only about one-half the aveling on the 1936 program was mpleted during that year beuse of lack of funds. It is now ing completed as fast as funds come available.

The maintenance item, "surface d roadbed," includes dragging eration of power maintainers, tting brush and weeds, and re- rfacing gravel roads. The resurcing of gravel roads was not up our usual standard because of k of funds. Snow removal inides erecting and removing snow ice as well as snow plowing and oveling, but does not include the rchase or repair of snow plows these costs are charged to eipment.

Some items of interest which not classified above but are inded in the maintenance and nstruction totals are as follows.

bor	$29,144.02
solene	6751.32
lvert pipe	5875.08
l and grease	1510.83
plosives	1545.00

During the depression years ices of material and labor were v and taxes for road purposes re greatly reduced as shown by e following tax collections in ncock County.

ad taxes collected in 1931	$157,088.70
ad taxes collected in 1936	65,374.04

Prices of both labor and mater- are increasing rapidly so if we e to continue to meet the dems of the public for the conuction of our farm to market ads it will be necessary to inease levies for road work.

In addition to the funds receivfrom tax collection the county ceives approximately $50,000 per ar as its share of the state gasoe tax. There are bills being introduced in the state legislature at Des Moines to take this gas tax money from the counties and turn it over to the State Highway Commission to be used in constructing roads costing $10,000 00 per mile or more. Friends of farm to market roads should resist this action.

MASON CITY HAS SINGING MOUSE; KEPT IN A JAR

And now Mason City has a singing mouse.

Mr. and Mrs. Harry Smith, 612 Third street northeast, captured one and now keep it in a glass jar until they can secure a suitable cage.

It was the nocturnal singing keeping them awake, that led to he discovery they had a mouse in the house. So they cornered him with a box and trunk and finally got him trapped in the jar, where he is still being kept

The warbling mouse hops about like a kangaroo In fact he is able to hop from the floor to the top of a table, according to Mrs. Smith He has big ears that stand erect

Livestock Killed In Train Wreck

TWO STOCK CARS PLUNGED INTO RIVER SOUTH OF TOWN

Sixty Five Hogs Killed And Many Were Crippled

Two stock cars were plunged into the river and a third went over the enbankment at the bridge south of Klemme Saturday night on a southbound shipment of livestock

The two cars which fell into the river went off the bridge on the west side of the track. One of these cars loaded with hogs stood on end in the river The other car loaded with sheep and calves lay on its side on the ice. The third car went off the north end of the bridge and slid down the embankment but did not fall in the river. This car was loaded with hogs. About sixty-five head of hogs were killed and a large number were crippled in the wreck Two car loads of stock behind the derailed cars were hauled back to Klemme and the other section of the train proceeded south

It is thought that one of the cars left he rails a few hundred yards norh of the bridge, as tracks revealed in the frozen roadbed would indicate., which was the cause of the wreck at the bridge.

STATES HAVE OPPORTUNITY TO SHOW WARES IN HUGE BUILDING AT NEW YORK FAIR

NEW YORK, (Special) —Included in the limited edition book of unusual size and beauty which the New York World's Fair 1939 Incorporated has sent to state governors and, through diplomatic channels, to foreign governments, is the following text devoted to. . .

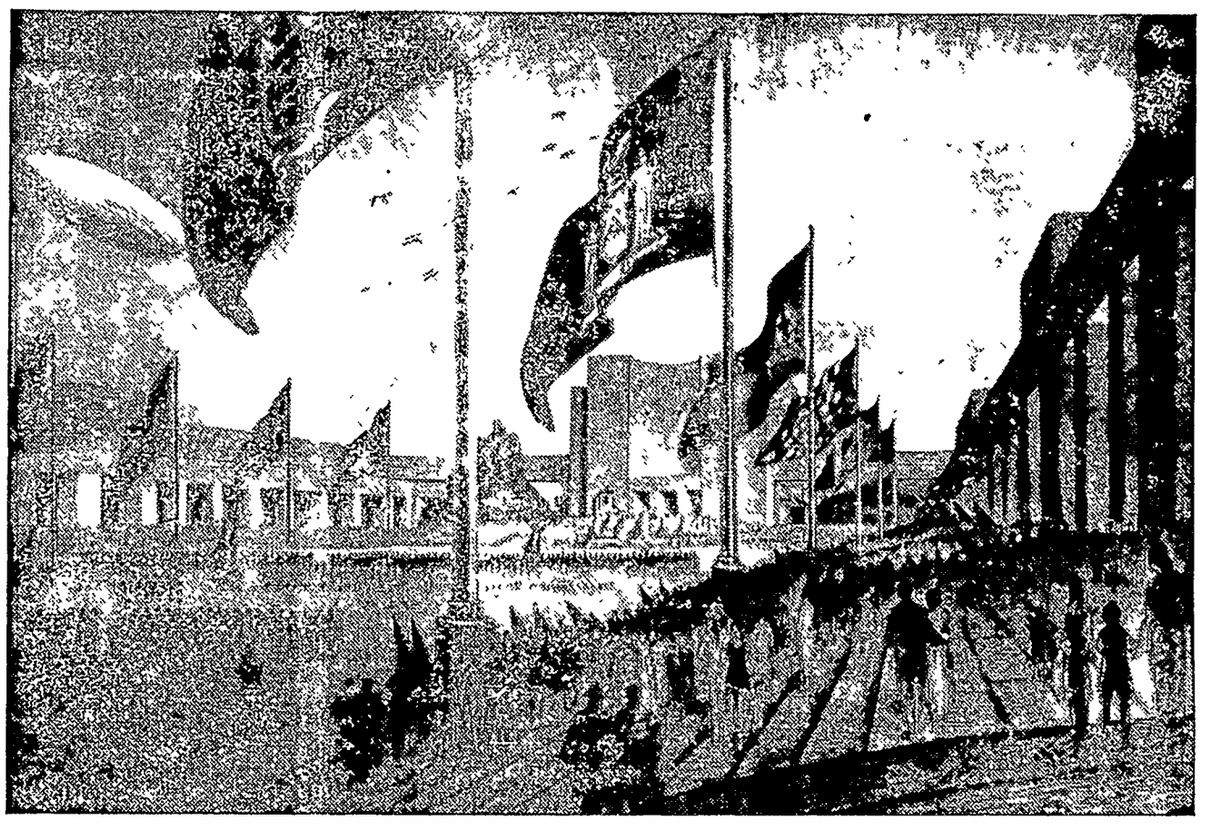
The Sovereign States of the Federal Union

George Washington, in declaring that the public felicity and prosperity of America depend upon the firm union and the unceasing cooperation of the sovereign American States, divined the future. The prosperity and the greatness of these United States have arisen from the free and unimpeded circulation of ideas and products in the world's greatest consumer market.

The Fair gives to each State the appropriate setting and opportunity to announce to the world its unique and indispensable contribution to America's rich and colorful civilization The Fair contemplates a Hall of States, in the imposing Government group and flanking the structure which the Fair looks to the United States to build, to house the exhibits of the forty-eight States, and the Territories. Those wishing to participate more extensively will, in addition to their exhibits in the Hall of States, either erect their own buildings or obtain space to display their products and attractions in one or more of the exhibit zones.

The State of New York has naturally taken the leadership in the participation of the sovereign States of the Federal Union. Its total appropriations for Fair purposes may exceed $5,600,000; and the New York State World's Fair Commission, appointed by the Governor, has been active for some time. Other States already are beginning to express enthusiastic interest in participating more extensively than at previous world's fairs.

The many visitors will find a fresh cause for pride and enthusiasm in the revealing exhibits of their respective States. But beyond this, the exhibits will enable the States to make a persuasive presentation to all visitors of what they have to offer to the consumer and t the tourist.



Before the Hall of States, at the New York Fair, a Brigade Might Pass in Review

Shamrocks Lose Grip On Race In 7-E Conference

SHAMROCKS LOSE TO KANAWHA BULLDOGS IN ROUGH CONTEST

Are Handed Worst Defeat So Far This Season

The Kanawha High School Bulldogs upset the dope bucket here Friday night to trounce on the Klemme Shamrocks by a score of 36 to 25. The teams played on even terms in the first half, but the visitors slowly pulled away in the final period and then clung to their lead in true bulldog fashion

Duke Yeakel, Kanawha forward led the scoring for both teams with a total of 14 points Jorgenson of Klemme and Cooper and Hanson of Kanawha tied for second honors with eight points each

The Shamrocks played over three-fourths of the game without the services of Ted Kaduce, who sprained an ankle late in the first quarter. The absence of the rangy center was sorely felt by Coach Kingery's men who had earned a 15 to 15 tie at half time.

Inability to make good on free throws was one big factor in the defeat for the locals Usually strong in this department of the game, the Klemme boys made good on only three chances out of nineteen

The Little Shamrocks came near spoiling the Kanawha second string's perfect record for this season when they held the visitors to a score of 12 to 10. Trampel and Paul did most of the scoring for the locals in this game.

Following is the box score of the first team game

KLEMME SHAMROCKS 25

PLAYER	FG	FT	F
Jorgenson, f	4	0	4
Lemke, f	1	2	2
Grosshuesch, f.	2	0	0
Kaduce, c	1	0	1
Paul, c	1	0	0
Schuldt, g	1	1	2
Keeper, g	1	0	2
Wicks, g.	0	0	0
TOTALS	11	3	11

KANAWHA BULLDOGS 36

PLAYER	FG	FT	F
D Yeakel, f	6	2	3
Cooper, f	3	2	2
Basler, c	2	1	4
Hanson, g.	4	0	3
W Yeakel, g.	0	1	4
Espe, g	0	0	0
TOTALS	15	6	16

Klemme Girl Will Be Heard On Radio Program Sunday

Miss LaVohn Sherwood, who is a freshman at Waldorf College, Forest City, will be heard on the "Waldorf Hour" over KGLO next Sunday afternoon at three o'clock Miss Sherwood will share the program with a young man from Renwick who sings baratone.

Miss Sherwood has a rich soprano voice and has shown marked talent since entering Waldorf.

The program on which Miss Sherwood appears will be the third Sunday afternoon program sponsored by Waldorf College over KGLO.

MARRIAGE LICENSES ISSUED AT GARNER

GARNER—Since Jan. 1, only one marriage license had been issued by Clerk Elmer Raw, unil Tuesday and Wednesday when the following couples were issued licenses: Theodore Hinders, 27, Woden, and Irene Mae Reitter, 21, Britt; Lawrence Blick, Legal, and Esther Folkerts, legal, both of Garner, and Paul Karvitt, 30, Clear Lake, and Wemkie Trampel, 28, Klemme.

Defying superstition and walking under a ladder, James Riordan of New York City then saw a dollar bill on the sidewalk, stooped to pick it up, and slipped and broke his leg.

SEVEN EAGLES STANDINGS

Seven Eagles Conference play last week saw Goodell well out in front in the Conference race when they retained their perfect record by whipping Crystal Lake 42 to 19, while Kanawha nosed out the Shamrocks from their second place by defeating them 36 to 25 to hand them the worst licking they have had this season. Woden stepped up a notch by defeating Hayfield 34 to 14, which put Crystal Lake next to the cellar Hayfield has a perfect record in reverse.

With the Klemme Shamrocks playing a postponed game at Hayfield tonight, a victory there would tie them for second place in the Conference with Kanawha.

Friday night the Shamrocks go to Crystal Lake; Woden goes to Goodell and Kanawha goes to Hayfield.

STANDINGS	Won	Lost	Ptc.
Goodell	7	0	1.000
Kanawha	5	2	.714
Klemme	4	2	.666
Woden	3	4	.488
Crystal Lake	2	5	.285
Hayfield	0	6	.000

KLEMME GIRL MARRIES CLEAR LAKE YOUNG MAN

Miss Wemkie, daughter of Mr and Mrs Peter Trampel, and Mr Paul Carvitt, son of Mr and Mrs William Carvitt of near Clear Lake, were married Wednesday afternoon, January 27th at 1:00 o' clock at the Trampel home southeast of Klemme

The ceremony was a quiet home affair with the bride's parents as the witnesses. Rev. Calvin Grosshuesch, pastor of the Klemme Reformed Church read the marriage rites. The bride wore a dress of blue crepe and the groom wore a suit of blue serge.

The bride, who was born at Kamrar, Iowa, has spent most of her life in this community. Both of the young people have a host of friends with whom the Times joins in extending congratulations.

Ben Reemstma of Ventura was a business caller at the Donald Neuberger home Saturday.

$228.92 FOR RELIEF USE!

KLEMME RED CROSS CHAIRMAN REPORTS THAT AMOUNT SENT IN

Still Time For You To Send In Your Contribution

Mrs. George Lawhorn, local chairman of the Red Cross, reports that up until Tuesday evening she has sent in $228 92 for relief of flood sufferers.

Mrs Lawhorn states that there are undoubtedly many in the Klemme territory who have not contributed but would like to do so. There is an urgent need for more money and those who want to help can send or leave their contributions with Mrs Lawhorn, Mrs. A H Dulmes or at the First National Bank

Vagabonds Play Even In Games

VAGABONDS WIN OVER FERTILE; LOSE TO GARNER

Trounce Fertile 38 To 21

Thursday evening the Klemme Vagabonds treked to Fertile, and again they downed the Indians Fertile started the ceremonies by caging 6 points in the opening minutes of play, but when the half ended they still had six points and the Vaagbonds had nineteen. The second half was played on more even terms, but the first half lead acquired by the Vagabonds was too much for the Fertile lads and they went down to defeat by a count of 38 to 21.

George Stokesbary was high for the evening when he played a sparkling offensive game to account for nineteen of his team's 38 points.

Lose To Garner Merchants

After getting off to a bad start and trailing 18 to 6 at the half, the Vagabonds put on a third period rally that netted them 14 points while the visitors were getting one. The Vagabonds looked unstoppable in this one period, but their work was to no avail, for early in the fourth quarter the Merchants again took the lead. Not satisfied with merely having the lead the Merchants went to work and ran the count to 36 to 22 before he gun sounded.

Greimann looked best for the visitors, while Brinkman led the scoring for the Vagabonds.

IOWA FARMERS GOT 52 MILLION FOR MAIN GOODS IN NOVEMBER

Washngton — The agriculture department reported Wednesday Iowa farmers received $52,203 000 for their principal farm products in November, a $14,260,000 increase over the same 1935 month.

Government payments of $665 000 increased their income to $52,868,000. In November, 1935, benefit payments of $1 683 000 were included in their $39,926.000 income

The Iowa January--November total income from the two sources was $493,567.000 compared with $446,874.000 the previous year.

Iowa farmers during last month were shown to have received $4,128.000 for crops and $48,075 000 for livestock and livestock products

Eastern Star Dinner and Initiation Will Be February 9th.

The Eastern Star chapter will hold a school of instruction next week Tuesday starting at 9:30 a m. under the able direction of the instructor, Mrs. Laura Lenz, of Mason City. At 6:30 p. m. there will be dinner for all the members at the dining room, and at 7:30 the degree work will be given.

Samples of Ocean Bottom Obtained by a New Device

WASHINGTON.—Samples of ocean bottom gouged out of ten feet of solid mud or silt by a new type of apparatus have been undergoing analysis at the Carnegie Institution of Washington. They are expected to tell new stories of the geological and biological history of the depths, hitherto hidden because no previously existing form of apparatus could do more than scoop up a superficial handful of material from the ocean floor.

The device, called a core sampler, has been developed in the laboratories of the Carnegie institution by Dr. Charles A. Piggot of the geophysical laboratory. It consists of a short, thick-walled cylinder with a plunger that can be driven forward by a charge of cannon powder. Attached is a ten-foot tube of tempered steel, which is called the bit. When this sampler comes into contact with the bottom, the powder is exploded and the bit is driven into the ocean floor.

Sample Comes up in Tube.

The bit is lined with a thin brass tube, which is removable. The ocean bottom sample remains in this, to be corked up and filed away for study in the laboratories on shore. A new lining is shoved into the bit, the powder chamber in the gun reloaded, and the sampler is ready to take another bite.

The first real deep-water samples were taken through the co-operation of one of the great commercial cable companies, which had to send out a powerful repair ship, the Lord Kelvin, to mend a break in a trans-Atlantic cable.

Cystine's Presence Is Necessary for Growth of Cancer

WASHINGTON.—Cancer tissue, contrary to generally held opinion, requires the same sort of protein nourishment for its growth as normal tissue does. Experiments showing this are reported by Drs. Carl Voegtlin, J. M. Johnson and J. W. Thompson, of the United States public health service's national Institute of Health, in Public Health Reports.

The results of the studies, in which the growth of cancers in mice were checked by certain types of diet, cannot be applied in the treatment of cancer in man, Dr. Voegtlin emphasized.

New fundamental knowledge of the chemistry of cancer growth, however, has been gained.

Needs Cystine to Grow.

The growth of breast cancer in mice can be checked, Dr. Voegtlin and associates found, by feeding the animals a diet deficient, though not entirely lacking, in cystine. This chemical is an amino acid, one of the essential building stones of all tissue proteins. Cystine is also part of another chemical, glutathione, which is widely distributed in body tissues.

After the cancer growth in the mice had been checked for about a month by the diet deficient in cystine, repeated injection of glutathione caused a marked stimulation of the cancer growth. This shows that glutathione is necessary for the rapid growth of cancer tissue just as it is apparently necessary for growth of normal tissue.

Old Lady of Ice Age Found in California

LOS ANGELES.—An Old Lady of the Ice Age is America's newest claimant for the title of oldest inhabitant.

Unearthed near here by federal WPA workmen, the skull and other bones of the ancient individual have been identified by anthropologists as belonging to "a female well advanced in years."

Dr. A. O. Bowden and Ivan Lopatin, anthropologists of the University of Southern California, have reported the verdict to the journal Science.

The skull when unearthed early in 1936 attracted quick scientific notice because, in the same geologic stratum of earth, bones of a mammoth were discovered. Dr. Bowden concludes that the 13-foot blanket of earth covering the ancient woman and the elephant has not been disturbed, and that the old woman must have seen with her own eyes the strange big animals such as mammoths and saber-toothed tigers in the closing days of America's Ice Age.

Students in College Suffer Severely From Eyestrain

Damage to Vision in Four Years Measured

THE student pays dearly for a college education when, in addition to financial costs, he gives up part of his precious eyesight. It has long been suspected that four years of close and long attention to books might impair the vision. Tests of grade and high school students have been made to determine the effect of school work on eyesight, but there has been little actual knowledge of what happens to the eyesight of college students.

The extent of damage to vision resulting from the strain on the eyes incurred in obtaining a college education has now been measured on one thousand University of Minnesota students.

Many Defective at Start.

Of these thousand, about one in six had seriously defective vision on entering college, Dr. Ruth E. Boynton, associate professor of preventive medicine and public health at the university, found. At the end of the four years in college, this percentage had increased. About one in four of the students had seriously defective vision at the time of graduation.

Most of these students were enrolled in the medical school or the college of education. Upon entering the university, eye examinations showed that about half of them had normal vision. About another third (30 per cent) had slight defects in vision, and 18 per cent, not quite a fifth, had serious defects in vision. The number with seriously defective vision increased to nearly a fourth (24 per cent) by the time of graduation.

College work was hardest on the eyesight of those students who started out with the greatest visual handicap, Dr. Boynton told a conference of the National Society for the Prevention of Blindness.

Few Hormones Are Employed by the Pituitary Gland

WASHINGTON. — The pituitary, master gland of the body, playsits part in growth, sex, maternal instinct and other acts of life's drama by means of only a few instead of many hormones or chemical messengers—three or four at the most instead of twelve or more.

This revolutionary idea of the number of hormones produced by the pituitary gland appears in a report by the Carnegie Institution of Washington of the activities of members of its staff engaged in research on the endocrine glands.

For years the pages of scientific literature have been crowded with reports of new-found activities of the pituitary gland. Each of these, it was thought, was due to a separate hormone produced by the gland for the particular activity observed. Besides growth and sex, the gland affects the body's use of sugar and water, the activity of the thyroid and adrenal glands, milk production and maternal instinct.

Prolactin a Busy Hormone.

The latest studies seem to show that many of these activities are due to a single hormone of the pituitary, called prolactin because its first discovered effect was its control of milk production.

This hormone now is reported to be the one responsible for the pituitary's effect on sugar utilization and on the adrenal glands. With the thyroid-stimulating hormone of the pituitary, prolactin is responsible for the pituitary's effect on growth. It also affects the sex glands and, at least in some species, the liver.

Carnegie scientists engaged in the researches giving this new conception of the pituitary gland were: Drs. Oscar Riddle, Robert W. Bates, J. P. Schooley, G. C. Smith, E. L. Lahr and M. W. Johnson. Research by scientists at other institutions contributed to the new picture of the powerful and versatile pituitary gland.

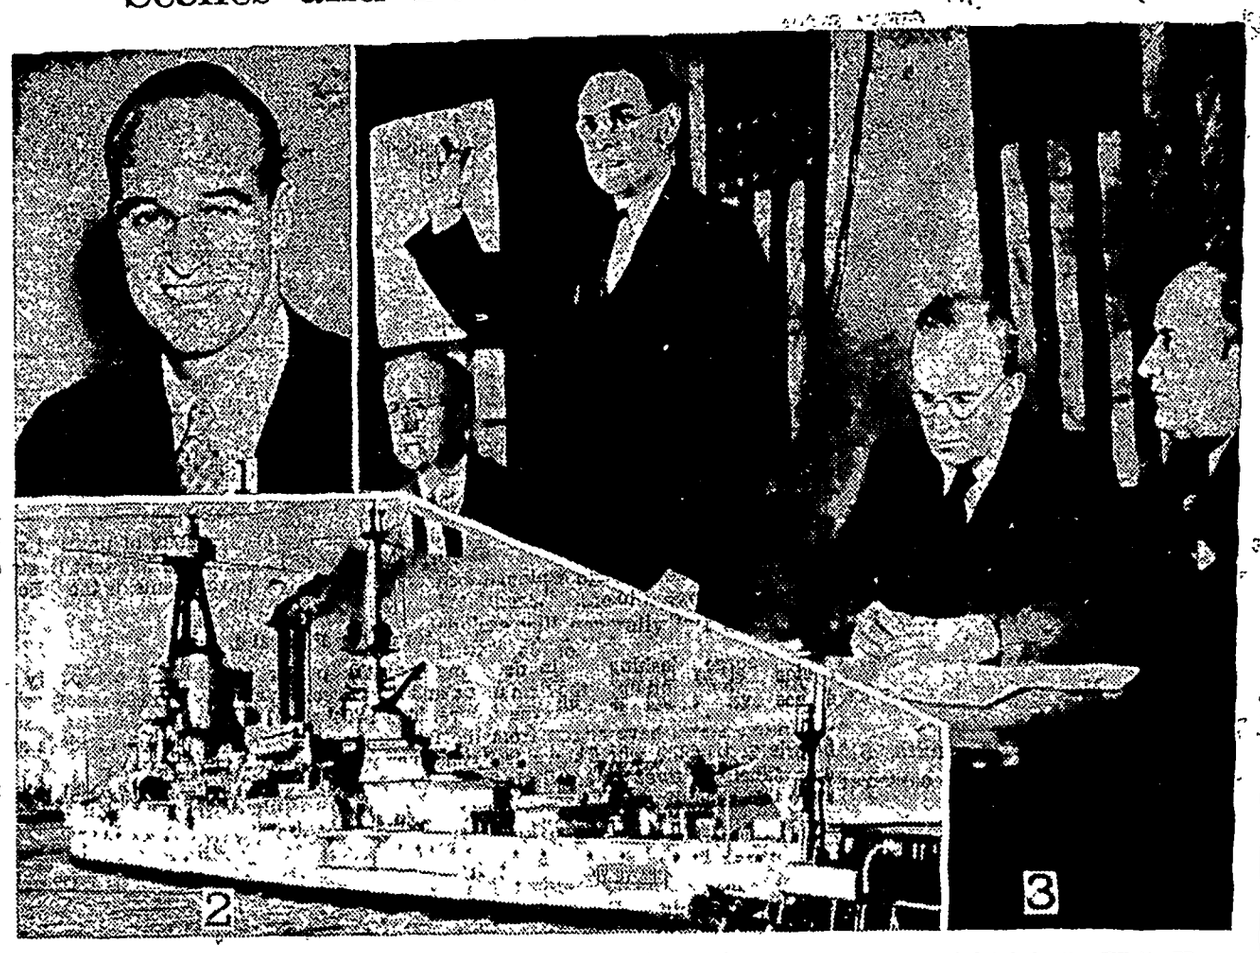
Ancient Corpse's Last Meal Under Microscope

BERLIN.—The last meal of a corpse many centuries old, found in a bog where acid water had preserved the body against decay, has been made the subject of scientific examination by Prof. Fritz Netolitzky of the University of Czernowitz, Poland.

A sample of the contents of the digestive tract, on microscopic study, proved to consist mainly of rye and millet, both very badly threshed and ground. There were also traces of some kind of a pod vegetable, possibly peas.

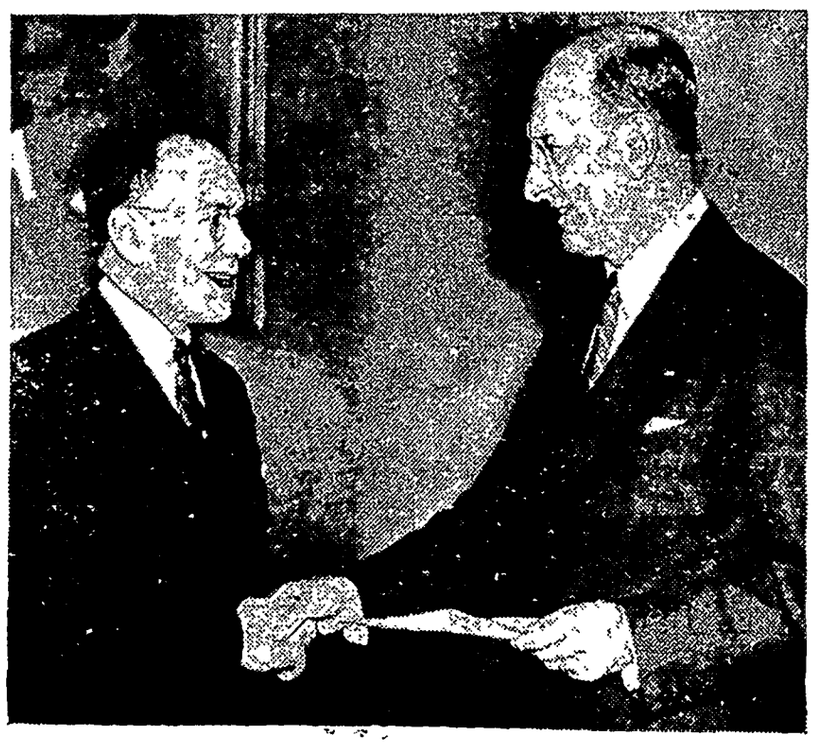
Professor Netolitzky's somewhat macabre research is regarded as of real scientific importance in connection with the history of grain cultivation in northern Europe in prehistoric time.

Scenes and Persons in the Current News



1—James Roosevelt, eldest son of the President, who has taken over a secretarial job in the White House. 2—French battleship of the Atlantic fleet now patroling Spanish waters as a result of the Spanish civil war. 3—Homer Martin, president of the United Automobile Workers (standing) as he discussed strategy with other officials of the union in the automobile strike.

New Secret Service Chief Takes Office



Left to right, Frank J. Wilson, who has been appointed secret service chief, is seen here with his chief, Henry Morgenthau, Jr., secretary of the treasury. Mr. Wilson, the man who put Al Capone behind prison bars, succeeds William H. Moran, who retired.

ELECTED RABBI CHIEF

Dr. Isaac Herzog, chief rabbi of Dublin, Ireland, who was elected chief rabbi of Palestine by a council of 70 elders to succeed the late Rabbi Kook. He is a man of great culture in lay as well as spiritual matters. He has degrees from three universities and specialized in classical languages and mathematics. The office of chief rabbi of Palestine is a sort of ministry of religion.

AUTO EXECUTIVE

From riveter, boiler maker and shop worker to executive vice president of General Motors corporation is a brief career picture of William S. Knudsen, General Motors' principal representative in the recent automotive labor situation. Knudsen is widely known in the motor car world,

"Rusty" Takes Kinks Out of His Crew

Rusty Callow, University of Pennsylvania rowing coach, looks over a trio of crew aspirants as they bend their backs to the ash at the season's first indoor crew workout. Crewmen stroking under the coach's watchful eyes are: George Nichols of Clinton, Ind., George Pepper of Philadelphia, Pa., and William L. Disston (stroke) of Philadelphia, Pa. (names in left to right order). This marked the start of Rusty's eleventh year at U. of P. as crew mentor.

Uninvited "Guest" Crashes Into Living Room

An uninvited and wholly unexpected "guest" arrived in the home of Horace W. Miller, near York, Pa., when the pictured car, driven by M. Carvell Rothrock, broke through the house wall to enter the Miller home. Police allege that Rothrock was driving too fast around a curve, and they reported also that both Rothrock and a companion who was riding with him were unhurt. The Miller house, however, was considerably damaged.

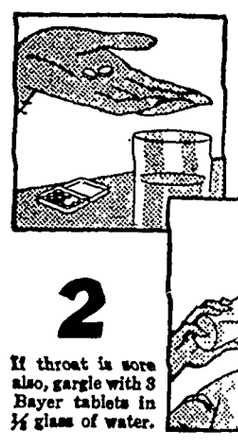
Quickest Way to Ease a COLD



1 Take 2 Bayer Aspirin tablets with a full glass of water.

2 If throat is sore also, gargle with 3 Bayer tablets in ½ glass of water.

The modern way to ease a cold is this: Two Bayer Aspirin tablets the moment you feel a cold coming on. Repeat, if necessary, in two hours. If you also have a sore throat associated with a cold, dissolve 3 Bayer tablets in ½ glass of water and gargle with the liquid twice. The Bayer Aspirin you take internally will act to combat the pains, aches, pains which usually accompany a cold. The gargle will provide quick, instant relief from soreness and tenderness of your throat. Your doctor will feel sure, will approve this modern way. Ask your druggist for genuine Bayer Aspirin by its full name—and not by the name "aspirin" alone.

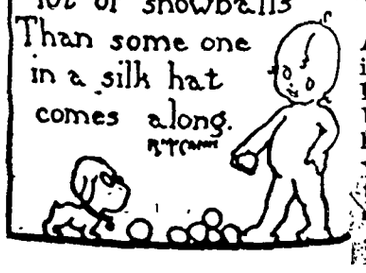
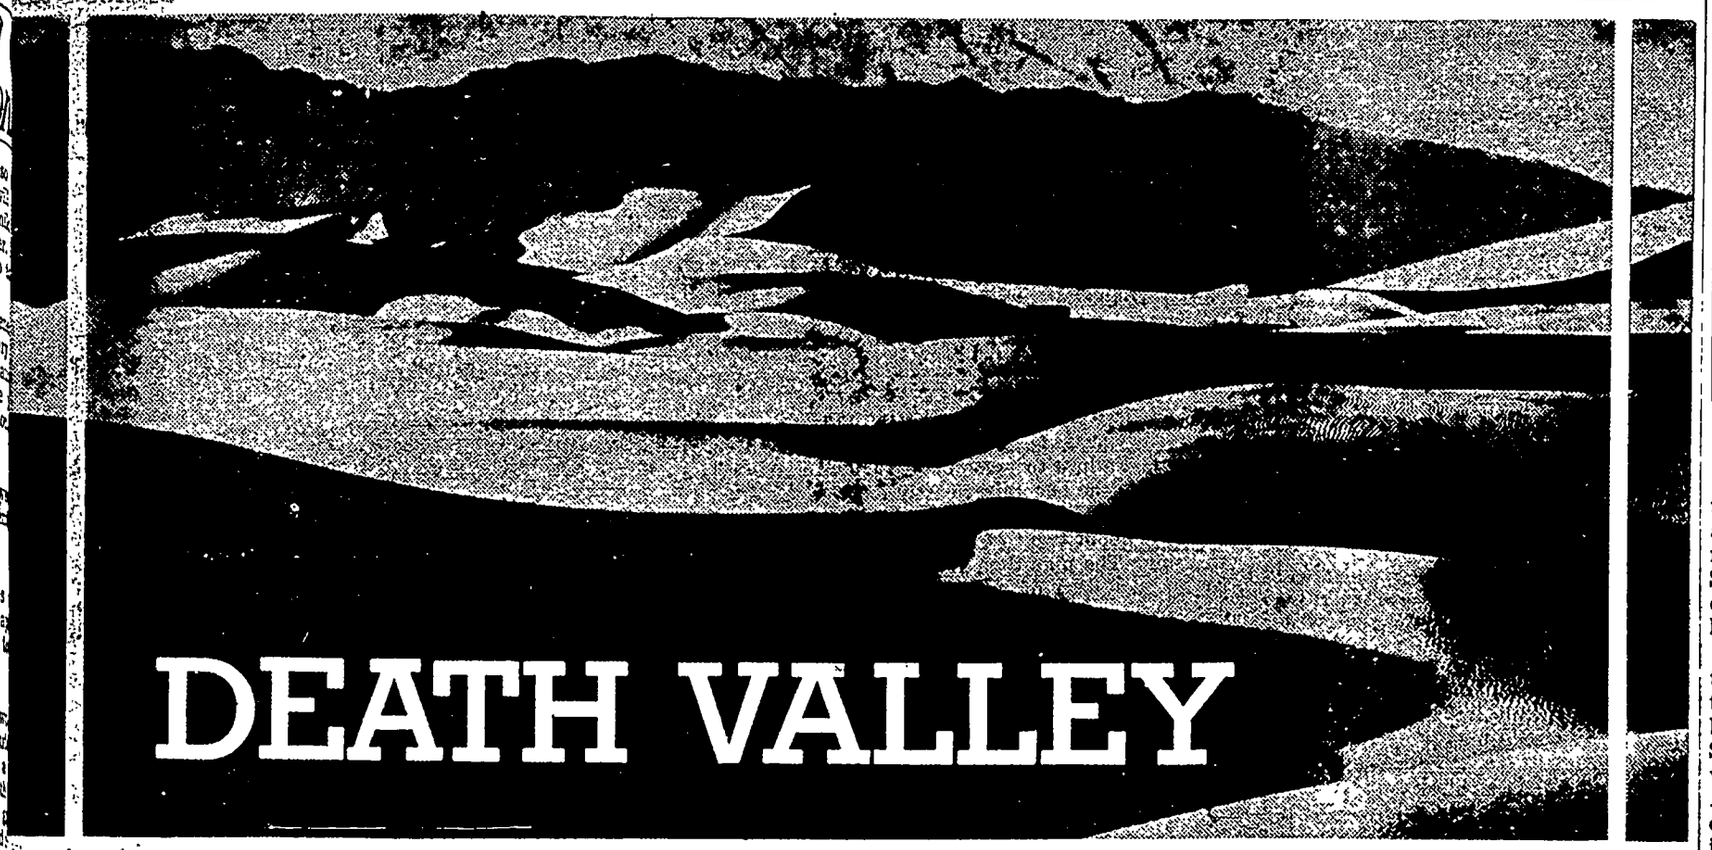
THE CHEERFUL CHERUB





DEATH VALLEY

HOW DEATH VALLEY WAS NAMED
(From "Tales of the Old Frontier.")

Across the white plain the heat waves shimmered and danced. Mirages of cool lakes appeared, mocking their thirst, and vanished. In the background stood a range of black-walled mountains through which the emigrants could see no opening. And this was Christmas day, 1849!

Early in the spring they had left the Middle West, 100 wagons strong, for the gold field of California. Then the fatal decision of a part of the train to try a short cut across the mountains had brought them into this valley whose floor was more than 200 feet below the level of the sea. In it they wandered for weeks of torment.

Again the party split. One group, 36 persons in all, young bachelors from Illinois who called themselves "The Jayhawkers," pressed on toward the mountains. Some of them died of starvation, some of thirst and others went mad and wandered away into the desert. In all 13 perished before they fought through to safety.

The other party, men with families, found a tiny spring and camped there to rest. Then food supplies ran low. Their oxen began to die and their wagons to fall apart in the blistering sun. So Asahel Bennett, their leader, sent two young fellows, Will Manley and John Rogers, forth to find a way out of the trap. As they departed Mrs. Bennett gave Manley a double handful of rice—half of all she had— and silently pointed to the hunger-pinched faces of her children.

The emigrants now sat down to wait for the return of the two scouts. A week passed—two—three—and still they did not return. At the end of the fourth week all except Asahel Bennett's wife abandoned hope. "They will come back," she declared steadfastly. But they did not, and the emigrants resolved upon one final desperate attempt. They began stripping the canvas covers from the prairie schooners and making pack saddles to cinch upon their emaciated oxen.

And then Manley and Rogers returned! They spoke but briefly of the days of horror spent in struggling from one waterhole to the next across the 250 miles of the Mojave desert, of the dead of the Jayhawker party whom they found along the trail. But they had brought food and, most vital of all, they had found a way out.

They guided the party on the long climb to the summit of the Panamint range. As the emigrants reached the crest and looked back into the inferno from which they had escaped, Asahel Bennett's wife raised her arms in a gesture of farewell. "Good-by, Death Valley!" she cried.

And thus it was named.

* * *

By ELMO SCOTT WATSON

IN THIS valley the heat waves still shimmer and dance across the sandy waste; the mirages still appear and then vanish; and the sun still blazes down to make it the hottest place found in all the world in mid-summer, with recorded temperatures of 137 in the shade and 160 in the sun. But how different is its reputation nearly a century after Asahel Bennett's wife christened it with that dread name of Death Valley!

There was a time when most Americans believed the saying "See Death Valley and die!" But that has been changed since Uncle Sam has been saying to his children: "After you have visited the Great Smoky mountains in North Carolina, Yellowstone park in Wyoming, Acadia park in Maine and Mesa Verde in Colorado, come to Death Valley. Here is a winter playground for you. Come, enjoy it."

For Death Valley is now a national monument, administered by the national park service of the department of the interior. And so every year, from October to May, thousands of Americans respond to their Uncle Samuel's invitation. For the fear of danger or even of discomfort in this lost world of lonely desert wastes, of harsh, barren mountains, of brooding silences, is no longer present there. Over the roads and trails once marked by the bones of pioneers, thousands of automobile tourists now drive in safety, finding there tourist camps, garages and gasoline stations and the ever-present roadside stands.

It's "Life Valley" Now.

The silence of the desert is no longer broken only by the winds which sweep down from the mountain tops and stir the ever-changing sands. The music of resort hotel orchestras blare out and echo from the slopes of the Funeral range or the Panamints. Moreover, Death Valley, once inhabited mainly by snakes and lizards, now has a permanent human population of nearly 200—the last census figures show that. Some of them have built luxurious homes there and they, with the thousands of tourists who come every year by automobile, by railroad, by bus line—yes, even by airplane—, have transformed Death Valley into Life Valley.

* * *

Dramatic as is the incident which gave Death Valley its name, scarcely less dramatic is the story of how the borax industry, which spread the fame of Death Valley, got its start in this region.

In 1880 Aaron Winters lived with his wife, Rosie, in a frontier home in Ash Meadows, a tiny oasis east of Death Valley. To their home one day came a wandering prospector who told the Winters of the borax deposits in the state of Nevada and how a great fortune awaited anyone who could find more such deposits. Winters asked many questions, including the question of how a person could know borax if he discovered it. He was told that the best test was to pour certain chemicals over the supposed borax deposit and then to fire it. If it were borax the chemicals would burn with a green flame.

"It Burns Green.!"

Winters had made many visits into Death Valley, and after talking to the prospector was convinced that there was borax there. So he set out immediately, accompanied by his wife, and soon afterwards encamped on Furnace creek. In the marsh (which appears on Furnace creek in the spring) he gathered the most likely-looking deposit.

That night he made the test as the prospector had told him. There was a breathless moment of suspense and then Aaron Winters cried "Rosie, she burns green! We're rich!" The borax industry of Death Valley had come into existence.

The next problem was how to get the rich borax deposits out of the valley. Out of necessity came the famous 20-mule team wagons which are inseparably associated with the name of Death Valley.

But borax is not the only wealth which this valley contains. Gold was discovered there many years ago and it has been the favorite haunt for the old-time prospector. Perhaps the most famous of these prospectors—certainly the most publicized—was the man who became known as "Death Valley Scotty." He was Walter Scott, an ex-cowboy and once a champion rough rider with Buffalo Bill's Wild West show.

Every so often "Scotty" came out of Death Valley with a pocket full of gold. He was believed to have a secret mine and certainly its wealth seemed to be inexhaustible. He hired special trains to take him to Chicago or New York. When he came to town he threw money out of hotel windows and traffic jams caused by scrambling people resulted. He built a desert palace which was said to have cost more than $2,000,000. He found other and new ways of "blowing" his money—all of which landed him on the front pages of newspapers all over the country and he became a perpetual advertisement, an official "press agent," for this region which remained a land of mystery for so long.

The Good Samaritan.

Another picturesque figure in the history of this region was the man who became known as the "Good Samaritan of Death Valley." Lou Westcott Beck was his name and he was one of the great number of men who sought wealth in this valley of death. But instead of finding his fortune he nearly lost his life in its barren wastes. When he finally escaped he resolved to devote his life to saving others from the fate which had almost been his.

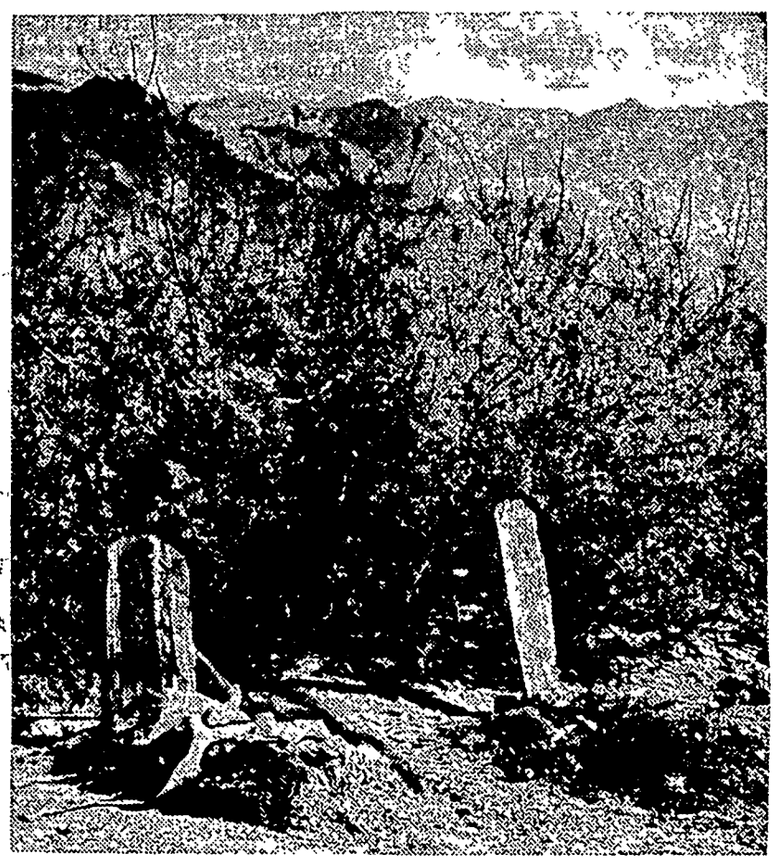
Each summer Beck made a trip into the valley of purple mist and great thirst, piling up rocks and placing signs on them to guide prospectors to waterholes, searching for lost travelers and guiding them to safety. For 13 years he did this work and during that time he and his companion, a Newfoundland dog named "Rufus," saved the lives of between three and four hundred travelers in the Colorado and Mojave deserts as well as Death Valley.

Then in 1917 Death Valley "got him" at last. During one of his trips he came to a spring which he had always used and drank from it. He offered some water to Rufus, but the dog refused to drink. The spring had become infected. After a terrible trip to his home in Pasadena, where Mrs. Beck awaited their return, the "Good Samaritan" went to bed ill and never rose again. The work which he inaugurated was carried on by the United States geological survey which erected the numerous sign posts that saved the earliest tourists from suffering the fate of so many of the pioneers in the valley.

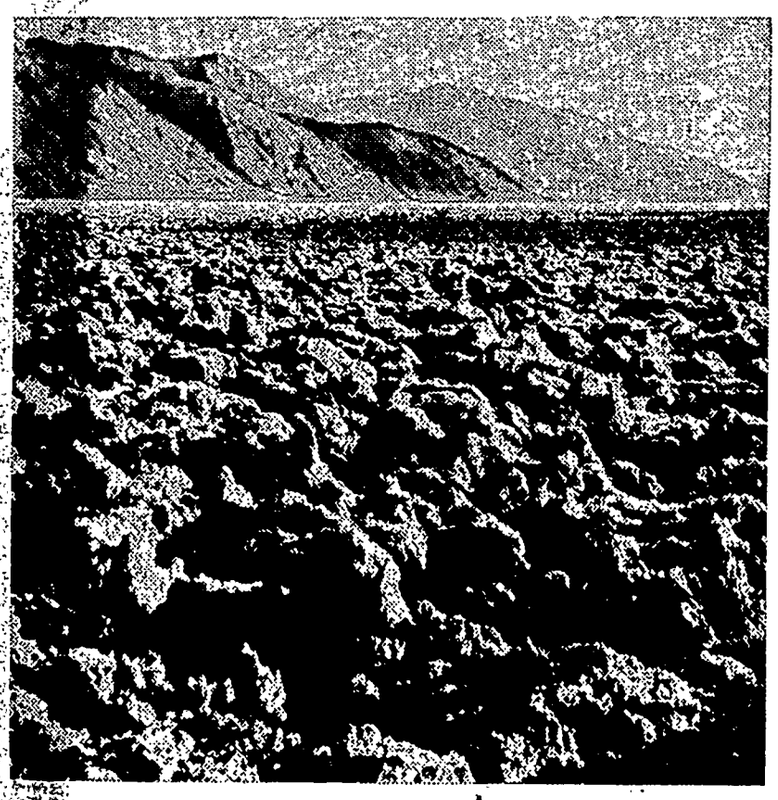
Another interesting character in Death Valley history was "Dad" Fairbanks who won fame as the "official rescuer" of the region. During his career in that role "Dad" saved the lives of more than 50 persons who had become lost in the desert. He called the buzzards, which wheel in great circles over the valley, his "spies."

"When the buzzards fly low and hover over one spot, I know some animal is in distress" he was accustomed to explain, "But when they hover high I know some human being is weakening under the blistering sun and needs my help out there in the desert." So to the lore of Death Valley is added the ironical fact that these birds more than once robbed themselves of their meal because their method of flying revealed to "Dad" Fairbanks' keen eyes the fact that a human being was in distress.

© Western Newspaper Union.



OLD TIMERS' GRAVES—These two simple slabs of wood mark the last resting places of two of Death Valley's best beloved characters: Jim Dayton, a driver of one of the famous 20-mule teams, who was buried on the spot where he perished in 1898 with all of his team, and "Shorty" Harris, who outlived him by nearly four decades, and was laid to rest, at his expressed desire, beside his buddy.



THE DEVIL'S GOLF COURSE—An expanse of salty deposit, crystallized into weird and fantastic shapes, varying in height from an inch to three feet and more, it is a striking testimonial to the fact that the floor of Death Valley was once a great inland sea.

DEATH VALLEY SCOTTY

UNCOMMON AMERICANS

By Elmo Scott Watson

Sam Hawken, Riflemaker

WHAT a Stradivarius is to violinists, a Hawken rifle is to those who love fine firearms. For a genuine example of the workmanship of "Old Sam" Hawken of St. Louis is one of the rarest weapons in existence. So far as is known, there are only five.

But it is not alone the rarity of these rifles which makes them interesting. It's a case of "the man behind the gun" as well. He was Samuel Hawken, born of Pennsylvania Dutch stock in Maryland in 1792. He was a soldier in the War of 1812 and after his return from it he began practicing the trade of gunsmith.

In 1822 he moved to St. Louis where his brother, Jacob Hawken, was already engaged in making guns. That was the golden era of the fur trade and the fame of the rifles which Samuel and Jacob Hawken were making soon spread all along the frontier because they were the most accurate and finest pieces of workmanship available, not even excepting the famous Kentucky "long rifles."

The demand for Hawken's product was limited only by the supply, which was small. For Hawken made every rifle by hand, welding the barrels out of strips of iron which he got from an iron furnace on the Meramec river in Missouri. These strips were hammered into five-inch lengths and welded around a steel mandrel, thus making the tube which was bored out with a rifling tool afterwards It was a tedious and thoroughgoing job of work, unusual even in those days of careful and honest craftsmanship.

But what was even more unusual was the fact that Hawken had one price for his rifles. That was $25—no more, no less. He could have had twice or three times that price, so great was the demand, but he refused to charge more because he believed that one price brought him trade.

Jacob Hawken died during the cholera epidemic of 1849 in St. Louis and Samuel Hawken continued in the business until 1859 when he sold out to an apprentice, John P. Gemmer who was running the Hawken shop when Samuel Hawken returned to St. Louis in 1861 to spend his declining years. "Old Sam" became a regular habitue of the shop so long as he lived and could scarcely keep his hands off the tools, so greatly did he love the work. Once Gemmer allowed him to don an apron and make a rifle complete as he had done in years gone by and this rifle, probably the last which "Old Sam," honest workman, ever made, is one of the two Hawken rifles now owned by the Missouri Historical society.

$50,000 Signature

THERE'S no doubt that John D. Rockefeller's signature, or that of J. P. Morgan, would be worth $50,000—if it were on a check! But the only American whose written name (not on a check) has ever been worth that amount was Button Gwinnett.

Gwinnett was born in England in 1732. Despite that fact, he can be listed as an American because he came to America in 1770, was chosen as a delegate from Georgia to the Continental congress and was one of the signers of the Declaration of Independence in 1776.

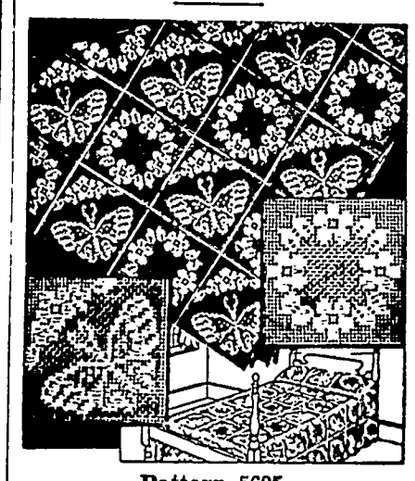
The next year he was an unsuccessful candidate for governor and he was also defeated as candidate for brigadier-general of the Georgia militia by Gen. Lachlin McIntosh. As a result of a quarrel, Gwinnett challenged McIntosh to a duel which was fought with pistols at 12 feet. He was mortally wounded and died on May 27, 1777.

Most of the 56 signers of the Declaration of Independence lived for many years after that historic event, wrote many letters or signed many documents. But with Gwinnett's career cut off in less than a year after he joined that company of immortals, he left few examples of his handwriting. So his autograph is the rarest of all the signers and it is that rarity which gives it such great value.

In 1926 Dr. A. S. W. Rosenbach, the noted collector, paid $22,500 for a will which was signed by Gwinnett as a witness. That was an unheard-of price for an autograph. But it was only the beginning of a "boom in Button Gwinnetts." Later in the year this same collector bought another—this time a signature on a promisory note and it cost him $28,500.

In 1927 an all-time record for autograph prices was reached when Dr. Rosenbach paid $51,000 for a letter signed by Button Gwinnett and four other signers of the Declaration who were serving on the marine committee of the Continental congress. Aside from the Declaration it is the only known document dealing with national affairs which this Georgian signed.

Lacy Squares Form a Spread or Scarf



Pattern 5695

In this pattern filet crochet, that favorite of the modern needlewoman, is adapted to two lovely squares—handsome used together—effective each used alone in cloth, bedspread or scarf. The lace stitch sets off the design in each square. String is the material used and you'll be delighted with the result. You can also use mercerized cotton to make the squares a smaller size. In pattern 5695 you will find instructions and charts for making the squares shown; an illustration of them and of the stitches needed; material requirements.

To obtain this pattern send 15 cents in stamps or coins (coins preferred) to The Sewing Circle Household Arts Dept., 259 W. Fourteenth St., New York, N. Y.

Write plainly pattern number, your name and address.

Uncle Phil Says:

Attributes of Character

Zest and enterprise, vigor and hardihood, faith and fervor, are not of time but of character.

Among the Indians, every male had to be brave or be chased out of the camp. Imagine an Indian sissy.

When a girl agrees to share a man's lot she makes the most important decision of her life—except when she gets a divorce.

If everybody's aim was to make others happy, even your armor would be penetrated, you old hardshell.

Pardonable Pride

Pride is not a bad thing when it only urges us to hide our own hurts, not to hurt others.

Beware of eccentricities. They may become imbecilities when one grows old.

That something is a fact, doesn't make it a legitimate subject of conversation.

Usually, you get as far away from "a man with an iron will" as life will permit. Most people like their own wills to have a breathing chance.

DON'T WAIT

SCHOOL NEWS

Grades 7 and 8

This week the eighth grade during reading period has been working on author and "Snow-bound" booklets.

We collected $3.85 which has been sent to help the victims of the flood.

Those who received 100% in spelling this week are: Melvin Coobs, Billy Zabilka, Ellen Kilgore, Allen Barz, Jacqueline Kudje, Keith Stille, and Harold Swalve. We have had several spell downs this week

Grades 5 and 6

Eunice Larsen brought some refreshments to school Wednesday afternoon and treated her room

During the week end Mr Patet painted our blackboards. Now they do not shine and we can see better what is written on them. We thank Mr Patet for dong this for us.

Leroy Bachman was absent the first part of the week after being hurt while skating.

We have been readng abut Washington D C. and Thursday Miss Barz showed us pictures and told us about the many interesting places she visited while she was there several years ago. In our study of geography if anyone has had the pleasure of visiting any of the places studied he shows pictures and tells the class of the tr pi

The first of the week we had a bank in whih we placed some of our savings for the flood district..

Grades 3 and 4

The following people made a rating of 100 in spelling this week· Ruth Bell, Carol Bock, Edward Barz, Betty Blickenderfer.

We are very proud of our arithmetic test scores this week. The highest possible score was 20 points. In the third grade Harlan Stille made a score of 20. There were seven people in the 4th grade who made a perfect score of 20.

The third grade began reading out of their new reader this week. This is the third reader they have used this year A second grade reader was read before they used a third grade book.

The fourth grade are playing a "Reading Game" Those who made an "A" on Test A are: Marjorie Hartbeck, Edward Barz, Herbert Schwartz, Patricia Kudje and Junior Buntenbach Next week we will work on Test B. It will be interesting to compare the scores with this weeks test.

We are remodeling our library We hope to have it completed next week Several new books made by ourselves are ready for our reading table.

Grades 1 and 2

Keith Stott has been absent all week. Dean Jacobs came back to school on Monday.

We took our wheat trays home this week Some of us are going to plant other seeds now

We made little Eskimo children of outing flannel one day. We made standards on them so they could stand up.

The second graders had a spelling contest on Friday.

These first graders got "A" in spelling· Esther Mae Hartbeck, Duane Bredlow, Hellen Suckow, Robert Baack and Donna Mae Heivelin.

INSULTING LITTLE BUSINESS MEN

Those who forecast the downfall of small retail business in this country insult the little business man.

The life of a small retailer may not be all beer and skittles—but taking him by and large, he shows an amazingly agressive spirit. He is more than eager to make improv ments in his methods in order to attract customers He provides a brand of personal service that makes and keeps friends.

When the chain retailing system began its growth some decades ago, the pessimists said that the day of he little independent was done —that monopoly would swallow him The pessimists are still singing the same tune—but the facts show how badly off-key they are Independent merchants instead of giving up the ghost in the face of supposedly unmeetable chain competition, have used their heads and thought up new inovations in retailing—and the chains have had a tough time keeping pace with them Many a case is on record where a live independent made the operation of a neighboring chain store unprofitable through his own customer attracting enterprise. There can be no monopoly where consumers have a choice of service,

Entertained Friends At Court Whist Party

Mr. and Mrs. Jim Reed entertained a number of friends at Court Whist Monday evening. High scores were won by W. C. Keraus and Mrs. Christiance; travel prize by Mrs. Walter Lemke, and low scores by Mrs. Melvin Neuberger and Alfred Merkel. Lunch was served after the games.

Roy McMillin, County Treasurer, reports that 1936 tax due before April 1st is coming in very well. At this time more than $14,000.00 of the 1936 tax has been collected.

American Legion Auxiliary

The American Legion Auxiliary mmbers will meet next week, February 11th in the evening with Mrs Will Kirkwood. All members urged to attend.

WHERE IT WENT

Sometimes the husband will discover a clue as to what became of that old overcoat, if he carefully examines the newest hooked rug —Omaha World-Herald

The republcans have wished the job of national chairman on John Hamilton again. This year they will pay him $15,000. Whether Hamilton will make his headquarters in Maine or Vermont has not been determined.—Winterset News

LIMITED EXPERIENCE

Asked to give a speech, a friend if ours says: "To tell the truth, I never did any public speaking except when I proposed to my wife on a party line."

" The motorist that hits me will certainly be sorry," said the dusty pedestrian.

"Why?" asked his companion.

"Because," said the other, "I'm carrying a stick of dynamite in my pocket."

Canadians Keep Customs of Normandy, Brittany

A country within a country, the French Canadian Province of Quebec, although under British rule since 1759, retains customs and traditions which the early pioneers brought from Normandy and Brittany more than four centuries ago.

In some of the smaller and more remote villages inhabitants learn the news from the town crier who stands on the steps of the parish church Sunday mornings after mass and in French calls out the events of the week.

Dog-drawn carts deliver milk and bread at the doorsteps of ancient houses in the lower sections of Quebec around Murray Bay and Cap a L'Aigle.

Spinning looms, hand-looms and hand-hewn furniture are found in almost every village home and the clothes of the inhabitants are frequently spun as well as tailored by their women folk.

Nose Betrays Character

It is the nose, rather than the mouth, which betrays character. All other features can be consciously controlled, but the quivering of the nostrils will often reveal an inward unrest even when the other features remain tense and immobile, according to a writer in Pearson's Weekly. Most famous soldiers have possessed Roman noses Wellington and Napoleon were two The man with pinched nostrils may have considerable ability, but he lacks the will powei to get there. Pinched nostrils usually denote a pronounced inferiority complex The straight Grecian nose indicates artistic ability; the large, fairly thick nose is the hall-mark of the financial genius; the long, thin nose is suggestive of the quarrelsome type, while, at the other extreme, the good-humored, door-mat type of person will usually be the possessor of a pug nose.

Cumin Seed

Cumin seed is a commercial product imported chiefly from Malta, Sicily and India. The cumin is an annual herb of the parsley family, a native of Egypt and Syria and is mentioned several times in the Bible, as in Matthew 23, "Ye pay tithe of mint and anise and cumin" From ancient times these aromatic seeds containing a pungent oil have been used for flavoring, as a condiment, and for medicinal purposes. The Talmud mentions it as a means to stanch bleeding and to cure colic, but its curative properties are employed chiefly in veterinary practice. The seeds of other plants are known also as cumin; black cumin being the product of nigella sativa, related to one of our common garden flowers, and sweet cumin or anise the product of pimpinella anisum.

BE SURE OF WHEN TO VACCINATE

—Prepared by American Foundation for Animal Health

There is a right time and a wrong time to vaccinate pigs against hog cholera. Failure to recognize this fact may cause the hog raiser costly losses.

The most dependable time to vaccinate is about two to four weeks after weaning. The pigs then do not require so large a dose of serum and virus, and if they are given the "double-treatment," the immunity against cholera will generally last throughout their lifetime.

Sometimes, when there is cholera danger in the vicinity, it may become necessary to vaccinate before the pigs are weaned. In this case, they should be left with the sows at least two weeks longer. This prevents the pigs being doubly-weakened by going through both weaning and vaccination at the same time.

Above all, pigs should be in a healthy condition when vaccinated. Enteritis is one of the most common causes of losses, following vaccination. It should be definitely determined that this condition is not present in the swine, before they are vaccinated.

Wormy pigs are a bad risk to vaccinate. The same is true of swine which are badly infested with mange. These conditions should be cleared up before immunization is attempted.

Of course, it is difficult for the layman at any time to tell with certainty, whether his hogs are in condition to undergo vaccination. Some symptoms are obscure and can be recognized only by the trained eye of the veterinarian. That is why it is always best to have a veterinarian go over a herd thoroughly, before vaccination is attempted. He can help put the hogs in condition, if they are not up to par. A check-up of this kind is the best insurance against unnecessary losses.

Only a veterinarian should be entrusted with the vaccination itself. For any layman to attempt it is to take a big chance with a valuable herd of hogs. Once the treatment has been given by a veterinarian, the farmer knows that his hogs are really immune from cholera, and that is what he wants, after all.

Outlook Justifies State Participation In New York Fair

Whalen Voices Opinion in Inviting Governor and People to the 1939 Exposition

NEW YORK, (Special).—In a letter of invitation to the governors of 47 states, Grover Whalen President of the New York World's Fair 1939 Corporation, points out that the commercial consequences of the international exposition under construction in New York City are so great and important that they alone would justify the active participation of every state in the nation.

"Fifty million persons from every walk in life, from every state in the United States, from every country in the world, are expected to attend the Fair," writes Mr. Whalen. "The great American market with its tremendous consumer purchasing power will be represented by these visitors. They will comprise a true cross-section of America."

The World's Fair, according to Mr. Whalen, will be a magnificent spectacle, entertaining and instructive. It will attempt to answer the questions. "What kind of a world *have* we built? What kind of a world *are* we building? What kind of a world *can* we build?" With collateral improvements, it will represent a total investment of more than $125,000,000 by the Fair Corporation and the governmental, industrial and other participants. The Fair site park is a tract of 1216½ acres, almost at the geographical and population centre of New York City.

Construction of buildings and roads, grading, dredging, planting and landscaping are already under way, based upon a schedule which calls for completion of all construction operations before January 1, 1939, to allow four months for final decorations and installation of exhibits preparatory to the opening of the Fair on April 30.

The opening date commemorates the inauguration, on April 30, 1789, of George Washington as the first President of the United States.

In the government area, and near an imposing federal hall to be erected by the United States Government, the Fair will provide a "Hall of States" in which the significant contributions of each state in laying the foundations for the better World of Tomorrow can be proudly displayed, says Mr. Whalen.

His letter supplements an invitation to participate in the Fair extended to the governors on November 30 by Governor Herbert H. Lehman of the host state of New York. Governor Lehman pointed out that the State of New York has already appropriated, to date, $2,130,000 for commencement of construction of boulevards, service roads, bridges, and certain other basic improvements the State will make at the exposition site or its approaches. The New York legislature, further, during 1936 passed an act creating the New York World's Fair Commission of 18 members and providing funds in aid of this body's preparation of plans for a state building and exhibit and for active state participation in the Fair.

No Poll Taxes

The city of Marshalltown has just voted to eliminate all poll taxes and this is now the third year that this plan has been followed there. The City officers declared that it had been impossible to collect this $2.50 head tax from more than a small per cent of the men of the city and hence they thought best to treat all eliminate the tax altogether legislature first mixed by fixing it so that the tax must be deducted 50c to collect and was worth while Later it was changed but the officers did not think worth while

Mrs. Art Kudje Entertained At Bridge

Mrs Art Kudje entertained a number of ladies at her home last week Tuesday and bridge was played at two tables. Scores were won by Mrs. John Etchen, high; Mrs. Ernest Lewis, travel; and Mrs. Lloyd Lau, low. Lunch was served after play.

W.F.M.S. Will Meet Thursday

The W F.M.S. will meet at the home of Mrs. Lester Stille Thursday of this week. Leader will be Mrs. Wm. Zabilkia and Devotional leader will be Miss Minnie Lenz.

All Aristicrats

Frank Rohwer, a farmer whose home is in Scott county, must feel rather like poor scrub stock when he compares himself with all of the high grade blooded stock on his place It is said that he makes a boast that not a single animal on his place is othen than registered stock, or at least eligible to registry. The list of breeds in whch he specializes includes, Hereford cattle Belgian horses, Guernsey cows, Spotted Poland China hogs, and White Rock chickens. There is a lot of pure bred stock on Iowa farms but perhaps few make such a clean sweep of the matter.

National Topics Interpreted

By WILLIAM BRUCKART

NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington.—Two messages to congress by the President have created more than the usual excitement attendant upon such things as the new session has settled down to its annual consideration of public affairs. In each of these were Presidential declarations that are beginning to reverberate and that means they are highly controversial.

Messages Cause Stir

In Mr. Roosevelt's annual message "on the state of the union," he took occasion to tell congress how much he appreciated its "co-operation" with him. He followed that bit of back patting with probably the boldest statement he has made since entering the White House four years ago for the first term. He called upon the Supreme Court of the United States, in a roundabout way to "co-operate" with the other two branches of the government, the legislative and executive.

The other wave of excitement, not to say disturbance, was caused by the President's special message asking congress for a wholesale reorganization of the executive departments and agencies—calling this proposal a plan for modernizing the government.

One can circulate through the corridors and offices of the Capitol and office buildings and hear mutterings aplenty and even a considerable bit of outspoken criticism by senators and representatives of the two circumstances I have mentioned. There are many members of the legislative branch who are entertaining a feeling that the demand for Supreme court co-operation was equivalent to carrying the ball out of bounds. But that part of the Presidential pronouncement is not likely, in the end, to produce the battle on the floor of the senate or house that will result from some phases of his "modernizing" program.

The fact is that our national government has become a structure, insofar as the executive agencies are concerned, that sprawls out like an octopus. About 75 per cent of these units and agencies are products of the New Deal recovery program; they work at cross purposes; they move in their own sphere and make their own policies with almost no direction from the White House. Certainly, the time is ripe to clean up that mess.

Yet, in cleaning up these conditions, in reorganizing, it is undoubtedly the consensus of those charged with responsibility for the job that common sense must be used and discretion employed or else untold damage will be done to the government and to the whole economic structure of the naton, including the taxpayers.

* * *

Reorganization Program

The Presidential reorganization program was sweeping in character and that is the reason why it has run into obstacles. For example, the plan calls for placing the interstate commerce commission, the general accounting office, the federal trade commission and the civil service commission largely inside of old-established departments over which cabinet officers preside. Now, a cabinet officer is and always has been in the past a political appointee, an individual who had been active in promotion of a party campaign and usually one who has made important contributions of money to his party's campaign fund. So, it becomes plainly evident, I believe, that to place such agencies as those I have named in regular departments, is to place them completely under political domination.

Where it is good, therefore, to place strictly administrative agencies under cabinet control, it becomes equally dangerous to place under political domination such quasi-judicial agencies as the ICC and the general accounting office. There can be no doubt of that fact. That is the crux of the disturbance among the legislators under the reorganization proposal.

Those of us who have had long experience as writers and observers in Washington have seen evidence in almost every administration of attempts of politicians to get their fingers into the pie of railroad rate making. They have adopted all sorts of tricks; they have used subterfuges and they have employed strong political pressure time after time to gain control of railroad rate making. Through all of these years since the ICC was established, there has always been enough sane minds in congress who, with White House backing, could resist this political move. Naturally, therefore, it is a matter of some question why President Roosevelt should attempt to toss the interstate commerce commission and its rate making power straight into the laps of the politicians.

Of course, the Presidential message on this point appears on its face to provide against the end that I have mentioned but old timers in congress point out how this wedge, driven only a little further, will bring about political domination of the ICC.

* * *

Potential Dangers

It is hardly necessary here to set down all of the potential dangers that can emanate from political control of such a vast structure as the railroads of the United States. It is unlimited in its possibilities. Dangers are inherent in any program of that kind with which the politicians are identified and it appears to be a circumstance in which congress, if it is going to serve the people properly, should call a halt.

As to the general accounting office and the plant to include it in the Treasury again under the rule of an auditor general, the reorganization scheme simply will set control of public expenditures back a quarter of a century. One of the earlier Presidents made no effort to conceal the use that could be made of the auditing unit of the government when he said, on an occasion where the chief auditor ruled an expenditure illegal, that if it were not possible to change the ruling under the law, it still was possible to change the chief auditor.

I am not making a charge that the present administration desires to spend congressional appropriations illegally; but one cannot dodge the conversations that are taking place around the Capitol in which legislators recall how President Roosevelt criticized John R. Mc Carl when he was comptroller general for a decision that prevented use of public money in a manner desired by the President. To sum up this particular phase of the situation, one hardly need to say more than that if the auditor general is a subordinate of the Secretary of the Treasury, he is likely to take orders from the Secretary of the Treasury, whoever that Secretary may be. And, since the Secretary of the Treasury is an appointee of the President and serves only at the President's pleasure, in my mind a link is established whereby the White House again will control determination of legality and illegality of expenditures.

Congress created the general accounting office in order that it would have an agency independent of the Chief Executive and the executive departments to keep tab on how those executive agencies expended the money which congress appropriated. That was the reason why the office of comptroller general was made to carry a fifteen-year appointment with removal only for malfeasance or misfeasance. Now it is proposed to tear down that structure and bring the whole auditing organization under a cabinet officer.

But there is another phase to be considered. It has been my good fortune to be in Washington during the entire life of the general accounting office as well as for several years before. Of my own knowledge, I can say that the general accounting office has recovered millions of dollars of illegally disbursed funds as well as prevented illegal disbursement of other millions.

* * *

Civil Service

There seems to be more support for inclusion of the civil service commission in the form of a civil service administrator under an executive department than there is support for breaking up of the federal trade commission as the President proposed. Neither of these agencies has such an important bearing on the public as a whole as do the other two I have discussed. The plan to make the civil service administration subject to cabinet control was softened considerably by the President by inclusion of a proposal to make all government employes below policy-making grades subject to civil service laws. That is a big step forward, provided it is not a ruse to permit packing the lists with adherents of one political party or the other, whichever may be in power.

The federal trade commission, like the interstate commerce commission, is a quasi-judicial body. There has been objection to its present setup as prosecutor, judge and jury but many legislators believe this can be corrected without emasculating the agency and destroying its identity by putting it into an executive department. It ought to be free and independent and ought not to have any politician in a cabinet chair telling it what to do when it seeks to make business be honest.

POULTRY

BONE DEFORMITY MAY BE CHECKED

Cornell Investigators Hope to Aid Poultrymen.

Supplied by the New York State College of Agriculture.—WNU Service.

Nation-wide recognition has come to research workers at the Cornell poultry department for their work on the cause and prevention of perosis, a bone deformity in young chickens. The problem has had the attention of scientists throughout the country for years.

The Cornell investigators have been experimenting for the past two years on the relation of certain inorganic elements to this disorder in chicks. They do not announce a "cure" but merely the role these elements have in the cause and prevention of this disorder.

The scientists announce that perosis is due to the lack of certain inorganic elements, of which manganese is notable, and that an excess of calcium and phosphorus makes the condition worse. They discovered that the perosis-preventing property of common feed stuffs was roughly in proportion to their manganese content By means of a spectroscopic analysis, considerable manganese and traces of iron were detected in substances used in their studies. Aluminum also entered into the picture.

Centering attention on manganese, the investigators had to work with measurements as fine as 0.0025 per cent, which is 25 parts to a million, adding that amount to a diet already containing 0.0010 per cent.

This amount was found to be quite effective in preventing perosis where 1.0 and 1.2 per cent of calcium was present in the ration. It also worked with similar levels of phosphorus.

Aluminum and zinc were shown to have similar but less effective preventive action. A mixture of manganese, aluminum, and zinc prevented the disorder at the lower calcium and phosphorus levels and, in addition, benefited growth slightly.

The Cornell research workers say results have merely demonstrated the importance of manganese and certain other trace elements in preventing perosis. Now they intend to determine the quantities of the elements needed to best handle the disorder.

Laying Mash and Grain in Hoppers for Pullets

The conventional system of feeding well matured pullets is either to keep a good laying mash and grain before them in open hoppers at all times, or limiting the grain by feeding it once or twice daily, advises a writer in Wallaces' Farmer.

If satisfactory production can not be obtained by these methods, one may feed a crumbly mash and use artificial lights.

In any case, a flock owner should not attempt to follow definite feeding instructions, but rather should feed enough grain to maintain satisfactory body weight.

Normally, a hundred hens will eat twenty-two to twenty-five pounds of feed daily, of which seven to ten pounds is mash and twelve to sixteen pounds is grain. Since grain is more palatable than mash, there is no danger of the flock eating too much mash.

Replacing Mash Mix

Skimmed milk contains approximately 90 per cent water. Dry skimmed milk contains usually a little over 8 per cent of moisture. Turning it the other way around, the milk solids in dry milk amount to 92 per cent, in liquid milk 10 per cent; in other words it should take nine times as much skimmed milk by weight to equal the same amount of milk solid as in dry skimmed milk. Now as to how much milk is used in any of the standard mashes, says the Pacific Rural Press, your guess is as good as mine unless the amount is declared on the feed tag, which is not the usual case, since it is not required by law.

Blue Andalusian Chicken

The Blue Andalusian chicken is one of the Mediterranean breeds, like the Leghorn, but it has never been developed to any extent commercially. It is quite possible, of course, says a writer in the Pacific Rural Press, that there may be birds of the breed which will be satisfactory producers. However, so much more work has been done by way of breed improvement that it would hardly be wise to start out with an uncommon breed.

Medicines for Poultry

Many poultrymen still have faith in the mysterious power of medicines. It is still a fact that most, if not all, poultry diseases fail to yield to drugs. A few of the remedies are decidedly harmful. Sodium bicarbonate, or baking soda, is poisonous to baby chicks and may be harmful to adults under certain circumstances. This fact was brought to attention several years ago, and has been confirmed by tests made, says the Pacific Rural Press.

New Stiff Silks That "Stand Alone"

By CHERIE NICHOLAS

WITH the midwinter social season upon us and festivities at southern resorts going at high tempo, smart women everywhere are preoccupied with new evening gowns to add glamour to time, place and the occasion. Greater formality than in years is the rule, and women are playing up to this edict by wearing gowns of rare beauty and richness.

One may belong to either of two schools of fashion—that which favors heavy stiff heirloomlike silks with a regal air or the type which favors diaphanous sheer silks that float about one enchantingly as one dances or promenades in the great concourse of fashion.

Stiff silk satins such as slipper satin or duchess satin are lovely choices for dramatic gowns. The "delicious" colors of these glorified satins are simply entrancing—make you think of moonlit rays that go glimmering over rippling waves, or icy blues that crown snow-capped mountains or the lovely tints of the rainbow as it enhances summer skies.

To be style-correct these stately satins should be fashioned along graceful princess lines with quaint artfully gored skirts that sweep into widened hemlines. See the model to the left in the illustration. It is a frock of Edwardian period influence done in ice-blue satin with the new shirred bosom styling. The puffed sleeves and princess lines achieve a charming youthful silhouette. The diamond sunburst worn suggests an heirloom that accords harmoniously with the type of silk used for the gown—a silk so grand and stiff it, as was the boast in grandma's time, would "stand alone."

Some of the newest silk satins are studded with gold or silver sequins or rhinestones. To the right in the picture stands a modern Juliet gowned in gardenia white satin, all-over starred with gold paillettes with halter neck of matching paillette banding. Accessory highspots include a Juliet cap and a handbag done in gold paillettes, together with an exquisite white ermine coat.

Warp printed silk taffetas have new looking patterns such as colorful bow-knots in vivid hues on white or green. Centered in the group a modern Jenny Lind greets us in a rustling silk taffeta frock warp-printed with red bow-knots. With it this lovely lady wears pale pink kid gloves embroidered in gold and pearls. The new and fashionable gloves featured this season are veritable works of art. There are pearls at the throat of this fair lady and she wears a superb pearl bracelet.

Other charming versions of the princess dinner and dance gown are done in stiff Lyons velvets with puffed sleeves and buttons all the way down the front. Rich silk damasks are also fashioned in princess lines made square-necked, in puff-sleeve styles which look like Edwardian ladies come back to life.

FUR AND FEATHERS

By CHERIE NICHOLAS

For high-style this midwinter season let your hat be either fur-trimmed or feather-trimmed. The model at the top is a stunning fez turban of black felt and Persian lamb designed to complement a fur-trimmed cloth costume or a fur coat or cape. Smart vogue calls for fur trimmed millinery. With the coronation in sight ostrich feathers are enjoying increasing popularity. A lovely British film star wears the delightful hat shown in the picture. It is an exquisite black felt with twin ostrich feather plumes in two shades of rose. Another cunning new style for young girls that takes on an ostrich trim is the little felt shape that is somewhat a Juliet type, being a shallow round skull cap. This is worn far back on the head with two wee ostrich tips posed perkily at the front.

BLACK SHEERS FOR DAY AND EVENING

For daytime sheer black woolens are smartly in fashion, and for evening the vogue for black nets and chiffons is everywhere apparent. Just now fringe trimming is important on the afternoon black sheer. The narrow fringe, placed row and row, forms cunning short cap-like sleeves with accents of fringe elsewhere on the bodice or at sash ends, or that which is tremendously chic—outlining the skirt hemline.

In the early showings the new daytime black sheers are feminized with the daintiest of white lingerie details in form of frilly jabots, and novel cuffs and becoming collars and bib effects.

The party-frock nets in black are made up in full-skirted styles with just yards and yards floating about.

Mustard Yellow and Beige Favored Colors for Spring

Look for these colors in the new spring fashions. In fact the vogue is on at this very moment for these flattering and very new-looking colors.

Best dressed women are favoring tweeds in beige and gowns of lightweight woolens in beige or golden hues are the "last word" for mid-season, worn under the not-yet discarded coats, in the daytime.

For evening simply styled frocks of "old gold" satin are very pleasing. Some of the newer brocades are also in this color.

Peasant Jewelry

Carved in brilliant peasant reds, greens, yellows, and blues, minute Tyrolean figures are set in a red and white catalin frame a fourth of an inch thick. The pins and clips are one-and-a-half inches square.

Alphabet on Blouses

Letters of the alphabet are spilled all over the fine cashmere blouses that are worn with winter street suits. The letters are usually in bright colors over a dull background.

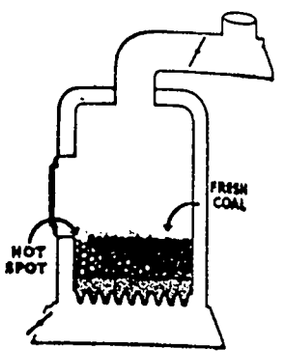
Home Heating Hints

By John Barch, Heating Expert

Refueling Furnace Fire Correct Way Means Most Heat at Lowest Fuel Cost

THERE'S an art in refueling a furnace fire that enables you to get the most heat at the least cost. There's more to it than just scooping up a few shovelfuls of coal and tossing it into the firepot. The economical way is simple.

Shake the grates gently when necessary. Don't do it vigorously and shake a lot of live coals into the ashpit. When you see a slight red glow in the ashpit, stop shaking. Then pull a mound of live coals from the rear to the front of the firebox, just inside the fire door, using your shovel or a hoe. Don't disturb the ash under the



live coals. That gives you a bed sloping down from the edges to the door to the rear.

Now, shovel a charge of fresh coal into the hollow toward the back of the furnace, being careful to leave a mound of live coals in front. These live coals ignite the gases rising from the contact with the fresh and hot coal, causing them to burn.

Finally, when these gases are thoroughly burned, clean the ashpit and reset the dampers. The return damper in the smoke pipe, you remember, should be nearly closed. The check damper should be entirely closed. The ash-pit damper should be open just a slide in the firedoor only about the width of a wooden match.

Copyright.—WNU Service.

Continental United States

The term "continental United States" is somewhat ambiguous. Strictly speaking, "continental" pertains to a continent, and "continental United States" should include all of the United States and the continent of North America but as more commonly used the term is synonymous with "the United States proper," and excludes Alaska as well as the other intervening contiguous territories, dependencies and possessions.

Dr. Pierce's Pleasant Pellets made from May Apple are effective in removing accumulated body waste.—Adv.

Power in Truth

There is nothing so powerful as truth; and often nothing so strange.—Daniel Webster.

Still Coughing?

No matter how many medicines you have tried for your cough, cold or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid nature to soothe and heal the inflamed membranes as the germ-laden phlegm is loosened and expelled.

Even if other remedies have failed, don't be discouraged, your druggist is authorized to guarantee Creomulsion and to refund your money if you are not satisfied with results from the very first bottle. Get Creomulsion right now.

Carving the Tombstone

Many a tombstone is carved with chiseling in traffic.

Gas, Gas All the Time, Can't Eat or Sleep

"The gas on my stomach was terrible. I could not eat or sleep. Even my heart seemed to hurt. A friend suggested Adlerika. The first dose brought me relief. Now I eat what I wish, sleep fine and never felt better." —Mrs. Jas. Filler.

Adlerika acts on BOTH upper and lower bowels while ordinary laxatives act on the lower bowel only. Adlerika gives your system a thorough cleansing, bringing out old, poisonous matter that you would not believe was in your system and that has been causing gas pains, sour stomach, nervousness and headaches for months.

Dr. H. L. Shenb, New York, writes: "In addition to intestinal cleansing, Adlerika greatly reduces bacteria and colon bacilli."

Give your bowels a REAL cleaning with Adlerika and see how good you feel. Just one spoonful relieves gas and constipation. At all Leading Druggists.

Brine and Salt Cures for Meat

Two Principal Methods Are Used by the Majority of Farmers.

By R. E. Nance, Professor of Animal Husbandry, North Carolina State College.—WNU Service.

The many methods of curing pork are mostly variations of the two principal methods: the brine cure and the dry salt cure. Common salt is the basis of all meat curing.

Sugar is sometimes added to give a better flavor and to counteract the tendency of the salt to harden the meat. Saltpeter may be used also to give the meat a natural red color, it has some preservative effect, too.

In curing pork, be sure that all the animal heat has dissipated and that the meat has not frozen. Do the curing in a cool, well ventilated place and, if possible, in a temperature of 34 to 40 degrees fahrenheit.

In the brine cure, for each 100 pounds of meat use 12 pounds of salt, two ounces of saltpeter, and six gallons of water. Boil the water and allow it to cool. If desired, add three cups of sugar to this formula.

Thoroughly mix the salt, saltpeter, and sugar and rub some of the mixture into the hams, shoulders, and sides. Pack all meat in the same vessel, skin side down, except the top layer should be skin side up. Weight the meat down with clean hard wood or bricks.

Dissolve the rest of the salt and other ingredients in the six gallons of water, before the water has cooled. After the solution is cool, pour it over the meat in the vessel until all meat is covered. Repack the meat on the seventh and twenty-first days.

When the meat is cured, wash it first in hot water and then in cold water and hang it in the smokehouse to drip for 24 hours before smoking.

For the dry cure, use for each 100 pounds of meat: eight pounds of salt, three ounces of saltpeter, and three pounds of sugar (brown preferred).

Mix the ingredients thoroughly and rub half the mixture on the meat, then pack it as for the brine cure. In seven days repack the meat and rub on the other half. The meat should cure three days for each pound of weight of each piece. Then wash it and hang it in the smokehouse.

Smoke the meat with hickory, oak, or corn cobs to suit the taste. If the smokehouse is fly-proof and well ventilated, meat may be left in it until used. Otherwise, it should be rewrapped in heavy paper.

Gilts Better Than Sows in Raising Market Pigs

An eight-year breeding experiment recently completed by the United States Department of Agriculture bears out the belief of many swine breeders that gilts are more economical breeding animals than mature sows.

E. Z. Russell of the Bureau of Animal Industry reports that pigs from gilts were raised at less cost per pound of marketable weight than pigs from mature sows. This includes all periods of growth—gestation, suckling, growing, and fattening.

Three groups were tested in the experiment — mature sows, gilts from mature sows, and gilts from gilts. Pigs from the second group were raised to a marketable weight for 47 cents a hundred pounds less than the first group of pigs, from the third group at 42 cents a hundred pounds less.

One of the advantages in using gilts for breeding, Russell points out, is that if a gilt should prove to be a poor breeder the animal still would sell as well as a butcher hog.

There was no drop in the production ability of the gilts from gilts, the records show that at the end of the eighth year their litters average 1,420 pounds at 190 days of age, the best record for this group for the entire eight years.

Agricultural Notes

Herbs that are grown for their fragrance include ambrosia, lavender, creeping mint, and sweet woodruff. Those grown for use in cooking include bush basil, chamomile, sweet marjoram, orange mint, and summer savory.

* * *

Lighter draft horses fit into any kind of farm work and the improved double hitches allow the use of a larger number of horses for doing very heavy work.

* * *

Twenty years ago, the ideal weight for a heavy draft horse was 1,600 to 1,800 pounds. Today, the ideal draft horse weighs from 1,300 to 1,600 pounds.

* * *

New York state has 103 dairy herd improvement associations that keep records of production and feed of 4,000 cows.

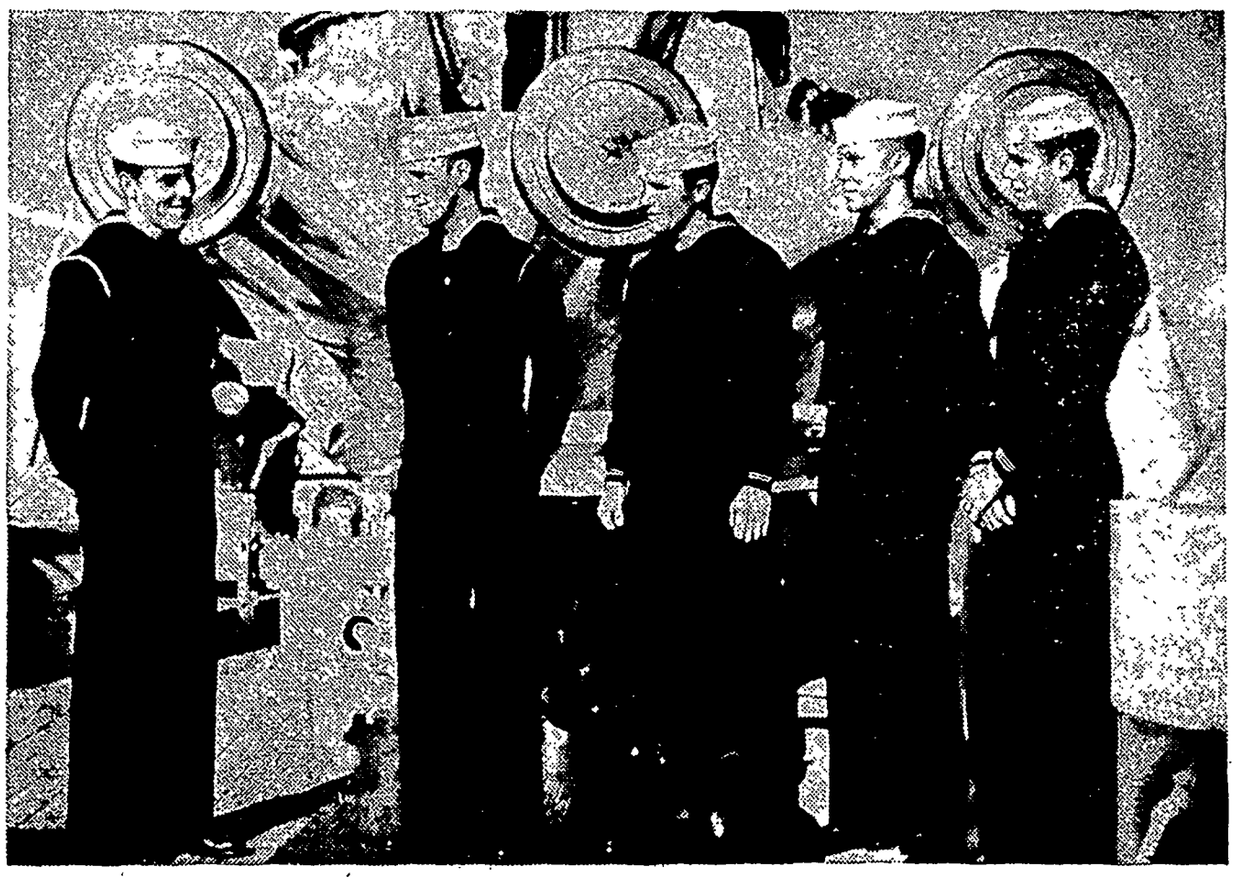
* * *

Ground or crushed wheat is an excellent feed for swine. It is 5 to 10 per cent higher in feeding value than corn.

* * *

Breeders of purebred sheep agree that the typical flock owner pays little attention to selecting a ram.

Meet the Sea-Goin' Cowdrey Brothers



Uncle Sam's navy is one swell place to be! If you doubt it, ask the five husky Cowdrey brothers, from Illinois, all sailors aboard the flagship Pennsylvania. They spend spare time cramming for advanced ratings tests, and awaiting the day when a sixth brother attains seventeen, so that he can make out his enlistment papers. Photograph shows (left to right), Charles, Paul, Harry, Burnem, and Manley Cowdrey.

Five Years Old, and Still Mixed Up!

Jane, Jean, and Joan Parisek (left to right), triplet daughters of Mr. and Mrs. Henry Parisek, of Chicago, whose parents can't tell them apart, celebrated their fifth birthday recently. The lollipops are a memento of that event.

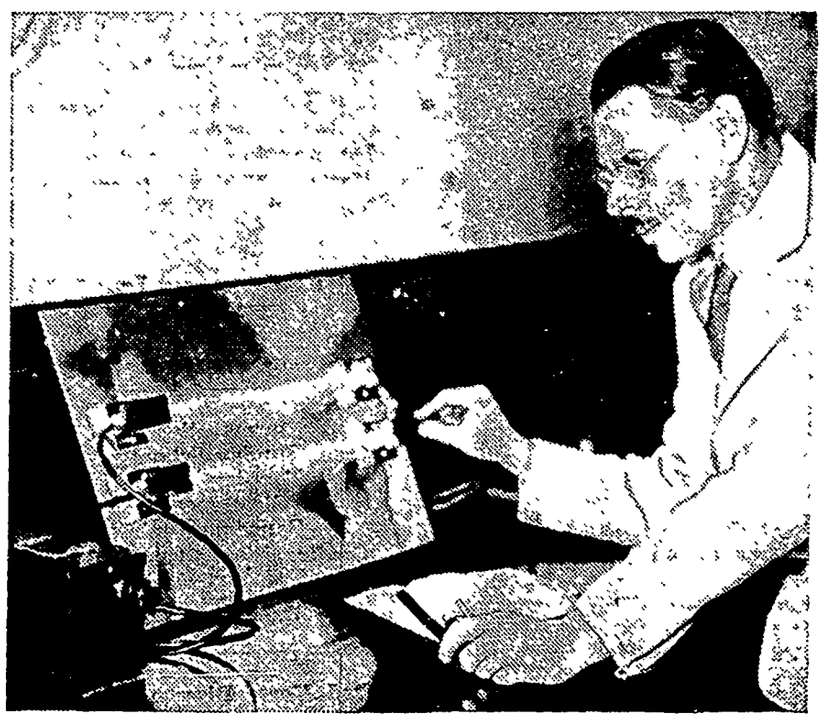
HEADS BOARD OF TRADE

Kenneth S. Templeton, recently elected as president of the Chicago Board of Trade. Templeton, a member of the exchange since 1911, is a partner of the cash grain firm of J. S. Templeton's Sons.

WISDOM ROOSTS

This wise owl has a lugubrious air about him and no wonder. The bird is deeply attached to Charles Kornet, of New York city, who found him in Bronx park and made a pet of him. But Charles, unable to care for the bird, took it to the Bronx zoo, where he is pictured just before he said good-by to his feathered pal. The owl likes his perch, which provides a means of gauging his size, which is 4 inches tall; weight, 8 ounces. The owl is one of the smallest of its kind on record.

Scientist Invents a "Flu" Killer



Inventor William Frank Wells, of the Harvard Medical school, Boston, is shown with his "floodlight" germ killing apparatus. According to Wells combination mercury and neon tubes with quartz glass tubing, and ultra violet rays given off, filter the atmosphere about the lamp, killing off all flu, and other germs. The apparatus—very successful in experiments—has already been installed in several New York hospitals.

Nature Is Scene Painter in Winter Playground

This unusual camera study shows the great crags of Yosemite National park and the little people who have their fun on them. To the right is the famous Half Dome in the distance. New ski trails have been completed in the park and the season is now in full swing.

They're So Simple to Sew!

NOT only the sun, but the moon as well, will rise and set on these new styles created by Sew-Your-Own. This timely trio is one of the most wearable ever offered the members of The Sewing Circle. Yet, and you'll love this, there isn't a complication or a single trick detail to bother with in the whole program.

Pattern 1981—Pajamas so comfortable, restful and entirely satisfying that the alarm clock will have to ring twice—no foolin'—that's the boast and even the promise of this newest two piece outfit. It goes through your sewing machine like a dream, and really is one made up in satin or one of the vivid new prints. For lounging, the long sleeved version in velveteen or silk crepe is a knockout. It is designed in sizes 14, 16, 18 and 20 (32 to 42 bust). Size 16 requires 5 yards of 39 inch material, with short sleeves 4⅞ yards.

Pattern 1207—If your day begins at the crack of dawn with a standing invitation to prepare breakfast in nothing flat, or thereabouts, this is a house dress you can well appreciate. It's on in a jiffy and is just the thing for a two-handed expert breakfast maker. The lines are clean cut and slenderizing. It has a large pocket that's helpful, and general prettiness that is conducive to one's mental and physical well being. It is available in sizes 34, 36, 38, 40, 42, 44, 46, 48, and 50. Size 36 requires 4⅞ yards of 39 inch material, with long sleeves 4¾ yards.

Pattern 1978—This blithe little blouse will add spice to your wardrobe at this time. Not only is it the essence of smartness and the last word in style, but the first word in simplicity, which is important to you who sew at home. It is feminine as to collar, delicately slender of waist and highly original throughout. You may have it with short or long sleeves, as you prefer. It is designed in sizes 12, 14, 16, 18, and 20 (30 to 38 bust). Size 14 requires 2⅛ yards of 39 inch material, with short sleeves 1¾ yards.

Send for the Barbara Bell Spring and Summer Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns. Interesting and exclusive fashions for little children and the difficult junior age; slenderizing, well-cut patterns for the mature figure; afternoon dresses for the most particular young women and matrons and other patterns for special occasions are all to be found in the Barbara Bell Pattern Book. Send 15 cents today for your copy.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Patterns 15 cents (in coins) each.

The event was in honor of birthdays of Mr. and Mrs. Evenson, Mrs. Sherwood, and Mrs. Sandberg and the Schneiders thirtieth wedding anniversary and the Hanson's fifteenth wedding aniversary.

ONE-ACT PLAY CONTEST TO BE GIVEN FEBRUARY 11th

Drama and Comedy In Three One Act Plays

The outstanding dramatic entertainment to e offered by Klemme High School this winter will be the one-act-play contest, which will be held next Thursday, February 11, in the school auditorium. In addition to being a contest to determine Klemme's entrant in the county play contest, his entertainment will provide a full evening of excitement and fun for those who see it.

The first play, "The Singapore Spider," is an intensely dramatic play. The action of the play is thrilling. It has a powerful appeal and a surprise ending.

"Family Jars,, and "His First Shave" are rollicking comedies of home life. They provide plenty of good, clean fun, and either one would be worth the admission price.

One of these three plays will be chosen to represent Klemme in the sub-county one-act play contest to be held at Goodell on Wednesday, February 17. Kanawha, Goodell and Klemme will compete in this contest.

The casts of characters for the three plays to be given here next Thursday are given below The plays are under the direction of Miss Agnes Galbreth.

THE SINGAPORE SPIDER

Jason Harridew, Raymond Keeper, Matt Harridew, his nephew, Paul Schuldt; Mrs Meggs, Jason's housekeeper, Evelyn Arnold; Mim Meggs , Raymond Wille; Josie White, Carmen Kluckhohn.

Bad Horse Disease.

Some weeks since there was in Wright county a serious outbreak of a new disease among the horses on the farms of that county and the latest count showed that three hundred of those valuable animals had died there. It was at first announced that the disease was due to the immature feeding of corn stalks cured in the fields, but later investigations show that it is rather brought on by he feeding of moldy ear corn and the experts at Ames college have recommeneded that no ear corn be fed, and that the animals be given only stalks without ears. Some farmers there have been reported as having lost as many as six or seven horses from this disease. It affects the brain.

Ten Justices of the Peace have filed their bonds of election to serve as Justices in Hancock County, they are listed as follows: H H. Mullin and Henry A. Schaper, both of Britt; Clark E. Lovrien and H. V. Reed, both of Garner; Henry Suckow and Wm C. Keraus both of Klemme; G. H Oxley, Corwith; H. D. Schoeder, Amsterdam township; F. A. Gee, Avery township and H. P. Pike of Ellington township.

Couple Married Here Will Live Near Garner

NORMA WILLE IS BRIDE OF YOUNG GARNER FARMER

Wedding Took Place At Wille Home Wednesday At High Noon

Miss Norma Wille, eldest daughter of Mr. and Mrs. C. J. Wille, and Mr. Harold Rockow, eldest son of Mr. and Mrs. Wm. Rockow of near Garner, were united in marriage Wednesday at high noon, February 10th at the home of the Bride's parents east of Klemme.

The ceremony was a quiet home affair with only the immediate relatives present, and was performed by Rev. Calvin Grosshuesch, pastor of the Klemme Reformed Church.

The Bride was attired in a gown of blue velvet and was attended by her sister, Ruby as bridesmaid, who also wore b'ue The Groom wore the coventional blue serge and his brother, Fred acted as best man. Miss Mildred Rockow, sister of the Groom, presided at the piano and played Lohrengrin's Wedding March.

Following the ceremony a wedding dinner was served and the young couple left soon after on a wedding trip. They will make their home on the Rockow home farm north of Garner.

Mrs. Rockow is a graduate of Klemme High School She has been active in 4-H club work in both Ell township and in the county. She was confirmed in the Reformed Church and has been active in Bible Class, Sunday School and Choir work.

Mr. Rockow is an industrious yong man who has chosen farming as his work and has displayed success along that line.

The Times joins with the many young friends of the couple in extending best wishes.

CONTEST PLAYS TO BE GIVEN AT SCHOOL THURSDAY NIGHT

Plays Being Put On Instead of Usual Declamatory Contest

Three one-act plays will be given at the Klemme High School auditorium this week Thursday evening. The plays are being given instead of a declamatory contest this year and the plays will be judged. The winning play will compete against plays by other schools in a county contest.

The titles of the plays to be given here are "Singapore Spider," "Family Jars," and " His First Shave."

FARM BUREAU MEMBERS RECEIVE NEW MAGAZINE

First issue of a new magazine, the Iowa Bureau Farmer, official publication of the Iowa Farm Bureau federation, has been circulated among farm bureau members and subscribers somewhat ahead of the time that had been announced as proposed first publication date.

The new publication has an enamel cover and 20 pages of information of interest to farmers. It was authorized last summer by the state board and takes the place of the Iowa insert in the Nation's Agriculture.

Handkerchief Shower

At the close of W.F.M S. Thursday afternoon, held at the home of Mrs. Lester Stille, the ladies had a surprise handkerchief shower on Mrs. Wm. Zabilka. Thursday was Mrs. Zabilka's birthday and she received many beautiful and useful handkies.

SEVEN EAGLES STANDINGS

In the Seven Eagles Conference play last week Goodell retained a perfect record by defeating Woden 45 to 20 on the Goodell hardwood. The Kanawha Bulldogs are still in second place as a result of beating Hayfield there 34 to 18. Klemme is a game behind the schedule but are pressing Kanawha close for second place honors. The Shamrocks tightened their grip on the upper position by defeating Crystal Lake there 32 to 16.

The Shamrocks and Hayfield are goth one game behind the schedule as Hayfield has cancelled a Shamrock game three times on the account of storms. A win over Hayfield by the Shamrocks would tie them for second place by Kanawha.

In conference play this week Hayfield comes to Klemme on Friday evening and Woden plays at Crystal Lake. The feature game of the week will be that of Goodell and Kanawha to be played on the Kanawha floor.

STANDINGS	Won	Lost	Ptc.
Goodell	8	0	1.000
Kanawha	6	2	.750
Klemme	5	2	.714
Woden	3	5	.375
Crystal Lake	1	7	.125
Hayfield	0	7	.000

COUNTY BOARD MEMBERS OF CONSERVATION GROUP ARE ELECTED RECENTLY

The county board of the agricultural conservation association for 1937 consists of the township chairman from each township who were elected recently. They are: Omar J. Maland, Amsterdam township; L. W Wesenberg, Avery; C. A Bird, Bingham; Victor Loebig, Boone; J. M Townsend, Britt; P. S. Tompkins, Concord; A. G Fredrickson, Crystal; Alfred Josten, Ell; Geo. J. Meinecke, Ellington; E. J. Andregg, Erin; E. B. Nedved, Garfield: Ben V. Greimann, Liberty; Rudolf Beinert, Madison; W. E. Puffer, Magor; Edgar Clapsaddle, Orthel; and S A. Barber, Twin Lake.

John M. Horan, 98-year-old boiler washer inspector of Milwaukee, has a record of 81 years of cintinuous service for the same railroad without an accident or loss of a days work.

Farmer's Union Held Meeting

The February monthly meeting of the Liberty local of the Farmers Union was held at the regular meeting place February 1st.

The regular business form was folowed. The meeting proved very interesting when probems of the farmers were brought up and discussed to great length. A letter was drawn up to be sent to our Representative at Des Moines. After an open discussion on current events of the day the meeting was adjourned.

The program which followed consisted of several musical numbers and talks.

Sandwiches cake and coffee were served by the committee.

The next meeting will be held at the Liberty schoolhouse No. 7, Monday evening, March 1st. Everyone is invited to come.

Will Gravel Roads

GARNER—A new county-wide WPA project approved last fall will replace the county work relief program to start about Feb 15. Approximately 54 miles of graveling of roads will be done under the new program.

1937 Hancock County Basket Ball Tournament

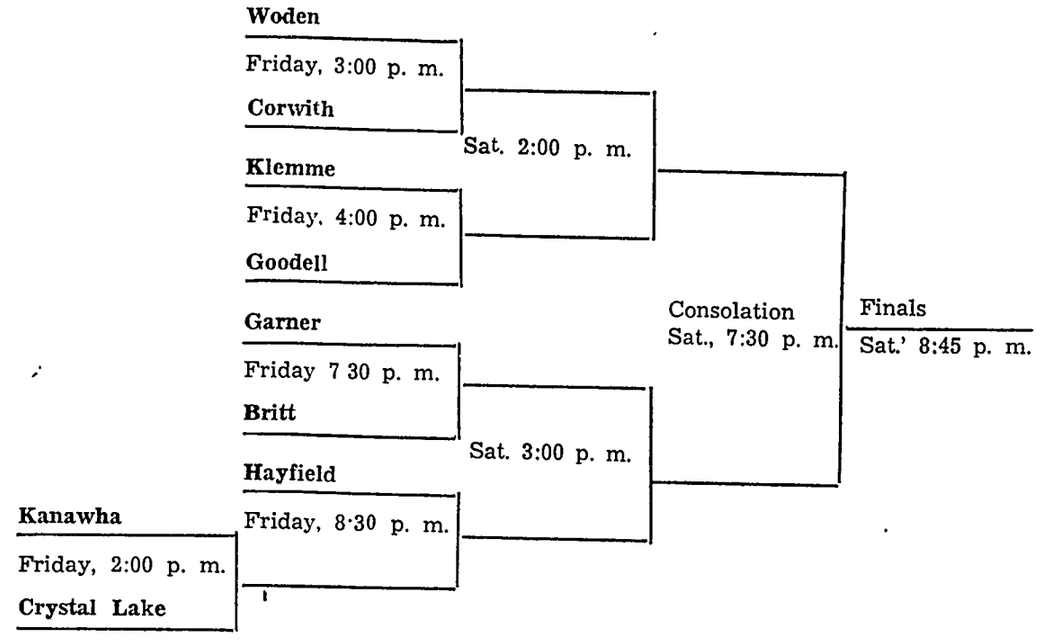
Garner High School Gymnasium



Hancock County Man Is Prominent In State House

REP. OSCAR E. JOHNSON ACTIVE IN LEGISLATURE

DES MOINES, Iowa (Special)—Rep. Oscar E. Johnson, of Kanawha, has been one of the most active members of the house of representatives since the forty-seventh general assembly convened

Since his arrival in Des Moines, Rep. Johnson has served on numerous important committees and caucuses. He served on the contest committees which have occupied the attention of the house, and was chairman of the Lyons county contest committee.

Rep. Johnson also served as chairman of the eighth district Demmocratic patronage committee, a most difficult assignment in view of the fact that an evenly divided house made a compromise on patronage matters most difficult. Rep. Johnson, however, was at all times in the buggy pitching for his home district and won several victories for it.

From all indicatiins, Rep Johnson will prove as prominent a member of the house in this session as he was in the forty-sixth general assembly. In the last session, Rep. Johnson served in the following important standing committees of the house: appropriations, cities and towns, county and township organization, dairy and food, of which he was chairman, fish and game, liquor control, pharmacy, public health, public utilities, and state planning.

When Speaker La Mar Foster announced the permanent standing committees of the house last week, he named Rep. Johnson to serve on the following in this session· state educational institutions, of which he is chairman, appropriations, county and township affairs, dairy and food, federal coordination, liquor control, motor vehicles, pharmacy, roads, social security, of which he is a ranking member, state planning, and ways and means.

Manifold Activities

Although Rep. Johnson has been engaged in manifold activities in connection with his committee and caucus assignments since the legislature opened, he has found time to prepare the groundwork for his committee on state educaional institutions. It will be the duty of this committee, among other things, to pass on an outlay of several million dollars for educational purposes, present askings and requirements indicate.

This week, house file 71, by Johnson of Hancock, a bill for an act requiring proof of financial responsibility, was introduced and referred to the committee on motor vehicles and transportation. No doubt before this bill is voted out on the floor, it will be discussed at a public hearing with the various interests in Iowa which legislation of this type will affect, represented.

Some of the other bills which Rep Johnson is following closely are: the homestead exemption bill, a bill to repeal the two dollar head tax for old age assistance revenue and providing for raising this revenue for needy old people from some other source.

New Industry To Locate In Klemme

W. F. BUTZ AND SONS WILL RUN HATCHERY HERE THIS SEASON

Have Leased Property in North-West Klemme For Business

W F. Butz and sons, who have a hatchery at Garner and one at Meservey, will extend their operatoins this year and will have a hatchery in Klemme.

Donald and Vern Butz were both in Klemme Monday and completed arrangements for leasing the property where Arley Blickenderfer now lives. Mr. and Mrs. Donald Butz will move here March 1st. A double garage will be remodeled and hatching machinery installed in the near future.

Orders will be handled out of the plant at Garner until such time as their equipment has been installed here.

Mr. Butz and son, Vern, will handle the business at Garner and Irene Butz will look after the business at the Meservey plant.

COUNTY TOURNAMENT WILL BE HELD AT GARNER GYMNASIUM

Annual Basket Ball Tournament Starts Friday, Feb. 29th

The Hancock County Basket Ball Tournament will be held at Garner starting Friday afternoon, February 26th at 2:00 o'clock when Kanawha meets Crystal Lake At 3:00 o'clock Woden and Corwith meet and at 4:00 o'clock Klemme and Goodell play. In the evening Garner plays Britt at 7:30 and then at 8:30 Hayfield meets the winner of the Kanawha-Crystal Lake fracus.

The semi-finals will be played Saturday afternoon at 2:00 and 3:00 o'clock, the consolation at 7:30 and the finals at 8:45 o'clock Saturday evening.

Shamrocks Step Up In Conference

SHAMROCKS WIN CONFERENCE BATTLE WITH CRYSTAL LAKE

Get Only Six Points During First Half

The Klemme High School cagers cut loose with a spirited rally in the last half to defeat Crystal Lake by a score of 32 to 16 on the Lakers floor last Friday night. After a new starting combination failed to click in the first quarter, Coach Kingery ordered a change of attack, and from then on the Shamrocks outscored their opponents in every period Crystal Lake led at the end of the first quarter 6 to 0 and were still ahead at the half 7 to 6, but the last half was all Klemme. The green and white hoopsters led at the end of the third quarter 19 to 11 and steadily increased their lead to the end of the game.

Jorgenson again led the Shamrock attack. After being held to two free throws the first half, Buster broke through for six field goals and another free throw in the last half for an evening's total of 15 points. Keeper was good for 7 points with a pair of field goals and three free throws Schuldt and Lemke each accounted for 4 points, and Kaduce made two. Ted was handicapped by a heavily taped ankle, but he played a fine game.

The Little Shamrocks turned back the Crystal Lake seconds by a score of 18 to 12 in the curtain raiser. Tied at 2 all at the end of the first quarter, the reserves added two points to their margin in each of the three remaining periods. Grosshuesch with ten points and Kluckhohn with four provided most of the scores.

Following is the box score of the first team game.

KLEMME SHAMROCKS 32

Farm Bureau Leaders Meet

Leaders Met At Home Of Mrs Verner Stromer

Fifteen ladies met at the home of Mrs. Verner Stromer Tuesday for lesson three of "Foods and Nutrition" This lesson dealt with the cookery of tender meats and was presented by Miss Florence Zollinger, H.D.A. Dinner was prepared by the ladies and consisted of Roast Beef with Hot Peaches. Browned Potatoes, Vegetable Salad. Rolls, Butter. Steamed Fig Pudding, Orange Sauce, Coffee.

An interesting feature of the pudding was the lighting of it When lit, the pudding made a lovely dish for festive occasions.

Ten of the great marches of all times are being studied this year in music appreciation. To do this part of the program, a portable victrola and records are used.

Mrs. Zollinger of Cedar Rapids mother of our H.D.A., was a quest

Next meeting will be March 9th at the Rev. Huenemann home.

Washington Digest

National Topics Interpreted
by William Bruckart

Washington.—The arrival of the first robin is only a sign of the coming of spring. It does not bring spring weather. Nevertheless, we Americans watch for signs all our lives and lately there have been several of them in national affairs that are worthy of notice.

Danger Signs

There never has been a time in our country's history, as far as I have been able to discover, when the tension surrounding labor conditions has been as dangerous as it is right now. I do not believe anyone can forecast what the results are going to be; what all of these strikes and factional fights in organized labor mean and I am convinced that they represent something much deeper than just dissatisfaction with wages or growing pains of expanding business. In other words, there are many students of national affairs who are attempting to analyze current labor conditions as signs of new times.

Most observers with whom I have discussed the present labor problems, are hopeful that these troubles mean only continued increases in the demand for labor. That is, they want to accept these signs as indicative of a returning and sound prosperity in commerce and industry. Yet, none of them is quite sure. There are too many "ifs" and too many uncertainties for anyone to attempt a complete diagnosis of the circumstances.

Some weeks ago I ventured the opinion in these columns that the rift in organized labor between William Green as head of the American Federation of Labor and John L. Lewis as sponsor of the industrial union idea, likely would result in serious trouble for the labor unions themselves. I was unable to report then that which I can write at this time, namely, that the schism in organized labor appears certain to set back the cause of organized labor many years. Indeed, it seems that the split, tangled as it is with partisan politics, may prove to be the uncharted rock in union labor's course and its ship may founder on it.

* * *

But the situation is fraught with graver possibilities, I am sure.

Grave Possibilities

There are elements and influences at work in the labor situation today that easily could lead to riots and bloodshed. From riots and bloodshed it is only a step to revolution of a political sort.

None here knows exactly what the administration's labor policies are beyond the exaggerated promises made during the last Presidential campaign. Of course, President Roosevelt and the bulk of his New Deal spokesmen are exceedingly friendly, overfriendly some believe, to organized labor. The New Dealers had organized labor with them in the last campaign. Now, however, it is made to appear that the support of labor in the campaign is proving more or less embarrassing to the administration which has just started on its second four-year term.

Some of the critics of the administration are outspoken in their statements that Mr. Roosevelt is trying to dodge, trying to avoid, getting mixed up too deeply in labor's problems. Some of his subordinates have been active but the President has stayed out of the picture just as far as he could and as long as he could.

I am inclined to believe that these assertions that Mr. Roosevelt is afraid to take leadership too frequently in labor's problems are unfair to the President. They amount to a statement that he lacks courage—which is not true. On the contrary, there are many who believe with me that Mr. Roosevelt senses developments yet to arise in the labor situation and he is, therefore, being cautious as to is steps thus early in what threatens to be a national labor crisis.

On the other hand, it is difficult to explain why the national labor relations board has been so nearly quiescent through such strikes as the plate glass and portions of the automobile workers.

If there ever was a situation made to order for use of the agency set up under the so-called Wagner law, that situation was to be found in the two strikes just mentioned. The board did so little in those circumstances that its existence can be said to have been forgotten. It amounted to a dead letter insofar as the law itself is concerned. In some quarters one can hear discussion to the effect that sponsors of the national labor relations act and board were unwilling to have that agency and the law receive a real test at this time. I have been unable to confirm this thought at all but frankly the circumstances that one sees indicate there is some truth in the rumor that too much of a burden should not be unloaded on the board for its first real test.

Business interests never have believed the law to be constitutional. The New Dealers, however, have contended vociferously that it valid and yet we have the pictu of a New Deal agency failing perform the very functions f which it was created.

* * *

I mentioned earlier some of th signs and portents that are visible in the labor situation. One of the most important of these is the significance of the "sit down" type of strike. I find many informed authorities who refer to the "sit down" strike as a key point in present labor problems.

"Sit Down" Strikes

It is something new in this country. It is a program of striking in which labor is entirely passive but by which it usurps the rights of ownership. The workers simply stay in the plants, offering no trouble and for the most part avoiding destructive tactics. But it is the fact that they remain in the plants, the property of their employers, that is causing considerable worry in government circles.

The reason why this phase of strike tactics is creating concern lies in the fact that it amounts to the seizure of private property by individuals who have no right or warrant in law. It would be the same thing as far as legal rights are concerned if a group of strikers went to your home or mine and announced they expected to stay there. There is no difference in the two situations. While the effect on you or me would be less important to the country as a whole, it remains as a fact that our rights would be violated in exactly the same manner as rights of corporations were violated, say, in the General Motors strike. After all, you and I are merely units of the great mass of people that make up the United States of America. Now, it takes no great stretch of the imagination to recognize that if union labor establishes its ability to occupy the property of others and fixes that as a precedent, then where are the rights of any person who owns property. It matters not whether it is a small cottage, a farm home or a great industrial plant—the right to own property, guaranteed to us by the Constitution of the United States, is virtually nullified.

One of the rights of American citizenship is a right to own property. It is a principle that has grown to be sacred with us since the Boston tea party. Yet, it is being challenged and thus far the federal government has made no move to break it up. As long as employers organize and tread on labor with a steel boot, just so long the workers are entitled to organize to combat mistreatment from business. But it does not seem to me to be a right of labor to actually take private property. To that extent I cannot feel very kindly toward those strikers at present asserting such a right through use of the "sit down" strike.

Now, there are reasons why the federal government has not acted. If troops were sent into private factories to drive out the "sit down" strikers, one can readily see what a riot would result. But if the federal government fails to enforce this inherent right, it is not doing its sworn duty to the rest of the people. And it was only a few weeks ago that Mr. Roosevelt again took the oath of office as President, swearing to enforce as well as defend the Constitution.

Then, another phase of the situation is being discussed. The Wagner law says employers must negotiate collectively "with the majority" organization of employees and it decrees further that the labor relations board shall determine which is the majority organization; that it can decide this question on evidence or order an election among employees. None can tell usually whether union or company organization employees are in the majority in some of these strikes, so the labor relations board has kept out of them.

Taking this labor situation as a whole, I believe I am justified in saying, as I said earlier, that it portends a crisis. Preaching of class hatred has been the main occupation of certain elements in the last three or four years and now those elements are reaping what they sowed. The tragedy of it all is that the rest of us have to reap the same reward.

Wisdom Teeth

Such appellations as "wisdom teeth" to indicate the third molars or "eye teeth" to describe the canine teeth are the carryover from the Middle ages to our own time of the relationship generally accepted between tooth and wisdom, tooth and eye, says Hygeia, the Health Magazine.

Sleep Talk May Be Legal

Words spoken in sleep are not evidence of a fact or a condition of the mind, yet, says Collier's Weekly, some courts of the United States have ruled that such testimony is admissible.

Scenes and Persons in the Current News

1—Crown Princess Juliana of Holland and her bridegroom, Prince Bernhard Zu Lippe-Biesterfeld, shown before the wedding. 2—Strikers picketing automotive plant warm themselves over an ash can stove. 3—Walter Runciman, chairman of the British Board of Trade, who is said to be negotiating trade agreement with President Roosevelt.

Strikes (Not Labor) Their Forte

Meet the mixed doubles bowling champs of New England—Ruth Weckbacher and her partner, Jim Gurry. Ruth, who was five times woman champion of the New England Bowling association, believes in settling bowling controversy but one way—no arbitration, just strike and keep on striking.

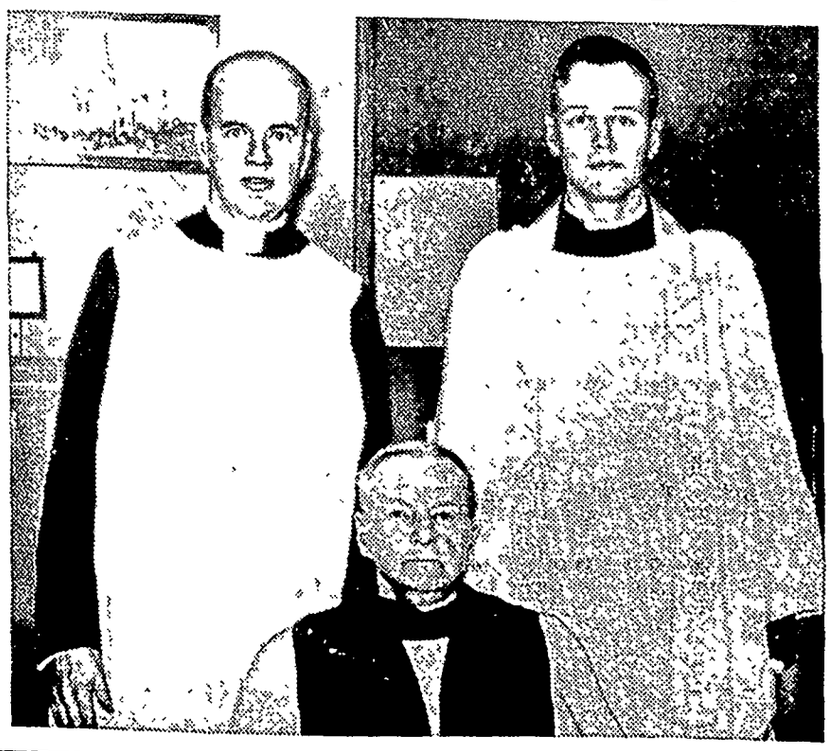
SHE'D BE CLAN CHIEF

A photograph of Miss Catriona Louise MacLean, of Ardgour, Scotland, seventeen-year-old claimant to the chieftaincy of the clan MacLean of Ardgour. Her claim is opposed by Lieut. Commander Henry MacLean, of Bursledon, Hampshire, who appealed in the Edinburgh court of session against the decision that a court can pass on the case.

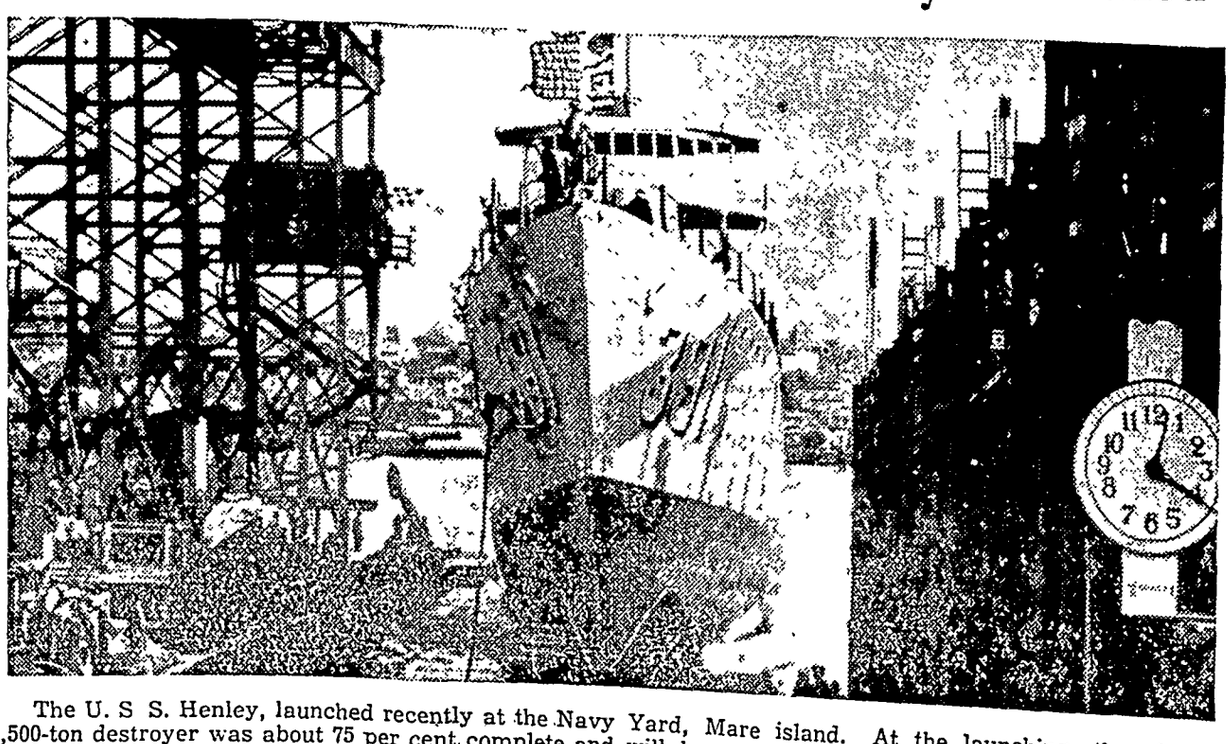
Bishop Elevates His Rector Son to Episcopacy

Brother Assists in Ceremony Unique in Church

For the first time in the history of the Episcopal church in America a bishop has elevated his son to the episcopacy. At the left is Rev. Dr. Lawrence of Springfield, Mass., elevated to the bishop of western Massachusetts by his father, Rev. William Lawrence, retired bishop of Massachusetts. Rev. Frederick C. Lawrence (right), his brother, rector of St. Peter's church, Cambridge, Mass., aided in the service. Dr. Lawrence was born in 1850 and ordained a rector in the Episcopal church in 1876. He was consecrated bishop of Massachusetts in 1893, retiring from active church service in 1926. The venerable clergyman has been a successful author, publishing biographies of Henry Cabot Lodge and Phillips Brooks as well as works on religious and historical subjects.



New Destroyer for Uncle Sam's Navy Launched



The U. S. S. Henley, launched recently at the Navy Yard, Mare island. At the launching, the planned 1,500-ton destroyer was about 75 per cent complete and will be commissioned in the summer of this year, carrying a complement of 8 officers and 150 men.

One at a Time

The famous De Witt, one of the greatest statesmen of the age which he lived, being asked by friend how he was able to dispatch that multitude of affairs which he was engaged, replied that his whole art consisted in doing one thing at once.

"If," says he, "I have any necessary despatches to make, I think of nothing else until those are finished; if any domestic affairs require my attention, I give myself up wholly to them until they are set in order."

Keep your body free of accumulated waste, take Dr. Pierce's Pleasant Pellets. 60 Pellets 30 cents. Adv.

Wasted Indignation

Most indignation is wasted. Nothing results from it.

If You Have a Child

ASK YOUR DOCTOR THIS

Ask Him Before Giving Your Child an Unknown Remedy

Practically any doctor you ask will warn: *"Don't give your child unknown remedies without asking your doctor first."*

When it comes to the widely used children's remedy— "milk of magnesia," the standard of the world is established. For over half a century many doctors have said "PHILLIPS' Milk of Magnesia." Safe for children. No other is "quite like it."

Keep this in mind, and say "PHILLIPS' MILK OF MAGNESIA" when you buy. Now also in tablet form. Get the form you prefer. But see that what you get is labeled "Genuine Phillips' Milk of Magnesia."

ALSO IN TABLET FORM:

Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

PHILLIPS' MILK OF MAGNESIA

Effects of Praise

Praise makes good men better and bad men worse.

Printed Lace and Other New Prints

By CHERIE NICHOLAS

SEEMS as if every type of material ever known has gone into print. The latest entrant into the printed realm is lace. Printed laces are the big news in the lacy story for the coming season. Granted that prints for resort wear and for spring are more lovely each year, but never have they risen to greater heights of glamor then when colorfully printed on sheer Chantilly lace which brings the pattern out color-gloriously.

The evening gown in the picture is fashioned of printed Chantilly lace, the patterning done in green and shades of yellow and orange. Black ribbons make the shoulder straps and belt of this handsome gown. And if you want to wear printed lace in daytime let it be a blouse of printed lace worn with your new spring bolero suit—a word to the wise is sufficient.

The advance arrival of new prints would indicate that the vogue for the spring and summer of 1937 promises to exceed all previous records. In the new showings silk prints fairly hold one spellbound with their daring, their unusualness and their artful art both as to color and design. The same may be said of the grand and glorious linens, also pique prints whose spectacular fling at color is simply breathtaking.

See the youthful contrast jacket-and-skirt costume centered in the group illustrated. An ensemble like this is an especially smart cruise fashion for deck-pacing or for going ashore at points enroute. It is fashioned of cloque pique combining print and plain. The fabric is one of the new pre-shrunk cottons so ideal to wear in warm climates where frequent tubbing is necessary.

The fact that prints are going strong in sunny resort and among cruise-faring fashionables in no way implies that midseason stay-at-homes are being left printless. On the contrary the prints that are peeping from beneath winter coats are as refreshing a sight as could possibly greet winter-weary eyes. The colors are entrancing and the patternings are unmistakably "new." The fact that the motifs are widely spaced makes for an absolutely "different" look. As a tonic that acts instantaneously we recommend a frock forthwith and sans delay made of one of the radiantly colorful new prints.

An interesting characteristic of early arriving modes is that the emphasis is placed on the smartness and novelty of the print which fashions the dress rather than on its making. In fact the new print frocks are styled most simply the more to show off to advantage the beauty of their material which thrills with unique designs and dramatic colorings.

The print fashioning the daytime gown shown in the foreground of the group illustrated makes color-play its big feature. Green and red on a brown ground is the color scheme. The belt is of brown suede. The large jewelled clasp (huge ones are worn this season) at the neckline further emphasizes the idea of striking color.

Speaking of the new spring prints in general they are newest looking when the florals are large and distinctive and set far apart. Just now it is the dark grounds that appeal or that which is ultra chic, the background in a vivid color. Paisley patterns and bold stripes are especially smart.

BEIGE LACE

By CHERIE NICHOLAS

Beige is high fashion again as in fact are all shades that suggest cinnamon and yellowish and delicate brownish tints. These colors are especially effective in lace and have the added advantage of practicality and wearability. The stunning lace dress pictured is tailored of beige lace. It has a nicety of detail that is recognized at a glance. The full skirt lends itself to movement and is most graceful on the dance floor. This is a grand type for the winter cruise and for packing up for a southern resort vacation as well as for the "little" evenings in town.

LACE HEADDRESSES SMART FOR SPRING

By CHERIE NICHOLAS

Fashion has always decreed that you shall be smart—and this year that you shall be pretty as well. This combination is entirely possible when you have seen yourself in the all-lace hats which are becoming more and more popular for dining out and the theater. One, a Schiaparelli model, is helmet like, with a conic crown. The lace is fixed on wire and gives the Spanish touch, which of course is the thing this season.

If you prefer to get your Spanish effect in another way, don't forget the mantilla. It can do wonders towards conveying that air of mystery and romance. And you can make it yourself, fashioning it in your own way. Some are made of squares of Chantilly; others have lace borders around net. We noted particularly one of plain net, with a wide border of lace. They are, incidentally, equally attractive when worn as scarves or shawls, and even folded in a triangle and tied ascot-fashion in front.

Black and White Popular for Formal Evening Wear

Black and white have established themselves as the height of formality for evening wear. Used together, they are always the more effective. Seen recently in one of the best New York fashion ateliers was a formal gown of white lace, pailletted all over with rhinestones, and over it was worn a charming, hiplength jacket of black net. Fitted snugly at the waistline, and with straight sleeves slightly puffed at the shoulder, it flared out in a full peplum below the waist.

The black net jacket suggested itself as an admirable light wrap to be worn with all evening dresses.

New Eye Training Needed to Meet Air Travel Growth

More Perfect Vision Must Be Developed

COLUMBUS, OHIO. — With air travel becoming increasingly important, more attention will need to be given to training the eyes of the oncoming generations, it appears from remarks made by Dr. C. E. Rice, consultant to the Social Security board, at the conference here of the National Society for the Prevention of Blindness.

A well developed ability to see with both eyes together is essential for normal perception of depth. This, Dr. Rice pointed out, is vitally important for pilots of aircraft.

Squint is one example of an extreme degree of lack of ability to fuse the pictures in the two eyes, or to make them see together. Sometimes this squint or crossing of the eyes is due to mechanical conditions which can only be corrected by operation, but in some cases the ability to fuse can be developed by proper training, Dr. Rice said.

The cause of the condition, which may lead to blindness of one eye because it is not used at all, is unknown. Dr. Rice suggested that some of the infectious diseases acquired early in life may play a part in causing the condition.

Cause of Myopia Not Known.

Nearsightedness or myopia is another visual defect about which not much is known as to the cause. It is probably due to defect in the development of the coats of the eye ball, and may even have its origin in the make-up of the germ cell from which the baby developed. Since the cause seems to start operating long before the child is born, it is wise, Dr. Rice thinks, to encourage the prospective mother to partake of a wholesome diet fortified with cod liver oil during the months before the child's birth.

Other dangers that may threaten the baby's eyesight before he is born are various disease germs. Most important of these are the germs of syphilis, tuberculosis and gonorrhea. Treatment of the mother before the baby's birth will safeguard the child from blindness due to syphilitic infection. Guarding the infant from danger of tuberculous infection, either from infected milk or from contact with tuberculous patients, will protect his sight from this particular hazard.

Not all cases of babies' sore eyes, dangerous because the condition may lead to blindness, are due to gonorrheal infection, Dr. Rice pointed out. Other disease germs may get into his eyes during the birth process. Dropping silver nitrate into the new-born baby's eyes, to protect him against this hazard, is now a world-wide procedure.

Some Wasps Are Much Meaner Than Others

WASHINGTON.—Wasps are not all alike. Some of them are meaner than others. They aren't all mean, so far as that goes. Some are relatively placid.

A study in insect individuality was made recently by Austin H. Clark of the United States National Museum. A mason-wasp's nest was brought to him for identification, and when the insects hatched out he studied them one by one.

The first one out was small, dark, and wicked. She lurked in a dark corner of the jar in which the nest was kept, ready to show fight against any of her sister wasps or anything else that offered. The second wasp out was bigger and really very good natured. She wouldn't even offer to sting Mr. Clark's finger when he offered her the chance.

Other wasps that emerged varied between the truculence of the first and the placidity of the second. Only one male appeared. At first he was dull and uninterested, but he "pepped up" considerably when he found there were ladies present.

French Will Build an 80-Inch Telescope

PARIS.—Plans are now complete and the site selected for the new national observatory of astrophysics with an 80-inch diameter telescope, it is announced by M. Jean Perrin, state under-secretary for scientific research.

In co-operation with the Minister of Public Instruction the observatory will be operated by a committee of French astronomers and scientists.

The observatory will be located in southwest France in the Basses-Alpes in the region of Forcalquier.

Young Whale Needs About One Jonah a Day for Food

Interesting Facts About the Cetacians

A JONAH a day would be just about right for a young and rapidly growing finner whale. That is, supposing the finner whale could swallow the prophet—which he couldn't. But anyhow, a whale of this kind, which are the ones most hunted for oil nowadays, increases in size by the equivalent of a big man's weight every day, during his period of most rapid growth.

This is among the host of fascinating whale-facts amassed in many voyages to both of the earth's frozen ends, by Prof. Johan Hjort, seagoing scientist of the University of Oslo.

Finner whales mate in early autumn, and their young are "calved" in May. The prenatal period is only a little longer than man's. The whale baby feeds on its mother's milk from May until December, when it is weaned. Adolescence lasts from then until about the beginning of the following August. Thus in two years the blue whale passes from infancy to adulthood, although of course it continues to increase in size for a long time after maturity is reached.

Their growth naturally goes on at a tremendous rate. In a single day, during the period of most rapid increase in size, the young whale puts on every day the weight of a full-grown man. A really large finner whale will weigh as much as 1,500 men—real he-men, too, the size of the thick-chested Viking whaler captains who pursue them. Cruising at ten knots, Professor Hjort has calculated, they must put forth an effort equivalent to 47 horsepower. The Norse biologist added that he has been on ships pursuing such whales at a speed of fourteen knots—and not catching them.

The oily blubber, chief prize in whaling, performs a very important biological function for the whales. It is to these huge sea mammals what the hump is to a camel—a reservoir of energy-food stored up in times of abundance, to be drawn upon in seasons of scarcity. Because of the tremendous quantitative fluctuations in the various forms of sea life on which whales feed, they must often go for long periods without feeding, and often cruise for hundreds of miles without so much as a herring or a shrimp to eat.

A second function of the blubber is protection from the cold. Fat is an excellent non-conductor of heat, so that a whale well wrapped up in his subcutaneous layer of blubber can live for weeks and months in polar water at a temperature near or below freezing.

Whalebone, formerly next in importance only to oil in the whaling industry, is now an object of practically no value.

Water Wagon Best for One Living in the Tropics

CHICAGO.—If you are going to live in the tropics, you will climb aboard the water wagon if you know what is good for you.

Here is the recipe for successfully living in a tropical climate, as given by Dr. Cecil K. Drinker, Harvard physiologist: No alcohol; adequate sleep, simple food, plenty of water, plenty of salt in the diet, and daily exercise.

Two years is probably the longest safe period for a white man to live in the tropics, according to Dr. Drinker, whose studies of the effects of heat and humidity on the human body are made the subject of editorial comment in the Journal of the American Medical Association.

The health of a man from a temperate climate begins gradually to deteriorate when he goes to the tropics, and the effects of the heat and humidity upon his wife and children are even worse.

Better Be Tall and Thin.

A tall, thin person is best fitted for tropical life, according to Dr. Drinker, for his body has a maximum surface for heat loss in relation to body weight.

Some of the bodily changes that have been noted among white residents of the tropics are as follows: The basal metabolism changes. Fertility is reduced. The pulse rate decreases slightly. The breathing rate decreases, but the minute volume of air is somewhat higher. Often a slight alkalosis develops. Blood sugar is likely to be low; the non-protein nitrogen increases; the total phosphorus in the blood is lowered. The red blood cells increase slightly; the white cells decrease.

Children, after the age of three years, tend to become weak and apathetic, Dr. Drinker states. By the time they are ten years old, they are poor in initiative and application.

In the case of adults, the will power often weakens, laziness follows and sometimes vicious habits gradually develop.

Going to the Party?

WHERE is the party? At Mrs. Smith's on Walnut street and it looks awfully much as though the principals were caught by the candid camera. Luckily, however, they're perfectly groomed for their parts:

Introducing Janet.

Janet in her jumper (Pattern 1996) is asking Mother which glassware to use. Her plaid blouse in taffeta makes her feel very dressed up. Mother chose this style because the many possibilities for change make it a wardrobe rather than a dress and she knew it would be easy-to-make. Your own little girl may have this same ensemble in sizes 6, 8, 10, 12, and 14 years. Size 8 requires 1¾ yards of 39 inch material for the jumper and 1⅛ yards for the blouse.

Mother, the Hostess.

Mother is the perfect hostess, calm and assured, because she knows her all-occasion frock with its sprightly crisp apron (Pattern 1220) is becoming and appropriate. For house wear she made up this model in print. She is wearing here the crepe version and knows that it will be delightful for later on in cool black and white. It comes in sizes 34, 36, 38, 40, 42, 44, and 46. The dress and apron in size 36 require 5½ yards of 39 inch material. The apron alone requires 1⅛ yards.

And the Guest.

The guest just arriving is wearing her trigest Sew-Your-Own. She likes it because the puffed shoulders and swing skirt make her hips look smaller. The collar is young and the sleeves stylish. This frock is especially chic in silk crepe alpaca or one of the lovely new prints. For your own daytime distinction, then, why not make up Pattern 1205? It is available in sizes 14, 16, 18, and 20 (32 to 42 bust). Size 16 requires 4⅝ yards of 39 inch material. One ball of yarn required for trimming as pictured.

New Pattern Book.

Send for the Barbara Bell Spring and Summer Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns. Interesting and exclusive fashions for little children and the difficult junior age; slenderizing, well-cut patterns for the mature figure; afternoon dresses for the most particular young women and matrons and other patterns. Interesting and exclusive all to be found in the Barbara Bell Pattern Book. Send 15 cents today for your copy.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Price of patterns, 15 cents (in coins) each.

WHY DIPTHERIA?

Whenever a child dies of Diphtheria in the present era it is a reflection upon the comunity in which such death occurs For more than ten years preventive measures against this terrible disease have been proved to afford practically 100 per cent protection.

A striking illustration of what may be acomplished by the adoption of modern scientific methods in the prevention of diphtheria is seen in the record of Manchester, N H., a city of some 80.000 inhabitants, which has not had a single case of that dreaded disease in five years.

But that this record, admirable as it is, should have suffecient news value to be featured by the Associated Press is a sad commentary on the rest of the country in which there were approximatelv 157 000 cases and many thousands of deaths from diphtheria last year

Immunization against this dis- passed the experimental stage and the medical profession regards it as almost wholly The immunization technique used in Manchester is used in most of the larger No civilized community should tolerate the existance of the disease, which strangles helpless children to death.

Its ravages are not so spectacular as those of kidnap murderers, but its effects are just as horrible, and many thousand times more frequent

It requires no laws, no G-men, no courts, to prevent this wanton desruction of innocents It requires onlya negligible expenditure of funds and strict vigilance to stamp it out

MORE REAR ENGINE TALK

Judging from the talk around the recent Automotive Engineers' convention in Detroit and also from patents recently granted to Ford company, the rear engine car is again being studied The reasons for this are obvious

First for the same amount of wheelbase a tremendous increase of room within the body can be obtained; second, with the engine weight over the driving wheels better traction can be secured, third with the driver unhampered by the high hood covering the engine much better vision is possible

To obtain these results however, engine experts say an entirely different type of motor must be designed David E. Anderson, chief engineer of the Bohn Aluminum and Brass Corporation, who has been specializing on engine development for a number of years, states that for this type of car we are likely to see developed a new high-effeciency engine incorporating much higher compression than now common, using aluminum pistons, aluminum cylinder heads and very possibly aluminum connecting rods and cylinder blocks

In other words, the engine developed for the rear motored car will approach closely to best aviation practices, and have tremendously greater output of power for its size than current passenger cars Anderson states that the necessary knowledge and the material is available to make such improvement in design possible

If his prediction, as well as those of other engineers, comes true we may see in the future a very highly effecient rear-engined car giving excellent performance and also far more economical on gasoline and oil than our present type.

Mrs Clyde Wolfe of Kansas' City recognized her stolen car on the street and flirted with the driver until a policeman came along and then had him arrested.

Nations of World Allot Year 1939 To New York Fair

World Exposition Already Growing Up; Seeks Active Participation of State

NEW YORK, (Special).—The New York World's Fair, in which every state in the nation must inevitably take small or prominent part, is out of its infancy

Preparatory construction goes on night and day at the Flushing Meadow Site of 1216½ acres at the geographical centre of New York City A steady flow of activities and announcements emanates from the Fair Corporation headquarters on four floors of the Empire State building. Judging from all of these, the Fair is a lusty growing institution that will reach full maturity—no question about it—by the scheduled opening day, April 30, 1939

The task of grading the site is about half completed. Battalions of men with trucks have already moved over 3,000,000 cubic yards of dry fill in the process of turning the waste marsh lands of the Flushing River basin into park ground Other battalions are scooping out "meadow mat" for use as fertile top soil for the made lands, and in so doing excavate the beds for the two large lagoons featured in plans for the Fair

The first of the 300 structures which according to estimates, will house the 1939 Fair, has been completed and is ready for occupancy. This is the headquarters building for the field forces of today and the employment department of the exposition period

Scheduled for early in the new year is the start of actual construction of the $900,000 Administration building. The designs for this structure, let under architectural contract a few weeks ago, are nearing the day of their approval in the Corporation's offices. Upon completion of this building, late in August, 1937, the Fair headquarters, bag, baggage and sales offices, moves to the exposition site

"The most splendid and significant edifice projected for the 1939 international exposition," the Theme building, as described at Fair headquarters, is also well along in its contractual period. The estimated cost of this great building for the "Thematic Centre" of the exposition is set at $1,200,000. The preliminary designs are to be finished in about eight weeks and the final plans submitted within four weeks thereafter Construction is scheduled to start immediately the designs are completed

From this Theme centre will radiate all that is to be the 1939 Fair as conceived by its founders and rendered into concrete terminology and model by the Fair's Board of Design.

"Our job from now on is to give physical expression to the plan and theme of the Fair as announced and as set down on paper in our headquarters," says Grover Whalen, President of the Fair Corporation.

"Starting next April 1, we plan to complete the design of one major building every ten days for a period of seven months. In all, we expect to design no less than 30 major buildings to house the exhibits from every part of the world. Some 300 structures, in all, are planned for the Flushing Meadow site, within a few minutes' ride from Manhattan"

Without solicitation on the part of the Fair, more than 250 American business house and instituttions have begun preliminary conversations regarding their participation and are already planning exhibits. Five of the great nations of the world have already assured the Corporation that they would erect their own buildings, while no less than 32 other nations have informally indicated their desire to participate

And then, on top of all this display of keen interest, comes the announcement that the International Convention Bureau, meeting in Paris, has allocated the year 1939 to the New York Fair This means that the New York Fair has exclusive ranking as the "one international exposition" of 1939, and assures it of the active support of the 21 nations signing the agreement.

President Roosevelt has just extended official invitation to the nations of the world. Governor Herbert H. Lehman, of the host State of New York, has extended invitation to the governors and residents of 47 states. Grover Whalen, likewise, has invited the governors in a letter pointing out that "the commercial consequences of the New York World's Fair are so great and important that they alone would justify the active participation of every state"

Fair Commissioners are already in South America and Europe Still others are on their way to the Far East and other foreign shores. Major Dennis E. Nolan, retired, as head of the Department of Foreign, State and Municipal Participation, will himself make representation to the governors and legislatures of the various states

Meanwhile, under the direction of Harvey D Gibson, President of the Manufacturers Trust Company, and Richard Whitney, former president of the New York Stock Exchange, the prominent figures in the financial capital conducted a 28-day campaign to sell $27,829,500 in debenture bonds of the Fair to finance the construction period.

Every confidence is being expressed that the Fair not only will "pay its way," but that it will bring a billion dollars more of revenue into Greater New York and stimulate American industry in general to an extent many fold that amount.

The total cost of producing New York's Fair, including collateral improvements, is set at $125,000,000. Statisticians estimate that the attendance will total more than 50 000,000 persons.

The City of New York, the State of New York, and the Government of the United States, according to expectations, will account for $35,000,000 of the total expenditures and thus lend an official backing never before achieved.

The Federal Payroll.

On February 28, 1933, just before the New Deal administration came in, the number of civil officers and employees on the Federal payroll was 563,487. On June 30, 1936, the end of the last fiscal year, this payroll total was 824,259, an increase of about 46 per cent.

Human Hair Strains Oil; Other Kinds Also Useful

Human hair, able to withstand a pressure of six tons per square inch, has an important place in American industry, declares a writer in the Washington Star.

Practically all the cottonseed oil used for culinary purposes is strained through press cloth made of hair.

In the cottonseed oil mills a measured quantity of cooked cottonseed is wrapped in a strip of hair cloth and placed in a machine, called a "cake former," where it is slightly compressed to make a compact mass. The cake, still covered with the cloth, is then removed to an hydraulic press, which squeezes the oil through the cloth. The product is piped into a settling tank and sent to a refinery.

The use of hair cloth for wrapping materials from which oil is to be extracted by pressure comes down from olden times. For many years, long-fibered goat hair and wool were used. Afterward, European manufacturers learned that the Asiatic camel hair was better on account of its length and stretching qualities and adapted it. The camel's-hair cloth was the first press cloth used in the United States. In 1906 the Boxer Rebellion in China almost cut off the supply of raw material, and manufacturers were compelled to resort to goat hair, llama hair, cow tails, horse tails, cotton, and, finally, human hair.

The Oriental disturbances which cut off the supply of camel hair provided a source of almost unlimited supply of raw material for the manufacture of the new type of press cloth. After overthrowing the Manchu dynasty, the Chinamen proclaimed their new-found liberty by cutting off their queues.

Meat Preservation Was Practiced in Early Days

There have been four classical methods of meat preservation—drying, smoking, salting and freezing. Meat drying originated in the more arid countries since, where the climate was moist, the meat would spoil before it could be properly dried. Apparently meat drying was first developed in the northern part of Asia, and the custom unquestionably was brought to North America and later to South America by the immigrant peoples who came across the Bering Strait, or a land bridge which is presumed to have existed there at an earlier date, writes Col. E. N. Wentworth, director of Armour's live stock bureau, in a packing company letter to animal husbandmen.

The chief principle in meat drying to cut the meat in sufficiently thin strips to permit rapid evaporation of the moisture. The Spanish adventurers who came to North America found dried meat in use by the Indians of what is now the Southwest United States, Mexico and Central and South America. The Spaniards called it "charqui" (pronounced "sharkey"), and presumably derived it from the native Indian word used in Peru for beef or other meat cut into long strips and dried in the wind and sun It was christened "xarque" by the Portuguese explorers who came to Brazil, but was known as "jerked" beef by the English adventurers.

The Adriatic Sea

Americans are prone to think of the Adriatic as an Italian sea, but as a matter of fact it equally washes the shores of Jugo-Slavia It stretches north from the Mediterranean for some 480 miles and the average distance between shores is about 100 miles. In the southern part it reaches a depth of 4,000 feet, shoaling off to 500 feet in the northern section. For centuries the Jugo-Slavian side has been known as "Nase More," while on the Italian side it is "Mare Nostrum."

The Provincial Congress

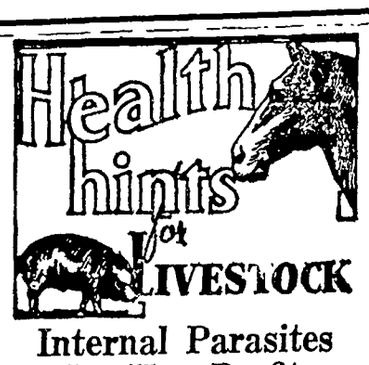
On October 11, 1774, the government of Massachusetts forever passed out of British rule, for on that day the provincial congress was organized in Concord The new authority devested the royal governor, one by one, of all his powers and functions, and became master of all the arsenals Every farmer's barn, as well as the courthouse, the tavern shed and the miller's loft, was requisitioned for the hiding of provisions and war supplies.

The Wart Hog

The wart hog inhabits Eastern Africa from Abyssinia to the Zambezi river. Other members of the same homely family can be found over most of the African continent They usually live along streams and den in holes in the ground. The curving tusks of the wart hog are highly prized by some natives of Africa, who extract them and string them together in necklaces.

Use of Music in Churches

In the early churches of Ohio there was much opposition at first to the suggestion that musical instruments be used to accompany the voices in hymns. In one church in Columbus a bass violin was brought secretly at night into the choir loft to be introduced as accompaniment Gradually the congregation became friendly with this sort of music during their services.



Internal Parasites Cut Hog Profits

—Prepared by American Foundation for Animal Health

Few farmers realize the terrific damage done to their hogs—and to their hog profits—by the worms and internal parasites which infest practically all hogs in one form or another. The dollars and cents loss easily runs to several millions of dollars annually.

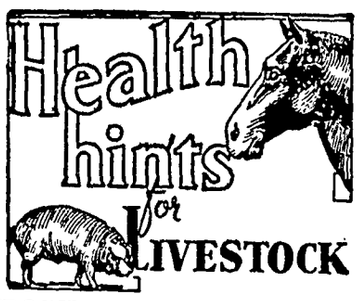
The most common of these parasites are the large roundworm, familiar to every farmer, the thornhead worm, nodular worm, and lung worm. The roundworm does the greatest damage of all. Eggs of this worm are picked up from the hog lot, hatch out in the pig's intestine, penetrate the bowel and enter the blood vessels, whence they travel to the liver. From there they pass to the heart and lungs. Then they go through the air passages and back into the stomach and intestines to complete the circuit.

By the time hundreds of worms have passed through the organs of a hog in this manner, they have done untold damage. The liver suffers, first, then the lungs, and many baby pigs die of pneumonia caused by such worms.

Thornhead worms attach themselves to the wall of the intestine. Kidney worms damage both liver and kidneys. Nodular worms lower the resistance of young pigs, and lead to ulcers and abcesses.

One of the worst results of worm infestation is the lowering of the hog's resistance to disease. Once his system becomes run-down, the hog is an easy prey to any disease or epidemic that comes along—and he hasn't the vitality to fight back. Such epidemics as hog cholera find wormy hogs easy victims, unless they have been previously immunized by vaccination. It is likewise true that vaccinating hogs which are badly infested with worms, may also be a dangerous business. This is another reason why vaccinating should never be done by anyone but a veterinarian, who can tell whether hogs are in condition to receive the serum and virus without danger.

The impression should not be given, however, that worms particularly lead to cholera. They simply weaken the condition of the hog. And when a hog is run down, whether from worms or one of the many other causes, he is an easy prey to this ever-present menace. That is why it is always good practice to have hogs immunized against cholera; for after they have contracted the disease, it is too late.



HOW TO CURB HOG CHOLERA LOSSES

$20,000,000 Annual Toll Is Needless

—Prepared by American Foundation for Animal Health

Voluntary reduction of the hog population by corn-hog quotas is one thing, but uncontrolled death losses of several million head of swine annually from inroads of hog cholera is a needless and costly sacrifice. Like lightning, it strikes without warning when least expected. And this loss is entirely needless.

Almost thirty years ago Drs. Dorset, Niles and McBryde of the U. S. Bureau of Animal Industry made their epochal announcement of the discovery of the true cause of hog cholera, and the development of a protective serum. Shortly after this the so-called simultaneous or double method of immunizing hogs through injection of the protective serum and a small doze of virulent hog cholera blood or virus was instituted. Thanks to this discovery, hogs can now be immunized for life. Inasmuch as it is necessary to use the virulent or infective virus-blood to confer a durable, lasting immunity, all authorities have advised that the treatment be administered only by veterinarians. A farmer takes too much chance with his herd if the vaccination is not done by a competent veterinary practitioner.

In Canada hog cholera is practically non-existent, and when it does appear the Health of Animals Division of the Canadian government immediately appraises and slaughters infected herds. However, in the United States, universal vaccination of the annual pig crop near weaning time is the only practical, logical and economical method of handling hog cholera in the hog belt states.

Millions of dollars in annual loss could be avoided by seasonal vaccination of the pig crop. When farmers wait until hog cholera outbreaks are widespread, the sudden heavy demand may create shortages of needed serum and virus with consequent disastrous losses.

The only safe policy is to vaccinate while one's herd is healthy, before it is too late to save the toll which cholera always takes once it starts.

"The heigth of conceit," says a friend of ours, "is a bald-headed man putting salt in his toupee to make people think he has dandruff."

ttle cabinet of twelve by Maude and Miska has been added to our have our room library The children took ing the cupboard and eek. The books have all gued and the children reular system of taking for over night reading. lowkow is the librarian for

this week.

The health unit for both grades this week has been "Foods for Health." We made several food posters. The third grade are making "King Good Health's Parade."

A special corner of our room has been set aside for free expression in art. Here the children who have to draw find colored chalk and crayons ready for their use. Many interesting pictures of the children's own ideas have been made. We hope to add brushes soon.

Fourth graders have started a new journey to Mediterranean Lands in their geography study. We are making a booklet telling about the people and their ways of living in these lands.

The following people made a rating of 100 in spelling this week: Ruth Bell, Ewald Grosshuesch, Patricia Ann Kudje and Herbert Swartz.

Grades 1 and 2

We have been making pictures for our Eskimo booklet

The second graders made new spelling books.

About a week ago we planted some cotton seeds and now they have come up

Roger's vine has grown so much that we will have to put up more strings for it to climb on

We have been learning Valentine songs and making Valentines. One day we made Valentine men of red and white hearts

ANENT MRMS

When we get the Webster English
Abbreviated, like anklet socks,
Lookin' like each paragraph
Came right out of the old hell-box,

The brides 'll be the brds,
And the grooms the grms;
And they'll all be the children
Of the Mrms.

A weddin' won't be nothin' 't'all
To make you snarl your face—
Y' can always tack a paragraph
If y' got to fill up space:

" They'll be singin' cradle songs
In ten months, more or less,
For there'll be some bbs
All their homes to bless'"

An old maid's prayer: Now I lay me down to sleep—darn it!

ITEMS OF INTEREST FROM AVERY TOWNSHIP

Mrs. August Trampel received a telegram Friday forenoon stating that her niece, Mrs. Dan Arends of Kamrar, had passed away at the Webster City hospital that morning

Mr. and Mrs. Fred Bachman were visiting at the Jake Bachman home in Goodell Monday afternoon.

Mr and Mrs. Albert White and family were last Sunday visitors at the Mrs. Ethel White home in Goodell.

John, Elmer and Esther Trampel and Fred Carolus were Sunday evening visitors at the Peter Trampel home

There was no school in district No 2 Monday due to the blocked roads which made it impossible for the teacher to get there

Mrs Albert White and children were Thursday afternoon visitors with Mrs Charley Fritzel

Mrs Adolph Schlichting and sons, George and Walter, were Friday afternoon callers at the John Trampel home

Some of those from this vicinity that wrote the eighth grade examinations in town Thursday afternoon and Friday were Maxine Stokesbary, Zeola Carpenter, Evelyn Lewis and Clarence Trampel.

Herb Marshall is on the sick list with tonsilitis

THEY ALL ADVERTISE

A hen is not supposed to have
Much common sense or tact.
Yet every time she lays an egg
She cackles forth the fact.

The mule, the most despised of all,
Has a most persisitent way
Of letting folks know he's around
By his insistent bray

The busy little bees they buzz,
Bulls bellow and cows moo,
The watchdogs bark, the ganders quack,
And doves and pigeons coo.

The peacock spreads his tail and squawks,
Pigs squeal and robins sing,
And even serpents know enough
To hiss before they sting.

But man, the greatest masterpiece
That Nature could devise,
Will often stop and hesitate
Before he'll advertise.

Arthur C Tilney, one legged shoe repairman of Crawfordsville, Indiana, has ridden a bicycle for 45 years, pedaling a distance of 78,000 miles and has worn out 4 bikes

Despite the fact that his entire stomach has been removed, Joseph Krall of Chicago lives on in good health.

Raven and Crow Differ but Both Are Scavengers

"The raven, a vanishing bird, is generally thought of as a near relative of the crow," says a member of the Izaak Walton League, in the Detroit News "But they are not even distantly related. There is nothing these two birds have in common except that they are both scavengers.

Many times an oversized crow is mistaken for a raven, due to similarity in shape and color. The average weight of a raven is two and a half pounds, a large crow will not weigh more than one and a quarter pounds. The length of the average raven is two feet from end of bill to tip of tail; the length of a large crow is not more than one and one-half feet; wing spread of a raven is four feet and that of a crow about three feet. The eyes of a raven are more like those of an eagle, whereas the eyes of a crow are on the side of the head much like those of a robin. The bill of a raven is longer and thicker and opens directly under the eyes, unlike the bill of a crow which opens forward of the eyes Another mark of distinction is the throat feathers and tail. The raven has loosely hung, pointed feathers on the throat, while those of the crow are short, thick and soft. The raven has a round tail, whereas the crow's tail is square.

There is a marked difference in the flight of the two birds. The raven sails more than a crow and has a peculiar wing stroke. There is also a marked distinction in the voice of the two birds—the crow caws whereas the raven croaks.

The raven, like the passenger pigeon, has not been able to adapt itself to civilization as the crow has and is rapidly disappearing.

Palindrome Reads Same Backwards as Forwards

Wenever you find a word, verse, or sentence that reads the same backwards as forwards, there you have a palindrome Single-word examples of this peculiarity are "repaper" and "deified." The touch of wit in many classic palindromic sentences is unmistakable. Thus Napoleon, mourning over his exile, might well exclaim, "Able was I ere I saw Elba," and Adam could hardly have found more appropriate words to introduce himself to Eve than simply, "Madam, I'm Adam!"

A shrewd take-off of the tooth-extracting frenzy of Sir Richard Paget and old Irish pathologist, is contained in the palindrome, "Paget saw an Irish tooth sir, in a waste gap." Other long palindromes are "dog as a devil deified lived as a god" and "lewd I did live and evil did I dwell;" while every Etonian can trip out a further example in "now note Eton won."

The ancient Greeks and Romans went so far as to coin sentences with a different and sometimes more sinister meaning when interpreted backwards.—Tit-Bits Magazine.

First Balloon Ascension

On January 9, 1793, at Philadelphia, Pa, Jean Pierre Blanchard, a French aeronaut, made the first balloon ascension in the United States. Great throngs, including President Washington and other distinguished public officials, witnessed the spectacle. Blanchard remained aloft forty-five minutes and traveled fifteen miles, descending at Woodbury, N J Thus began the history of American air communication, for Blanchard carried a letter from President Washington, calling on all citizens to "receive and aid him with that humanity and good will which may render honor to their country and justice to an individual so distinguished by his efforts to establish and advance an art, in order to make it useful to mankind in general."

The Fighting Fo'c'sle

In sea stories you often read about the fo'c'sle—the forward part of the vessel under the deck where the sailors have their quarters. The name is short for forecastle, says Pearson's London Weekly, and it comes from the days when ships were built mainly for fighting. Then the forecastle was actually a castle in the fore part of the ship — a strongly built structure which commanded a view of the enemy ships. This forecastle also provided shelter for the men who did the fighting—soldiers in those days, for the sailors only worked the ship and had nothing to do with the scrapping.

Character in Pencil Points

Here are some hints on judging character from pencil points, given by a writer in Pearson's Weekly: The person who gives a pencil a sharp, stumpy point is inclined to be mean The business man gives his a long and carefully even point. The generous person makes a long, narrow, uneven point which breaks very easily. The man with artistic tastes cuts a long, irregular and finely sharpened point.

Sea Killers

The killer whale is the unchallenged lord of the seas. To him a man-eating shark would be but a gulp. It even attacks rorquals, the mightiest whales that live, and not a few fishermen have been found in a killer whale's stomach.

Strangle Hold

On a crowded car: "Madam, would you like me to get you a strap?"

"No thank you, I have one."

"Then would you mind letting go of my necktie?"—Annapolis Log

A Los Angeles court increased John Kierman's speeding fine when he angrily said, "I'll sell my car and buy a perambulator"

Lincoln—the First American President

By ELMO SCOTT WATSON

ABRAHAM LINCOLN, the first American President? Yes, he was!

Now, that doesn't mean that an attempt is being made to upset commonly accepted history nor to deny George Washington, who was "First in War, First in Peace and First in the Hearts of His Countrymen," the further honor, usually accorded him, of being the first chief executive of this republic. But the fact is that Lincoln, not Washington, was the "first American President" and for this reason:

When a child is born, its nationality is that of its parents, regardless of its birthplace. The parents of all the Presidents from Washington down to Buchanan were born before the Declaration of Independence was signed and were therefore British subjects, even though they were born in America, Lincoln's father and mother were the first parents of a President born after July 4, 1776. So he was the first chief executive, born in the United States of AMERICAN parents and therefore he was the first REAL American President.

That characterization of Lincoln, however, is not based alone on a mere technicality in regard to the nationality of his parents. More important is the fact that there was blended in him the strains of the two cultures which were such a vital force in the making of America. One was from New England and the other from Virginia.

* * *

It was just 300 years ago that the first of the Lincolns came to America. Samuel Lincoln was his name and he was born at Hingham in Norfolk, England, in 1619. In 1637 he emigrated to the Massachusetts Bay colony and lived there until his death in Hingham, Mass., in 1690. From this original immigrant seven Lincolns can be traced in direct line to the man who became President.

A Migratory Family.

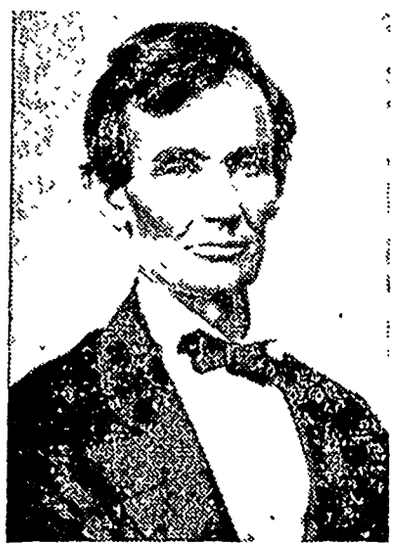
As the years passed successive generations of the Lincolns felt that urge for a westward migration which was such a striking characteristic of the pioneer stock that conquered the wilderness of North America and did so much to build in it a new nation. Not one of the seven died in the same town in which he was born and only one died in the same state. The westward faring of the Lincolns took them from Massachusetts to New Jersey to Pennsylvania, to Virginia, to Kentucky, to Indiana. They came finally to Illinois from whence they sent one of their sons back East again, there to die and in the dying, as well as in his living, to achieve immortality.

Here is the record of those seven Lincolns:

Samuel Lincoln was born in Hingham, England, in 1619 and died in Hingham, Mass., in 1690. His son Mordecai Lincoln, Sr., was born in Hingham, Mass., in 1657 and died in Scituate, Mass., in 1727. His son

Mordecai Lincoln was born in Scituate, Mass., April 24, 1686, and after a residence in New Jersey died in Berks county, Pa., in 1736. His son

John Lincoln was born in Berks county, Pa., in 1716 and



ABRAHAM LINCOLN

died in Virginia in 1788. His son

Capt. Abraham Lincoln was born in Virginia in 1744 and died in Kentucky in 1786. His son

Thomas Lincoln was born in Virginia in 1778 and died in Illinois in 1851. His son

Abraham Lincoln was born in Kentucky in 1809 and died in Washington in 1865.

So much, for the moment, for New England's contribution to the "Man of the Ages."

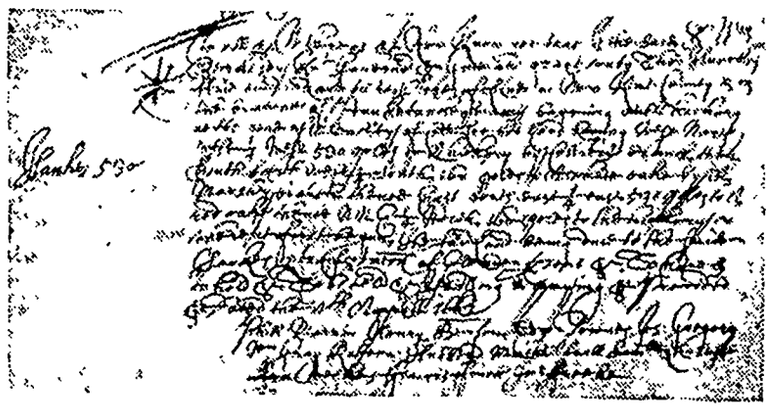
* * *

Seventeen years after the first of the Lincolns came to Massachusetts Bay colony there arrived in Virginia a little group of 27 persons. They had been deported from England as a punishment that was being inflicted upon Cromwell's men who were captured by the Royalists, now back in power. Among them was a man named Thomas Hanks whose origin is unknown except that the Hankses were Malmesbury men. In the American colony Thomas Hanks, through various purchases, became an important landowner in what is now Gloucester county.

In the Virginia land office at Richmond are preserved some of the patents granted to Hanks and they show that he held several hundred acres of land adjoining the estate of a certain Col. Richard Lee, who had established his home in Virginia 12 years before Hanks' arrival. Lee was a Royalist, one of the foremost in Virginia in support of Charles I. and one of the first to hail Charles II as the lawful sovereign of England. And now he found himself next-plantation neighbor to Thomas Hanks, the Rebel, who had been deported from England because he had ridden with the Ironheads of Oliver Cromwell!

Lincoln and Lee.

How amicably the two men lived as neighbors we have no means of knowing. But we do know that the Lees and the Hankses in the years that followed, intermarried. Two centuries later two men, who claimed Col. Richard Lee as a common ancestor, found themselves arrayed against each other in a greater civil war than their forefathers had known in



Thomas Hank's patent for 530 acres adjoining land of Colonel Lee in Virginia.

England. They were President Abraham Lincoln of the United States of America and Gen. Robert E. Lee, commander-in-chief of the armed forces of the Confederate States of America.

During those two centuries the Virginia Hankses, like the Massachusetts Lincolns, had also begun to move westward, although not traveling so far as the New Englanders. Some time after the Indian uprising of 1675 and Bacon's rebellion of 1676 Thomas Hanks disappeared from history but not until he had started the line which would come to its greatest glory in the little boy who was born in a Kentucky log cabin 128 years ago this month. That line was as follows:

Thomas Hanks. His son was

William Hanks. Born probably in Gloucester county, Virginia, about 1655. Died in Richmond county in 1704. His son was

John Hanks. Born in North Farnham parish in Richmond county, date unknown, and died in 1740. His son was

Joseph Hanks. Born in North Farnham parish, December 20, 1725. Died in Nelson county, Kentucky in 1793. His daughter was

Lucy Hanks. Born probably in 1766 in Richmond county, Virginia, and died in 1825(?). Her daughter was

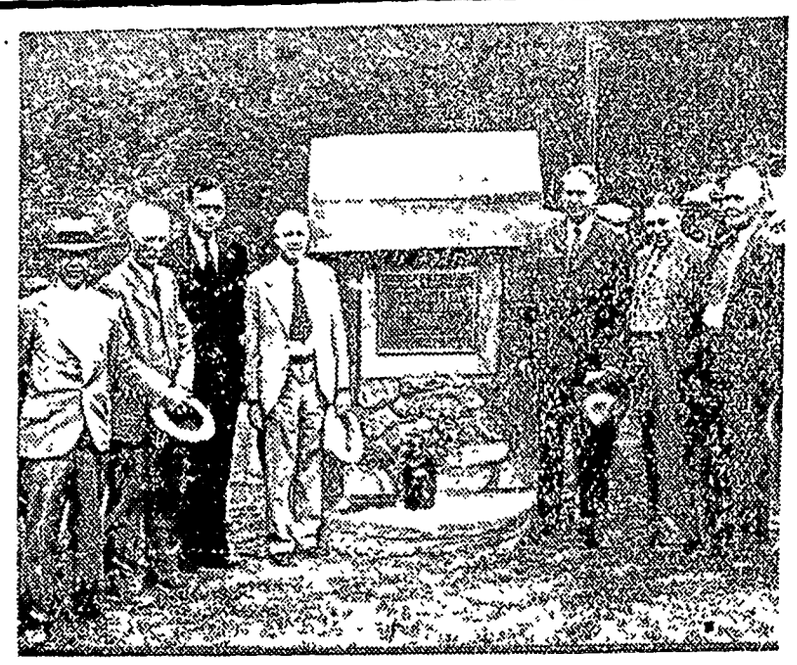
Nancy Hanks. Born in Mineral county, West Virginia in 1783. Died in Spencer county, Indiana, October 5, 1818. Her son was Abraham Lincoln.

* * *

In 1860 the America which had once hailed those frontier heroes, "Old Hickory" Jackson and "Old Tippecanoe" Harrison was ready now to hail another frontiersman — "Old Abe" Lincoln. True, as an Indian fighter, his record in the Black Hawk war wasn't "much shakes" when compared to Jackson's conquest of the Creeks and Harrison's victories over The Prophet and Tecumseh and their Shawnees.

The "Rail-Splitter" Elected.

But the ax was as potent a symbol as the rifle. Of course, it wasn't as useful to defend your cabin against the onslaughts of the "red devils." But, without it, you couldn't have built your cabin in the first place. And when



Memorial which marks the birthplace of Nancy Hanks in Mineral county, W. Va.

you used it to split rails with which to fence the land you had won from those same "red devils," it meant that this land was going to be yours to have and to hold and to hand down to your children. So they elected the "Rail - Splitter" President and who knows how much that election was due to the fact that in 1860 America was still frontier minded?

Nearly a hundred years before that time there had been another Abraham Lincoln who might have been an even greater frontier hero—if the "red devils" had spared his life. He was Capt. Abraham Lincoln, the grandfather of the "Rail-Splitter," who sold his comfortable home in the beautiful Shenandoah Valley of Virginia in 1780. Then he started west with his wife and their five children—Mordecai, aged eleven; Josiah, nine; Mary, six; Thomas, four; and Nancy, a baby in the strong arms of her mother, Bathsheba Lincoln.

Capt. Abraham Lincoln carried with him three treasury warrants each acknowledging receipt of 160 pounds in Virginia money and each calling for 400 acres of land to be located in any county in Virginia, Kentucky then being such a county. Thus it was that an Abraham Lincoln crossed over the mountains into what was then "the West" and became the first Frontiersman Lincoln.

Late in the spring he entered 400 acres of land on Floyd's Fork in what later became Jefferson county, Kentucky, and a little later 800 acres below Green River Licks in Lincoln county. Two years later an official survey was made and his patents were issued in due course of time. But he did not live long to enjoy his new domain.

A Frontier Tragedy.

One morning in May, 1786, while Capt. Abraham Lincoln was at work on his farm near Hughes Station on Floyd's Fork a skulking Indian shot him down. Sending his younger brother, Josiah, to the station for help, seventeen-year-old Mordecai sprang into the cabin and seized the long rifle which rested on two wooden pegs set in the logs over the fireplace. Then, as the hideously-painted red man darted from his ambush toward the place where little Tom Lincoln sat crying beside the body of his dead father, a shot from the long rifle, poked through the unchinked logs of the cabin by Mordecai, dropped the red raider in his tracks.

Despite this tragedy the widow, Bathsheba, continued to live on their new farm. That autumn when George Rogers Clark organized a company to fight the Indians, the settlers made contribution of arms and provisions to the extent of their ability. Highest in appraisal on the list was a fine rifle credited to "the widow Lincoln." One wonders if it was the rifle, notched with the knife of young Mordecai after he had avenged the death of the first Frontiersman, Abraham Lincoln.

Later the Widow Lincoln moved with her brood to a home on Beech Fork in that part of Nelson county which later became Washington county and there she lived until they were grown. One of them, young Tom Lincoln, was serving in the militia at the age of seventeen. In 1798 he went to work as a hired hand for an uncle who lived on the Wautauga in Tennessee and, returning from there, he stopped in Cumberland county and bought some land. In 1802 he was made a constable in that county but he evidently didn't linger there long. He moved to Hardin county and in 1803 bought a farm on Mill Creek.

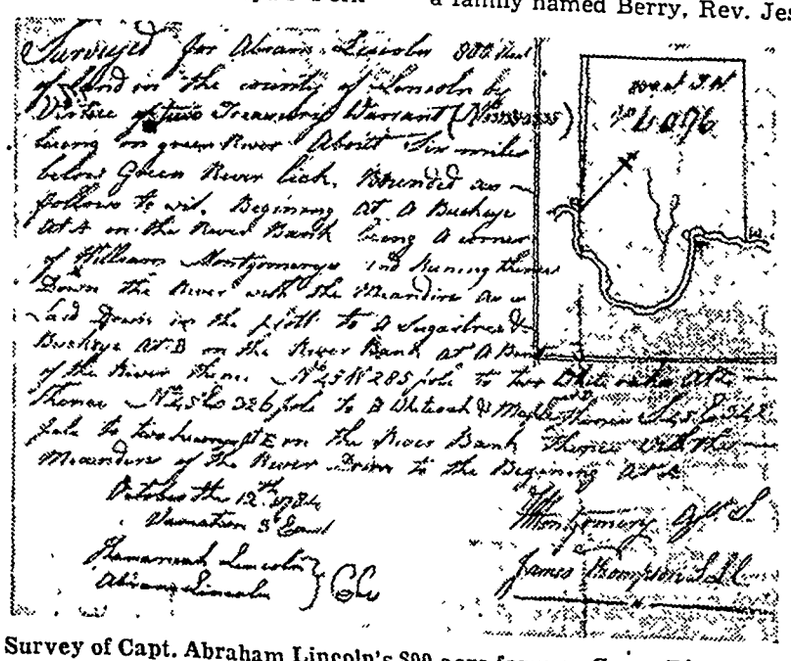
Most of the young folks of Kentucky in those days married early. But Tom Lincoln didn't seem to be in any hurry to get himself a wife and settle down. That is, he didn't until his eyes finally rested one day on a twenty-three-year-old girl who had come with her family from Hampshire county, Virginia, (later Mineral county, West Virginia) back in 1784 when she was only a year old. Nancy Hanks was her name and she was the natural daughter of Lucy Hanks. But folks also called her Nancy Sparrow because Lucy Hanks, changing from the ways of her wild girlhood, had become the faithful wife of Henry Sparrow.

A Century-Old Mystery.

Who Nancy Hanks' father was is still as much a mystery today as it was that day more than three-quarters of a century ago when Abraham Lincoln told one of his friends that his unknown grandfather was "a Virginia gentleman" from whom he had inherited whatever fine qualities he had. It was probably a mystery also when the Hankses came to Kentucky. But evidently Tom Lincoln wasn't troubled by the fact that there was a taint on the name of Nancy Hanks.

In June, 1806, he went back to Beech Fork and there on June 12, in the big double log house of a family named Berry, Rev. Jesse Head married Thomas Lincoln and Nancy Hanks. He took his bride first to Elizabethtown and there their first child was born—a girl. A year before his marriage Tom Lincoln had bought a farm near Sinking Spring in Hardin county and there he took his family next.

There on February 12, 1809, was born the boy who was given the name of his grandfather—a name which Americans have enshrined in their hearts.



Survey of Capt. Abraham Lincoln's 800-acre farm on Green River, Ky.

POULTRY

POULTRY MANURE BRINGS REVENUE

Droppings Easily Salvaged and Sold at Profit.

By J. C. Taylor, Extension Poultryman, New Jersey College of Agriculture.—WNU Service.

Poultry manure is a profitable source of revenue that can be made to increase the income of every poultryman. As an aid to the proper handling of manure, one poultryman has a large shed with a concrete floor. When the laying houses and brooder houses on the plant are cleaned, the floor manure or litter is placed in one corner of the shed and used for mixing with the moist manure from the dropping boards which are cleaned every day.

The floor manure is spread out in a flat pile about six inches deep and the fresh manure from the dropping boards is spread upon it. The pile is then shoveled over and the dropping board manure of the next day is spread over the heap.

The presence of the floor manure or litter and the frequent shoveling rapidly dries out the dropping board manure. A week's accumulation of dropping board manure mixed with the floor manure is set aside and a new pile started.

Following this method of handling and processing poultry manure, the poultryman has little difficulty in disposing of the material locally to vegetable growers. During the last few years one poultryman has been pulverizing some of this mixed manure and selling it to home owners for their gardens and lawns. The practice has been followed by others with equally good results.

Potatoes for Chickens; Fattening, Egg Producers

When unmarketable potatoes are available, they can be used to advantage for poultry feeding, either for fattening poultry or for egg production, according to a writer in Hoard's Dairyman.

Potatoes should not be regarded as a succulent feed or as a green feed even though they contain approximately 80 per cent of water. They must be cooked before feeding and simply served as a partial substitute for grain. Their value becomes apparent when the solids or dry matter content of corn and wheat is directly compared with that of potatoes with a similar moisture content.

In other words, if 70 per cent of the water is removed from potatoes, the composition of the remaining residue becomes practically the same as that of corn and wheat insofar as protein, carbohydrates, and digestible nutrients are concerned. It is because of the high water content (80 per cent) of potatoes, as compared to that of corn and wheat (about 10 per cent), that 4 to 5 pounds of potatoes are required to substitute for 1 pound of grain. Hence, a simple, convenient method for calculating the approximate feeding value of a bushel of potatoes is to divide the current price per bushel of corn or wheat by 4.5.

Care of Muscovy Ducks

The general management of Muscovy ducks is the same as that of other breeds. In a few points there is a slight difference. They are more of a meat eating variety, and the addition of 5 per cent beef meal to their ration will take care of that part of the management. They will breed in trios or one male to four females, just the same as other birds. They require houses which are considerably warmer than do ordinary ducks, because they are a tropical breed and will not stand very cold weather.

Poultry Cullings

In Michigan eggs are sold by the pound.

* * *

It is a severe drain on a bird to go through the molt.

* * *

Hens that grow broody often are likely candidates for culling.

* * *

Dry mash made of mixed grains can be kept before the birds in hoppers all the time profitably.

* * *

Bantams, being small, require but minimum space. A 4 by 12 foot inclosure six feet high will be found excellent.

* * *

Barley alone may not be too heating but has not the proper qualities for a balanced ration. Use some wheat and oats, as well as the barley; also green feed and corn.

* * *

Pullets need to be graded and put into different pens according to their maturity.

* * *

The whites of fresh eggs are thick enough to diffuse the light so the yolks to not appear so distinctly in candling.

* * *

Mites in chicken houses may be held in check by painting the roosts, dropping boards and walls—after they have been thoroughly cleaned with crude oil, waste crankcase oil or a concentrated disinfectant.

UNCOMMON AMERICANS

By Elmo Scott Watson

© Western Newspaper Union

"Mother of Thanksgiving"

OF COURSE, we all know we owe the observance of Thanksgiving to the Pilgrim forefathers But if it hadn't been for the persistence of a woman editor the chances are that it would still be only a New England festival instead of a nationwide holiday celebrated in all states on the last Thursday in November. Sara Josepha Hale was her name and she was the editor of Godey's Lady's Book, the most popular woman's magazine of the Nineteenth century

She was born in New Hampshire in 1788, and, like all New Englanders, the celebration of Thanksgiving, even though its observance was not a regular event, was very dear to her As early as 1827 she began advocating that "Thanksgiving, like the Fourth of July, should be considered a national festival and observed by all our people." But it was not until 1846 that she began her campaign through the columns of Godey's Lady's Book, of which she became editor in 1828.

Early each spring she began writing letters to governors of all states and territories asking their assistance in making the last Thursday in November, which had been Washington's choice for the firs Thanksgiving Day, set aside by Presidential proclamation. By 1849 most of these commonwealths were keeping individual festivals but no attempt was made to have the date uniform. So Mrs Hale started on the Presidents.

She wrote to Fillmore, Pierce and Buchanan again and again. But all of them ignored her, for they felt that such "feminine meddling in public affairs" should be frowned upon. However, in 1863, as the result of a letter which she wrote to President Lincoln, he issued the first national Thanksgiving day proclamation since Washington's day. Mrs. Hale had won her battle after 17 years' effort. With the precedent thus established other Presidents. as well as governors of states, have never deviated from the custom which Lincoln thus established.

Being thus the "Mother of Thanksgiving" was not, however, Mrs. Hale's only claim to distinction. She was the author of that famous poem, "Mary Had a Little Lamb"; she was the first to advocate women teachers in public schools; she started the first day nursery; she founded the first society for the advancement of women's wages, and her demands that housekeeping be given the dignity of a profession put the term "domestic science" in our language.

Prisoner of War

IN THE year 1758 there was born to an English family, then living in Ireland, a son who was to bear the name of John Whistler. Before he became of age young John ran away from home and enlisted in the British army In 1777 he was sent to America with troops who were to serve under General Burgoyne and when "Gentleman Johnny's" expedition ended in disaster at Saratoga, young John Whistler was a prisoner of war.

Before the end of the Revolution he was sent back to England as an exchanged prisoner and soon afterwards he was discharged from the army. Then he fell in love with the daughter of one of his father's friends, eloped with her, came to America a second time and settled down at Hagerstown, Md. But he could not be content with civilian life for long. So in 1791 this soldier who had worn the scarlet uniform of Old England put on the nondescript uniform of a lieutenant adjutant in the levies which made up a part of the army of the new republic.

From that time on he served continuously on the Northwestern frontier under St. Clair, Wayne and the others who were campaigning against the hostile Indians. By 1797 he had won a captaincy and in 1803 he was stationed at Detroit. Then orders were given to build a fort at the foot of Lake Michigan and establish a garrison there with Whistler as commandant. Accordingly he built the post which was named Fort Dearborn and thus he became the "father of Chicago."

For nine years Whistler ruled at Fort Dearborn and then he was ordered back to Detroit. At the outbreak of the War of 1812 he was serving there on the staff of General Hull and when that flustered officer, without attempting resistance, surrendered his post to the British army which swooped down upon him, Whistler again became a prisoner of war.

So his was the unique distinction of having been a British officer who surrendered to a victorious American army and then an American officer who surrendered to a victorious British army. That alone would make him an "uncommon American" even if he hadn't been the "Father of Chicago" and the man whose grandson became one of the greatest of all American artists —James Abbott McNeill Whistler.

Delight a Child With These

Pattern 5247

This sturdy pair, dressed in their "Sunday best," are sure to walk right into the heart of some wee tot. You'll have fun, too, making both the dolls and their bright finery, 'specially if your scrap bag furnishes you with gay odds and ends. Hair and features are done with a few simple embroidery stitches. Grand indeed for gifts are Sambo of the checkered overalls, and Mammy, in apron and kerchief. In pattern 5247 you will find a transfer pattern for a doll about 14 inches high; patterns for making the clothes; directions for making doll and clothes; material requirements.

To obtain this pattern send 15 cents in stamps or coins (coins preferred) to The Sewing Circle Household Arts Dept., 259 W. Fourteenth St., New York, N. Y.

How Brazil Got Name

Long before the "official" discovery of the new world, as far back as the Thirteenth century the existence of Brazil was already known to traffickers and merchants from a legend current among them. The report was that far away was a mysterious country covered by immense forests where a tinctorial tree grew in abundance. The dye was of a fiery hue, much like a brasa (live ember). Hence the name of brasil, given first to the wood and afterwards to the country where it grew.

O. W. Holmes Said:

I find the great thing in this world is not so much where we stand, as in what direction we are moving. To reach the port of heaven, we must sail sometimes with the wind and sometimes against it; but we must sail and not drift, nor lie at anchor.

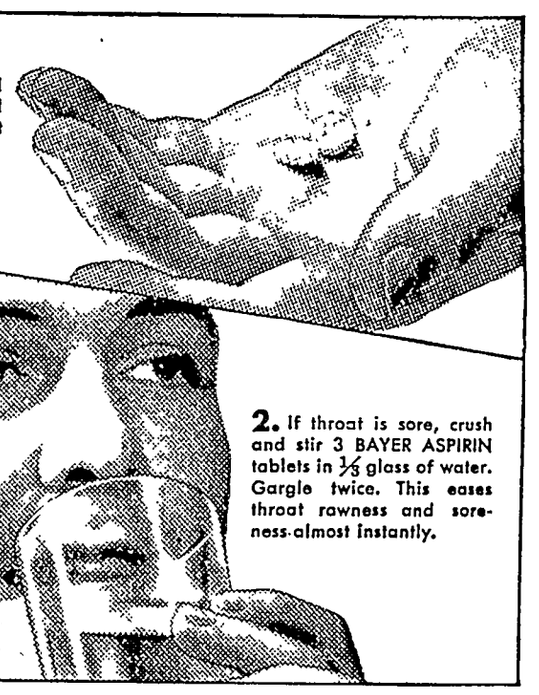
Beware Coughs from common colds That Hang On

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid nature to soothe and heal the inflamed membranes as the germ-laden phlegm is loosened and expelled.

Even if other remedies have failed, don't be discouraged, your druggist is authorized to guarantee Creomulsion and to refund your money if you are not satisfied with results from the very first bottle. Get Creomulsion right now. (Adv.)

How to Ease a Cold Quickly

1. Take 2 BAYER ASPIRIN tablets and drink a full glass of water. Repeat treatment in 2 hours.



2. If throat is sore, crush and stir 3 BAYER ASPIRIN tablets in ½ glass of water. Gargle twice. This eases throat rawness and soreness almost instantly.

Get Quick-Acting, Quick-Dissolving Bayer Aspirin. Take 2 Tablets

The modern way to ease a cold is this: Two Bayer Aspirin tablets the moment you feel a cold coming on. Then repeat, if necessary, according to instructions in the box.

At the same time, if you have a sore throat, crush and dissolve three BAYER tablets in one-third glass of water. And gargle with this mixture twice.

The Bayer Aspirin you take internally will act to combat the fever and pains which usually accompany colds. The gargle will provide almost instant relief from rawness and pain, acting like a local anesthetic on the irritated membrane of your throat.

Try this way. Your doctor, we know, will endorse it. For it is a quick, effective means of combating a cold. Ask for Bayer Aspirin by the full name at your druggist's — not for "aspirin" alone.

Dr and Mrs. A H. Dulmes entertained at a six-thirty o'clock dinner Sunday evening Mr and Mrs P M Wilson, C. G. Waterman and family and R. A. Jorgenson and family.

The Times is glad to report that Ed. Jacobs is making a good recovery from his recent operation. However, Ed. will be forced to remain in the house a few more weeks. He is up and around the house every day now.

Mr and Mrs. J A Chambers are enjoying their visit in the sunny south. They are visiting Mrs. Chambers' aunt, Mrs M J Wells, and her uncle, J D Tabb, at Shawnee, Oklahoma Mr and Mrs. Chambers expect to return home through the flood district.

Dr. and Mrs. Elmer Larsen of Centerville, Iowa, stopped in Klemme last Thursday They were enroute from Minnesota where Dr. Larsen was called to attend his father, Lawrence Larsen, a one time resident of Klemme, who was sick with pneumonia. They encountered a sample of our snow drifts on their way to the E. J. Arnold home and were compelled to return to town.

One great philosopher has said that "the deepest urge in human nature is to be important. It's a knawing and unfaltering hunger" It lead Lincoln to study law, Dickens to write his immortal novels. We see proof of this philosopher's statement in our daily contact with men.

Eastern Star School Of Instruction Held Tuesday

The Eastern Star School of instruction held Tuesday morning under the able direction of Mrs. Laura Lenz of Mason City, was very much enjoyed by all present. An afternoon luncheon was enjoyed at the Garner Cafe. At six thirty dinner was served in the dining room and at eight o'clock initiation work was put on by the officers. The work was very attractive and much enjoyed, as the officers were dressed in formal white dresses.

R.N.A. Lodge

The R.N.A. Lodge meets on Wednesday now instead of Friday as they previously did, so today they will hold their regular monthly meeting in the hall at the bank building. Mrs. C. G Waterman and Mrs. Sumner Trumbell are the hostesses for today.

Klemme To Play At Lake Meet

SHAMROCKS WILL PLAY IN SECTIONAL AT CLEAR LAKE

First Round Of State Basket Ball Tournament March 4th.

DES MOINES—Eight hundred and fifty two teams, the largest number in history, will compete in the Iowa high school basket ball tournament starting March 4th.

George A. Brown, executive secretary of the board in control of high school athletics announced the 64 sectional tournament sites Wednesday and assigned the 852 teams to the various meets. Eight tournaments were awarded to each of the eight Iowa districts. There were 836 teams in the 1936 tournament.

Following are the sectional sites, and the assigned teams, that will be of most interest to local fans

CLEAR LAKE

Class A—Britt, Clear Lake, Forest City, Garner, Mason City, Nora Springs, Thompson Class B—Crystal Lake, Hanlontown, Klemme, Leland, Swaledale, Ventura.

DOWS

Class A—Belmond, Clarion, Dows, Eagle Grove, Class B—Alexander, Galt, Goodell, Latimer, Meservey, Popejoy, Rowan, Williams.

Teams in Hancock county that are not assigned to the above sites are Kanawha and Corwith, who go to Renwick, and Woden, who goes to Burt. Hayfield is not entered

Loses Car Radio

Henry Smid had a rather expensive trip to the Surf last Friday evening He parked his car near the Surf, locked the door and forgot all about it until time to go home, at which time he unlocked the door and found that the lining was torn loose from the ceiling of his car Upon closer inspection he found that some clever hoodlum had gotten in to his car, torn out the radio, locked the car and beat it with his loot.. Henry reported the matter to the police and found that there have been several such cases recently. So if you are going to the Surf you will do better to hitch hike.

3,726 ESCAPE PENALTY

Number of cars licensed in Hancock county by the time the deadline was reached February 1 bested the record of Feb 1, 1936, by approximtely 200, Co. Treasurer Roy L. McMillin said Tuesday night.

On February 1 this year 3,334 cars had been registered besides 392 trucks, whereas at the same time last year approximately 3,100 had been registered.

"A $1 penalty attaches to the initial cost of the license each month after Feb. 1," the treasurer explained.

During January only 30 new cars and five new trucks were registered in Hancock county.

Goodell Cagers Win The Seven Eagles Conference

WIN OVER KANAWHA BULLDOGS CLINCHES CONFERENCE CLAIMS

Shamrocks Have Chance To Claim Second Plaie

The Goodell High School basket ball team is again Seven Eagles Conference Champions by virtue of their win over Kanawha Friday evening on the Kanawha floor where they ecked out a 13 to 12 win over the Bulldogs. Hofer was high man for Goodell with 6 points while Duke Yeakel led the Bulldogs with 4 points.

Goodell has one more conference game, that with Klemme on the Goodell hardwood this week Friday evening. The outcome of this game will not alter Goodell's claim to the championship. Should they suffer a loss to the Shamrocks they would still be in the lead by one game. The Shamrocks have 2 losses and Kanawha now has 3. A win at Goodell would put the Shamrocks in second place and the Bulldogs in third place. Likewise, another Goodell win would automatically tie the Shamrocks and Bulldogs for second place with three loses each. However, the Shamrocks, who are now roosting in second place, are one game behind, as they still have a game to play with Hayfield to complete the schedule. A loss to Hayfield is not likely and this game will be played next week.

Crystal Lake Wins

In a Seven Eagles Conference game Friday night Crystal Lake defeated Woden 24 to 18. Jilek of the Lakers was high with 10 points, while Smith led Woden with 7 points.

Klemme Routs Hayfield

The Shamrocks went on a scoring spree Friday night to down Hayfield 75 to 18, the worst licking ever administered a conference team.

Gomes This Week

The most important Seven Eagles Conference game to be played this week will see the Shamrocks and Goodell in action on the Goodell floor. The game is important to both teams, and much is at stake. The Shamrocks will try to upset Goodell's winning streak and will battle for second place in the Conference, while Goodell will try to maintain a perfect record by defeating the Shamrocks. Also, Goodell has never been defeated by any team on their home floor and the Shamrocks are out to try to be the first team to defeat the smooth working Goodell team on their own floor.

Another game which might prove a thriller will be the game at Woden when the Kanawha Bulldogs invade that court Woden has shown considerable strength in several games and may upset the hope and defeat the strong Kanawha team.

Crystal Lake goes to Hayfield and this game may be evenly matched, with Crystal Lake favored to win.

Friday night's games will complete the Conference schedule for this year.

SEVEN EAGLES STANDINGS

	Won	Lost	Ptc.
Goodell	9	0	1.000
Klemme	6	2	.750
Kanawha	6	3	.666
Woden	3	6	.333
Crystal Lake	2	7	.222
Hayfield	0	8	.000

After thieves stole six of the chickens in the henhouse of Justice of the Peace, W. T Connolly of Weston, W. Va., he put a lock on the door. Next morning the rest of the chickens were missing—also the lock.

FORMER GOODELL FAMILY SERIOUSLY INJURED IN AUTO ACCIDENT

Mr. and Mrs. Joe Kissinger and ten year old son, Kay, were seriously injured in an automobile accident near Estherville last Thursday night when their car was struck head-on by a car driven by Louis Garling, 65, janitor of the Superior school of which Mr Kissinger is superintendent. Garling was killed instantly.

Mr. Kissinger received a jaw fracture and cuts and bruises, Mrs. Kissinger had a fractured jaw, skull injury and their son a broken arm Miss Joyce Tooker and Leo Goerders, teachers, were injured.

Mrs Kissinger's condition was considered very serious, but reports are that she is much better

325 AREAS FOR GAME IN IOWA

$69,156 Is Expended On Game Development In Past Two Years.

DES MOINES — A total of $69,156.70 was expended on game development during the last two years, according to a report of the Iowa conservation commission.

The report showed the commission now has 325 game management areas in 80 counties. These areas cover 812,562 acres and include 5,182 farms.

Under the present game management plan, the report explained, individual farmers are established as game management acres wherever the landowner appears suffeciently interested in perpetating wildlife as well as providing sport.

Many Areas Improved

Many of the areas have been improved through efforts of local sportsmen interested in improving their own sport the report said

After application for establishment of a game refuge has been approved by the game department, the area is maped and a survey is made of cover and food conditions and of the game population.

Wherever necesary, recommendations are made for improvement of the environment so that wildlife can propagate under natural conditions, the report said

Signed Agreement Required

If the landowner, sportsmen or sportsmen's group agree to make necesary improvements a signed agreement is required by the commission which provides that they will carry out game management practices recommended for the area.

They also must agree to allow hunting on the area whenever there is a surplus of game available

The conservation commission agrees that when the recommended improvements have been carried out, it will post the area with signs, affording the landowner aditional protection against unauthorized hunting.

Will Operate Station

GARNER—Earl Benson of Clarion has leased the Royal 400 service station from Mrs. E H Arnold on highway 18. He and Mrs. Benson will move here this week. He plans to reopen the station within a few days.

COUPLES ISSUED LICENSES TO WED

GARNER—The first marriage licenses issued during the month went to Harold Rockow, 24, Garner, and Norma Wille, 22, Klemme, and to Harold Evans, 28, and Cora Mae Masterson, 23, both of Corwith.

FORMER RESIDENT DIED AT HIS HOME IN NEBRASKA

Below is the obituary of Mr. Lewis Ell, who passed away at his home in Panama, Nebraska, where he lived for thirty years to the day of his death He spent his childhood days in Ell township which was named after hs grandfather, Sebastian Ell. The deceased is the nephew of Phillip Ell of Mason City Ia., George Ell, of Belmond, Ia and Mrs Harry Smith and Mrs. G. W. Kluckhohn, both of Klemme, Ia and has a host of cousins in various towns He was preceded in death by his sister, Mrs Mattie Jacobsen on May 16, 1936

Lewis S. Ell

Lewis Sebastian Ell, son of John C and Katherine Ell, was born at Rochelle, Ill Nov 27, 1867.

In 1870 he moved with his parents to Hancock County, Iowa where he lived for eight years. He came to Lincoln, Nebraska in 1878 and two years later to Bennet. Here he met and married Mary M Brant. To this uinon were born two sons, Earnest P and Wm V., and one daughter, Josephine, who with his widow mourn his death which occured at his home in Panama Sunday evening Febr. 7 at the age of 69 years 2 months and 11 days after a lingering illness of cancer He had lived at the home where he died since Febr. 7, 1907

Besides his immediate relatives he is survived by one granddaughter and four grandsons, a brother, John P Ell of Chicago, a half brother, Ted Graw of Seward, Ill. A half sister, Mrs Frances Selzer, of Los Angeles, Calif, four nephews and two nieces and a host of other relatives and friends.

He was a member of the U B. Church af Panama and M W A. lodge, remaining a faithful member to the end

Funeral services were held at the U B Church on Tuesday afternoon, Febr. 9, 1937 Rev. Samuel Waring, of Bennet and Rev. Kelso Angle of Panama officiated. Burial was in the Bennet cemetery beside his father, who passed away 21 years ago

"A loved one has finished his cause whose place cannot be filled in this home."

CALLING ALL CARS!

As Lee Klotzbach was working around in Jacobs store one day last week he was shocked to hear a radio program interupted and a message about as follows pour forth from the luod speaker: "Calling all police, calling all patrolmen and officers in Hancock county. Garage held up and robbed at Ventura. Lone bandit thought to be Lee Klotzbach of Klemme. Calling all cars be on the lookout for bandit driving Ford pick-up."

The radio message had hardly finished when Marshall Geo. Buseman walken into the hardware store and the expression on Lee's would indicate that he thought the jig was up.

But it turned out to be a joke The boys at the store had hooked a micraphone to the radio set and ran the wire into the basement, where they simply had to push a button to cutout the radio program and "broadcast" the fake message just to get Lee's goat

Lee has been laying awake nights thinking up sordid schemes and anything is liable to happen to Melvin Neuberger and Cecil Bridges, the culprits "on the air"

Shortly after he had been reprimanded by his mother because his hands were dirty, Eugene Hogsten, 11, of Denver, hanged himself from a towel rack in the bathrom of his home

Klemme Reformed Church Was Scene Of Quiet Wedding

LE ROY JOHNSON AND MISS EMMA GOLL WERE MARRIED SUNDAY P. M.

Young Couple Will Reside On Goll Farm Southeast of Klemme

Sunday afternon, February 12th, at 3:30 o'clock Miss Emma Goll became the Bride of Mr Le Roy Johnson at a marriage ceremony performed at the Klemme Reformed Church, with Rev. Calvin Grosshuesch officiating

The couple were attended at the altar by Mr. and Mrs. Roger Schlawin. The Bride wore a floor length dress of Royal Blue chiffon vlevet with a shoulder corsage of pink and white roses. The Bridesmaid. Mrs. Schlawin, wore a floor length dress of black rough crepe trimmed with chiffon velvet with a shoulder corsage of pink and white carnations. The Groom and Best Man wore the conventional dark blue

A three course wedding dinner was served in the balcony of the Garner Cafe at six o'clock.

After a short weding trip the couple will return to Klemme and after the first of March they will be at home to their friends on the Goll farm southeast of Klemme

The Bride is the daughter of G A Goll. After graduating from the Klemme High School she attended State Teachers College at Cedar Falls and has taught for 4½ years in Hancock County schools. She is a member of the Klemme Reformed Church and has always taken an active part in church work. She has taught in the Bible School and is active in both Sunday School and Young Peoples Bible Class.

Since coming to this community some six years ago Mr. Johnson has made many friends. He is the son of Mr. and Mrs. A. C. Johnson and was born at Iowa Falls. Both of his parents have been dead for some time. When a child he was baptized in the Lutheran faith. He is a member of both the Reformed Church and Sunday School. For the past few years he has been employed by Walter Rosendahl as a truck driver However, he has always been interested in farming, and so he and his bride will take up that line of work.

The Times joins with the many friends of this fine couple in extending best wishes and congratulations.

LOCAL TELEPHONE OPERATORS GAVE FINE SERVICE DURING LAST STORM

Mr. and Mrs. Carl Anderson deserve to be complimented for the extra service they rendered Saturday evening during the severe blizzard The Seniors of the Klemme High School had gone to Mason City that day to have pictures taken, and the sudden storm which came up made it difficult for them to get home Mr. and Mrs. Anderson both checked up as soon as a carload of students came in and then telephoned their parents to tell them the children were alright. They continued to gather information and notify the parents until all had been accounted for.

The anxious parents appreciated this extra service that Mr. and Mrs. Anderson gave them.

REFORMED LADIES AID WILL MEET WEDNESDAY FEBR. 24th

The Ladies Aid of the Klemme Reformed Church will meet Wednesday afternoon, February 24th with Mrs Fred Barz and Mrs. Carl Anderson as hostesses.

METHODIST LADIES AID

The Ladies Aid of the Methodist Church will meet this week Thursday at the church parlors. A quilt will be on the frame and members are asked to come at one o'clock.

Shamrocks Step Ahead To Second In Conference

SHAMROCKS WILL PLAY LELAND IN SECTIONAL TOURNAMENT

In the sectional tournament which will begin March 4th, Klemme Shamrocks will play Leland in th first round of play. Following is a schedule of pairings made for the Class B teams who will meet at Clear Lake

Upper Bracket:
Crystal Lake vs. Ventura
Hayfield vs Rock Falls

Lower Bracket:
Hanlontown vs. Swaledale
Klemme vs. Leland.

In the Class A schedule the following teams will meet:

Upper Bracket:
Thompson vs Bye
Mason City vs Clear Lake

Lower Bracket:
Britt vs Nora Springs
Forest City vs Garner

HELLO, FOLKS

Mr. and Mrs. Harvey Barz are the parents of a nine and three quarter pound baby boy who arrived at their home Thursday, Feb 11th They now have a family of two boys.

Rev and Mrs. Harvey Nelson, of Ledyard, are the parents of a fine baby boy Rev Nelson is the youngest son of Mr and Mrs Tom Nelson of near Klemme.

A fine baby girl was born to Mr and Mrs. Truels Steffens Sunday night.

A fine good looking baby boy, weight six pounds, who was born on January 21st, came to make his home with Mr. and Mrs Axel Hofgren at Evanston, Ill. The new arrival has been named Robert Axel, but we presume his dad will call him "Bobby" Mrs Hofgren is a daughter of Mrs. Mary Waterman and is a sister of C. G Waterman

TITONKA MAN KICKED BY COW

TITONKA—Floyd Elliot was badly injured Tuesday while milking, when a cow kicked him breaking his right leg just above the knee. Mr. Elliot called for help but it was more than hour before anyone reached him

He failed to come in for breakfast and his wife went outside to call him When she got out of doors she heard him shouting The Elliots have no telephone and she could not bring him in herself, so was forced to walk a half a mile for neighbors, who called a doctor and then went to the farm to help bring Mr Elliot in

Altogether, he was lying in the cold for 1½ hours before he was brought in It will be necessary to x-rav the injury, but his condition is such that pneumonia is feared

More Money Sent In For Flood Relief Here

Mrs. George Lawhorn, local chairman of the Red Cross, reports that she sent anothe check Saturday for $34 50 for flood relief. The total amount sent in from Klemme now totals $263.42.

Funds are still needed and anv who have not contributed but who would like to so may send or leave their donation with Mrs. Lawhorn, the First National Bnak or the Klemme Times

No woman truly happy without three men—perfect husband, perfect sweetheart, perfect provider—explains beautiful model and dancer in The AMERICAN WEEKLY, the magazine distributed with Next SUNDAY'S CHICAGO HERALD AND EXAMINER.

SHAMROCKS ROLL OVER HAYFIELD FIVE 75 TO 18

Pile Up Largest Victory Margin This Year

(By K.H.S. Sports Editor)

Piling up the greatest victory margin of the year and setting a new floor rdecord for individual scoring, the Klemme Shamrocks ran rough shod over Hayfield High here Friday night to beat them by a score if 75 to 18 Except for a feeble lead acquired by the visitors in the first minute of play, the outcome was never in doubt. By the end of the first quarter, the Shamrocks had piled up a 22 to 5 margin, and the second team ran the count to 39 to 5 at half time. The last half of the game was a rout. Hayfield got only three points and made so many fouls trying to stop the local sharpshooters that they badly weakened their team. Coach Kingery generously inserted second team players into the game and even allowed one of the Hayfield men who had been fouled out to remain in the game, but the Klemme scoring rampage continued steadily to the end of the game.

Breaks Floor Record

A new scoring record for the Klemme floor was set by Buster Jorgenson, who dropped in fifteen field goals and three free throws in the three quarters that he was in the game Grosshuesch, Kaduce and Paul also scored heavily; and Schuldt, Keeper and Trampel were not far behind them. For the visitors, Blank led the attack with 10 points.

Grade Team Defeats Hayfield Grades

In the curtain raiser, Klemme's grade team trounced Hayfield bv a score of 32 to 11. Allen Barz with 12 points, and Duane Trees with 8, led the scoring for Klemme Nolda led the visitor's attack with 10 The grade second team was good for a lot of comedy and a total of two points when they entered the fray in the second quarter and again in the fourth.

Following is the box score of the first team game.

KLEMME SHAMROCKS 75

PLAYER	FG	FT	F
Jorgenson, f.	15	3	2
Lemke, f.	0	0	0
Grosshuesch, f.	5	2	1

STORY OF THE FLOOD

The Times will publish next week an account of the flood written by Mr and Mrs. Lyle Burr of Louisville, Kentucky The article was received just as the Times was going to press, so this interesting letter will be printed next week.

After he testified that his wife had not been sober for two years, Robert E. Cranston of Buffalo was granted a didvorce.

A prospective pridegroom of McAllen, Tex., unable to pay Justice G. C. Sewell his fee in a lump sum, turned over $1 a week until the whole amount had been paid.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington.—I have said in these columns many times that politics is a business. If anybody desires proof of that statement I think I am able now to offer the best possible evidence of the truth of that statement.

Politics Is Business

Lately, W. Forbes Morgan, treasurer of the Democratic national committee, has demonstrated beyond the shadow of a doubt what politics as a business actually means. He did so in the recent announcement that the Democratic national committee would seek to build up a "war chest" of $10,000,000 that the vast New Deal party machinery can go on at top speed; that the momentum gained by the successful Presidential campaign of 1936 can be maintained and that the party can continue to function as a cohesive unit through which millions of voters may speak.

It appears that Mr. Morgan will not succeed in getting anything like $10,000,000 together but it is very significant that he is thinking in terms so large as those mentioned in his announcement. It means simply that the present control of the New Deal party is determined to carry out to the nth degree the theory of its chairman, James A. Farley, only recently reappointed as postmaster general of the United States.

Mr. Farley plays politics in exactly the same manner that he would engage in a business venture. He takes chances when the stakes are high, he knows his men, his workers, and moreover, he knows how to get the best results out of the material he has. His operations are not unlike the functions of a sales manager of a great concern—he sells what he has to the voters and if any salesman fails to function, Mr. Farley looks for replacements.

We might illustrate the Farley methods further by reviewing some of the methods he employed in the last four years. For, when it comes to raising money, the Democratic national committee, under Chairman Farley, is both businesslike and versatile. It will be recalled how whenever the pretext arose, the Democratic national committee sponsored such things as dinners to which the faithful partisans were asked to buy tickets, usually high priced tickets, for an ordinary banquet. It will be recalled also how elaborate programs of the Democratic national convention were sold by the hundreds of thousands; how those programs were loaded to the gunwhales with advertising of concerns that could not well refuse to buy advertising space; how victory dinners were given, and how finally the inaugural ceremony when Mr. Roosevelt took office was turned into a gigantic political rally that spread itself into every hotel in Washington that had space for great dinners and dances. These things are but a few which demonstrated the Farley versatility but they prove to my mind that if the Democratic national committee sets out to build up a real "war chest," it will accomplish exactly its objective.

The committee set-up is the most pretentious yet attempted by any political organization. It has a large and exceedingly efficient staff of trained men and women and it runs like the well oiled machine that it is.

It will cost money to keep that machine running at high speed, but Mr. Farley recognizes how elections are won. His philosophy is that the early bird catches the worm and so, although there is not another election for two years, the Democratic national committee is making ready for that election campaign right now. Unless the wise political students around Washington are badly mistaken, Mr. Farley will know pretty well when the congressional and senatorial candidates take to the stump early in 1938 just what the last two years of the Roosevelt administration will be like. It goes without saying that he will be prepared for them.

* * *

In contrast to the circumstances I have just related, it must be disheartening to witness the feeble, almost futile, efforts that are shown around Republican headquarters. Of course, old time politicians always say that a winning horse can be financed, never a loser. John D. M. Hamilton, the Republican national chairman, rode a losing horse. He came out of the race saddled with a gigantic deficit. Deficits for losing political parties are not as easily financed as United States Treasury deficits these days and so Mr. Hamilton is having his troubles in that direction as well as finding any enthusiasm among Republican party workers.

G. O. P. Contrast

But that does not excuse the Republican national committee nor Mr. Hamilton. After all, it is to be remembered that approximately 18,000,000 voters cast their ballots for the Republican presidential nominee, Governor Landon of Kansas. That is not a small number, any way you examine it. It is a powerful segment of the American population but it is powerful only to the extent that its leadership develops enthusiasm for the fight and capacity to take it on the chin when victory goes the other way.

Among the New Dealers who can be classified as sound politicians, there is considerable regret at the failure of the Republican leadership to get going. President Roosevelt, himself, would like to see more opposition because it would make his task much easier and would prevent some of the unsound legislation from seeping through congress on account of a lack of opposition. Furthermore, if there were more Republican fight, there would be less chance of splits in the Democratic ranks in congress. Democratic leaders entertain a very real fear of this possibility.

* * *

From among the corps of political writers in Washington, I hear much criticism of the Republicans who are variously described as being "dead on their feet." They are certainly doing less than nothing. They have allowed the Democratic national committee to carry the ball on every play; they have offered no publicity by way of criticism of New Deal programs and they have developed no plans at all for reviving the Republican organization or restoring life to the party workers.

Criticize Republicans

I am not saying that Mr. Hamilton is wholly to blame for this condition. He must accept responsibility, however, because he is the titular head of the organization. It would seem, therefore, that unless Mr. Hamilton awakens and shows some fight, there will be fewer Republicans in the house or senate after the 1938 elections than there are now. The national chairman of the Republicans, according to all discussion that I hear, sooner or later will have to start cooking or depart from the kitchen. Otherwise, the 18,000,000 voters which the Republican party has as a nucleus upon which to build will become so badly disorganized, so disheartened and discouraged, that it will be impossible to reunite them.

Part of the Republicans' difficulties are traceable directly to Capitol Hill. I simply cannot understand why Senator McNary of Oregon, continues to serve as Republican leader in the senate when, in the opinion of most observers, he has failed to justify his title in any way. It will be recalled that he did nothing in behalf of Governor Landon's candidacy against Mr. Roosevelt. Nor has he shown either the capacity or the desire to carry on as an opposition leader should carry on since the new congress convened.

Again, this is not the fault of Chairman Hamilton. Frankly, I think it is the fault of the few Republicans in the senate. If they had any fight in them, or any faith in their party label, they would insist upon a militant leadership on their side of the senate chamber, small as their number is.

* * *

There are much greater signs of fight among the house Republicans. They are trying to make themselves heard, but the preponderance of Democratic strength in the house coupled with the gag rules which have been applied without stint or limit by the Democratic majority, precludes Republican leader Snell and his associates from doing very much for their party in the house. Where senators have the privilege of unlimited debate, House members are allotted time and lately the time allotted to the Republicans has been infinitesimal. That, of course, is one of the spoils of victory and the Democrats cannot be blamed for asserting their power.

Signs of Fight

But the point of it all is that while Democratic Chairman Farley has his team on its toes, full of fight, ready to go, Chairman Hamilton has not even been vocal personally, much less has he been able to stir up fight among his associates. It is a situation from which most anything may emerge. Mr. Hamilton sought and was given a vote of confidence by his own national committee shortly after the election. He cannot say now that his hands are tied insofar as the authority of leadership is concerned. So, it is made to appear that unless the present leaders of the Republicans really enter the arena, unless they show their ability to carry the fight to the enemy, it seems rather likely that new leaders will come from the ranks of the Republicans and the present group will become has-beens.

When Church Is Flooded Home Takes Its Place

His church filled with water, Father John Dillon of St. Stroz Catholic church of Cincinnati holds services in the home of Edgar Pharo. As many of his parishioners who were able attended the services.

Flood Threatened Live Stock Saved by Coast Guard

Members of the U. S. Coast Guard shown evacuating live stock and farm residents near Cairo, Ill. Here Coast Guard men are shown taking possession of cows found on a railroad right of way which is higher than he ground from which the flood had driven them.

HIGH AND DRY

High and dry is Emil Dallalio as he perches atop a light pole in a flooded Cincinnati street. The water was 20 feet deep. As the Ohio river receded leaving death and desolation in its wake, refugees began returning to their homes.

"OLD MAN RIVER'S" FOE

Secretary of War Harry Woodring, under whose orders army engineers and detachments of the regular military service worked to maintain the levee system along the Ohio and Mississippi to combat the raging flood waters. Secretary Woodring ordered the army to evacuate all persons from the Mississippi valley extending from Cairo, Ill., to New Orleans for 50 miles on either side of the river.

Prevent Pestilence in Flood Areas

She was a good little trooper, even when driven from her home by the raging Ohio, but the inoculation needle brings tears from Evelyn Jean Hartung as Dr. Reece M. Pedicord, Wheeling, W. Va., health commissioner gives her anti-typhoid serum injection.

Exhausted Refugees Find Relief

A father and his children, pictured in a refugee train as it left Portsmouth, Ohio, for haven and safety. They sleep the sleep of exhaustion, as did the majority who escaped the terrors of the great flood.

Striking Wild Rose Design in Cutwork

Pattern 1337

Simplicity of design—simplicity of needlework combine to make these wild roses effective cutwork. Do the flowers in applique too—it's very easy to combine with cutwork. Use these designs on sheets and pillow cases, scarfs and towels — an attractive back. Dress up your own home or make them as gifts. Pattern 1337 contains a transfer pattern for one motif 6½ by 20 inches, two motifs 5 by 14¾ inches and pattern pieces for the applique parts; illustrations of all stitches used; material requirements; color suggestions.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle Needlecraft Dept., 82 Eighth Ave, New York, N. Y.

Write plainly pattern number, your name and address.

A Big Building

Russia is constructing the biggest building in the world. About over a million cubic yards of earth have been excavated for the foundations, and the steam shovels and pumps are at work night and day behind a high wooden fence in Kropotkin square in Moscow, within sight of Kremlin towers. as the Palace of the Soviets will have 200,000 tons of steel and 400,000 tons of concrete. Of its halls will seat 88,000 persons.

Dr. Pierce's Favorite Prescription tonic which has been helping women of all ages for nearly 70 years.

Evil of Self-Pity

No subtler habit of evil is there in the world than that of self-pity. —Bright.

A Three Days' Cough Is Your Danger Sign

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid nature to soothe and heal the inflamed membranes as the germ-laden phlegm is loosened and expelled.

Even if other remedies have failed, don't be discouraged, your druggist is authorized to guarantee Creomulsion and to refund your money if you are not satisfied in results from the very first bottle. Get Creomulsion right now. (Adv.)

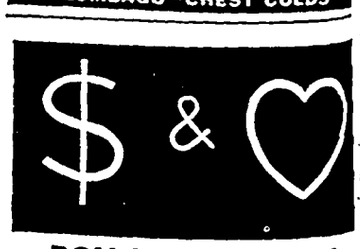
Big Task

Philosophy's chief duty is to reconcile the contradictions of our experience.

SORE MUSCLES MADE HER ACHE ALL OVER Feels like a new woman now

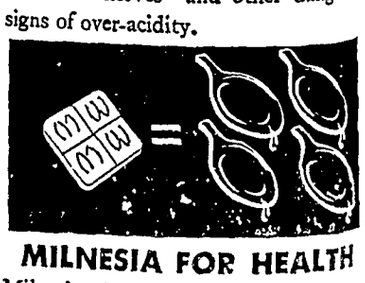
Why suffer with muscular pains of rheumatism, neuralgia, lumbago, or chest cold? Thousands say Hamlins Wizard Oil brings quick relief. Aching legs, arms, chest, neck, back. Just rub it on—rub it in. Makes the skin glow with warmth—muscles feel soothed—relief comes quickly. Pleasant odor. Will not stain clothes. All druggists.

HAMLINS WIZARD OIL
For MUSCULAR ACHES and PAINS Due to RHEUMATISM · NEURALGIA LUMBAGO – CHEST COLDS



DOLLARS & HEALTH

The successful person is a healthy person. Don't let yourself be handicapped by sick headaches, a sluggish condition, stomach "nerves" and other dangerous signs of over-acidity.



MILNESIA FOR HEALTH

Milnesia, the original milk of magnesia in wafer form, neutralizes stomach acids, gives quick, pleasant elimination. Each wafer equals 4 teaspoonfuls milk of magnesia. Tasty, too. 20c, 35c & 60c everywhere.

Time to Plan Sew-at-Home Program

By CHERIE NICHOLAS

WHY not start your spring sew-at-home program now and "avoid the rush?" Those who are in a position to know declare that women are turning back to the art of sewing at home with an enthusiasm such as has not been manifest for years. Make-it-yourself clothes are not only a sure means of self expression, these enthusiasts say, but they offer the best answer to being really well dressed on a limited budget.

And there's the new spring fabrics! 'Nuff said! No further argument is needed. So here's taking a look toward the new materials. Such ravishing colors, subtle textures and glorified patternings as the spring prints, the cottons, the linens, the piques, the gabardines, the shantungs, the silks, the satins and so on ad infinitum are flaunting is enough to entice anyone into bringing home rolls of yardage, and it follows like the night the day that you will eagerly and without delay be joining the sewing-bee clan.

Of course when one starts in to do spring sewing the really sensible thing is to tackle the simplest garments first, made of inexpensive wash materials. So let's betake ourselves to the wash goods sections and see what's doing in the way of pretty prints or "what have they." Never were sturdy cottons so novel, so amusing and so irresistably likable. The best of it is, if you ask for the right kind you can get materials that are guaranteed against shrinking and that's something not to be lightly considered.

The new cottons and linens and other wash prints run the gamut of design from sportsy little designs for house, active sports and spectator wear to gorgeous multicolored large florals that look handblocked, for evening dresses. There is a set of cunning classroom prints that are delightful for school and home wear. These prints are practical as well as youthful. History, geography, algebra, even music print supply motifs for these clever prints. What could be more befitting to wear during study hours and easier for the amateur seamstress to begin with than a two-piece pajama outfit made of one of these interesting prints such as we are picturing to the left in the group illustration. The perky classroom print that fashions this attractive two-piece is pre-shrunk, which means that its snug neckband can not grow tight, tighter, too tight when pajamas go to wash.

A house coat of cotton so fine it rustles like silk and washes without a tremor because it is sanforized shrunk, as in fact are the materials in each of the garments pictured, is shown to the right. An effective light navy blue is its color with white cord and buttons. Any girl can make herself such a garment, since it requires no close-fitting. Merely cut carefully by the right tailored pattern and take care to give a neat finish so that the making will do credit to the lovely lustrous material.

It is especially encouraging to home-sewing enthusiasts to know that smartly new fabrics that wash perfectly yet look formal enough for any type of wear have come into their own in a big way. The dress centered in the group can be very easily made, especially after you have mastered the making of the pajama outfit and the house coat as shown. This is a broad-shouldered frock on the popular shirtwaist dress order. It has crisp youthful lines and contrasting color accents. Use swagger broadcloth, which is one of the shantung-like new cottons now available in all wash goods sections and this frock will cost you next to nothing. The original style is developed in brown swagger broadcloth with belt, vest and neck trimmings of the same material in rust shade. Can be sent to the laundry week after week without loss of fit or style through shrinkage.

© Western Newspaper Union.

BRAIDED JACKET

By CHERIE NICHOLAS

This two-piece daytime dress is of satin-back bemberg and acetate crepe, a material you will love to wear during the midseason and coming months. It is simply but very effectively styled with all-over soutache braid trim on the jacket. The ascot and breast pocket handkerchief lend bright color accent.

NIGHTGOWN BIB IS WELCOME PRESENT

By CHERIE NICHOLAS

A most original and welcome gift is something that you make yourself, giving that personal touch that means so much. A charming suggestion is a nightgown "bib" made of dainty lace. It is so easy to slip on for breakfasting or reading in bed, and is that becoming you will be wanting to make another one, after your gift is duly sent, to keep for your very own.

One we have seen is made of insertion lace gathered and joined row-and-row to form a circle measuring not less than twelve inches across. Satin ribbons were attached at the top and tied around the neck. There is great opportunity for originality in making these "bibs" for you can vary their shape, having them round, square, in triangle form or whatever strikes your fancy. You can use lace edgings, or insertions or all-over lace and decorate it in your own way. Thus you can express yourself to your friends and know that you are selecting a gift that is sure to delight any feminine heart.

Redingotes for Spring

Prophetic of spring is the full-length redingote with princess cut worn with the gayly printed frock.

Exotic Prints

The tendency is for more exotic and striking prints this season.

Keeping Up With Science

By Science Service

© Science Service.—WNU Service.

Ancient Ruins Are Found in Utah Close to Trail

Ceremonial Building and Many Other Houses

Blanding, Utah.—Within 80 yards of a trail over which Zeke Johnson, custodian of the Natural Bridges National Monument, Utah, has walked for more than 20 years, he has discovered a ledge full of prehistoric houses, including that rare find, a kiva or ceremonial building with an almost complete roof and what is apparently the original ladder for entrance still in place.

Mr. Johnson was engaged in repairing the trail between the Augusta and Caroline bridges—two of the three natural arches which the national monument was established to protect—and lunchtime found him in a narrow canyon in which there is little sunshine at this time of the year.

Lucky Find on a Cliff.

Seeing the sun bright and warm on a cliff about 30 feet above, he scrambled up to eat his lunch in the sunshine.

"Imagine my surprise," he says, "when I saw a ledge full of houses, within 80 yards of the trail over which I have walked for 20 years. There is one large kiva with the roof almost complete and a fine ladder standing in the hatchway with the small willows still holding the rungs in place.

Two Well Preserved Houses.

"Besides the kiva," Mr. Johnson continues, "there are two well-preserved stone and adobe houses with no roofs but walls which are in a fine state of preservation. A small barrel - shaped structure abutts against one of the houses. Six or eight rooms with walls of fine masonry but partly torn down also are on the ledge. There is a lot of broken pottery and flaked stone lying around. I picked up six arrow points and several broken ones."

Roots of Prairie Grasses Grow at Astonishing Rate

Washington.—Roots are formed at the rate of two miles a day by an average clump of one of the wild prairie grasses of the West. When the plant is two years old, it has a total of nearly 320 miles of roots, probing through a mass of soil seven feet deep and four feet square.

These figures on the root "mileage" of crested wheat grass were presented at the meeting of the Botanical Society of Washington by T. K. Pavlychenko of the University of Saskatchewan. Mr. Pavlychenko was born in Ukrainia, but for several years has been a Canadian citizen.

Crested Wheat Grass Valuable.

Crested wheat grass, the subject of his special study, was introduced from western Siberia into the Plains area several decades ago, as a means for combating weeds which were spreading at an alarming rate in the old cattle country. The grass proved to be not only a very successful weed control and a good forage plant but also a remarkably efficient binder of the soil against the wind erosion that starts dust storms.

To make a really thorough investigation of the cord-like roots of this grass, Mr. Pavlychenko undertook a monumental job, combining the patient digging of a geologist with the delicate technique of a surgeon.

Russians Invent New Musical Instruments

Moscow.—An instrument resembling the organ, which produces sounds of oriental music as well as those of western music, has been invented by A. S. Ogoltevets. The octave of this instrument has 17 intervals.

Demonstrated before the Academy of Sciences of the U. S. S. R., the new instrument won high praise, Tass, official Soviet news agency, reports.

Soviet musical inventors have produced interesting results by using electricity to intensify the sound of violin and guitar music. Recent electric musical instruments introduced include the Emoriton, Violena and Eouodin.

Oxygen's Magnetic Property Plays Role in Life

University of Illinois Scientist Tells How

THAT human life is in some way bound up with the great force of magnetism has long been a speculation of man. "Personal magnetism" is a pseudo-scientific phrase which shows one form of this type of speculation.

At the recent conference at Princeton university on molecular structure, however, a true scientific basis for linking magnetism and life was discussed. And the link appears to take place in the blood and makes possible the body's respiration.

Dr. Worth H. Rodebush of Illinois university's chemistry department, told of the rôle the magnetic property of oxygen plays in life. Oxygen, he pointed out, supports respiration by permitting the oxidation of the blood's impurities at relatively low temperatures. But if it supported all forms of combustion as it does respiration the whole world would shortly burn up.

Oxygen Behaves Queerly.

Something of the paradoxical behavior of oxygen is shown, Dr. Rodebush indicated, by its position in the periodic table of the chemical elements, where it stands between the inert gas nitrogen, on one hand, and the extremely reactive gas fluorine, on the other. Oxygen, in other words, has a considerable amount of chemical activity and affinity and yet not too much.

"A possible clue to the paradoxical behavior of oxygen is found in the fact," declared Dr. Rodebush, "that, of all the common elementary diatomic gases, oxygen alone is paramagnetic, gathering in a magnetic field, and hence reacts readily with other magnetic materials, such as the iron in the hemoglobin of the blood."

Not Easily Explained.

Because of the magnetic characteristic of oxygen, explained Dr. Rodebush, it does not react so readily with the non-magnetic substances like cellulose and the hydrocarbons. And thus spontaneous combustion does not occur at ordinary temperatures. Yet within the human body, the reaction between oxygen and hemoglobin, by which the impurities in the blood are burned, takes place readily without raising the temperature above body heat.

History Is Traced in Adobe Bricks of Old Missions

Berkeley, Calif.—Adobe bricks from ruins of a Dominican Mission in Lower California have preserved evidence of a smallpox epidemic that ravaged the Indian population in 1781.

Two California scientists who have been examining bricks from old missions made the discovery of bones in bricks from San Vicente Mission. It is supposed that builders of the mission must have shoveled in bone fragments from unmarked graves of smallpox victims when they were getting earth to make the brick.

Yield Many Clues.

Mission bricks are yielding many clues to early western history, according to the two brick investigators, Prof. G. W. Hendry of the University of California, and M. K. Bellue of the State Department of Agriculture.

On some bricks are footprints of men, dogs, coyotes, birds; and in other bricks have been found nut shells, leather trimmings, pottery, copper fragments, and seed of plants grown in early days in the west.

African Skull Gives Man a New Relative

London.—A prehistoric human skull that has come to light in East Africa provides man with a brand-new relative for his proud old family tree.

Enthusiastically hailing the skull as "of the greatest importance," Dr. L. S. B Leakey, noted British anthropologist, gives his opinion that this early African was an entirely different genus of man from any heretofore known.

Dr. Leakey's verdict, if generally accepted, means that an unsuspected extinct branch of the human race is now known; and that this distinct type of man, low in type, was among a number of genera and species of humans who were on earth, but who died out, leaving only the species Homo sapiens to which all mankind alive belongs.

The skull, which Dr. Leakey has examined in Berlin at the Natural History Museum by special arrangement with the discoverer, was unearthed during the scientific expedition to the Eyassi lake basin in Tanganyika territory.

Poultry

SPROUTED OATS GOOD WINTER DIET

Tender Plants Should Be Free From Mold.

By J. C. Taylor, Extension Poultryman, New New Jersey College of Agriculture. WNU Service.

Green food for winter feeding of poultry can easily be obtained by sprouting oats. Oats to be sprouted should be good seed oats and free from any must or smut, and a home-made oat sprouter, consisting of trays two feet square and four or five inches deep with fine hardware cloth for the bottom, is satisfactory equipment.

Soak the oats in warm water overnight and then spread them on the trays about an inch thick. Keep the temperature of the room in which the oats are placed between 60 and 70 degrees Fahrenheit and water the oats once a day. When the sprouts are three or four inches long, they are ready to be fed to the birds at the rate of one square inch of oats to each bird daily.

The most serious trouble in sprouting is mold. Great care is needed to avoid its appearance and no oats should be fed which have any trace of mold. Careful washing of trays and tubs used in sprouting oats in a five per cent solution of formalin is a good practice to follow. If this fails to control the mold, use one teaspoon of formalin to every six quarts of water and allow the oats to soak in this solution for 12 hours.

Houdans a French Breed, Takes Name From Village

The Houdan is a French breed, taking its name from the village of Houdan. It is a rather popular breed in France and is kept to a certain extent in the United States for the production of table poultry. It is a bird of good substance with good length and depth of body, making it well adapted for the production of meat. The back is long and of good breadth, sloping slightly toward the tail. In many respects the Houdan somewhat resembles the Dorking, an English breed. The standard weights in pounds are: Cock, 7½; hen, 6½; cockerel, 6½; and pullet, 5½.

A characteristic feature of the Houdan is the presence of a fifth toe, practically all other breeds and varieties of chickens having but four toes. The Houdan also has a well-developed crest and a beard. The comb is V shaped.

The Mottled Houdan has black plumage with about 1 feather in 2 to 1 feather in 10 tipped with positive white, depending on the section of plumage. The fluff is black, tipped with gray. The under-color in all sections of both sexes is dull black. The ear lobes are white. The color of the beak is dark horn; the shanks and toes are pinkish white, mottled with black.

The White Houdan is the counterpart of the mottled in type and has pure white plumage. The ear lobes are red. The beak, shanks, and toes are pinkish white.

Problems of Disease

With the increase in poultry population, and local concentration, have come problems of disease—plenty of them. Some of the experiment stations, notes a writer in the Rural New-Yorker, in states where poultry is a large industry have research laboratories comparable to those of the great hospitals. Germ and parasite infestation, bodily defects, nutritional deficiencies and disorders are studied to find the exact causes, so that prevention, vaccination or medical treatment may be recommended. Easily administered capsules are available for many poultry troubles, such as intestinal parasites. We all realize that disease prevention through sanitary measures is of prime importance, but many poultry disorders do yield to modern treatment so that it is not necessary to chop off a hen's head at the first sign of ailment.

Loss From Red Mites

Red mites and body lice frequently cause serious loss in egg production. Deaths also may follow a bad infestation among both young and old stock, and considerable time and care may be required to bring the flock back into condition after the trouble has been overcome. Carelessness or insanitary conditions are usually responsible for the presence of these pests. They thrive on dirty hens and multiply rapidly in filth if it is allowed to accumulate.

Experiment on Chickens

Because of the fact that chickens are suitable subjects for experimentation, many scientists, not interested in poultry husbandry or diseases, have used chickens as experimental subjects. The industry has profited by this work. The most exact and accurate knowledge of diseases is of little value unless it is interpreted in terms that are applicable to ranch conditions and is presented to poultrymen in a manner that is understandable to them.

My Favorite Recipe

By Helen Keller

Golden Gate Salad.

½ pound of fresh marshmallows cut in halves.

2 nice oranges, carefully peeled and cut in small pieces.

2 bananas, cut in dicelike pieces.

2 thick slices of fresh pineapple cut in the same way.

1 large tart apple, cut fine.

½ pint bottle of red maraschino cherries, cut in half, with juice.

½ pint jar of french marrons, broken up, with sirup.

The delicate inner stalks of one head of celery, cut in small pieces.

¼ pound of fresh pecans or english walnuts.

Mix nuts, fruits, celery together in dish and put in icebox.

Dressing.

½ pint of thick mayonnaise.

½ pint of thick cream.

Whip cream and mix with mayonnaise and juice of half a lemon. An hour before serving mix dressing lightly with salad and sprinkle with plenty of paprika. Serve very cold on crisp lettuce leaves.

I like this salad very much. I ate it first in California, so I call it Golden Gate salad. It is best made of fresh fruits, but it can be made of canned fruits. At home we often serve it instead of dessert, with a little more whipped cream.

Copyright.—WNU Service.

Cable Railways

The longest cable railway in the world will soon be opened for traffic in Italy. It will run from San Remo to the top of Mount Bignone, a distance of about four and one-half miles. Three stations, one nearly a mile high, will be located along the line. The cable system itself will be supported by 18 steel towers.

Cable railways are also widely used in industry for conveying ores, lumber, grain and other materials. Some are continuous, a number of carriers making a complete circuit.

DO THIS FOR A COLD

1 Take 2 Bayer Aspirin tablets with a full glass of water at first sign of a cold.

2 If throat is sore also, gargle twice with 3 Bayer tablets dissolved in ½ glass of water.

Quick Relief with 2 Bayer Aspirin Tablets

The modern way to ease a cold is this: Two Bayer Aspirin tablets the moment you feel a cold coming on. Repeat, if necessary, in two hours. If you also have a sore throat due to the cold, dissolve 3 Bayer tablets in ½ glass of water and gargle with this twice. The Bayer Aspirin you take internally will act to combat fever, aches, pains which usually accompany a cold. The gargle will provide almost instant relief from soreness and rawness of your throat. Your doctor, we feel sure, will approve this modern way. Ask your druggist for genuine Bayer Aspirin by its full name — **not** by the name "aspirin" alone.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder may be burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. *Doan's* have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. *Ask your neighbor!*

WITCHCRAFT IN THE U. S.

News reports of "witchcraft murders," in which the victims were killed because they were supposed to be exerting evil influences upon their neighbors, have brought to light an unbelievable prevalence of superstition in land of civilization.

Investigations pursued in consequence of these killings have revealed that in certain sections the belief in witchcraft and magic is as common as that whch prevailed during medivial times in Europe or among African natives of the present.

One of the murders reported was committed in order to obtain possession of a "magic book" in which was printed: "Whoever carries this book is safe from all enemies; can not die, nor be drowned in any water, nor burn up in any fire," and so on.

It is estimated that in the United States not less than 20,000 profesional "priests and priestesses of voodooism, fortune-tellinp, and other charlantanry make a living by playing upon the ignorance and credulty of superstitious people. They even number among their dupes many persons of wealth, educatiin and social prestige There is no accounting for how they get that way.

But the fact still remains that America is still a land of automobiles, airplanes, radio and belief in witchcraft.

Mrs. Richard Connors of Evanston, Ill., broke a rib while doing setting up exercises as directed over the radio.

TRAINING FARM BOYS

More extended instruction in the handling of machinery, and particularly in the use of electricity, is advocated for farm boys by the Federal Board for Vocational Education, according to a southern regional agent.

He declares that electricity is rapidly becoming used to a greater extent on farms, particularly in the South and in other sections where waterpower is available. For this reosoh he urges the necessity for requiring vocational agriculture teachers to study the operation of electrical equipment, so that they may teach the boys under their charge to employ it in practical farming.

Recently a specialist in the Department of Agriculture pointed out that mechanical power can be produced at less than half the cost of animal power. The increased cost of man power is also an important factor in hastening the employment of a greater number and a larger variety of labor-saving machines.

The farmer of the future must have a certain amount of mechanical knowledge, hence the farm boy should begin as early as possible to master the practical operation of power-driven machinery, which he must inevitably use if he hopes to be a successful farmer in the future.

LOAN CHANGES WHOLE OUTLOOK OF MASON CITY FARM FAMILY

Life is beginning to look as sweet to the George S. Renshaw family, of near Mason City, as the honey the family excels in producing.

The Renshaws weren't happy a few months ago. Renshaw, who farms an 80-acre place, was being pushed by creditors. So hard was he trying to meet payments that there wasn't enough money for daily needs. The discouraged attitude of the parents reflected on the children and they rapidly lost interest in school work and all activities.

The turning point came with a $570 loan made last March by the Rehabilitation Division of the Resettlement Administraton.

With a new grasp on life the Renshaw's attitude changed. The children liked their school work again Son James, 14 has helped his father with the 70 hives of bees which last year produced 5,200 pounds of honey. James has two swarms of his own from which he sold enough honey to pay for 24 piano lessons and a bicycle to carry him to school.

An 11 year old niece who lives with the family has a hive from which she sold $6 worth of honey. A daughter has a number of projects of her own.

First payment on the loan will be due next March. The payment was made in November.

CLASSIFYING MOTORISTS

Among the measures designed to reduce automobile accidents, a new Connecticut law will be watched with interest. It provides different insurance rates for various classes of motorists.

Those whose driving records indicate them to be especially competent and careful are granted a reduction from the regular insurance rates; the next class pay the standard insurance fee; those found to have been involved in minor accidents and slight violations of traffic rules must pay a premium of 10 per cent; those who have had serious accidents are penalized 25 per cent; while those who are shown to be at fault in highly serious and flagrantly unavoidable accidents must pay an additional premium of 50 per cent for their insurance.

The new law has not been in effect long enough to enable one to judge of its results, but it seems to be based upon sound principles and may prove o be of some measurable benefit in reducing automobile accidents.

TOASTING INSECTS

Among the new inventions which promise relief to suffering humanity is the electric light insect exterminator, said to have been perfected by scientists from the University of California, and which may take its place among such well-known appliances as the electric toaster, the electric iron and the electric razor.

According to the United Press, the invention consists of a bulb which may be attached to any ordinary electric light socket. Among the uses to which it has already been put with success are:

In front of theaters to keep insects from annoying patrons at the box office; at filling stations for the same purpose; over outdoor swimming pools and in illuminated gardens: on playgrounds and athletic fields, and so on.

The same process is being employed in chicken and turkey pens; the turkeys especially showing great appreciation of having their food electrocuted before their eyes and then having the choice morsel dropped right before their beaks.

The light which was invented especially as a protection against mosquitoes, has received so much attention that requests have come from as far as India and Africa for full information on its manufacture and use.

If the device really works as advertised, its inventors may be classed among the major benefactors of mankind.

LAKES AND STREAMS RUINED

Iowa like many other states during the past decade has unwittingly destroyed much of the natural environment in the lakes and streams of the state for fish life Many lakes and permanent marshes have been drained, creek and river courses have been straightened and excessive silt and erosion have destroyed the natural environment for fish in most of the streams. Many cities and towns of the state are dumping heir sewage and refuse from their industrial plants into streams, which, in many cases, absolutely destroyed them for carrying fish life.

Soil erosion and pollution have brought such a decrease in the fertility of many lakes as to place them in a condition of biological instability.

A jail cell may keep a man from running away, but it can't keep him from running for office. From the Sacremento county prison where he is held on counterfeiting, Joseph announced his candidacy for of Cambell, Ohio

"—and this dollar is obsolete"

An electric service company can only keep pace with the constantly increasing demand for better electric service by the continued application to its property of every new development.

The art of generating and distributing electricity is advancing rapidly and it is not unusual to find that equipment installed only a year ago is already obsolete.

Unfortunately this is an item of expense running into thousands and thousands of dollars which is often "overlooked" by those who promote other service.

Canadians Keep Customs of Normandy, Brittany

A country within a country, the French Canadian Province of Quebec, although under British rule since 1763, retains customs and traditions which the early pioneers brought from Normandy and Brittany more than four centuries ago. In some of the smaller and more remote villages, inhabitants learn the news from the town crier, who stands on the steps of the parish church Sunday morning after mass and in French calls out the events of the week.

Dog-drawn carts deliver milk and cream at the doorsteps of ancient houses in the lower sections of Quebec and Murray Bay, and Cap a ... looms, hand-looms and ... furniture are found in ... village ... and the ... the inhabitants are ... as well as tailored by ... folk.

Eyes Betrays ...

... nose ... Man ... which betrays ... features ... but ... the nostrils will often reveal an inward unrest, even when the other features remain tense and immobile, according to a writer in Pearson's Weekly. Most famous soldiers have possessed Roman noses. Wellington and Napoleon were two. The man with pinched nostrils may have considerable ability, but he lacks the will power to get there. Pinched nostrils usually denote a pronounced inferiority complex. The straight Grecian nose indicates artistic ability, the large, fairly thick nose is the hall mark of the financial genius, the long, thin nose is suggestive of the quarrelsome type, while at the other extreme the good-humored doormat type of person will usually be the possessor of a pug nose.

ANNUAL SPELLING BEE TO BE HELD AT SCHOOL THURSDAY AND FRIDAY

The annual spelling contest for the grade students of the Klemme Public Schools will be held Thursday and Friday of this week. Each room will have a contest of its own on Thursday, at which time the five best spellers in each grade will be chosen. On Friday these leaders in each grade will meet in a final elimination to select a winner over all. This winner will represent our school in the county contest at Garner some time in the near future.

The contests in each room will be held at convenient periods Thursday and the teachers will supervise their own contests. The final contest Friday will be judged by ... of Jot'em ...

SCHOOL NEWS

Grades 7 and 8

who received 100 in spel- week are: Allen Barz, ohnson, Keith Stille and walve. We had a spell- riday. Keith Stille won en Barz second, and Ellen hird.

ighth grade is finishing on Snow-Bound booklets. afternoon we had a val- arty. Lorraine Buntenbach ned queen and was assis- Garland Brinkman, Allen Keith Stille in distribut- alentines.

Grades 5 and 6

the last period on Friday afternoon we had our Valentine party. For our Valentine box we had Dan Cupid's house.

Betty Schuldt celebrated her eleventh birthday Friday by bringing treats. We all sang the birthday song for her and wished her many more.

Tuesday afternoon Miss Barz told of her trip to New York City and showed some pictures. On Wednesday she told of Niagara Falls.

We have one more group of states to complete in fifth grade geography. As one means of review we intend making a product train

This coming week the sixth grade history class will be busy making castles. We are doing this as a summary of our study on feudalism.

Grades 3 and 4

We had our Valentine box Friday afternoon. The box was made to represent a mail box. We read Valentine stories and poems before the box was opened.

Next week the language and music periods will be spent in acting out a Valentaine play. The children are writing the play. The scene of the play is in Mother Goose Land. The dialogue is being written in verse form. We are using the Valentine songs we learned last week in the play also.

Grades 1 and 2

The second graders started reading new books this week. The first graders read from a new book on Thursday and Friday too.

We made writing booklets this week.

The second graders learned the Roman numerals and put them into their number books.

LaVohn Schlawin and Iris Rosendahl visited our room Friday afternoon.

We had our Valentine box on Friday. Everyone received such pretty Valentines.

We are willing to concede our mistakes when we make one. A year ago we said ladies hats couldn't be funier.

Time may be money but we have noticed that friends appreciate the money we spend with them more than the time.

OLDSMOBILE CHEVROLET

Parson Weems, Washington Myth-Maker

By ELMO SCOTT WATSON

FEBRUARY 22 is near at hand, which means that we shall soon be honoring again the memory of George Washington. As usual, a part of the annual Washington Birthday celebration will consist of tributes to his greatness as a soldier and a statesman, as the leader in the American struggle for liberty and as the first President of the new nation. It is certain, too, that there will be a repetition of many of the familiar stories about "Washington, the man" and "Washington, the human being" and it is inevitable that, in retelling those stories, fact and fancy will be mixed, myth and legend will be recited once more and the "real Washington"—the Washington which you and I and our friends and associates in everyday life can understand—will still elude us.

Why is it that George Washington seems destined always to be a remote, shadowy figure in our minds? Why must he remain a god-like personality aloof from humankind, a marble statue of a man who never once steps down from his pedestal to walk the earth like other men? One of the reasons is that the myth-makers went to work early in the history of our nation and one in particular seized upon George Washington as the subject for fashioning legendary tales. His name was Mason Locke Weems and he, more than any other man, is responsible for what millions of Americans think they know about George Washington.

So it seems appropriate to tell at this time the story of "Parson" Weems and his career. And not the least of the interest in that story is the fact that he himself is almost as shadowy a figure in the minds of most Americans as is the Washington which he helped create for them.

On October 1, 1759 a son was born to David Weems, a farmer in Anne Arundel county in the Province of Maryland, and his wife, Hester Hill Weems. Evidently there was no danger of "race suicide" in the Weems family for this was their 19th child! The boy was given the name of Mason Locke Weems and when he grew up was sent to Kent County school, at Chestertown.

At the age of fourteen young Weems went to England to study medicine and follow in the footsteps of a great uncle, Dr. William Locke, for whom he had been named. After graduating from the University of Edinburgh young Weems served for a time as a surgeon on a British warship. Then in 1776 he returned to America.

Apparently Weems took no part in the fight for liberty and during the last part of the war he seems to have had some association with Rev William Smith, an energetic churchman who had taken over Weems' alma mater, Kent County college, and was developing it into the present Washington college Out of that association grew Weems' decision to become a minister. After some difficulty in overcoming the prejucide of high Episcopal

REV. MASON L. WEEMS

church officials in England against citizens of a "rebel colony," Weems was finally ordained in 1784 and for the next five years served as rector of All Hallows church in Maryland.

During this time his income was meager and he eked it out by conducting a school for girls. Also during this time he was having other difficulties. He found himself unpopular with the conservative members of the parish because he was too willing to preach, if requested, to Methodists who had recently split off from the established church; too willing to exhort in ballrooms and other "ungodly" places; and too charitable in extending religious instruction to negroes—among them his own slaves whom he had freed several years before.

He Leaves the Ministry.

In 1790 Weems was without a charge and during the next two years he presided occasionally over the neighboring parish of Westminster. Finally, feeling that he was a failure as a minister, he decided to turn his talents to other work. During his service as a preacher he was a strong advocate of temperance and showed other signs of becoming a reformer. In that character he reprinted from the English original a popular medical pamphlet, the nature of which gave it a wide sale but scandalized some of the conservative churchmen. This not only hastened his decision to leave the ministry but pointed the way to another career—that of becoming a publisher and bookseller.

Back in 1784 an Irishman named Mathew Carey had come to Philadelphia and established a newspaper, to which venture he soon added the publication of books and magazines. In 1793 Weems met Carey and formed a business association with him which continued for more than three decades.

So "Parson" Weems became an itinerant bookseller and soon his travels were taking him all along the Atlantic seaboard. Moreover, he was making more money in this business than he had ever made before. So in 1795, when he married Fanny Ewall, the daughter of Col. Jesse Ewall, a prosperous planter near the Potomac river port of Dumfries, Va., he was able to install her in a comfortable home which he had bought in Dumfries. After the death of his father-in-law, Weems and his wife moved into Bel-Air, the Ewall mansion, and there he made his home, what time he was not out on his book-peddling trips.

Important to this story are the facts that the Ewalls were closely related to the Balls, the family of George Washington's mother, that Colonel Ewall's sister married Dr. Craik, Washington's personal physician, and that Washington himself occasionally visited Colonel Ewall at Bel Air which was only 18 miles from Mount Vernon. But more important still, is the fact that from a seller of books Weems' ambition led him to become a writer of books—or, more accurately, of pamphlets.

Washington's Indorsement.

His first venture in that field was taken about a year after his marriage. He collected a symposium of the utterances of Benjamin Franklin and other exponents of the homely virtues of life, which he published under the title of "The Immortal Mentor, or Man's Unerring Guide to a Healthy, Wealthy and Happy Life." Washington, because of his friendship for the Ewall family, wrote an indorsement of the book. More than that, he permitted Weems to display this indorsement on the title page of the pamphlet and the magic of approval by the "Father of His Country" had much to do with the successful sale of Weems' little book.

When Washington retired from the Presidency Weems put out another book. It was called "The Philanthropist: or a Good Twenty-Five Cents worth of Political Love Powder for Honest Adamsites and Jeffersonites" and it was a protest against the partisan political spirit which was dividing the country. Along with Weems' plea for harmony among the citizens of the country in this book were sketches of the nation's fighting men during the revolution, designed to stir up patriotic sentiments in his readers.

Because of the double purpose of this book Washington indorsed it also, with these words: "Much indeed is it to be wished that the sentiments contained in your pamphlets, and the doctrine it endeavors to inculcate, were more prevalent—Happy would it be for this country at least, if they were so."

This was in August, 1799. Within four months Washington lay dead at Mount Vernon. In January, 1800, Weems wrote to his friend and business associate, Carey, as follows:

I've something to whisper in your lug. Washington, you know, is gone! Millions are gaping to read something about him. I am very nearly prim'd and cock'd for 'em.

So within a few months there appeared an 80-page pamphlet bearing the title of "A History of the Life and Death, Virtues and Exploits of General GeorgeWashington; dedicated to Mrs. Washington, by the Rev. M. L. Weems of Dumfries." Its author was quite correct in believing that "millions are gaping to read something about him." For the first edition of the pamphlet was soon sold out and a second edition followed quickly. In this edition the author added a line to the title "Faithfully taken from authentic documents" — probably because some skeptic had questioned some of his statements.

The Book Grows.

But the public seemed willing to accept what he had written about the great Washington unquestioningly. The book was selling so fast that it was difficult to keep up with the demand for it. A new edition appeared every year and each successive edition was larger than the previous one By the time the fifth edition was published in 1806 the 80 pages had grown to 250 and its title now read "The Life of George Washington, with curious anecdotes,

GEORGE WASHINGTON
(Picture used as the frontispiece in Weems' biography.)

equally honorable to himself and exemplary to his young countrymen." Also the author now described himself on the title-page as the "former rector of Mt. Vernon parish," despite the fact that there was no Mount Vernon parish in Virginia, any more than he was, as he described himself in later editions, "former rector of General Washington's parish."

The buyers of Weems' book, however, apparently weren't concerned about the accuracy of the author's description of himself anymore than they were concerned about the accuracy of some of his "curious anecdotes." They literally "swallowed them whole;" they told them to their children, who in turn told these tales to theirs. Thus did some of the legends about George Washington become deeply-rooted in American belief.

Chief among these legends is the familiar cherry-tree story. Weems declared that this story was told to him by "an aged lady connected with the household of the elder Washington" but he took care never to tell her name. The same anonymous "lady" is also the authority for the story of how Wahington's father tried to "startle George into a lively sense of his Maker." This story, while not so well known as the cherry tree story, is equally interesting.

In it Weems has the elderWashington tracing George's name in the earth in his garden-patch and planting it with cabbage seed. A little later the boy is shown what is apparently a miracle—his name,"George Washington," spelled out in green shoots coming up from the ground. When young George runs to his father for an explanation, the parent makes his little trick an excuse for a sermon on the workings of Omniscience.

The Origins of His Tales.

If there was ever the slightest bit of evidence to support either story historians, who presumably have dug up every possible bit of information that has a bearing on Washington's early life, have never been able to discover it. What they have discovered, however, is this:

Back in 1797 John Bioren of Philadelphia published a book called "The Looking Glass for the Mind; or, the Juvenile Friend." Later editions of this same book were brought out by T. B. Jansen and Company of New York. In them appeared a story called "The Fruitful Vine," in which a father moralizes to his son much as the elder Washington moralizes to young George in the cherry tree story. Since the cherry tree story did not appear in the earlier editions of Weems' biography but in later ones (after the publication of "The Looking Glass for the Mind") scholars are convinvced that the "Parson" based his cherry tree story on the vine story. Similarly, an anecdote, invented by an English squire long before Washington's time to impress his son with the greatness of God, gave Weems the idea for his cabbage seed story.

Although the origin of some of the other stories which Weems included in his book are not so easily detected, there is little doubt in the minds of historians that they are pure inventions by the "Parson" with only the slightest, if indeed any at all, foundation in fact. All of them, of course, were highly moral and all tended to paint the youthful Washington as nearly perfect as a boy could be.

About a decade ago Washington's biographer was himself the subject of a biography. It was "Parson Weems of the Cherry Tree," written by Harold Kellock and published by the Century company. In this book Kellock, commenting upon the fact that Weems originated so many Washington legends, says:

"He (Washington) was first in manly games, the fastest runner, the best jumper, and could throw farthest. In fact, this young Admirable Crichton was the hero of a literary artist who knew the commercial value of laying on virtue with the heavy trowel. In these and other fables of a similar character scattered through the book, Weems created a Washington that all the study and research of the scholars have been unable to erase. It is the Weemsian Washington that persists in the school readers and in the popular imagination, a figure of truly terrifying piosities and incredible perfections, and, as Mr. Albert J. Beveridge remarks in his life of John Marshall, 'an impossible and intolerable prig.'"

An Early Best Seller

Be that as it may, the American people of the Nineteenth century evidently wanted their heroes pious to the point of priggishness for they accepted "Parson Weems portrait of Washington as an authentic one and handed it down to us.

Before Weems' death in 1825 he wrote many other books, most of them moral tracts such as "The Drunkard's Lookingglass," "God's Revenge Against Murder," "God's Revenge Against Gambling" etc. Undoubtedly they were popular in their day but that day soon passed. More enduring was his masterpiece even though it was a masterpiece of mixed fiction and fact. For his "Life of Washington"—that paradox of a book filled with untruths about a man whom he painted as the paragon of truthfulness!—is more than an early "best seller," It is a monument to a master myth-maker who gave a nation legend and convinced them that it was History.

Give Hogs Range When Fattening

Animals Will Produce Meat of Better Quality When Not Crowded.

By H. W Taylor, Extension Swine Specialist, North Carolina State College.
—WNU Service.

Contrary to popular belief, a small, filthy, crowded pen is no place to fatten hogs. Crowded and filthy, the hogs cannot be as healthy and sanitary as they should to produce good, firm, wholesome meat. Overfat hogs do not produce the best pork.

Hogs will gain well and keep clean if allowed a reasonable amount of range and given all the balanced ration they can eat, and some exercise is needed to keep them healthy.

Since it is important that pork be produced as economically as is reasonably possible, it is a good practice to turn the hogs into a field where they can glean food that has been left from various crops.

Fattening hogs should have, in addition to the field gleanings, all the corn they can eat and a protein supplement should be kept before them at all times.

Fish meal or tankage, or a mixture containing one-half cottonseed tankage is recommended as a good protein supplement.

Along in the early winter, growers should begin to think about their spring farrows, and see that the necessary equipment is available.

Now is a good time to build a farrowing house. A plan for such a house may be obtained from county farm agents.

Finds Cost Varies in the Production of Milk

The cost of producing milk varies from month to month; it is highest in winter months and lowest in summer months, according to Dr. L. C. Cunningham of the department of agricultural economics at Cornell university.

Based on yearly average costs, he says, January and February are the two months when costs are highest, and June and July months when they are lowest. During fall months, the cost builds up toward a winter high; during spring months it tends to taper toward the summer low.

At the same time, the farm price of milk does not change correspondingly. More variation occurs in the cost of producing milk than in the price received at the farm. In general, he points out, the price of milk does not fall so far below the yearly average in the summer, nor rise so high in the winter months.

If the yearly average cost is taken as 100 per cent, the highest producing cost is represented by 128, and the lowest by 54, whereas the farm price of milk is represented by a high of 115 and a low of 84.

Dr. Cunningham's figures are based on a study of 437 dairy farms in four representative dairy sections of New York state.

Good Storage

One of the most important factors in good storage is maintaining the temperature in which each fruit and vegetable keeps best. Failure to provide this temperature shortens storage life. Proper amount of moisture in the air of storage rooms is also essential. Other causes of spoilage may have come from storage diseases such as rots and molds. Then there are varieties of fruits and vegetables which are naturally poor keepers. For winter storage, potatoes keep best in piles small enough so that not more than three feet can be measured from the center of the pile to the outside. Potatoes need air, and they should be free from loose dirt when placed in storage. Moist air helps in preventing potatoes from shrinking, especially if the air temperature is somewhat higher than that recommended. Frequent sprinkling of the walls in the storage room is beneficial.

Notes of the Farm

With the exception of two years in the past 25, the farm value of the United States potato crop was below average when the total yield was above average and the farm value was higher when the crop was below average in size.

* * *

Soy bean meal mixed with powdered skim milk has been discovered by University of Minnesota scientists to be a good pollen substitute for bees.

* * *

The crop pest bindweed—or morning glory—defies drouth because its roots, that spread even as much as twenty-five to thirty feet, store up so much food for hard times.

* * *

According to estimates, mastitis and Bang's disease cause an average annual loss of $200 to every New York state dairyman.

* * *

Queen bees may be shipped by air mail. However, baby chicks are barred, since they can not stand the high altitudes.

* * *

Total slaughter of cattle and calves in the United States is expected to be smaller in 1937 than for either of the preceding two years.

A Severe Test

According to Marco Polo, when an aspirant to priesthood had arrived at the monastery, the prettiest young girls belonging came forth to meet him, and, hovering round, would overwhelm him with embraces and caresses. The old priests, meanwhile, stand by, keenly watching if he betrayed any pleasure at the caresses of the girls, he was rejected; but if he submitted himself to them coldly, and remained unmoved face, he was admitted to the priesthood.

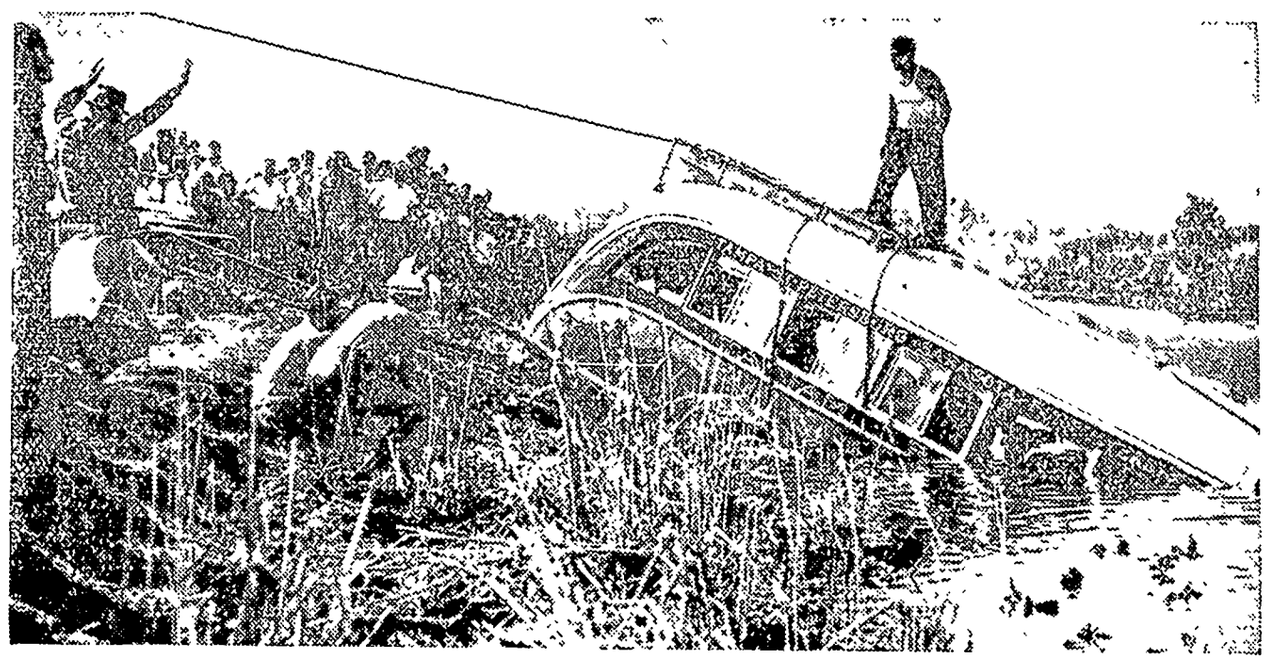
British Factory Assembles 30,000,000 Gas Masks

Girls prepare respirators at a factory that opened at Blackburn, England, recently which will supply 30,000,000 gas masks for the civilian population of England. The repirators which the girls are handling are claimed to be proof against all known gases.

Where Fatal Bus Accident Cost 17 Lives



At scene of recent bus accident in which 17 persons were drowned and 16 others injured on the Tamiami Trail highway 30 miles from Miami. The bus leaped from the road, overturned and plunged into a canal, drowning its victims. The 40-foot passenger bus was later hauled from the water by wrecking crews. The bus was bound from Miami to St. Petersburg, Fla.

Deserts Bridge Table for Handball

Ellen Meyers, Chicago miss who has deserted the bridge table for handball—generally regarded as an activity for men exclusively.

A Spanish Soldier's Farewell

It may be for the last time that this loyalist militiaman is kissing his little son. The touching photograph was made a few moments before a loyalist regiment marched to the firing line outside the Spanish capital.

ORIENTAL FEMINIST

Baroness Shrezue Ishimoto, Japan's most famous feminist leader, writer and lecturer, who is on a tour of the United States, interpreting the spirit of the modern Japanese woman before American audiences. With a guiding determination to bring education within the reach of every Japanese woman, the baroness claims but one ideal—to bring the women of her country out of feudalism into the light of a greater freedom.

HEADS GERMAN NAVY

Admiral Carls, former vice admiral, who was raised to full rank and the post of commander of the German fleet following the surprise retirement of Admiral Foerster. According to rumor from the German capital, reason for retirement of Admiral Foerster was his disagreement with Hitler over the naval policy with regard to Spain.

Simplicity That Intrigues

THIS is the problem: Sister wants to entertain the Girl Scouts, it's Jule's turn to have the Bid-or-Bi club and Rose insists she can't put off the Laff-a-Lots a minute longer. And each of them has just finished a new dress and is anxious to wear it for the occasion.

Sister's Choice.

Sister's bit of intrigue is, as you can see, a dress worth wanting to show off (Pattern 1223). It is made of velveteen this time and a little later on she's going to blossom out in a bright crisp gingham version for school. The smart collar, flattering flared skirt and puff sleeves are good reasons for this frock's popularity. It comes in sizes 6 to 14 years. Size 8 requires 2⅛ yards of 39 inch material.

Jule's Entertaining Dress.

Jule knows a neat trick when she sees one whether on the table or in a page of fashions, and she didn't miscue in choosing Pattern 1998. She'll wear this snappy shirt frock when she's "it" to entertain and because she chose broadcloth it will look more trig and lovely after each washing. The diagram shows why a few hours is all that's needed to sew this grand number. You may have it in sizes 34 to 46. Size 36 requires 4⅔ yards of 35 inch material. With long sleeves 4⅞ yards.

It Was Easy, Says Rose.

They didn't believe Rose when she said she made this startlingly pretty dress (Pattern 1224). She did though, even the buttonholes! However, the same stunning effect can be had by sewing the buttons on for trimming only. The elegance of the princess-like lines, the eclat of the heart shaped sleeves and withal its ease of construction make the question read "How can I help but make this dress?" It is available in sizes 12 to 20 (30 to 40 bust). Size 14 requires 4⅜ yards of 39 inch material, plus ⅝ yard contrasting. With long sleeves 4⅞ yards required.

New Pattern Book.

Send for the Barbara Bell Spring and Summer Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns. Interesting and exclusive fashions for little children and the difficult junior age; slenderizing, well-cut patterns for the mature figure; afternoon dresses for the most particular young women and matrons and other patterns for special occasions are all to be found in the Barbara Bell Pattern Book. Send 15 cents (in coins) today for your copy.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Patterns 15 cents (in coins) each.

Melvin Neuberger drove to Des Moines last Wednesday afternoon to take in the Iowa Hardware Dealer's Convention for a couple of days. This was the first year that Ed. Jacobs, local hardware dealer had missed the convention for about fifteen years. Ed. is recuperating from a recent operation and is making a good recovery

The Senior clas of the Klemme High School, accompanied by Supt. and Mrs. Galbreth, drove to Mason City Saturday where the Seniors had their pictures taken at the Russell Studio.
They went in three cars and had quite a time battling the storm getting back to Klemme. Supt. Galbreth and his passengers had to stay at Ventura for the night as they could get no further. Emily Paul and her passengers were fisrt to arrive m Klemme, getting in about 8:00 p m Harold Abele had car trouble and had to have his car towed into Garner and then arrived in Klemme about ten o'clock The three cars left Mason City shortly after 5:00 p. m

Entertained Bridge Club

Mrs. Fred J. Arnold was hostess to the U Delt Em Bridge Club at her home Thursday afternoon Lunch was served following the games. First, second and third high scores were won by Mrs. Kudje, Mrs Wilson and Mrs. Lawhorn, while Mrs Jacobs drew a prize Mrs Walter Lemke was a guest.

TIMES OFFICE REDECORATED BY WORLD'S BEST PAINTER

Last week George Lawhorn interior decorator extraordinary and the world's best painter, dabbed paint here and there in the Times Office with the result that blotches here and there became a rather nice decoration and the final results were quite pleasing to the eye. .all except one place on the wall that the Times "devil" hid by hanging a big calender over said eyesore. That spot has caused painter Lawhorn many sleepless nights The more he daubed to cover the spot, the worse it got. Consultations were called experiments were tried out, the blotch got bigger and worser Why it got that way had George considerably down, until Rev Cal Grosshuesch came along took a squint at the big blotch, and then solved the question "Why," says he, "that's where you had Landon's picture hanging!"

He was right!

LOCAL BASKET BALL STATISTICS

The Shamrock victory over Hayfield Friday night broke a few records in local high school sport.

The 75 to 18 score was the highest score in high school competition on the local floor, and as far as we can learn, is the biggest score ever turned in by a high school team in the Seven Eagles Conference or in Hancock County

Files from the Times show that in 1935 "Pete" Kilgore set a floor record for individual scoring when the Shamrocks defeated Ventura 56 to 16 and he contributed 22 points by lacing in 11 field goals.

In the game Friday night "Buster" Jorgenson shattered the floor record by looping 15 field goals and earning 3 free throws for a total of 33 points. That may also be a record in both the Seven Eagles Conference nd in Hancock County. Last year "Toky" Ahrenkiel, Goodell's lanky hot-shot forward made 23 points when Goodell defeated Hayfield 63 to 22.

The Klemme Vagabonds have piled up the biggest score on the local floor when they defeated Alexander March 7, 1936 by a score of 84 to 34 in an independent game. in this game K. Koerner made 22 points to lead the Vagabonds, and Vestweber led Alexander with 18 points.

In 1934 Clarence Lemke set a floor record for independent basket ball on the local floor for individual scoring when he made 24 points against Sheffield.

Continuing statistics for the Shamrocks this year: They have played 15 games to date running up a total of 549 points as against their opponents 308 points, on a net gain of 241 points. The Shamrocks have lost four games by a total of 16 points or an average loss of only 4 points a game.

The Shamrocks have averaged to date 36½ points per game, and their oponents have averaged 20½ points per game, giving them a 16 point average lead in all of the fifteen games played to date.

And, that's good basketball on anybody's court.

Again, what's in a name lawsuit between Luther and Hermann Rongg, r ants to rights to a pa Leon R. Yankwich of L ruled: "The court w Wright is wrong and right."

THE KLEMME TIMES

VOLUME 41 — KLEMME, IOWA, WEDNESDAY EVENING, FEBRUARY 24, 1937 — NUMBER 40

Former Klemme Girl And Husband Tell About Flood

Louisville, Kentucky
February 14, 1937

Dear Friends:

It was suggested that we write a sort of "Flood Report" for the Klemme Times and as we receive the Klemme Times each week we learned about the contribution made by the Klemme people to the Red Cross. We know therefore that you are interested and believe we can give you some idea of what happened here since Jan. 21st. We were fortunate to be living on the one high spot in the west end just three blocks from the river while the store is six miles east of us on East Broadway.

On Thursday evening, Jan 21st, Beargrass Creek which practically divides crescent Hill and the Highlands from the rest of the city started backing up East Broadway. After attending a meeting of the officials of the American Legion, where some hurried plans were made for relief work, Lyle, with the help of some of his salesmen, succeeded in moving everything out of the basement of the Great American Tea Company store and placing all merchandise about three feet up from the floor This work was finished about 4:00 a. m Friday. At 7:30 a. m the basement was filled and at noon water was knee deep on the floor After shopping all over Louisville for hip boots Lyle purchased the last pair at Sears Roebuck, two sizes to small but able to get into them and glad to get them. We also bought oil lamps, kerosene and groceries of all kinds that did not require cooking. Midnight Friday found me boiling potatoes while the gas was still on. Lyle was out helping friends move furniture to second floors. At 3:00 a. m. our neighbor, Police Officer Rus Loid, came home quite worried which meant there was much danger as he was born and raised in Louisville and knew something of floods Saturday morning he agreed with Lyle that Carolyn and I had better leave and go to Lexington. After much driving we reached the Bus Station where we boarded the last and only bus leaving.

No trains or busses left Louisville in any direction Friday but Saturday morning a detour was discovered whereby we reached Lexington and stayed with friends. I talk to Lyle Monday morning, Jan. 25th and learned that he was safe and the water had not reached our first floor as yet We were unable to communicate with each other again until the following Monday when he was able to drive to Lexington. He returned the next day and Carolyn and I returned the following Sunday, Feb 7th, finding a much different city than when we left. People were beginning to return to their homes to clean out the mud and filth Furniture was being carried out in the yard and piled up as rubbish. Pianos, radios, overstuffed suites, dining tables, all fallen apart, and mattresses, linens and drapes, a mass of mud and windows and doors broken Garages are turned over and carried out into alleys and streets.

In many low sections homes are turned on the side, moved off the foundations and in many cases entirely gone One of our salesmen owned a nice little home which floated one-half mile away and another house is now standing where it used to be. Many homes will have to be rebuilt entirely while many will need only new plaster and woodwork and floors.

Refugees were and still are being cared for as well as possible in churches, schools and private homes. The Red Cross provides food and clothing. In the Highlands and Crescent Hill there were sixteen to twenty people in four and five room homes. Nearly everyone in our small high spot remained at home keeping warm as best they could with fireplaces and stoves.

Lyle will now give you some idea of the relief work done in the west end while I was in Lexington.

Mrs. Burr has very effectively described events leading up to the peak of the crest. I wil try to give you a word picture of what actually happened during the time that the "Beautiful Ohio" river was ravaging its hardest. Our home is located in the section called Shawnee only three blocks from the river which makes a horse shoe around Louisville, bordering the business section on the north and our Beautiful Shawnee on the west. As early as Wednesday, Jan. 20th, the northeast section of town called "The Point" was flooded and Thursday we were greatly concerned about the safety of our home. By midnight Thursday it was evident that business houses in the vicinity of our store would be flooded By Friday it was hard to drive from our home to town, a distance of six miles. Saturday, Jan 23rd, we did nearly the impossible to get to town where Mrs. Burr and Carolyn boarded the bus for Lexington. Knowing that they were safe relieved my mind of a great burden and left me free to assist in rescue work which was becoming a problem. At this time it was a certainty that our store, stock, office would be gone except what was turned over to relief work so I returned to the vicinity of our home as best I could driving through water which crept into the car. Three of us neighbors formed a rescue party, two of us representing the American Legion and the third a Police Officer. By taking advantage of our authority we secured a boat and later on a motor for it. As it was evident that our homes were in no immediate danger we had only to go two blocks to begin in ernest evacuating people from their homes We loaded our boat with as many as we could safely transport and deposited our "cargo" in the nearest two story building we came to which usually was a church or a school. Being in our rescue boat continuously we could hear radio calls only when we were unloading our refugees, then we would take the nearest address given over the radio Of course hundreds of rescue boats were doing the same thing and occasionally we would get to an address to find the people had already evacuated Had everyone been willing to be removed, rescue work would have been much easier Many folks would not leave until water was actually on their floors when they became panicky and it was very difficult to keep from overloading the boat. We worked frantically until 3:00 a m. Sunday, Jan 24th, when we "Flopped" for two hours rest but not sleep as cries for help were ringing in our ears Then a most heartbreaking thing happened—rain started falling and that rain nearly drenched the hearts out of us It took all the heart and nerve we had to push out on another day and night of rescue work. We paraffined our hats and wore oilcloth over our shoulders to try and shed some water but every minute the rain fell harder and the water kept raising and as the day and night wore on we were so wet and low in spirits that only Divine Providence and pleas for help kept us going Sometime during the night of Sunday, Jan 24th the rain ceased and that put new power into all of us Old Man River kept on raising and rescue work continued through to Wednesday noon when the river reached its crest of 57 1 feet, just 29 1 feet above flood stage. Our home was indeed protected as we had only four feet of water in our basement and our back yard was dry, however the street was covered about three feet deep in front of the house By the time the river reached its crest nearly all people who were fortunate enough to be in second story houses or those still more fortunate who were on first floors were practically out of food. From Wednesday noon, Jan 27th, until Sunday night we were busy boating food to these people Commissaries were established at the few dry spots in the west end from which we secured the groceries of milk, bread and canned food Except for a few homes who had fire places or coal or kerosene stoves no one was able to cook and heat was a rare luxury as the gas, electricity and telephone were all extinguished as early as Monday Jan. 25th Many resourceful people built stoves out of garbage cans and did their limited cooking and boiling of water on their porches By Monday, Feb 1st, the water had receded sufficiently to allow most people to walk to the commissary on dry land which was indeed a welcome privilege.

At this time my efforts were no longer needed so I attempted to turn my attention again to my business which was almost a total loss I drove to Lexington and the reunion with my wife and little daughter wa indeed a happy occasion As yet Louisville was an unsafe place for them and they did not return until Sunday, Feb 7th Even though we are still without lights or gas we are mighty thankful that our home is not in the same pitiful condition as are 90 per cent of the homes of our beautiful Shawnee and the west end

Should you hear reports that 33 of our 40 square miles were covered with water from a depth of two to thirty feet, you may believe them for that is correct. We were certainly washed but not washed clean or washed out for Louisville is cleaning up and coming back to be a bigger and better city touched by an abundance of brotherly love.

Louisville is mighty thankful for the help received from outside communities. Times such as we have experienced certainly prove who our friends are. To you good people of Klemme and vicinity we are grateful for your assistance through the Red Cross and other channels and in behalf of Louisville, Mrs. Burr, our little daughter and myself, we wish to say Thank You

Sincerely
Mr and Mrs Lyle Burr

JURY LIST FOR MARCH TERM

Following are those people drawn for the Petit Jury for the March Term of the Hancock County Court. Report for duty March 16th, 1937, at 10:00 o'clock a. m

Wayne Lemke Married Girl From Clarion At Galesburg

FORMER KLEMME YOUNG MAN WEDS CLARION GIRL

Were Married Feb. 12th At Methodist Parsonage At Galesburg, Illinois

Word has been received here by relatives of the marriage of Miss Katherine Wendell, daughter of Mr. and Mrs. Theodore Wendell of Clarion, to Mr Wayne R. Lemke, oldest son of Mr. and Mrs. O W Lemke of near Klemme, on Friday, February 12th at 8:00 o'clock p m. at the Methodist parsonage at Galesburg, Illinois by the Rev. Arthur Cotes, Pastor. The single ring ceremony was used.

The ceremony was witnessed by Mr. and Mrs. Lee Hendryx, friends of the young couple, of Galesburg.

The bride was attired in a gown of Royal Blue Crepe and wore black accesories The groom wore the conventional blue serge suit

Mrs Hendryx was attired in a brown crepe dress with brown accessories. Mr Hendryx wore Oxford gray

Mrs Lemke graduated from the Clarion High School with the class of '35 and since then has been staying at the home of her parents in Clarion.

Mr. Lemke graduated from the Klemme High School with the class of '26 and for the next year and a half attended the University of Iowa at Iowa City. He was later employed at the J. C. Penny Co at Mason City for three years and after leaving there he operated a photograph studio in Algona for a couple of years.

After a short honeymoon trip Mr and Mrs. Lemke will be at home at 95 Lincoln St., Galesburg, Illinois.

Friends extend congratulations.

J. V. Coulven wrote to the Chicago traffic court that he "regretted his inability to accept a summons for speeding."

TWO KLEMME HIGH SCHOOL STUDENTS INJURED IN AUTO CRASH

Emily Paul, Klemme High School senior, and Milton Paul, a sophomore, children of Mr and Mrs Herman Paul were injured in an auto accident Saturday evening at about six-thirty o'clock on Highway 69 north of Klemme near the Ben V Greiman farm.

Emily suffered a fractured knee cap on her left leg, and a bone in her right wrist was cracked and a cut in her forehead required four stitches to close Milton was badly bruised on his face After the accident passing motorists took them to Garner for treatment.

The accident happened when Emily and Milton were returning home from Mason City where the former had been that day to have pictures retaken as a member of the Senior class. When at a point near the Greiman farm Milton, who was driving, saw the approaching car through the blizzard and he pulled as far to his side of the road as snow banks would permit. The approaching car was occupied by two young ladies from Cedar Rapids Evidently they were confused by the blinding snow and struck the Paul car. Both cars were more or less smashed up in front as they met head-on. The girls from Cedar Rapids were not injured and journeyed on to Estherville by train

The Paul children remained at Garner over night and were brought to Klemme Sunday noon. Both are recovering

BLIZZARD OVER WEEK END WORST ONE THIS WINTER

Iowa is just recovering from the effects of a good old fashioned blizzard that swept down Saturday afternoon and raged for about 24 hours, blocking roads and tieing up traffic.

Keith Stille Winner Of Local Spelling Contest

GOODELL WINS SECOND TILT WITH SHAMROCKS

Fourth Quarter Rally Falls Short By Two Points

(By K.H.S. Sports Editor)

A determined rally in the closing minutes of play fell short by two points, and a fighting band of Klemme Shamrocks again bowed to the rival Goodell cagers by a count of 27 to 25 in a game played at Goodell last Friday night. Trailing by seven points with half of the last period gone, staged a drive that looked like a sure victory charge, but the timer's horn cut it short before the green and white cagers could tie the score.

Coach Kingery's men dominated the play in all but the third quarter, when Dennis, Goodell's veteran guard, cut loose with three long one-handed shots that would break up anybody's ball game Klemme led at the end of the first quarter, 4 to 3, and at the half, 14 to 10; but the sharp-shooting of Dennis and his mates gave the home team a 24 to 17 lead at the end of the thrid period, and they never relinquished their advantage.

Leading the Shamrocks in their game fight was Captain Ted Kaduce, who flipped in four field goals and two free throws to lead the scoring for both teams. Jorgenson with five points, Lemke and Keeper with four apiece, and Schuldt with two, completed the Klemme scoring.

Little Shamrocks Win Hard Battle

The Little Shamrocks were pressed hard all the way but pulled out of danger in the last quarter to beat their neighbor rivals by a score of 20 to 14. Ruben Grosshuesch scored seven field goals and a free throw in this game to win high point honors by a wide margin.

Following is the box score of the first team game:

KLEMME 25

PLAYER	FG	FT	F
Jorgenson, f	2	1	0
Lemke, f	2	0	2
Grosshuesch, f.	0	0	1
Kaduce, c.	4	2	2
Keeper, g.	2	0	0
Schuldt, g	1	0	1
TOTALS	11	3	6

GOODELL 27

PLAYER	FG	FT	F
Boller, f.	2	0	1
Zielie, f	2	1	0
Burk, f.	0	0	0
Dawson, c.	1	0	1
Hofer, g	2	3	2
Dennis, g	4	1	2
TOTALS	11	5	6

GOODELL CAGERS RETAIN PERFECT RECORD IN CONFERENCE PLAY

The feature game of the Seven Eagles Conference last week saw the Klemme Shamrocks come uncomfortable close to shattering Goodell's winning streak when they put on last quarter drive to hold Goodell to one point while they pulled up from Goodell's 26 to 17 lead to stop at 25 as Goodell put in free throw to end the game 25 to 27 The game was a fine exhibition of basket ball throughout

The big surprise in Conference play was pulled by Woden when they downed Kanawha 23 to 19 on the Woden floor

Crystal Lake found an easy victory at Hayfield when they defeated the haymakers 39 to 19 Hayfield holds a perfect record with no wins

Following are the standings.

TEAM	Won	Lost	Ptc.
Goodell	10	0	1.000
Klemme	6	3	.666
Kanawha	6	4	.600
Woden	4	6	.400
Crystal Lake	3	7	.300
Hayfield	0	9	.000

LOCAL SPELLING CONTEST WAS HELD FRIDAY

Keith Stille Will Represent Klemme School In County Contest

The five best spellers in each grade were chosen Thursday afternoon Friday the five best spellers from the second grade competed against the five best spellers from the third grade and then the five surviving spellers from these two grades spelled the fourth grade etc. A student must fail to spell correctly on two didfferent words before he is eliminated. Students pronounced the words before spelling, and if necessary the teachers pronouncing the words gave illustrative sentences to make the meaning clear.

When only two spellers remained at the end of the contest and one missed a word, the other had to spell that word correctly and another word correctly before he was the winner.

The five best spellers in the second grade were:
Roger Ridder,
Phyllis Christance,
Peggy Lou Coobs
Dean Jacobs,
Willis Anderson,

and they spelled against the five best in the third grade:
Ruth Bell
Carol Bock,
Mayis Meyer,
Esther Tiggeman
Mary Lou Neitland.

From these spellers the five best were·
Roger Ridder,
Phyllis Christance,
Ruth Bell,
Carol Bock,
Esther Tigegman,

and they spelled against the five best in the fourth grade:
Phyllis Christiance,
Ruth Bell,
Carol Bock,
Herbert Schwartz,
Emily Johnson.

These left took on the five best spellers in the fifth grade, leaving·
Ruth Bell,
Robert Reed,
Corrine Merkel,
Barbara Johnson,
Lawrence Bock,

who took on the five best spellers in the sixth grade, leaving,
Lawrence Bock,
Betty Reed,
Eugene Johnson,
Betty Schuldt,
Eugene Haberkamp,

who took on the five best spellers in the seventh grade, leaving,
Betty Reed,
Eugene Johnson,
Melvin Coobs,
Ellen Kilgore,
Charles Bock,

who took on the five best spellers in the eighth grade, leaving,
Jackie Kudie.
Charles Bock,
Melvin Coobs,
Shirley Johnson,
Keith Stille.

Shirley Johnson missnelled "curiosity," so Kieth Stille had to spell the same word and then spell another word, which was "efficiency" which he spelled correctly. Keith will represent the Klemme schools at the county contest a Garner, which will be held some time next month.

Certificates were awarded to each student winning first place in each grade. The following received them:

Second grade, Roger Ridder,
Third grade, Ruth Bell,
Fourth grade, Marjorie Hartbeck,
Fifth grade, Robert Reed,
Sixth grade, Betty Jean Reed,
Seventh grade, Melvin Coobs,
Eighth grade, Keith Stille.

POULTRY

CONSIDER BEAUTY IN THE BREEDERS

Good Health Is Prerequisite in Choosing Birds.

By J. C. Taylor, Extension Poultryman, New Jersey State College of Agriculture. WNU Service.

"Make the useful more beautiful and the beautiful more useful" is the slogan many poultrymen are following in connection with their breeding programs these days. The old idea that a chicken cannot conform to breed characteristics and still lay eggs is out of date.

Good health is as much a prerequisite to breeding ability as it is to good looks. Bright eyes, smooth, glossy feathers and an abundance of vitality are qualities every bird should possess if it is to be considered for the breeding flock. Size, egg production and breed characteristics must also influence the final selection of breeders. Among these three factors, size is most important, for many high-producing flocks have had their standards lowered by poultrymen who have disregarded the size and weight in picking the breeders.

When pullets and cockerels are used in the breeding pen, weight is particularly important. Under no conditions should any bird weigh less than indicated in the weight standard for the various breeds commonly found, which follows: White Leghorns — cockerels, five pounds; cock birds, six; pullets, four; hens, four and a half. Plymouth Rocks—cockerels, eight; cock birds, nine and a half; pullets, six; hens, seven and a half. Wyandottes—cockerels, seven and a half pounds; cock birds, eight and a half; pullets, five and a half; hens, six and a half. Rhode Island Reds—cockerels, seven and a half pounds; cock birds, eight and a half; pullets, five and a half; hens, six and a half. Jersey Giants—cockerels, eleven pounds; cock birds, thirteen; pullets, eight; hens, ten pounds. New Hampshires—cockerels, seven and a half, cock birds, eight and a half; pullets, five and a half; hens, six and a half.

Pullorum Disease Easily Acquired by the Turkeys

Baby turkeys are as susceptible to pullorum disease as are baby chicks, and show the same manifestations, according to Dr. W. B. Hinshaw, associate veterinarian in the college of agriculture at Davis, says the California Pacific Rural Press, although no case has been found where an outbreak had originated from carriers in the turkey breeding flock.

The chief source of infection in poults, says Dr. Hinshaw, is in the hatchery where turkey eggs and chicken eggs are hatched in the same incubator.

Survivors from an acute outbreak apparently have a greater ability to abort the infection than chickens, and consequently fewer permanent carriers remain in the flock.

Dr. Hinshaw feels that in the light of present knowledge a general testing program for turkeys is not justifiable. Flocks that have become infected should be tested, however, if they are to be used for the production of hatching eggs.

Turkey Oldest Bird

Because the turkey is the oldest domesticated bird native to America, its history and the names of those pioneer men and women responsible for its development are unrecorded. It is evident, however, that the breed which we know as the Bronze is the oldest, resulting from refinement and selective breeding of the original wild bird. A great many breeders have played a part in bringing this grand breed to its present state, says Successful Farming.

In the Henyard

Plan on one nest to each five hens.

* * *

Produce infertile eggs by removing all males from the flock.

* * *

Hens may be used for the production of hatching eggs until two to five years of age.

* * *

The amount of heat needed in batteries depends upon the type of building, whether it is insulated and other factors.

* * *

In feeding out chickens and turkeys for market, it is advisable to eliminate fish meal and codliver oil from the feed during the last few weeks to avoid fishy taste and odor in the meat.

* * *

The past year's turkey crop was estimated at 20,000,000 birds, or more than 30 per cent over the previous year.

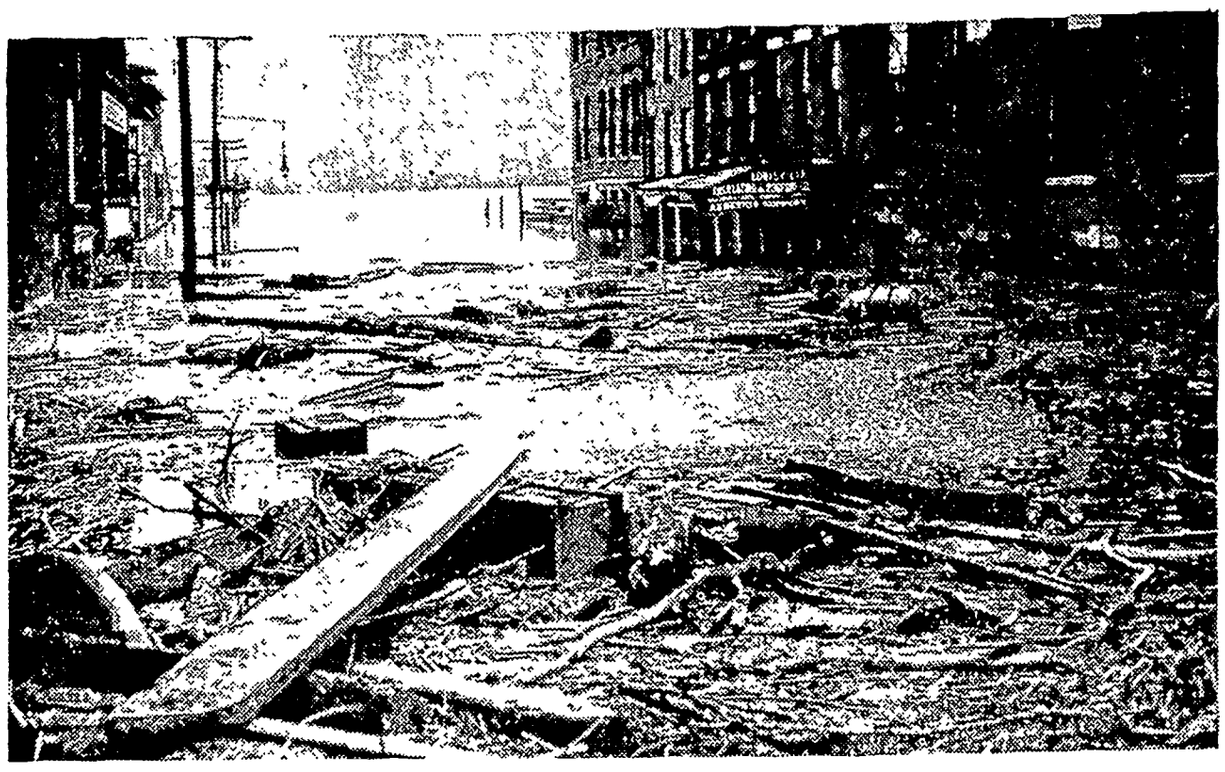
* * *

Granted that hens will have a tendency to use certain nests yet the more nests there are the less crowding and the less egg breakage

* * *

Iowa State college has developed a new type fowl which is called the "streamlined rooster." The fowl is the result of cross breeding between a pheasant and a leghorn chicken.

Flood Aftermath Reveals Sinister Scene



Scene in a Cincinnati street after the turbulent waters of the Ohio had receded. Rubble carried by the swollen river for hundreds of miles was left high and dry on city streets when the crest of the flood passed on, leaving scenes of ruin in its wake.

Schooled in War, They Deal in Mercy

Militia of the Ohio National Guard are pictured by a field kitchen as they prepare food for flood sufferers. A group of the refugees are lined up at the right as they await the call "Soup's On."

HE CAN TAKE IT!

This youngster found a temporary home in a box car when the Mississippi river flood drove him from his own home. He took flood discomfort in his stride. One thing that may account for his obvious high spirits was the fact that water shortage eliminated his Saturday night bath and the daily scrubbing behind the ears. It was estimated that more than 1,000,000 people in the Ohio and Mississippi valleys were rendered homeless by the flood. The known dead were estimated in excess of 400. Contributions by citizens everywhere to the special relief fund of the Red Cross were more than $17,000,000. The storm's damage was estimated at close to a billion dollars.

FLED RIVER'S WRATH

This aged inhabitant who fled the rich Mississippi bottom lands in the face of the raging flood waters of "Ol' Man River," has a startled stare for the photographer who snapped him at his refugee camp in Memphis.

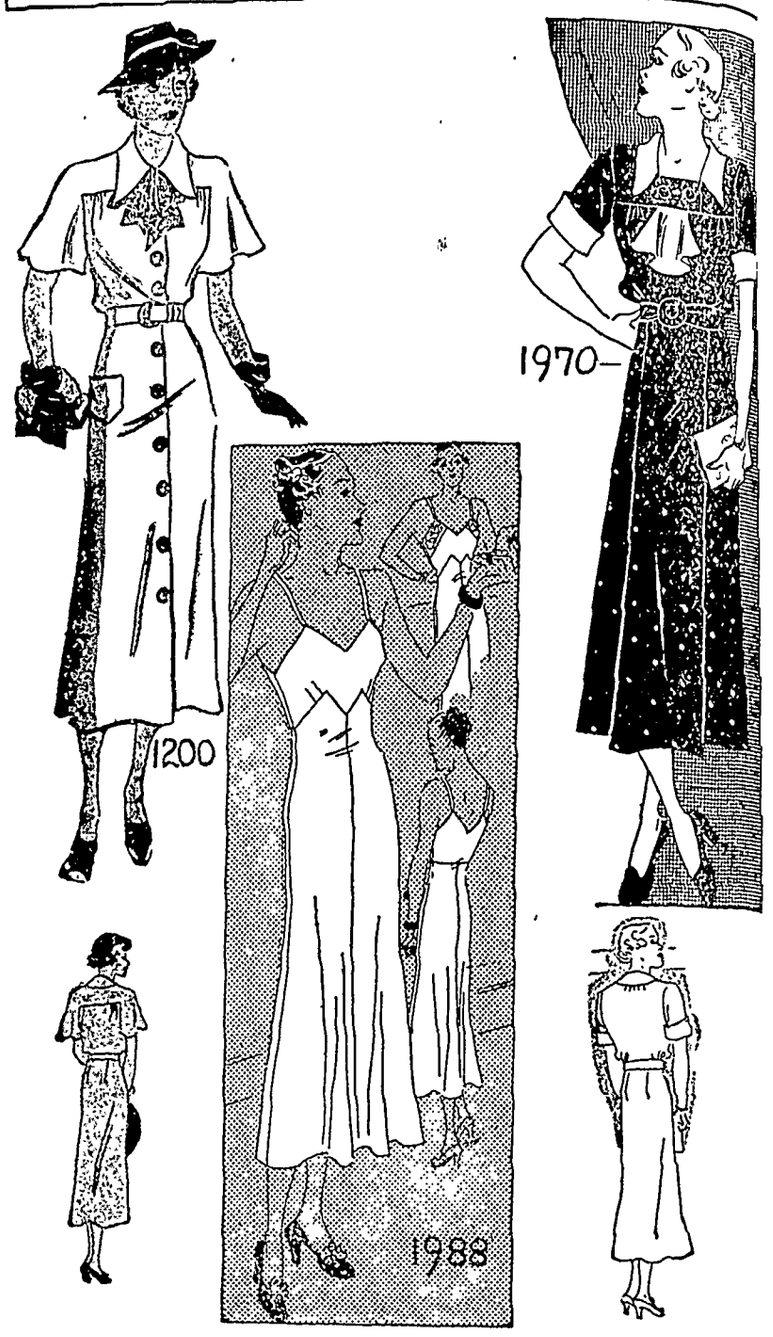
Box Car Becomes Home for Refugees

Box car home of flood refugees driven from their farm homes near Ridgely, Tenn., by the flood waters of the raging Mississippi. With all the discomfort and suffering caused by the greatest flood in the history of the Ohio and Mississippi valleys, these flood victims could still smile.

Red Cross Aids Flood Sufferers

Here's where your dimes, quarters and dollars went when you "earmarked" them for Red Cross relief. Grandma Donsky, who vows that in all her years she has never seen such a disaster, is seen receiving an allotment of sorely needed groceries at the Louisville Red Cross station.

We've a Date to Sew!



OH GRACE, before you go—you're not in a hurry, are you—notice Mabel's slip.

Isn't that the one that you were telling the girls about at the Bid-Or-Bi club last week, Mabel?

Yes, it's my Sew-Your-Own and I'm real proud of it because it fits so smoothly. There's no bunchiness at the waistline or hips—it's fitted, you see—and yet there's lots of room around the bottom. And do you know how long it took me to make it—no self praise, but exactly two hours by the clock. I simply followed the pattern's instruction chart—as easy to do as to concoct a new dessert.

Tie, Buttons, Hat to Match.

It would be grand for a tailored dress like mine, wouldn't it, Mabel?

Just the thing! Are you off to the Civic League luncheon at the Hall? Your dress made up beautifully in that aquamarine, Grace. I'm crazy about it. The yoke-and-sleeves-in-one idea is swell and the black tie and buttons to match your hat make you look like Mrs. Merriweather herself.

Now, now, cut the rave. You know that neat-but-not-gaudy is my motto. Bye, I'll see you in print.

So long . . . Anne, since you like my slip so much, I'll be glad to help you make one like it, if you want me to.

That's lovely of you, Mabel, but would that sort of thing be right for a "Stylish Stout" like me?

That Slenderizing Effect.

Oh, but you DON'T look stout. The panel in front breaks the skirt line, and the jabot and collar do wonders for the "Buzzum." It would be grand made up in a flowered print for Spring, Anne.

That very idea occurred to me. Why don't we get together tomorrow afternoon and sew—are you game? Come to my house. I baked a batch of oatmeal cookies today.

It's a date, Anne, I'll be over in the morning as soon as the kids are off to school.

Pattern 1200 is available in sizes 14 to 20 (32 to 42 bust). Size 16 requires 4⅛ yards of 39 inch material plus ⅜ yard contrasting.

Pattern 1970 is available in sizes 36 to 52. Size 38 requires 4¼ yards of 35 or 39 inch material plus ¾ yard contrasting.

Pattern 1988 is available in sizes 34 to 46. Size 36 requires 3⅞ yards of 39 inch material and 1 yard of ribbon for shoulder straps.

New Pattern Book.

Still Coughing?

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid nature to soothe and heal the inflamed membranes as the germ-laden phlegm is loosened and expelled.

Even if other remedies have failed, don't be discouraged, your druggist is authorized to guarantee Creomulsion and to refund your money if you are not satisfied with results from the very first bottle. Get Creomulsion right now. (Adv.)

Character Supports

Character must stand behind and support everything, the sermon, poem, picture, play.

Household Questions

When serving pickled onions use sugar tongs instead of a fork. It is easier to get them out of the jar.

* * *

A little sweet oil applied to bronzes after they are dusted, followed by a brisk rubbing with a chamois skin will bring out their rich tones.

* * *

Sliced almonds make a pleasant addition to chicken salad.

* * *

A little starch added to the water used in washing windows, mirrors and other glassware will not only help remove dirt but will give a lasting polish.

* * *

When broiling a steak, cut off excess fat around edge to prevent it from catching fire when placed below glowing fire.

CHEST COLD HAD HIM IN AGONY

Found Amazing RELIEF from PAIN

No need to suffer agony of muscular aches and pains! Thousands report wonderful soothing relief with Hamlins Wizard Oil. Just rub it on—rub it in. Acts quick. Relieves that terrible soreness. Loosens up stiff, achy muscles. Has a pleasant odor. Will not stain clothes. At all druggists.

HAMLINS **WIZARD OIL** For MUSCULAR ACHES and PAINS Due to RHEUMATISM—NEURALGIA LUMBAGO—CHEST COLDS.

CHANGE OF LIFE

Mrs. Bridget Welsh of 1528 Northside Ave., Lincoln, Nebr., said. "Dr. Pierce's Favorite Prescription brought me through the 'change' in excellent health. I worked quite hard all during that time too. Whenever I felt tired and wornout I would use the 'Prescription' as a tonic and I soon felt fine again. It increased my appetite. The 'Prescription' was recommended to me by a physician and for that reason I had the utmost confidence in it." Buy now!

Uncle Phil Says:

Judging Self

To judge and examine one's self is a labor full of profit.

The vein of gold in many a man is seldom taken for a yellow streak even by the dullest.

One gets two enjoyments out of going into debt. One when he borrows the money, the other when he pays it back.

Anticipated Pleasures

Why do we always wish time to hasten? Is it because our anticipated pleasures are so superior to our actual ones?

When a man becomes thoroughly contented he has outlived his usefulness.

If you are too smart for some people, they admire you, but seek other company.

When we don't like certain manners and certain manifestations of bad taste, we are not necessarily snobs.

It's Often Needed

One thing about the School of Experience—you can always take a post-graduate course.

Some are so easy-going that they don't take the trouble to nail a lie if it doesn't affect them.

This earth owes a hen a living, too; but she has sense enough to scratch for it.

To make better men it is necessary to begin with the children. That's what McGuffey's Readers did.

Dr. Pierce's Pleasant Pellets are an effective laxative. Sugar coated. Children like them. Buy now!—Adv.

Anger Abolishes Reason

An angry man is again angry with himself when he returns to reason.—Publius Syrus.

The Need of Man

Order is man's greatest need, and his true well-being.—Amiel.

Stomach Gas So Bad Seems To Hurt Heart

"The gas on my stomach was so bad I could not eat or sleep. Even my heart seemed to hurt. A friend suggested Adlerika. The first dose I took brought me relief. Now I eat as I wish, sleep fine and never felt better." —Mrs. Jas. Filler.

Adlerika acts on BOTH upper and lower bowels while ordinary laxatives act on the lower bowel only. Adlerika gives your system a thorough cleansing, bringing out old, poisonous matter that you would not believe was in your system and that has been causing gas pains, sour stomach, nervousness and headaches for months.

Dr. H. L. Shoub, New York, reports: "In addition to intestinal cleansing, Adlerika greatly reduces bacteria and colon bacilli." Give your bowels a REAL cleansing with Adlerika and see how good you feel. Just one spoonful relieves GAS and stubborn constipation. At all Leading Druggists.

Strength in Truth

Truth is a strong thing—let man's life be true!

MOROLINE SNOW WHITE PETROLEUM JELLY LARGE JARS 5¢ AND 10¢

MORNING DISTRESS is due to acid, upset stomach. Milnesia wafers (the original) quickly relieve acid stomach and give necessary elimination. Each wafer equals 4 teaspoonfuls of milk of magnesia. 20c, 35c & 60c.

Cleaning Up in the Wake of Raging Flood Waters

With shovels, brushes and pumps workmen clear ponds of water and heaps of gravel and dirt from the approach to Suspension bridge at Covington, Ky., as the flood waters of the Ohio river receded. This city was almost completely inundated during the flood.

Workmen Toil Against Time and the Father of Waters

Workmen are pictured building up the Mississippi river levee at Cairo, Ill., in an effort to stem the rising waters. The most disastrous flood in the history of the father of waters cost hundreds of lives, rendered more than a million people homeless and caused hundreds of dollars worth of damage.

Flood Refugees Enjoy a Hot Lunch

Unperturbed by their flight from the alluvial agricultural area of Arkansas, these children are seen eating at the refugee camp at Memphis, Tenn., with full enjoyment of the meal. All the roads from Arkansas into Memphis were clogged with refugees.

Derelicts of the Flood Find Safety

Grandpa C. E. Murphy, of Wilson, Ark., made homeless by the flood, shown enjoying the hospitality of the American Red Cross at the camp in the state fair grounds in Memphis, Tenn., as he reads the newspaper accounts of the flood—and cares for his granddaughter, Gloria Murphy.

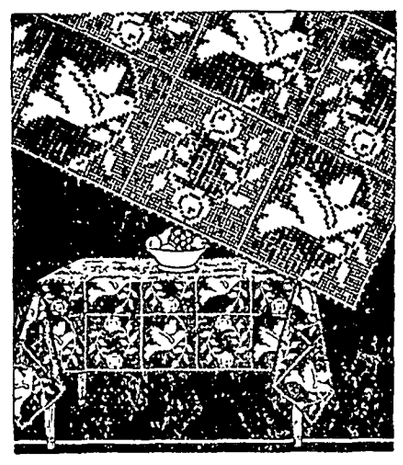
RED CROSS CHIEF

Admiral Cary T. Grayson, chairman of the American Red Cross which has dedicated itself to the task of relieving the suffering of flood refugees. Red Cross nurses, doctors and hospital units have prevented the spread of epidemics. Funds raised by public contributions have provided food, shelter and clothing for the sufferers.

GEN. MALIN CRAIG

Gen. Malin Craig, chief of staff of the U. S. army, who had direction of the task of combatting the flood waters of the Ohio and Mississippi rivers, strengthening the levees, evacuating refugees from danger zones, providing shelter and preserving order in various areas. The U. S. Engineer Corps performed invaluable service in calculating the extent of the floods, the height of the water and in strengthening the levees.

A Luxurious Tablecloth

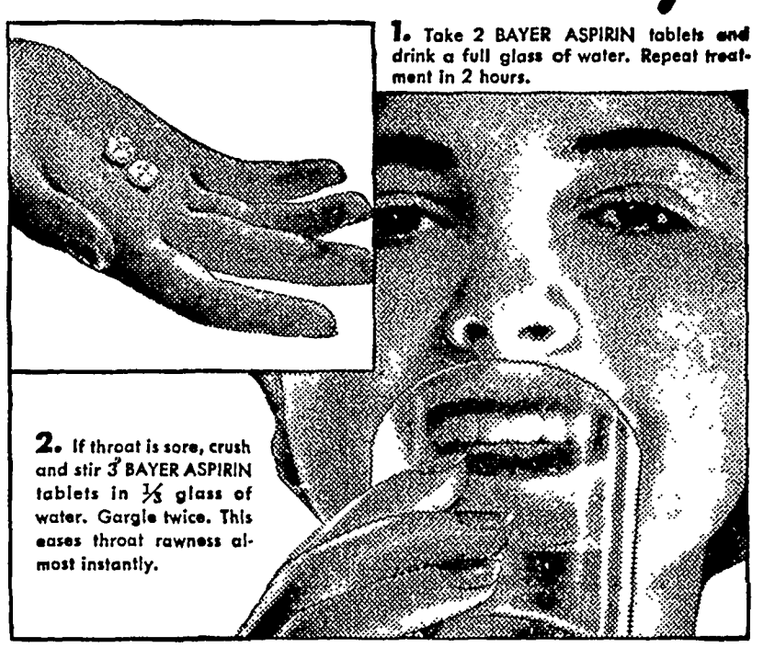


Companion squares in filet crochet make the loveliest household accessories. A square at a time made in spare moments—time you'll never miss—and before you know it you'll be ready to join them for a cloth or scarf. As a bedspread, too, this design will be a winner. Use string—it's easy to work with, inexpensive, lovely when done, and wears like iron. If it's gifts you're thinking of, use a finer cotton and make a pillow top, vanity set or other small articles that take but a few squares. In pattern 5738 you will find instructions and charts for making the squares shown; an illustration of them and of the stitches used; material requirements.

To obtain this pattern send 15 cents in stamps or coins (coins preferred) to The Sewing Circle Household Arts Dept., 259 W. Fourteenth St., New York, N. Y.

Write plainly pattern number, your name and address.

15¢-Price Now of Famous Cold Remedy



1. Take 2 BAYER ASPIRIN tablets and drink a full glass of water. Repeat treatment in 2 hours.
2. If throat is sore, crush and stir 3 BAYER ASPIRIN tablets in ⅓ glass of water. Gargle twice. This eases throat rawness almost instantly.

Genuine Bayer Aspirin the Thing To Take for Fast Relief

Instead of buying costly medicines for a cold, try the way nearly any doctor you ask will approve as the modern way — BAYER ASPIRIN. It is perhaps the most famous and most widely used of all cold remedies today — yet costs only 15¢ for a dozen tablets or two full dozen for a quarter anywhere in the United States. Virtually 1¢ a tablet.

The way you use it is this: Two BAYER tablets when you feel a cold coming on. Take with a full glass of water. Then repeat, if necessary, according to directions in each package. This will act to fight fever, and pains which usually accompany colds. Relief comes rapidly.

Get the genuine BAYER ASPIRIN by asking for it by its full name: not by the name "aspirin" alone.

STEERING GEAR ALIBIS

An automobile expert has recently written an article debunking the ancient alibi of careless or drunken drivers who blame their acidents on failure of the steering gear He states that the most rigid tests by manufacturers have proved that steering gear failure is practically unknown

The fact is, no part of a moderr car is structurally stronger or more certain of responding to the demands made on it than the steering gear But the old excuse is still worked to a finish, and is usually accepted by those who should know better

If the driver is drunk and weaving his way along when the crash comes and he lives to tell the tale, he calls upon the ghost of his steering gear If he is speeding on a slick pavement and goes into a skid or was dozing and did not see the other car before he hit it—always the steering gear is blamed And the steering gar can't talk back

It's time we stoppd listening to such alibis, which are false 999 times out if 1 000 Some 37.000 people are killed and more than a million are injured every year, and at least 90 per cent of these accidents are the result of foolhardy, reckless or drunken driving

To this ghastly toll is to be reduced the dangerous driver must be punished and not permitted to get away with the old steering gear alibi.

A MARTYR TO SCIENCE

Another distinguished name was added to the long list of martyrs to science when Henry T. Koenig a Denver Chemist, died as a result of research work with radium He was the last survivor of 20 scientists who aided Mme Curie, co-discoverer of radium, in her early experiments with that powerful and mysterious mineral

Like those other heroes of the laboratory Koenig continued on as long as possible, although he knew he was doomed by a malignant infection which caused cancer of the lip, from which he finally died But the discoveries made by him and his brave companions have made possible relief for thousands now living, and will benefit millions yet unborn

Koenigs method of extracting radium at less cost from the ores in which it is found in infestimal quantities is recognized as one of the greatest contributions of the present century to medical science.

Truly, as Milton says, "peace has her virtories no less renowned than war," but the world still showers greater honors on heroes of war than on heroes of peace. Perhaps when man becomes more civilized those who save life may be esteemed at least equally with those who destroy it.

NATURE RAMBLES

Trees, like all other forms of life, are dependent upon the once plentiful necessities for their existance, water, food, sunlight and protection

Our native trees are now facing a grave danger and we see Nature's danger signs wherever we look, with the most necesary element, water, slowly disappearing We notice trees in their weakened condition subject to insects and disease which they cannot fight off

With our lack of moisture through over-drainage and excessive running-off of our rains and the destruction of our moisture holding areas, such as sloughs and unpastured woodlands, we find to bring about constructive cure for our loss of underground soil moisture we must give serious thought and effort.

Although it has taken all of us nearly fifty yearsto cause this condition, it can be remedied in time by tahe restoring of our native timber to its original state of undercover and leaf mulch Many of our drainage ditches which are dry may be strangled to prevent waste of precious water.

Even now if we enter into a period of excesive rainfall this water cannot penetrate the horizontal stratas of clay, found in most of our upland soils, and we would again face a dry cycle in a more serious condition than we have known in the past.

It has been shown that an oak forest will evaporate through its foliage 2000 to 2600 gallons of water per acre per day, which is equivalent to one-tenth inch of rainfall daily. Our lowland sloughs and ponds were created to maintain an even underground water level in seasons of shortage and plenty

If we continue to use our timberlands so that they cannot reproduce their kinds it will be but a question of time until the older trees in their weakened condition pass on and leave nothing of value for the future.

All of us dislike facts and figures, but let us remember our history of older nations. In the beginning they had their fertile prairies and forests rich in food Now these same countries are facing famine and disease. Some are buried in drifting sands and their locations cannot be found

Cretainly these rich lands were given to use wisely for food and we should protect them for the future

THRIFT AND SUCCESS

Opportunities come to everyone, but often the greatest opportunities cannot be grasped because it requires a little ready money to take advantage of them

This point is emphasized by a well-known financier, who in an article on thrift says "Those who become leaders in the business world found the turning point in their careers when they were able to take advantage of a great opportunity because they had money at hand In most cases the sum of money involved was small, but coupled with vision, ambition, clean living and self-mastery, these men were able to turn their nest eggs into colossal fortunes"

It is understandable that the habit of saving comes hard for most people, but having once made a start it is comparatively easy to continue Nothing inspires the confidence of business men in a young person more readily than the knowledge that he or she is able to save money, even though the amount saved from month to month is not large Many a young man has been enabled to make a most desirable business connection through a reputation for thrift and having a little ready cash.

Did you know that 36,000 young men and women reach the legal voting age each year? Some people wonder if they are being adequately educated to fully meet their responsibility While they are better fitted for this responsibility than most of the older voters were, the question still stands. Have the schools fully met their responsibility? Among many other things the schools should deeply impress upon the student is the fact of the great importance of law observance as a basis of good citizenship.

BANNING OF FIREARMS

Former Commissioner Whalen of New York favors legslation to prohibit the sale of firearms, on the theory that criminals would thereby be unable to get them. This brings up an old question, in which there is room for argument on both sides, but we doubt that a no-gun law would help much.

The trouble is that a professional crook would find a way, through smuggling, bribery or other unlawful means, to get his gun anyway. Even if all firearms were required to be registered it would take another army of inspectors to keep track of them, besides, every criminal would provide himself with a good-sized arsenal before the law could be put into effect.

Maybe the sole object sought by Mr Whalen could be accomplished the other way around—by making it compulsory for everybody to carry a gun after sundown Then the crooks would have a less advantage.

LOST—THIRTY BILLION TONS OF IOWA TOP SOIL

Erosion Has Taken Heavy Toll Of State's Virgin Land, Reconnaisance Survey Shows

Thirty billion tons of fertile soil! Unleashed by the breaking of the virgin sod, the mighty forces of erosion have levied that tremendous toll upon Iowa since the state was first settled, estimates P. E. Brown, head of the Department of Agromony at Iowa State College.

This is equivalent to a loss of more than 137,000 tons per 160 acre farm or approximately one-third of the original surface soil.

Acre Plant Food Loss 13,000

Dr Brown's estimate is based on a statewide reconnaisance soil survey conducted by the Soil Conservation Service of the U. S. Department of Agriculture and the Iowa Agriculture Experiment Station Results of the survey are reported in Special Report No. 2, "Soil Erosion m Iowa," availale from the Bulletin Office, Iowa State College, Ames, Iowa.

The survey indicates that a staggering volume of plant nutrients has acompanied the soil on its journey to the Gulf of Mexico. It is estimated that about 55 million tons of nitrogen, 18 million tons of phosphorus and 455 millin tons of potassium have been carried away from Iowa farms. On the basis of present prices of commercial fertillizers, it would cost close to $3,000 per acre to replace this plant food.

No Erosion On 13 Per Cent

"The capital value of Iowa farms, thus, is being depleted by erosion—a depletion that is actually far greater in value than the the land's market price," Dr Brown points out

The survey reveals that only about 13 per cent of the total land area of Iowa shows little or no erosion Approximately a third of the land shows slight sheet erosion with up to 25 per cent of the original surface soil washed away More than 14 per cent of the land has lost 25 to 50 per cent of its surface soil, and 31 per cent of the land has lost 50 to 75 per cent of the surface layer On 9 per cent of the land erosion has been so severe that 75 per cent or more of the original surface soil has washed away.

"This vast loss in capital stock to Iowa agriculture emphasizes further the need for immediate and concerted action to controll soil erosion," Dr Brown declares.

What do you do for frost bites What are the symptons of frost bite?

The affected part of the body becomes painfully cold and then suddenly the sense of feeling in that part is gone The affected part becomes white or grayish white in color

Keep the patient away from fire or warmly heated room.

Apply palm of hand, wool or fur to affected part

Massage the parts very gently then apply cold water

Apply ointment as you would to a burn because frost bite is the same in effect.

The object of the treatment is to bring the frozen part of tne body back to a normal temperature gradually and to restore circulation.

For every 59 men under arms in 1913 there are now 79.

Joe Ferguson, considered the best pocket billiard referee in the country, wears out three pairs of shoes a year just walking around the tables.

LIME CORN LAND THIS YEAR TO BOOST LEGUME GROWTH IN 1938

If a small grain crop and a legume are to follow corn, an application of ground limestone on the land after it has been plowed and and before the corn is planted, or after the corn is up, will insure a good crop of alfalfa, sweet clover or other legumes the follwing year, declares J. B. Peterson, of the Soils Department, Iowa State College. Lime should never be applied before the land is plowed.

If applied before corn planting time it may be worked into the soil through discing and harrowing. If applied after the corn is up, cultivation will mix it thoroughly into the soil where it will gradually neutralize soil acidity. As a general rule, lime should be applied to acid soil not les than three or four months before the legumious crop is to be grown.

Seventy-five per cent of the Iowa soils are acid, Mr. Peterson asserts. The eastern half, and the south central and southestern parts of the state are particularly in need of lime; often as much as two to four tons per acre. Farmers in doubt about the need of applying limestone to their soil, or the amount to apply or where to apply it should see their county agent. The Soils Department at Iowa State College will also test samples of soil as to lime needs free of charge.

COMPENSATION

When my luck seems all out
And I'm down at the mouth.
When I'm stuck in the North
And I want to go South;
When the world seems a blank
And there's no one I love
And it seems even Gods
Not in Heaven above,
I've a cure for my grouch
And it works like a shot—
I just think of the things
That I'm glad I am not!
A bird in a cage,
A fish in a bowl,
A pig in a pen,
A fox in a hole,
A bear in a pit,
A wolf in a trap,
A fowl on a spit,
A horse in a stable,
A cow in a shed,
A plate on the table,
The sheet on a bed,
The case on a pillow,
A bell on a door,
A branch on a willow,
A mat on the floor.
When I think of the hundreds of things I might be,
I get down on my knees and thank God that I'm me
Then my blues disappear, when I think what I got,
And quite soon I've forgotten the things I have not.

McLean System Will Save Swine Losses

—Prepared by American Foundation for Animal Health

Millions of dollars in swine losses could be prevented every year if farmers would universally adopt the "McLean County," or clean-ground system of rotating hog lots.

A hog lot which has been used for a period of years, is infested with literally billions of germs of swine diseases, and millions of eggs of swine parasites—ready and waiting for the next crop of pigs to be born.

Under the McLean County plan, the young pigs escape these dangers through the simple measure of moving both the sows and their young onto clean, fresh pasture land, about two or three weeks after the pigs are born. Here they grow to maturity without ever coming into contact with the infections of the old lot. And every year, the hog pasture is rotated just as corn land is now rotated.

A few posts, poles, and a load of straw are all the material needed to make a suitable shed for the temporary pasture. Then, when the shed is no longer needed, the posts and poles can be removed, and the straw burned.

If, along with the "clean ground" plan, farmers would universally adopt the practice of having their pigs vaccinated against cholera two or three weeks after weaning time, the annual saving in unnecessary death losses would amount to many million dollars. In spite of every precaution, cholera breaks out year after year, often where least expected. It is the most costly livestock disease in America, and the farmer who does not have his veterinarian immunize his swine, simply as a matter of common-sense insurance, is as foolish as the farmer who fails to take out fire insurance on his house and buildings.

GOODELL U. B. CHURCH

Dr. W. E. Dye, Pastor

Miss Zelda Eimbrink, S.S. Supt.

Sunday School 10:00 a. m.
Morning Worship 11:00 a. m.

On the account of the storm last Sunday we will begin the series of Sermons on:—"With Christ in the Deeper Lessons."

Sunday morning's subject: "The Lesson of True Greatness," Luke 22: 26-27.

This is an interesting study in the last week of Lord's Earthly Life.

If you are not attending church elsewhere we invite you to come ere. A welcome always awaits you. If you come once we know you will come again.

ay the eighth grade re- g letter from Mrs. d) Muenchow, in ans- letters that they wrote go.

seventh an deighth nts are working on reading.

hea. received 100 in spel- , Cl ek are: Melvin Coobs, , Hack, Allen Barz, Fred- ones, acqueline Kudje, Mar- and Keith Stille.

elcome **ades 5 and 6**

AF lay afternoon we had nd of the spelling con- test in our room. In fifth grade Robert Reed received first and in the sixth grade Betty Jean Reed received first. In the final contest that was held on Friday afternoon those who spelled were Robert Reed, Lawrence Bock, Julia Bell, Corrine Merkel, and Barbara Johnson Those who spelled on Friday from the sixth grade were Betty Jean Reed, Leonard Kaduce, Eugene Johnson, Betty Schuldt, and Eugene Haberkamp.

Mrs Reed visited our room on Friday afternoon We are always happy to have visitors

Phyllis Klotzbach has been absent for the past week beause of a burn she receved on her foot. We hope she will be able to return soon.

In sixth grade reading each pupil is making a booklet telling of the poem, "The Pied Piper" of Hamelin" in pictures.

Grades 1 and 2

We finished our Eskimo booklets this week Some were saved for the Exhibit.

In our spelling contest on Friday Phyllis Christiance, Roger Ridder, Peggy Coobs, Dean Jacobs and Willis Anderson competed with third grade Roger Ridder had won our second grade contest and was awarded a certificate.

Our breakfast bowls came one day last week. Ten children had eaten their hot cereal, so they received bowls. Two more will get their bowls soon

HANCOCK COUNTY TOURNAMENT THIS WEEK AT GARNER

The annual Hancock County Basket Ball Tournament will be held at the Garner high school gymnasium beginning Friday afternoon at 2:00 o'clock when Kanawha meets Crystal Lake

At 3:00 o'clock Woden meets Corwith The latter is favored to win, but Woden has shown considerable strength and may upset the dope, as it will be remembered they gave Kanawha a sound licking only last Friday night.

What will undoubtedly be the feature game of the tournament will begin at 4:00 o'clock when Klemme and Goodell meet Goodell is the defending county champion and winner of the Seven Eagles Conference this year However, in the two games they have played against Klemme they won by only two points in each game The Shamrocks, although they lost against Goodell Friday night, displayed plenty of power and outclassed Goodell throughout the greater part of the tussle, and put on a power house drive in the last quarter of play, holding Goodell to a single point while they pulled away from Goodell's 26 to 17 lead and ran the score up to 25 to 26 in a little over two minutes of play

In the evening the feature game will be between Britt and Garner at 7 30 o.clock Both teams are evenly matched and it is a toss up as to who the winner will be

The second game will be between the winner of the Kanawha-Crystal Lake game and Hayfield. Kanawha's Bulldogs are doped to come out head in these two games

The semi-finals will be played at 2:00 and 3:00 saturday afternoon, the consolation at 7:30 and the final at 8 45 Saturday night

GRAND JURY

Following are those drawn for the Hancock County Grand Jury for the year 1937, Report for duty for the March Term — March 9th 1937, at 10:00 o'clock a m

Wm F. Erdman, Corwith; W T Butts, Goodell; Henry Orthel, Woden; John C Freerksen, Kanawha; J M Swanson, Forest City; Wm Weiland, Britt; Harrison Taylor, Hayfield; Charley Meleney, Britt; G A Hortsman, Britt; Ole Eliason, Kanawha; C. R. Williams, Corwith; H H Ollenberg, Garner.

KLEMME M. E. CHURCH WILL ENTERTAIN LIBERTY CHURCH

Moving Pictures of Mexico Will Be Shown

Rev. W. G Muhleman will show pictures of Mexico at the Klemme Methodist Church next Monday evening, March 1st, at 8:00 o'clock These are pictures which he himself took while in Mexico last month. The public is invited to see the pictures

Preceding the pictures at 7:00 o'clock, the Liberty Church folks will be our guests at the regular Monthly Birthday Supper. Klemme folks, bring your baskets heaped up full Yes, bring two baskets.

MAKE MACHINERY REPAIRS NOW SO AS TO AVOID DELAY LATER

Farmers should begin checking over their new machinery now so that any new parts needed may be secured before "repair days" roll around says Byron T Vitue, extension assistant in agicultural engineering at Iowa State College

The question of buying a new machine or repairing an old one—a problem always facing the farmer—should be settled before the crop year is begun if field breakdowns with present equipment are to be avoided

Farmers should consider all factors before discarding or trading in their machines. In some cases money spent for repairs might more wisely be used in obtaining a new machine but usually a few dollars spent for new parts will make an old machine perform satisfactorily.

HAVE YOUR HORSES GAINING WEIGHT MONTH BEFORE SPRING WORK

Prepare your horses for spring work by having them gaining in weight at least thirty days before actual field work is to start. A B Caine, of the Animal Husandry Department, Iowa State College, advises Iowa farmers This will mean giving them more feed—more corn, oats and hay If a legume hay is fed care should be taken not to feed to much. One pound of alfalfa or soybean hay for each 100 pounds live weight of the horse is suffecient.

Before work horses are put to work in the field, their feet should be properly trimmed, in order to prevent cracking or breaking off If a portion of the hoof breaks off this will often leave the foot unbalanced which may not only cause unsoundness but may interfere with the horse's action The feet and legs should be viewed from the front and side to determine the correct shape before the trimming is done Mr Caine points out

Work horses should also be induced to shed their winter coat of hair before spring work Some farmers practice clipping long hair although this is not a general practice.

The horses shoulders made tender by winter idleness must be watched carefully Previous to spring work, shoulders may be toughened by a daily application of salt water This practice may be followed until the horse becomes hardened to work Misfit collars are the most common cause of sore shoulders Caine warns

A total of 523 persons died in Iowa during 1936 in highway accidents The figure was 52 less than in 1935

Miss Edna Ralton, a fat school teacher of San Francisco, got wedged between desks and a carpenter had to saw her out.

According to the Literary Digest, Prof P. J Schmidt has demonstrated that fish may be gradually frozen into a solid block of ice, and after being kept in that condition for three days or more will revive and go swimming about as usual when the ice around them is melted The demonstration was made before a Russian scientific society.

Recalling the "Hero of Manila Bay"

By ELMO SCOTT WATSON

IT WAS just 20 years ago that the word flashed over the wires from Washington, D C., that a man named George Dewey had died there and immediately thousands of Americans recalled once more how that name had thrilled them one May morning back in 1898 For this man was the "Hero of Manila Bay" and his astounding victory in the far-off Philippines at the very beginning of the Spanish-American war had at once placed his name high in that galaxy of naval heroes which includes the names of John Paul Jones, Stephen Decatur, Oliver Hazard Perry and David Farragut.

This was the man for whom they had poured out a flood of adulation such as few other Americans had ever before received and few have known since.

They built a triumphal arch in his honor in New York city, they raised money to buy a house in Washington for him, and they presented him with a loving cup made from 70,000 dimes.

They made songs about him, such popular ballads as:

"'Twas on a dewy morning in
the dewy month of May
When a man named Dewey sailed
into Manila bay."

They named their sons after him. (And if today you're introduced to a man whose first name is "Dewey," you're safe in guessing that he was born late in 1898 or early in 1899!)

And then these Americans who constitute The Public, which is consistent only in its inconsistency, proved once more its fickleness by turning against the man whose name they had flung against the stars They didn't approve of his marrying again nor of his deeding his gift house to his young second wife And when in response to what he understood was a popular demand, he announced his candidacy for the Presidency it was characterized as the "climax to a series of unfortunate mistakes" and the public that had once praised him now ridiculed him.

But this latter episode was forgotten when at sunset on January 16, 1917, he died. All the honors that man can give to a hero were his. There was a state funeral in the Capitol and burial in Arlington. The newspapers printed column upon column about his career and once more the name of the "Hero of Manila Bay" was on every American's lips.

It was thus for only a day or two. At that time Americans were facing the grim reality of their country's being drawn inevitably into the war then raging in Europe. Within three months after his burial in Arlington, America had gone in with the Allies, and under the shadow of this great conflict the war in which Dewey had won his fame grew more and more insignificant.

A Forgotten Hero.

Out of the World war came new heroes to be acclaimed and to the younger generation of Americans Admiral George Dewey became little more than a name in their school histories. And thus it has been for the last two decades.

But this year it will be heard again for America is preparing to celebrate the centennial of his birth. Vermont, and particularly its capital, Montpelier, where still stands the little house where he was born on December 26, 1837, will take the lead in the celebration The national capital, where he spent the sunset of his life, and where he is buried in Washington cathedral, will also participate and from these two centers will come the inspiration for a nation-wide observance of the career of one of the great figures in America's naval history—the "Hero of Manila Bay."

* * *

It has been said that Dewey was directly descended from Charlemagne and other European monarchs but he probably took greater pride in the sturdy line of New England patriots who were his more immediate ancestors—nine generations of them leading back to Thomas Dewey, the first of that name, who came from England and landed at Boston in 1633. Among them was his great-grandfather, William Dewey, who was a Minute Man at the outbreak of the Revolution and later a corporal in the Continental army who served at Saratoga under General Gates.

William's son, Simeon, was born at Hebron, Conn., and died in Montpelier, Vt., at the age of ninety-three. Simeon Dewey had made his impression on the life of Montpelier as justice of the peace and was one of the organizers of Dartmouth college who gave 50 acres of land for its use and support. Their son, Julius Y. Dewey, became a doctor.

John Barrett, biographer of Admiral Dewey, declares. "Dr. Julius Dewey explains the greatness of his son. He was great before him. He may not have won national fame, but his fellow citizens appreciated his sterling worth He was an exceptional man. He was a rare development of the very best Vermont stock."

Graduated from Norwich college at the age of seventeen, young Dewey, even though there was no heritage of the sea in his ancestry, decided he wanted to go to the United States Naval academy at Annapolis and Dr. Dewey secured the appointment from Vermont for his son. At first, young Dewey's grades were not high but after a warning from both his stern father and his teachers he improved his scholarship and was graduated third in his class in 1858.

A Baptism of Fire.

In April, 1861, Midshipman Dewey was commissioned lieutenant and soon had his baptism of fire. For he was assigned to the steam frigate Mississippi in the West Coast squadron in the Gulf of Mexico which brought him under the command of David G. Farragut.

Dewey was on the Mississippi when it ran ashore at Fort Jackson, after losing its bearing in the smoke of battle. On swimming away from the ship, Lieut. Dewey, after the order to abandon her came, saved the life of a sailor from drowning at the risk of his own life and Captain Smith in his report spoke of his bravery and coolness.

When the Civil war ended Dewey was a lieutenant-commander, a high rank for a young man of twenty-eight. Next he was stationed at the navy yard in Portsmouth, N. H., and there he met and fell in love with Susie, the daughter of Gov. Ichabod Goodwin. They were married in 1867.

In 1873 Dewey became the father of a son but it cost the life of the little boy's mother. Inconsolable over his loss, Dewey asked for a distant tour of duty so that he might forget his sorrow Leaving his son at home with his parents, Dewey went to the Pacific to take charge of some important surveys in that ocean and very quickly he began rising rapidly in the service He was commissioned a captain in 1884, commanded the Pensacola on the European station from 1885 to 1888, served as chief of the bureau of equipment from 1888 to 1893 and as a member of the lighthouse board from 1893 to 1896. In the latter year he was advanced to commodore and also served as president of the board of inspection and survey.

War With Spain.

During these years conditions under Spanish rule in Cuba had gone from bad to worse and American sympathies became so involved that by the fall of 1897 war with Spain seemed imminent. Commodore Dewey was in Washington at the time and his request to take command of the Pacific fleet had just been granted. Shortly before leaving the capital he happened one day to meet one of the justices of the Supreme court on the street, who said to him:

"Commodore, it looks as though the Spanish war were coming."

"It certainly does," was Dewey's answer.

"I suppose," said the justice, "that the first battle will be fought at Havana."

"No," said the commodore, "it will be fought at Manila."

"What do you mean?" said the justice, to which Dewey replied

ADMIRAL GEORGE DEWEY

"If I have anything to do with, I shall sail over in the night and capture Manila before breakfast."

That there was another man who had the same idea is shown by the cablegram which Dewey received at Hongkong, China, on February 25, 1898 from the vigorous young assistant secretary of the navy named Theodore Roosevelt. It read: "In the event of war with Spain, you will capture or destroy the Spanish ships in those waters and operate in the Philippines." Dewey was ready and waiting for just some such message as that. Although war had not yet been formally declared, this gave him a free hand to fight the Spaniard when and where he found him.

So with bands playing "The Star Spangled Banner," Dewey's squadron put out to sea from Hong Kong and headed for Manila, where, on May 1, 1898, in one of the shortest naval engagements in history, he destroyed the Spanish fleet without having a single man killed or suffering serious injury to any of the American ships. Next the Spanish navy yard at Cavite fell and the power of Spam in the East was ended for all time.

The Nation Is Thrilled.

The news of the victory at Manila thrilled the nation as had no other event for many a year. Immediately there was a demand for prompt and official recognition of Dewey's feat. President McKinley appointed him an acting rear admiral and in a message to congress on May 9, 1898, recommended that the thanks of congress be given to the victor of Manila. Not only was this done but, in addition, congress voted that a handsome jeweled sword be presented to Dewey by the government.

When the new rear admiral came back to the United States in 1899 the sword was presented to him by the President at an impressive ceremony in front of the Capitol in the presence of a cheering throng of thousands of people. It bore the arms of Vermont and the United States, and had the initials "G. D." outlined in diamonds.

In March, 1899, Dewey was made Admiral of the Navy, the highest rank ever held by any American naval officer, Farragut and Porter having been admirals only. From March 29, 1900, to the time of his death Dewey was president of the general board of the navy and a familiar figure on the streets of Washington as one of its most beloved citizens—despite the temporary eclipse of his popularity following his marriage and the announcement of his candidacy for President.

A Beautiful Young Widow.

Dewey's second wife was the daughter of Washington McLean, Cincinnati publisher, who had been not only a friend of Lincoln and Grant but of Jefferson Davis as well She had married Gen. John B Hazen, who had served in the Union army, while still very young and she was a still-youthful and altogether charming widow when Dewey, who had met her in Washington years before, returned to his triumph in the capital. Before long the gossips were linking the names of the elderly naval hero and the young widow and predicting their marriage.

Partly because of a prejudice against Mrs. Hazen's religious affiliations, partly because of her social ambitions and partly because of a feeling that it was somehow undignified for the "Hero of Manila Bay" to marry a woman much younger than he was, the public disapproved of the match. Heedless of this disapproval Dewey went ahead and married Mrs. Hazen. The public might have forgiven him for thus deciding that his marriage was his, and not the public's, affair but when he deeded to his wife the house in Washington which had been bought by popular subscription, popular resentment flamed high.

Then on the morning of April 4, 1900, the New York World printed an interview with Dewey in which he said in part: "If the American people want me for this high office (of President) I shall be only too willing to serve them . . . Since studying this subject I am convinced that the office of President is not such a very difficult one to fill, his duties being mainly to execute the laws of Congress."

Dewey had been approached on the subject of being a candidate for President but had disclaimed any such ambition. However, a "Stop Bryan!" element in the Democratic party had persisted in promoting his candidacy. At last he had yielded to the temptation and made his ill-advised announcement which resulted in much ridicule being heaped upon his head.

However, the fickle public soon forgot, as it always does, that George Dewey had ever been anything less than the great hero it had once hailed back in 1898-99. His last years with his wife were idyllically happy until that day in January, 1917, when he contracted a cold. Put to bed by his doctor, he grew gradually worse, mostly with the ills which he humorously described as "anno domini."

It is said that as he lay half-conscious he began to fight over once more the battles of his life and, as though he were giving commands from the bridge of the Mississippi at New Orleans or the Olympia at Manila, his voice rang out with some of its old-time resonance until Death stilled it at last.

His body was first entombed temporarily in the mausoleum of Gen. Nelson A. Miles at Arlington, then moved, with military and naval honors, to another Arlington tomb which his widow had built. Later it was removed to the Bethlehem chapel at Mount St. Alban, Washington, and finally given its last resting place in the Washington cathedral—the American equivalent of a combined Westminster Abbey and St. Paul's. In these four entombments there is a strange analogy between the careers of Dewey and another American naval hero. For John Paul Jones was given three temporary burials before his body was finally laid to rest in the chapel crypt at Annapolis.

Purebred Cattle Make Best Herds

Tests Made With Different Breeds of Dairy Cows Ample Proof.

By C. L. Blackman, Specialist in Animal Husbandry, Ohio State University. —WNU Service

Ability of purebred dairy cows to outdistance grades and mixed breeds in the production of milk and butterfat is emphasized in records from Ohio dairy improvement associations.

Production records of 10,320 cows were kept in the 32 associations which reported The herds are divided into two classes, those with 15 cows or less and those with more than 15 cows, and the high producing herds in each class are listed. The individual production records of the 32 high cows out of the 10,320 also are given.

Twenty-three out of the first 30 herds in the small herd class were registered purebreds, as were nine out of the first 10 in this classification; 20 out of 32 herds in the large herd class were registered and 8 out of the first 10; and 26 out of 30 high-producing individuals were registered purebreds and 9 out of the first 10. Only 7 out of 92 of these high records were made by herds that were classified as of mixed breeding and in most of these cases the individual animals had a high percentage of the blood lines of some one acknowledged superior breed.

Perhaps not all the superiority as shown by these records was due to the animals themselves because owners of purebreds usually are prouder of their live stock and devote extra attention to the herd. Members of the association bought 48 purebred cows and 14 purebred bulls during one month.

Some cows of mixed breeding and some grade cows produce more milk and butterfat than some individual purebred cows but the records show that the chances of good production are much better with purebreds than with grade or scrub cattle. If this were not true all the work of farmers and scientists who have spent lifetimes in perfecting purebreds would have been wasted.

Dairymen who admire purebred cattle should remember that purebred dairy cattle originally were developed by farmers who worked for centuries to implant the good characteristics and to eliminate the undesirable features of their particular breed. Each breed came from a limited area where groups of breeders built up herds of cattle that would breed true to type.

Farm Dam as Conserver of Both Soil and Water

Soil conservation and water conservation go hand in hand, says the Conservation service. For the cheapest and most practical small reservoir for the farm, it recommends an earthern dam. Such dams may be built across a drainage line or may enclose an artificial depression to be filled from a natural stream or drianage way. Most of the cost is for labor and equipment which a farmer usually can supply himself.

In building reservoirs and ponds for livestock the Soil Conservation service declares too much emphasis cannot be placed on ample spillways, especially if the dam is located in a stream channel.

Watersheds overgrazed and subject to gullying and sheet erosion, should be protected by vegetation before being used to fill a stock pond. Otherwise, eroded soil will rapidly reduce water storage capacity. If the watershed above the reservoir is too large there is danger of flood damage.

Steps suggested for keeping mud out of live stock reservoirs are reduction or abandonment of grazing and tillage in the watershed; settling basins, check dams, or grassed waterways upstream from the dam and floodgates in a diversion ditch or pipe line that may be closed against mud-laden water.

Feeding Chopped Fodder

Chopped fodder should find a place in the winter ration for horses; however, one should not attempt to feed chopped fodder as the only forage in the ration, advises a writer in the Indiana Farmer's Guide. During the winter the best plan is to feed half alfalfa and half corn stover, fodder with the ears removed. There is no need to chop the stover for the animal as it will be consumed as satisfactorily in the unchopped form. Feed horses the alfalfa in the barn and at every available opportunity turn them out in the barnyard or adjacent lot where they will be given their allotment of corn stover. In this way the animals get sufficient exercise—a very valuable factor.

Treating Milk Cans

It is a very good practice to treat all milk cans, that have been washed at the milk plant and returned to the farm, with a solution of chlorine just before they are again filled with milk, says E R Garrison, of the Missouri College of Agriculture. Even though the cans have been washed and steamed at the plant, considerable growth of the surviving bacteria will occur in the moisture left inside when the can stands with the lid on.

One Way Traffic by Prehistoric American People

Aleutian Islands and Bering Strait Routes

ONE-WAY traffic routes in prehistoric America! This is the picture conjured up by the latest theory of how early America's inhabitants came and went.

Eastward across Bering Strait, up in the far northwest corner of the continent, came the Asiatic immigrants who were to people America and give it a varied assortment of Indian and Eskimo civilizations.

Westward across the Aleutian Islands, at times, moved groups of emigrants, leaving the shores of America to go back to Asia—home of their forefathers.

Not that the early immigrants and emigrants, of course, realized that they were pioneers, trail-breakers, or carriers of cultural knowledge from continent to continent.

Route by Aleutian Islands.

That there was a route of westward travel, an exit route from America, across the Aleutian Islands, is the theory advanced by Henry B. Collins, Jr., of the United States National Museum.

Speaking before the American Anthropological association in Washington, Mr. Collins pointed out certain features of prehistoric life that were similar in Kamchatka and directly across the way, in the Aleutian Islands and southern Alaska. The aborigines on both sides used stone lamps, for example, and wore labrets as lip ornaments, and made houses with the entrance through the roof. And these, from archaeological evidence, Mr. Collins pronounces American fashions, which were carried back to Asia.

Culture Carried to Asia.

That emigrants carried these cultural ideas back to Asia, across the Aleutian Island stepping stones, with boat journeys between, is argued by Mr. Collins on this ground: "These traits are widespread in western America, either in the interior or along the coast as far up as the Aleutian Islands. In Asia they are found only in a limited area along the coast nearest the Aleutian Islands. They were not found, originally, further north either is Asia or America, and therefore they could hardly have been carried west over the Bering Strait route."

Bering Strait, he concludes, was the main entrance to the American continent for the early immigrant waves, but was not important as a west-bound route. And the Aleutian Islands, lying 800 miles south of Bering Strait, were the main exit but were not used by east-bound wanderers headed for American shores.

Removing Carbon Dioxide From the Gas in Flues

New York. — The smoke-belching chimneys of the nations as a source of frozen carbon dioxide—known as dry ice to most laymen—is the picture envisioned by the scientific report of Prof. Barnett F. Dodge and Charles S. Comstock of Yale university at the American Chemical society's symposium here on absorption and extraction.

Carbon dioxide is always present in all flue gases, everywhere that fuel is burned. Where the task of the absorption chemist comes in is to get it out of the flue gas. Once extracted, it has a wide use in liquid form as the "fizz" in soda water, as only another common example in addition to its frozen, solid state as dry ice for packing ice cream and other cold products.

How It Is Removed.

Fluid soda ash or potash sponges plus a counter scrubbing method is one of the most common ways of extracting the carbon dioxide from flue gas.

The gas is sent out through a special packing tower which contains broken material packed loosely. Down from the top of the tower flows the absorbing liquid and the rising carbon dioxide gas seeps upward in intimate contact with this chemical sponge.

City Fuel Gas Without Carbon Monoxide

Berlin.—Hameln in Hanover, a small city of 28,000 inhabitants, claims the honor of being the world's first community to rid its city gas supply of the dangerously poisonous carbon monoxide.

This is done by mixing the gas as it comes from the producers with hydrogen, and passing over a catalyst that combines the two into harmless, readily combustible methane. Instead of the 21.4 per cent of carbon monoxide once present in Hameln's city gas, there is now only about one per cent.

Washington Digest

National Topics Interpreted by William Bruckart

Washington.—More perhaps than ever before in our country's history, the courts of the nation, federal and state, are in a jam. They are being subjected to a greater strain than ever before and, I think, the strain is too great for them long to continue to bear it.

The President and the Court

That sentence sounds sensational. It is meant to be. In the opinion of many sound thinkers, men and women of vision, there has never been a time when a wave or surge has attacked the courts or any other American institution with such ferocity.

One of the reasons the situation is to be regarded with so much concern is President Roosevelt's latest request of congress for a reorganization of the judiciary system. He is asking for more judges everywhere which, of itself, seems entirely proper, but the message astounded observers by proposing an increase in the membership of the Supreme court of the United States to fifteen. That is to say that if it were enacted into law, Mr. Roosevelt's own proposal would give him authority to select six additional justices of the highest tribunal. Inasmuch as the present membership of the court has refused a number of times to hold New Deal legislation valid under the Constitution, it takes no stretch of the imagination at all to figure out that Mr. Roosevelt's proposal would give him authority to select a sufficient number of new justices so that the New Deal would hold the balance of power in the highest court of the judiciary of the country.

There may be and probably is merit in the President's proposal that judges should retire at seventy years of age. It happens that the present membership of the court includes six men who are above that age and a statute compelling retirement at seventy would make six added vacancies in the court unless the present court should find that this law itself is unconstitutional in one regard. The judges are appointed for life and they cannot be removed without cause — which means they must be impeached by congress and tried.

The message respecting reorganization of the judiciary system was by far the most sensational to come from Mr. Roosevelt as President. He pointed out in it that he had proposed reorganization of the executive branch of the government so that it might function more efficiently. The next step, he said, was to reorganize the judiciary so that it could administer justice more speedily. But there are many minds throughout the country which find it difficult to believe that the necessity for speedy justice is the fundamental reason for the new proposal.

It is too early to tell, of course, how congress will act on the President's suggestion, but the more astute observers here are quite convinced that such legislation cannot go through without a bitter debate. The political implications are many. If a real struggle develops in the house or the senate, it is not outside the range of a good guess to predict that it could split the tremendous Democratic majority asunder in either house. If it did that once, undoubtedly enmities and factions would be created that would continue through the remainder of the President's new term and only the passage of time can disclose how far reaching such a thing might be.

But let us review for a moment some of the background of the conditions that have preceded the President's sensational proposal. There have been sniping and bushwhacking at the judiciary for a number of years and this was thrown into high speed by the President himself when the Supreme court threw out the NRA. On that occasion, Mr. Roosevelt made the well remembered remark that the decision had taken us back to "the horse and buggy days."

There followed an uproar by a vocal minority of radicals and persons who claimed to be liberal. They attacked the Supreme court for throwing out New Deal measures, ridiculed the justices as "the nine old men" and proceeded in general to spread poison to all and sundry about the country's judicial system. On top of that came Mr. Roosevelt's speech to congress last month in which he made a virtual demand upon the Supreme court for "a more enlightened interpretation of the Constitution." That was an unprecedented thing but it was not nearly so sensational as the present problem.

* * *

Congress Criticizes

Much of the problem that is swirling around the courts of the land results from the position which congress has chosen to take. There are a goodly number of representatives and senators who, swayed by the vocal minority mentioned earlier, have voiced bitter criticisms of the judiciary and have even proposed that its freedom be curbed. They are doing this because they see the Supreme court deciding every now and then that some ill-thought-out piece of legislation should be tossed out of the window. A good many of these congressional shouters have only a slight understanding of the babble that they put out on the floors of the house and senate, but the fact remains they are a part of the congress and hence their words are received with some consideration among those who want to believe the same way.

On the other hand, there are men like Senator Borah of Idaho, who foresee real trouble for all of us if the powers of the courts are curbed. Senator Borah thinks the question of the freedom of the judiciary is a paramount issue and lately has made a powerful appeal that if the people want to make changes in their government, the people ought to do it and not the President and the congress

The Idaho senator makes the point that only through a judiciary unfettered by politics, free to operate as it sees the law, can the people of the country retain their freedom. If judicial independence goes, liberty goes. So it seems to me that congress, which just now is the spearhead of the movement to change the power of the courts, ought to recognize its own responsibility.

I said earlier that the courts could not continue long to bear the present burden of attack. That burden which they carry now results largely—and this is especially true of the Supreme court of the United States—from the fact that congress has ceased to be a deliberative body. It has tossed great chunks of undigested legislation at the courts and when the courts have held these laws unconstitutional, a bunch of nitwits each time has unleashed a great howl. It would seem then that the proper conclusion is that the nine old men are not older nor any less enlightened than the members of congress or the executive branches of the government but that especially congress is failing to do its job. It is attempting to read election returns into the judiciary. It seems to me it ought to be remembered by members of congress and officials of the executive branch of the government that each and every one of them has taken an oath as an official of this government to preserve, protect and defend the Constitution and in so doing they must defend the courts.

* * *

Laughs Are Loud Today

In any discussion of congress and its activities, I find time to do a little laughing. Through the last several weeks, a period when floods were raging and people were dying, when thousands upon thousands walked the streets without jobs, when other thousands walked the streets because a militant labor leader had called a strike and had permitted his strikers to violate laws of the land by seizure of property—while all of these things were happening, our congress was giving thought to a picayune proposition. It was discussing a bill providing for alterations of the Capitol building, itself.

The tragedy of this particular thing is that it has a very good chance of being enacted into law before the end of this session. It is proposed to spend four or five million dollars to extend and reconstruct the central portion of the Capitol along lines that would make the three east wings extend the same distance from the main building. It would enlarge the central portion and provide more office space when, as far as any observers can see, there is ample space for all of the offices required now or for the next half century.

I said the tragedy of the thing was that this proposal stands a fair chance of passing through congress.

Sponsors of the plan declare it will improve the appearance of the central portion of the old building. It may do that but I have found more architects who disagree than agree with that thought.

As for the office space argument, it would appear that somebody in congress is quite determined simply to spend some more money. It is to be remembered that only two years ago, the house of representatives built a second office building at a cost of $9,000,000 for its members. About the same time, the senate added a wing to the senate office building so that each senator could have three rooms whereas heretofore the average senator had only two rooms in his suite. Committee chairmen always have had three or more rooms. In addition, there are several hundred offices in the Capitol building itself and a goodly number of senators and representatives have private offices in the Capitol as well as in the office buildings. So altogether, I think there is just ground for saying, as one hears said frequently, that the congresses of the last few years much resemble boys who have received too many toys in one delivery. They don't know what to do with themselves.

Being Afraid of the Dark

By Audrey C. Hayden

AS FAR back as I can remember I never was afraid of the dark. When I became a mother, I believed that there was no reason why any child should be afraid, and that if fear were never suggested in connection with darkness, it wouldn't occur to the child to be afraid. Darkness is a natural phenomenon, I reasoned, and one of which babies are not afraid.

Applying this theory, all went well with my own little girl, until something unfortunate happened. Either someone complimented my little three-year-old on her bravery, shown in going up to bed alone, or someone told an alarming story, or someone—well, no matter I don't know how it happened. This I do know: Jane began to say she was afraid of the dark—that frogs would get her. She would even refuse to go to the bathroom alone with only the hall light burning.

Believe Fear Is Expected.

Now I really believe that most cases of fear of the dark on the part of children have no deep-rooted reason. When there is such a reason, if it can be found, of course very careful consideration should be given to reconditioning. But most children fear the dark because they have somehow imbibed the idea that it is rather expected of them—that if they are not afraid they are very brave, but if they are afraid it is nothing to be wondered at. The child having acquired the fear, there are two popular methods for exercising it. One is to attempt to get back to the original cause and explain that away; the second to overcome it by setting up artificial bravery.

I tried to reason with Jane, and showed her pictures of frogs to let her see how small they are, and also made a lot of "brave talk" about "a great big girl like you." But my efforts had no effect. Jane just cried and clung to my dress, and pulled me along with her to bed or the bathroom. She wasn't brave and wasn't going to be talked into it.

Imagine With Child.

It seemed best to accede quietly. I took her to the bathroom and to bed for two or three weeks, and I did it as a matter of course. I made it a point, also, to walk from room to room without a light as soon as she was in bed. After going downstairs I would come up on an imaginary errand, and walk about again in the darkness. On several occasions, a little before bedtime, we took walks together, and sometimes we went down cellar in the dark, but always without any mention of its being dark.

When she spoke of frogs I said yes, I could see them too—that it was fun to be able to imagine things, wasn't it? And the best part was that since they weren't real, you could stop imagining them whenever you wanted to. Once we got down and hopped around the room, playing we were frogs ourselves. I got some polliwogs for the fish bowl, and I bought a celluloid frog—but we were very matter-of-fact about it and frogs and darkness and fear were never connected in our conversation.

Darkness Is Ordinary Condition.

Then one day I felt very ill and spent the day lying on the couch. When night came and Jane wanted to go to the bathroom I called her over and said, "Now, Jane, Mother is sick, so you will have to go alone." And she said, "Yes." "It will be dark in there, do you understand? And I cannot come in if you call me to turn on the light," I explained. She thought a minute and then said, "All right." When bedtime came, I undressed her and sent her up to bed alone, and then casually sent another member of the family up on an errand. Jane had the idea, though, that I was sending her alone to bed, and that the company and the light were merely incidental.

The next night I went to the bathroom, ostensibly to get something, making it appear accidental that I went when Jane was there. Then I sent her off to bed alone, casually. The next night I sent her to the bathroom and to bed in the dark without comment, and it has been a regular occurrence ever since. Did we get at the root of the trouble? That's hard to say since I never found out the beginning of the fear, but—we made the dark into a very ordinary, matter-of-fact condition. —National Kindergarten Ass'n.

Over Mt. Everest

Aviators have succeeded in flying over the top of Mount Everest, the highest mountain in the world. Rear Admiral P. F. M. Fellowes, D. S O., rose to a height of 34,000 feet in a temperature ranging down to —76 degrees Fahrenheit in 1934. In his flight over the mountain he cleared the peak by a bare 100 feet. The Houston Mount Everest flight cleared the peak on April 3 and 19, 1933.

Lloyd Lau drove to Eagle Grove Saturday with a load of hogs and because of the blizzard which made driving nearly impossible was forced to stay over until Sunday morning

Mrs. P M. Wilson entertained Friday afternoon at bridge in honor of Mrs. Mary Mutch of Grundy Center. Mrs. C. G. Wateman won high prize and Mrs. Mutch received a guest prize.

Mr and Mrs. E. C. Buntenbach and children, who went to Garner Saturday to be present at the sale, did not return to Klemme until Sunday noon because of the blizzard.

Mrs Paul Grange and son, Dorance, and Mrs. P. M. Wilson who had gone to Mason City Saturday had to remain over Sunday at Garner on the account of the blizzard which blocked the roads.

Mrs. George Lawhorn and Mrs. Ed Jacobs, who had spent the day at Mason City Saturday were forced to remain until Sunday afternoon at Garner because of the blizzard.

Mr. and Mrs. Pink drove down from Titonka Monday for a visit at the home of their daughter, Mr and Mrs. Earl Stott. Mr. Pink returned home but Mrs. Pink remained in Klemme for a longer visit.

Mr. and Mrs. George Stokesbary entertained Sunday evening at two tables of bridge. Mr. and Mrs. Will Kirkwood won low couple prize, while Mr. and Mrs. Alfred Merkel won high couple prize. A lovely lunch was served.

Keith Bailey of Belmond, accompanied his father to Klemme Saturday to help set up new farm machinery at the Northern Implement Co. On the occount of the storm Keith was unable to return home until Monday.

The Times learns that Tom Mitchell, former Klemme resident, now depot agent at Swea City, has been ill for the past three weeks. Tom will not be able to attend to his duties at the depot for several more weeks.

Otho and Verl Keraus drove down from Swea City Tuesday evening, being called here by the illness of their mother, Mrs. W. C. Keraus. The boys plan to return to Swea City Thursday as their mother is much better.

Mr and Mrs. Alfred Merkel and Mr. and Mrs. Jack Etchen entertained several friends at a George Washington party Monday evening at the Merkel home. Four tables of bridge were played. Mrs. Reed won high prize for ladies, and Art Kudje high for men, While Mrs. Sumner Trumbel won low for ladies and Don Christance low for men. Carl Anderson won the travel prize. Cherry pie with home made ice cream and coffee was served.

Mrs. Calvin Grosshuesch underwent a major operation at a Mason City hospital Tuesday morning Her condition is reported as being favorable at this time. However, she will not be able to have company until the latter part of the week.

Mr. and Mrs. C. C. Kilgore received word Monday that their son, Clair, who is a senior in the University of Minnesota this year, is in quarantine for srarlet fever. He has a mild case but will have to stay in quarantine the required length of time.

Supt. and Mrs. Galbreth will move Saturday into the new house built by Paul Grange. Chas. Fritzel and wife will move into the place vacated by the Galbreths Mr Fritzel purchased the place last year and is now retiring from the farm

Donald Neuberger, accompanied by his wife's sister from Buffalo Center, drove to Ottumwa Friday to see Mrs. Neuberger at the sanitarium. Donald reports that his wife is feeling better than she has for several years, that she is gaining in weight and is cheerful and happy

Mrs Ed. Buntenbach entertained at four tables of bridge Wednesday afternoon at her home. Mrs. Mary Mutch of Grundy Center and Mrs. R. Baack of California were guests Mrs. Art Kudje won high prize, Mrs. Martin Barz, travel prize, and Mrs. C. G Waterman won low prize. A delicious lunch was served by the hostess.

Goodell Victors In County Tournament

GOODELL CAGERS WIN COUNTY CHAMPIONSHIP SECOND YEAR

Klemme Shamrocks Eliminated In First Round Of Play

The Goodell jinx was still in effect when the Shamrocks entered the county tournament at Garner last week and the Green and White cagers bowed to their rivals for the third time this season. The score was 30 to 23, but the battle was nip and tuck throughout the game. The margin of vicory widened only in the final minutes after Paul Schuldt, regular Klemme guard, had been ejected on fouls.

Coach Kingery was forced to play a crippled team in this encounter, but the boys put up a good battle Jorgenson and Keeper were both slowed up by bruised leg muscles, and this handicap had a telling effect both on offense and defense.

Zielie was again the big gun for Goodell with a total of fourteen points. Schuldt dropped in four long goals for Klemme before he left the game, and these eight points were good for scoring honors for the Shamrocks. Jorgenson counted six points and Kaduce five for runner-up honors.

While Klemme fans had their hearts set on winning this game, it was no disgrace to be beaten by Goodell. Coach Fish's men had already been declared undefeated champions of the Seven Eagles Conference, and they went on to win the county crown for the second year in succession.

Following is the box score:

KLEMME 23

PLAYER	FG	FT	F
Jorgenson, f	3	0	3
Lemke, f.	0	1	0
Grosshuesch, f.	1	0	1
Kaduce, c.	2	1	1
Keeper, g.	0	1	1
Schuldt, g.	4	0	4
Lau, g.	0	0	0
TOTALS	10	3	10

GOODELL 30

PLAYER	FG	FT	F
Boller, f.	2	0	2
Zielie, f.	6	2	1
Dawson, c.	0	1	2
Hofer, g.	2	0	2
Dennis, g.	2	3	0
TOTALS	12	6	7

The tournament as a whole was one of the most interesting ever held in the county. There were enough close battles and surprise endings to keep the fans exited throughout the series. A summary if the other games follows:

Crystal Lake 16. Kanawha 15

Crystal Lake's inspired team threw a surprise in the very first game of the tournament by edging out Kanawha by a score of 16 to 15. The Lakers showed a lot of fight and an uncanny ability to make free throws. They made only three field goals against Kanawha's six, but ten free tosses gave them their margin of victory. Jilek was high point man for Crystal Lake, while W. Yeakel was the chief scorer for Kanawha.

Corwith 44, Woden 26.

Corwith flashed a smooth working offensive attack which really got underway in the second half to eliminate Woden in the first round. Nall scored 23 points for the winners to set an individual scorng mark for the tournament. Shipman of Corwith was good for ten points, and Helm and Gerdes of Woden each got nine.

Garner 25, Britt 21.

Another pair of natural rivals met in the first game Friday evening when Garner eked out a four-point victory over Britt. Excitement was high as the host team, led by Denney at forward, fought through a tight battle to win. Scoring on the Britt team was evenly divided.

Crystal Lake 35, Hayfield 7.

Coach McGreevey's Lakers had little trouble with Hayfield in their second game, holding them to two field goals and three free throws Jilek again led the scoring for Crystal Lake The entire squad took part in the game.

SEMI-FINALS

Goodell 14, Corwith 13.

Goodell got a scare in their semi-final game with Corwith. Coach Key's boys had their defensive armor on and held Goodell to their lowest total in the tournament Zielie broke hrough the defense for three field goals, however, Corwith could not quie overtake the leaders in the last quarter Shipman led the Corwith scoring with five points.

Garner 18, Crystal Lake 15.

Crystal Lake continued to hold the respect of the tourney fans as they battled Garner in heroic fashion, only to lose by a three point margin The Lakers were playing their third game and the strain was starting to show on them Denney scored nine points for Garner, but M. Sorenson of Crystal Lake was high man for the game with eleven points.

CONSOLATION FINAL

Corwith 25, Crystal Lake 23.

Two evenly matched teams met in the consolation final game and gave the crowd one of the most thrilling exhibitions of the tournament. At the end of the regular playing time, the teams were tied at twenty-three all. The officials explained to the crowd that a new ruling this year gave the victory in an overtime tournament game to the first team to score two points. With this ruling in effect the excitment was even greater than before, and it was a dramatic finish that Shipman of Corwith provided when, after about two minutes of the overtime, he swished in a long field goal from near center Swan of Crystal Lake and Nall of Corwith led the scoring.

CHAMPIONSHIP FINAL

Goodell 22, Garner 19.

The two finalists of last year battled it out again for he championship this year with the same result as a year ago—a victory for Gooodell. The winners led during most of the game but were foried to work at top speed to keep a safe distance ahead of their opponents. Goodell had built up a comfortable lead by the end of the third quarter but Garner cut loose with a barrage of long shots that made the game interesting and exciting up to the final gun. Dennis and Boller led the scoring for Goodell, while Weaver was high point man for Garner.

After the final game, Goodell was presented with the county championship trophy as well as the trophy for the championship of the Seven Eagles Conference

Deliberation Versus "Rush and Jam"

By RAYMOND PITCAIRN

National Chairman Sentinels of the Republic

Probably the most widespread criticism of Congress during the past few years has been based on the eagerness of its members to speed new and unfamiliar measures through the legislative mill.

"Rush and jam" has too frequently been the method—instead of careful study and consideration of all bills which influence the public welfare

During recent weeks, however, Congress appears to have shown a different attitude. Measures affecting fundamental principles of our government are being subjected to scrutiny and study by various Senators and Representatives who have not hesitated to express either approval or disapproval—and the reasons therefor

Many have thus reasserted their right to express their own opinions and the opinions of the men and women they represent, regardless of party affiliations

To all citizens who regard members of both House and Senate as their representatives at Washington, this evidence of politically independent judgment is encouraging To all Americans it means a stronger voice in government.

Rushing a measure through Congress gives the people little opportunity to understand its purport and effect, or to let their will be known.

Reasonable study and discussion, in contrast, clarifies the issues involved—not only to members of the Congress but to the people as well

After all, it is we, the people for whom government is organized and who are helped or injured by its actions It is we, the people who bear its burdens and pay its bills It is to us that our elected officials must answer **And Congress should realize that it will rise in public esteem to the extent that it recognizes these facts and lets us know just what our government is planning to do.**

Because President Roosevelt was re-elected last November Fred De Laney of Clyde, N Y, must let his hair grow for four years He bet on Governor Landon

Our Government of Balanced Powers

By RAYMOND PITCAIRN

National Chairman Sentinels of the Republic

Among the famous admonitions of George Washington recalled by many Americans on his recent birthday celebration was the following

"If in the opinion of the people the distribution or modification of the Constitutional powers be in any particular wrong let it be corrected by an amendment in the way which the Constitution designates. But let there be no change by usurpation, for, though this in one instance may be the instrument of good it is the customary weapon by which free governments are destroyed"

As this is written that admonition remains strongly in the minds of the American people

Various members of Congress are pointing out in public utterances the necessity of preserving the independence of our three co-ordinate branches of government—Legislative Executive and Judicial—as established in the Constitution to safeguard individual liberties

Nor are their words unheeded, as public sentiment, expressed in the press and in letters to Congress, demonstrates Seldom has any public question aroused so widespread non-partisan a discussion.

Undoubtedly this discussion will continue And that is an encouraging sign in a republic which lists free speech and full discussion of public questions high among the rights of citizens guaranteed under the Constitution

It is the province of an independent Congress to make our laws; of an independent Executive to enforce them, and of an independent Judiciary to interpret them.

That is our Constitutional system of government.

A government agency arranged to buy a team of mules for George Marlin, an aged Arkansas farmer, but through mistake sent the check for an even $200 to Marlin Thinking it was the first installment of his Townsend plan old age pension, which he must spend in thirty days, he bought a second-hand merry-go-round.

C. J. Wille Voted New Head Of Local Co-Op Creamery

C. J. WILLE ELECTED PRESIDENT OF CREAMERY AT ANNUAL MEETING

Otto Pringnitz Is Vice President And Albert Barz is New Director

At the annual meeting of stockholders of the Klemme Co-Operative Creamery, held at the bank basement Saturday afternoon C J. Wille was elected president to succeed Herman Stromer who had effeciently held office on the board for many years. Otto Pringnitz was named vice president and Albert Barz was named as new director to succeed C. J. Wille Joe Schuldt was re-elected director, Walter Lemke, Seretary and J E Stille, treasurer.

Secretary Lemke's report revealed that total receipts amounted to $164,645,49 and that the plant purchased 1,543,962 pounds of cream, and manufactured 505,028 pounds of butter at a cost of .019 cent per pound. Average price paid per pound of butterfat was 37.06 cents

In his talk retiring President Stromer emphasized the point that business in the past year was very satisfactory and stressed especially the fact that the manufacturing cost a pound of butter in the local plant was far lower than in many neighboring plants. He also pointed out that the Klemme Creamery paid right up to the very top for butterfat.

SILVER AND TWENTIETH WEDDING ANNIVERSARIES WERE OBSERVED SUNDAY

Mr. and Mrs. George Schoenwetter Married 25 Years February 28th

Sunday, February 28th, was the twenty-fifth, or Silver Wedding Anniversary of Mr. and Mrs. Geo Schoenwetter of Liberty Township, and was also the twentieth wedding anniversary of Mr. and Mrs. Ralph Ludeke, of Garner.

In honor of the event relatives and friends gathered at the Schoenwetter home and all brought well filled baskets of good things for the big dinner Those present were

Mr. and Mrs. Milton Weisbrod and Mr and Mrs Elmer Weisbrod of Fenton, Iowa; Elmer Ludeke and son, Lyle, of Britt; Mr and Mrs. Ralph Ludeke, June and Marilyn of Garner, Mr and Mrs Lester Stille, Ruth and Lois, Mrs Hartzel; Alice Bailey; Mr. and Mrs A. J Schoenwetter; Irven, Lloyd and Ida Ax; Mr. and Mrs. John Neuberger, Jr, Masha and Junior, of Ventura; Mrs Fred Schlichting and Gladys; Mr. and Mrs Henry Ludeke and Paul of Meservey.

A fine time was enjoyed by all

TO R.E.A. SUBSCRIBERS

There are many stories going around to discredit the possibility and progress of the R.E.A mainly prompted by one opposition or another One statement is that the association has compromised with the utilities There is absolutely no ground for the above assertion. Another story is that it will add additional tax on the taxes of the farm As I have said many many times. The only loan in the whole program is the loan on the line itself.

The time waitnig for the final development may seem long but all good and valuable things take time. We must remember that whoever was developing such an undertaking would require practically the same length of time. The government has assured us low enough rates to make it worth our while and patience in waiting. A thousand or more subscribers, as we now have, means much. The development is assured.

M. C. JAMES,
Ch. Hancock Co. R.E.A. Comm.

March 1st Saw Number Of Moving Changes Nade

QUITE A NUMBER OF PEOPLE ARE MOVING IN THIS COMMUNITY

A Number Of Moving Changes Made in Both Town And On The Farms

March 1st found quite a number of Klemme folks settled in new locations, and the Times will endeavor to cover the greater part of the moving list this week.

First we will start with the moving list in town Charles Fritzell and wife, who purchased property in town a couple of years ago have moved in to their home which has been rented by Supt. and Mrs Galbreth. Supt. and Mrs Galbreth are now settled in the new house in southeast Klemme built by Paul Grange last summer

C. D Smock and family have moved into the Lawhorn place in northeast Klemme which has been occupied by Lloyd Smith and family, who moved into Mrs Martin Bachman's house on East Main Mrs. Bachman and family have moved to her farm southeast of Klemme Mrs. Herman Bridges and family have moved into the house vacated by the Smock family Mrs. Bridges lived in the upstairs apartment of the house in which Martin Barz and family reside.

Earl Stott and family, who have resided in the D D Ross house just west of the M E. Church, have moved to rooms in the rear of their store Arley Blickenderfer and family have moved to the Ross house Mr and Mrs. Donald Butz, of Garner, have moved to the place vacated by the Blickenderfer family in Northwest Klemme. Mr. Butz will operate a chick hatchery in Klemme this year

Emil Kraus and family have moved to Belmond where, we understand, Mr Kraus will operate a Watkins route The Kraus family have been living in the house on the farm formerly owned by Karl Kraus.

That about completes the list in town.

Albert Kehl and family have moved to their farm north of Klemme on Highway 69 Albert has been operating this farm for the past year or more Holck Bros move to the place north of Klemme that is owned by Kehl's and which they vacated when moving to the other place

Erwin Rosendahl moves from his mother's place to a place south of Ventura where Harm Menke has been living Kasper Kerns moves to the Rosendahl farm.

Henry Schuldt and family have moved to a farm near Mason City and a Mr Vestwebber of Belmond moves to the Schuldt farm.

J A Chambers moves from his farm southeast of Klemme to the Quigley farm one mile north of Goodell Walter Kimball moves from northeast of Klemme to the farm vacated by Chambers. and Quigley moves to the Monahan farm east of Goodell

Paul Havlick moves from a farm three-quarters of a mile north of the Liberty M E. Church to the farm vacated by Walter Kimball and Austin Hefty of near Woden moves to the farm vacated by Havlick.

Mr. and Mrs. LeRoy Johnson, reently married, have moved to the G. A. Goll home place southeast of Klemme, and Alvin Goll, who has been living there moves to the Moberly farm, and Wm. Neuberger who has been living on the Moberly farm moves to a Stone Ranch farm east of Klemme.

Ed Chistians moves to the John Christians farm vacated by Karsjens Christians.

Joe Stokesbary, who has retired, moves to Garner, and R. W. Buckley moves to the Klinge farm vacated by Stokesbary, northwest of Klemme.

Harold Ridder begins farming for himself this year having purchased a farm near Rockford.

Donald Neuberger had a sale and sold part of his stuff and moved to his father's farm, the Lew Neuberger farm, and will help his father with farm work. Henry Boland of near Hayfield moves on the Dr Tice and Mrs. Larson farm vacated by Neuberger.

Harlow Helps, who has been on the old Joe Johnson farm, moves to the home farm, the Henry Helps place southeast of Klemme. Jake Hess moves to the farm vacated by Helps and Hilko Barkema moves to the place vacated by Hess south of town. Mrs Martin Bachman moves to her own farm from town, the place vacated by Barkema

Stewart Hevelin moved to the Dr Tice farm which was vacated by Chas Fritzel. Hevelin and Art Johnson had been farming the Henry Nanenga place southeast of Klemme Art remains on this place.

KLEMME DOWNS HAYFIELD ON CLEAR LAKE FLOOR

Have Conference Average of .700

Playing without the services of Buster Jorgenson, who was out of the lineup because of a bruised leg muscle, the Shamrocks downed Hayfield by a score of 35 to 20 on the Clear Lake court. At the end of the first quarter the score stood at 6 to 4 in favor of Klemme and from that point on they steadily increased their lead, and were never in danger during the remainder of the game.

Kaduce led the scoring for the evening when he rang up four field goals and three free throws for eleven points. Grosshuesch and Schuldt were right behind with ten apiece, and Lemke got four to complete the Klemme scoring. C. Katter led the loosers with seven points.

Following is the box score:

KLEMME 35

PLAYER	FG	FT	F
Grosshuesch, f.	5	0	1
Trampel, f.	0	0	2
Kluckhohn, f.	0	0	1
Kaduce, c.	4	3	1
Schuldt, g.	4	2	2
Lemke, g.	1	2	1
Lau, g.	0	0	1
Abele, g.	0	0	0
TOTALS	14	7	9

HAYFIELD 20

PLAYER	FG	FT	F
Blank, f	2	2	1
Chizek, f.	2	0	1
D Katter, c.	1	1	2
Henrickson, G.	0	0	4
C Katter, g.	3	1	0
Nelson, g.	0	0	1
TOTALS	8	4	9

Practice Session Used For Game

As both teams were to practice on the tournament floor sometime during the week it was decided by officials of the two schools that the game missed at Hayfield could just as well be played at Clear Lake and then the conference schedule of both teams would be played out. Consequently the long delayed game was played, leaving Klemme with a percentage of .700, and Hayfield with a percentage of 000.

Fifteen years ago the deepest producing oil well in the world had a depth of 4,683 feet, and its drilling was rightly considered a remarkable feat But during the intevening years progress has been made in the oil fields as elsewhere. Recently a California well owned by the Tide Water company was brought in at the astounding depth of 10,560 feet—9 feet over 2 miles.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington.—It is undoubtedly one of the fundamental foundation stones of democratic government that where a civic right or privilege is accorded, the persons who are granted those rights necessarily have some duty to perform under those rights. It is well established, for example, that workers may organize into unions; that those unions have the right to bargain collectively which means that a committee representing the members of that union may speak for it in dealing with the employers, and it is a right undoubtedly of unions to call its members away from work on strike. I think there can be no debate concerning these three premises. But since these rights have been granted to workers and accepted by them on the same inalienable basis as the right to vote, the obligations that go with these rights necessarily have been accepted by the workers.

The People Lose

We have just seen a settlement of one of the great strikes of this decade and the return of more than one hundred thousand workers to the plants of the General Motors corporation Immediately after Governor Murphy of Michigan, had announced that General Motors and John L. Lewis and his Committee for Industrial Organization had reached an agreement, efforts surged and swelled in a movement on the part of each side to claim victory in the settlement. From all sources I have been able to tap, from every trustworthy observer of national affairs, I have obtained virtually the same story about the General Motors—C. I. O. strike settlement As far as I can see after digesting all of the opinions within my reach, it seems to me that neither General Motors nor John L. Lewis won. What is much more important is that the American people lost by that strike and they are in a fair way to lose much more.

The General Motors strike was one of the costliest in history. I am told that the workers alone lost something like one hundred million dollars in wages, and, of course, the stockholders of General Motors likewise lost because during all those days, forty-four of them, that the plants were closed, no new cars moved into trade. That means that all the thousands of dealers and salesmen of General Motors automobiles earned no income.

* * *

Truth About Settlement

The truth about the settlement seems to be that each side was willing near the end to accept Governor Murphy's proposition for settlement as a face saving proposal. It is undoubtedly true that John L Lewis would have been sunk without a trace and his movement to break up the American Federation of Labor and take control of labor for himself would have been utterly ruined had there not been some concessions by the General Motors officials. He apparently attempted to break up the A. F. of L. before he had sufficient union men weaned away from the parent organization and that is the reason why his position in the General Motors strike was so precarious from his personal standpoint.

On the other hand, it is quite evident as well that General Motors was forced into a position where it had to make concessions or be charged by the federal government with responsibility for bloodshed and destruction of property in riots. Governor Murphy acted throughout the strike negotiations under the flag of President Roosevelt, saying his movements were at the wish of the President. General Motors did not dare attempt to run counter to the President's commands because it could not withstand public sentiment that could and probably would be built up against it should it be publicly criticized by the President.

And to support my statement that the settlement is a face saving agreement and that neither side won in it, it is necessary only to consider that this agreement will run just six months. It contains no elements of permanency nor does it show any signs of a basic understanding which will swing public sentiment to the Lewis faction.

* * *

Another Crisis

Thus, there are many observers who feel that another crisis will arise along about the first of July and that in the meantime William Green, President of the American Federation of Labor, will have built up a considerable amount of strength on his side of the factional fight. What the future holds, therefore, is difficult to guess. It can be said only that in the recent strike and in the controversy that seems certain to lie ahead, General Motors again will be the goat and the public will pay.

I have been wondering whether many people recognize how they are going to pay for the cost of this strike. I have mentioned ways in which they have lost by it and it seems equally clear that when the Lewis unions get through with the use of force, it is likely to bring about an increase in the cost of the automobiles they produce. It is likely to go further than just automobiles. There is a move on now to attempt something of the same sort of labor attack on the steel manufacturers. If that materializes, it is easy to see how widespread the increased costs will be and how consumers will pay in the end.

This may seem to be an argument against increased wages. It may seem to be a defense of steel boots that used to be worn by industrialists and with which they trod upon defenseless labor. But it resolves itself into a question of justice and a consideration of the problem as it concerns consumers as well as workers. If there is anything in the theory that labor is entitled to a fair wage, there must be likewise some merit in the contention that the public which consumes the product of labor is entitled to an equal amount of consideration.

* * *

Federal Charters

Political leaders have been quick at all times in recent years to sit astride the neck of business, especially big business. Corporations were held up as something to be despised, especially if they were large corporations. Lately there has been quite a definite movement for legislation in congress that would force corporations to have federal charters; that is, charters issued by the government at Washington which, therefore, could control such corporations with whatever regulations were deemed necessary. This legislation, it is true, has not approached the stage where a prediction of its passage can be made. The point is, however, that it represents the thoughts of a certain percentage of the people. The question of legality of such a statute obviously remains to be determined but it is to be noted that this proposition is simply another step in the movement to cast a stigma upon business, a move to make business appear immoral or criminal or generally infamous.

Business has found it advantageous to incorporate. It removes certain responsibilities from the individuals joining in a corporation and adds certain commitments at the same time. Here again are the rights and counter obligations arising with those rights and I think no one can dispute the fact that our nation has moved forward more rapidly because of the use of the corporation as a business entity.

But I have been unable to find an answer to the question why the federal government should take control by law of business corporations without at the same time taking control of labor organizations. Now, it is to be noted that labor unions have steadfastly avoided taking the step of incorporation It is not true abroad where many labor organizations hold corporate charters just as would a business enterprise.

The fact that labor unions have not incorporated leads one to the presumption that the unions have felt such a step would hamper their activities. And, indeed, it might. For example, there have been scores of instances where labor unions, through their authorized officials or bargaining committees, have signed wage contracts with their employers—only to ditch that contract subsequently without regard for its binding force.

As labor unions are now organized, they are very loosely knit associations and there is nothing by which the individual members are bound except their own will to perform. In the case of a business corporation, for example, the stockholders have invested money and obviously when the corporation is sued in court or accumulates any kind of liability the stockholders' money in the corporation is available to pay whatever obligations develop. Hence, the lack of a corporate organization on the part of a union removes all responsibility insofar as law is concerned from the unit into which the workers have organized themselves.

The point is, after all, that the General Motors strike has demonstrated beyond the peradventure of a doubt that the national labor policies are utterly ineffectual and contain no consideration for the consuming public. Labor, as represented by the John L. Lewis faction, has shown its willingness to back its demands with force in disregard of law and it has failed to answer the responsibilities which it seems to me accomplish the rights and privileges the nation accords it.

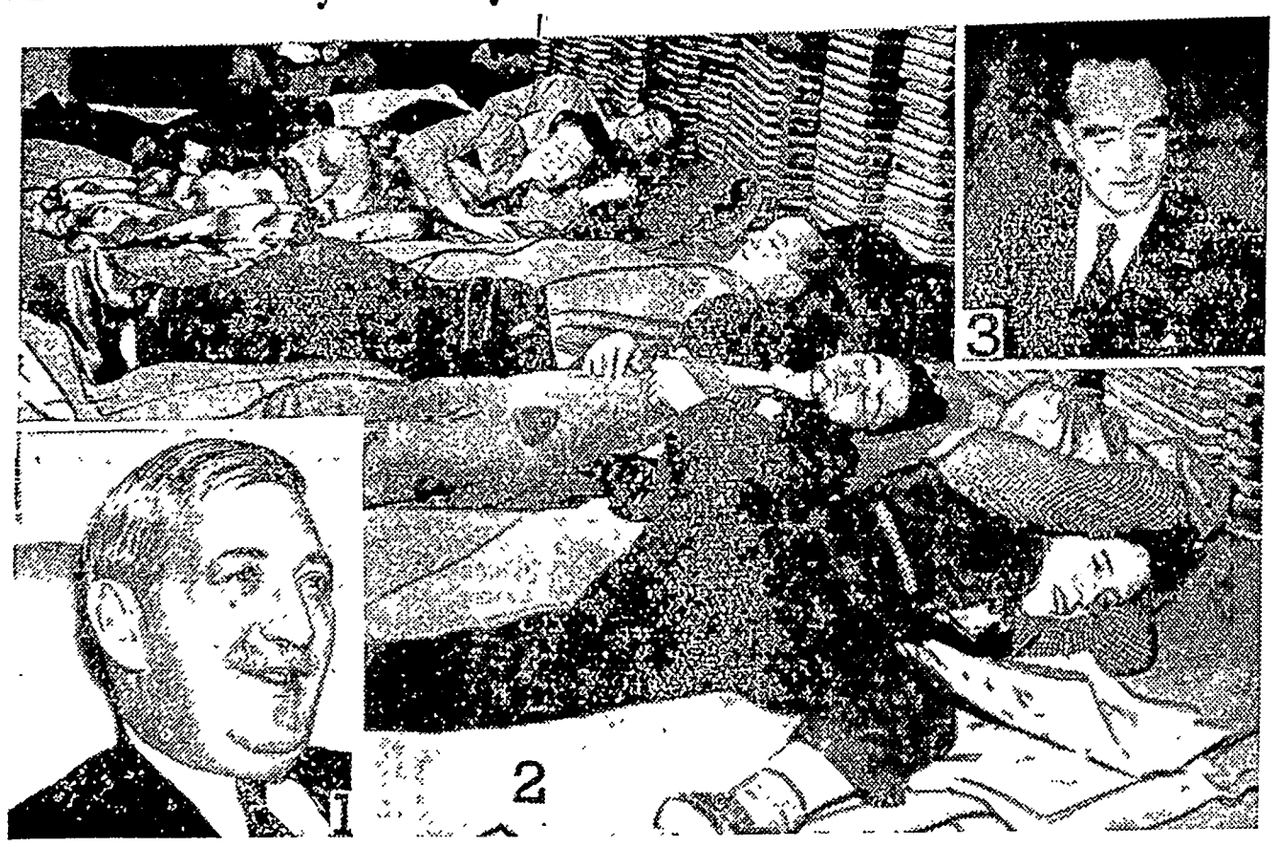
Auto Industry Ready for Peak Year as Strike Ends



1—William S. Knudsen, vice president of General Motors, who signed the agreement for his company which ended the costly motor strike. 2—Last vigil of the "sit-down" strikers before they marched out of the plant in Flint, Mich. 3—Gov. Frank Murphy of Michigan, who conducted negotiations that led to solution of strike difficulties.

Salute of Daggers for Il Duce

With drawn daggers, his personal bodyguard salutes Mussolini during the celebration of the fifteenth anniversary of the founding of the Blackshirts. This dagger-salute, incidentally, is supposed to date back to the arrogant emperors.

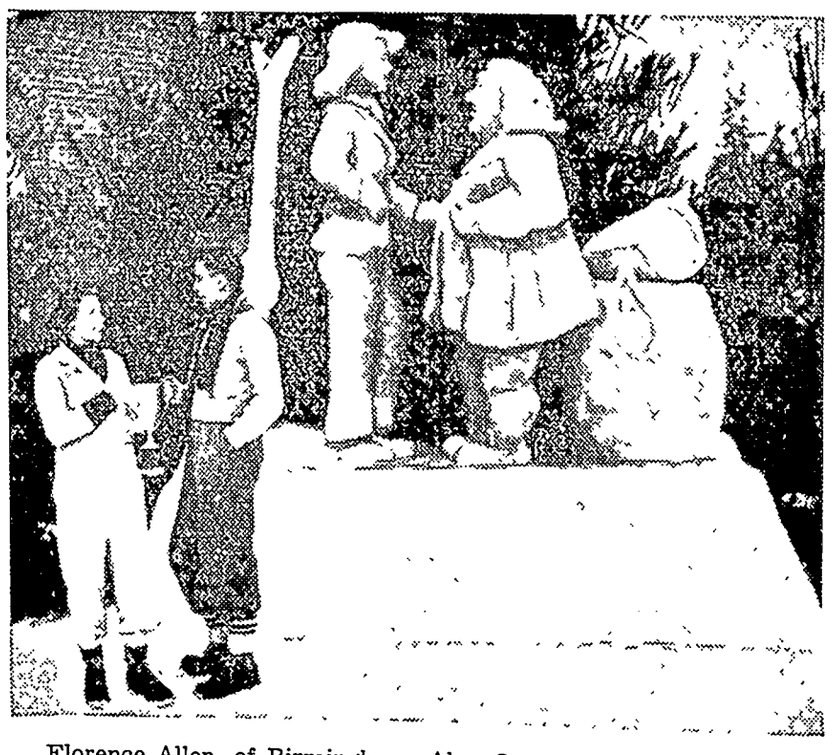
TO WED ERIN'S ENVOY

Mrs. Nicholas F. Brady of New York, widow of the utilities magnate, whose forthcoming marriage in Rome after Easter to William J. Babington Macaulay, Irish Free State minister to the Vatican, was revealed by friends recently. It was also reported that the ceremony probably will be performed by Cardinal Pacelli, Papal secretary of state, who was a guest at the Brady mansion at Manhasset, L. I., during his recent visit to this country.

RESCUED FROM MINE

Peter Robert Johnson, thirty-six-year-old coal mine operator, who was rescued alive from the Pittsvein mine at Flemington, W. Va., after he had been buried by a cave-in for a week. CCC workers and other volunteers, aided by the entombed man's dog, worked 18 hour shifts, 24 hours a day to save Johnson. The mine operator's rescue was regarded as one of the most amazing feats on record.

Snow Queen Statue Wins College Cup



Florence Allen, of Birmingham, Ala., Queen of the Snows, presents a cup to Joseph Fogarty, of Newburg, N. Y., representing Delta Tau Delta fraternity, which made the best snow statue, picked by judges at the annual winter carnival here. The statue shows the founder of Dartmouth greeting the carnival queen.

U. S. Army Demonstrates Its Landing Efficiency

First equipment brought ashore by the U. S. army, taking over Cabrillo beach, near San Pedro, Calif., in preliminary landing exercises, included tractors, trucks, field and machine guns. Photograph shows a tractor and trucks being put on the beach to demonstrate with what efficiency the army can disembark its troops and gear in the event of hostile attack upon our shores.

UNCOMMON AMERICANS

Germ-Free Animals Will Be Big Aid to the Scientist

How They Are Reared by Notre Dame Biologist

Notre Dame, Ind.—Animals that never have a germ in their bodies, from birth to death, are being produced at Notre Dame university, in the laboratories of Prof. J. A. Reyniers of the biology department. This is something really new under the sun; for every animal body that walks, from that of man himself down to the lowliest ameba, is the unwitting, often unwilling host to swarms of bacteria and other micro-organisms.

Production of really germ - free animals is a matter of very great practical importance.

Animals Kept Germ-Free.

The problem is two-fold: the animals must be brought into the world germ-free, and they must be kept in a germ-free world once they have been born

The first step is partly taken care of by the nature of pre-birth existence itself The unborn young of any mammal, wrapped in their fetal membranes, are normally germ-free. During and after the process of birth they receive their first inoculations.

Professor Reyniers therefore takes the prospective mothers of his experimental animals (usually guinea pigs), shaves them, bathes them in antiseptic fluid, covers them with a sterilized envelope. Then he puts the animals into a closed horizontal cylinder that looks like a small steam boiler, known as the operating cage. Its interior has been rendered absolutely sterile, and only germ-free air is admitted.

Rubber Gloves Used

A pair of long rubber gloves are sealed into two openings in the side of the cylinder. A third, glassed, opening serves as an observing window.

In this operating cylinder he opens the body of the mother animal by standard cesarean surgery, and removes the young through a connecting tube into a second cylinder, the rearing cage, which is also rigidly sterilized.

To test for possible contaminations, an animal from each group is instantaneously killed and its whole body ground to hamburger in a meat - grinder operating under sterile conditions in a third cylinder. Parts of the ground-up guinea pig are transferred to tubes containing a large number of different culture fluids for the encouragement of bacterial growth of any kind that may be present. If no growth occurs, and if microscopic tests are negative, it is considered reasonably well assured that the young animals are really germ-free.

Lots of Hemoglobin Is Necessary for Mountain Climbing

Washington.—It takes red-blooded men—and some animals—to stand high altitudes without getting mountainsick or experiencing other unpleasant symptoms when they first reach the heights, it appears from studies carried out as part of the program of the International High Altitude expedition.

Lack of oxygen in the atmosphere on a mountain top is responsible for most of the unpleasant symptoms. Persons who can enjoy their meals and be in a cheerful frame of mind when first climbing to oxygen-rare high altitudes owe this ability to the stuff which gives the red color to their blood, hemoglobin.

Hemoglobin Carries Oxygen.

Hemoglobin besides coloring blood red plays the vital role of oxygen carrier between lungs and the rest of the body. Everyone has hemoglobin in his blood, but apparently some kinds of hemoglobin are more efficient at grasping oxygen from the air as it is breathed into the lungs.

Evidence for this was obtained in studies of mountain animals, such as the viscacha, the llama and the vicuna of the Andean highlands, and reported by Drs. F. G. Hall of Duke university, D. B. Dill of Harvard university, and E. S. Guzman Barron of the University of Chicago to the Journal of Cellular and Comparative Physiology. These animals all had hemoglobin which was more avid for oxygen, and also had more hemoglobin in each red blood cell, than did animals that live at sea level.

Woman Auto Driver Good as the Man in the Essentials

Results of Tests Made in Towns of Iowa

SCIENCE has come to the defense of the woman driver. If she is not so efficient as are the men, it is not because of her sex or innate abilities but merely because she lacks the driving experience necessary for greatest skill.

This is shown by tests of more than 2,000 persons on vision, reaction time and other essential abilities for the automobile driver, made by Dr. A. R Lauer, associate professor of psychology at Iowa State college.

Only in strength of grip was there any difference between the sexes. Among the younger persons tested, the men were somewhat better than the women in judging distance. Women were somewhat inferior in tests of performance of skills resembling auto driving, due to lack of experience of those tested.

Best Drivers at 22.

Best drivers are those twenty-two years old, Dr. Lauer reported to the American Association for the Advancement of Science. This is true of both men and women. In complex mechanical skills, boys and girls are about equal up to the age of fifteen. After that boys are superior, but this difference disappears again in later age.

Keenness of vision drops off rather sharply for both sexes after the age of forty to forty-five, and after fifty-five the loss is still greater.

Ability to stand glare begins to lessen at the age of twenty, and the drop is much sharper after forty.

In making these tests, Dr. Lauer transported his driving clinic about like a circus making two-day stands in each town and inviting the public to come and be measured.

Women Are Warned of Health Hazard in Eye Shading

London.—The woman who turns to exotic shades for her eyelids in the quest for additional beauty and glamor may wake up some morning to find herself with a distinctly undesired and non-glamorous reddening and swelling of her lids.

The danger of inflammation of the eyelids, with reports of actual cases, is pointed out by Dr. Henry C. Semon, physician to the dermatological departments of the Royal Northern, Hampstead and King George General hospitals, London.

In the old days, eye shading was confined to actors and actresses and the only cosmetics used were black or varying degrees of it, made from lampblack, vegetable and animal charcoal and other sources of carbon. In these there was probably no harm, Dr. Semon says in his report to The Lancet.

Risk In Aniline Dyes.

Modern vogue for green, blue, silver and other shades of eye shadow cosmetics to match costumes and for various occasions brings a new hazard—that of the aniline dyes which must be used to achieve these desired shades for the eyelids.

Nothing the chemist can do in the way of treating these dyes for use in eyeshades will entirely obviate the risk of their producing inflammation, Dr. Semon says. Changes in the perspiration and skin secretions and the effects of sunlight, temperature changes and the sulphur in city air cannot be taken into account in the chemist's calculations, and these may alter even the most carefully prepared compound.

The skin of the eyelid is perhaps the most delicate of all the skin on the body, Dr. Semon points out, which increases the chance of its being irritated.

Diatomite Deposit Is Found in Nevada

Carson City, Nev.—Diatomite, a useful earthy mineral, has been found in a large deposit in Nevada. The bed is nearly 100 acres in extent and in some places more than 50 feet thick. Hundreds of thousands, perhaps millions, of tons are in sight

Formerly much used as a "carrier" for nitroglycerine in making dynamite, this mineral has yielded place to other materials in the explosives industry, and has itself found a number of other employments.

Diatomite comes in two varieties: a coarse-grained yellow form good also for filters and for heat insulation, and a fine-grained white form used in making toilet preparations, jewelry polishes, and as an inert "carrier" in salves, ointments, etc. The Nevada bed is an exceptionally fine grade of the white form.

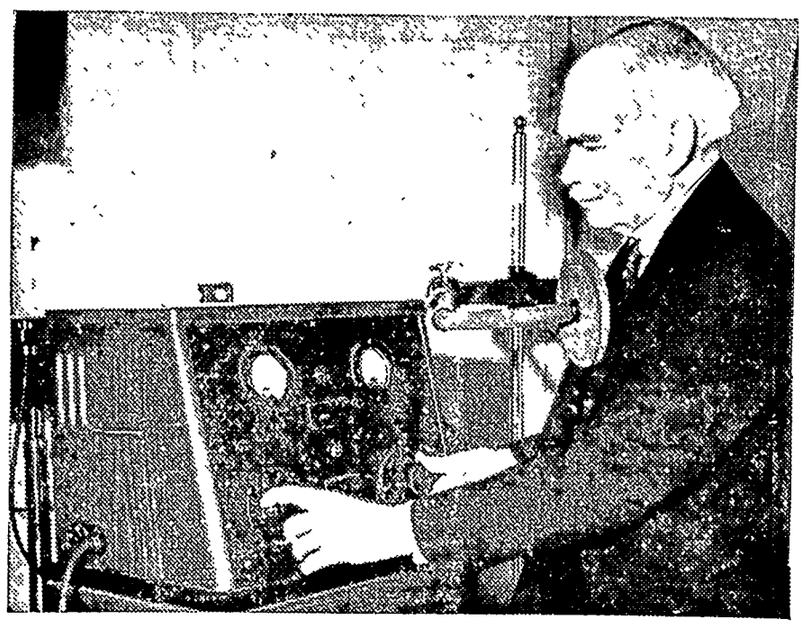
CINDERELLA HEIRESS

Lillian Elifsen, maid in a West Englewood, N. J., home, took a day off to visit New York when she heard that she had inherited $600,000 from her foster father in Norway, but she is going to hold her job until the fortune is turned over to her. Lillian's family name is Petersen and she was born in the United States, but when she was two years old she was adopted by a Norwegian shipbuilder and was taken by him to live in Norway.

KING'S BIRTHDAY

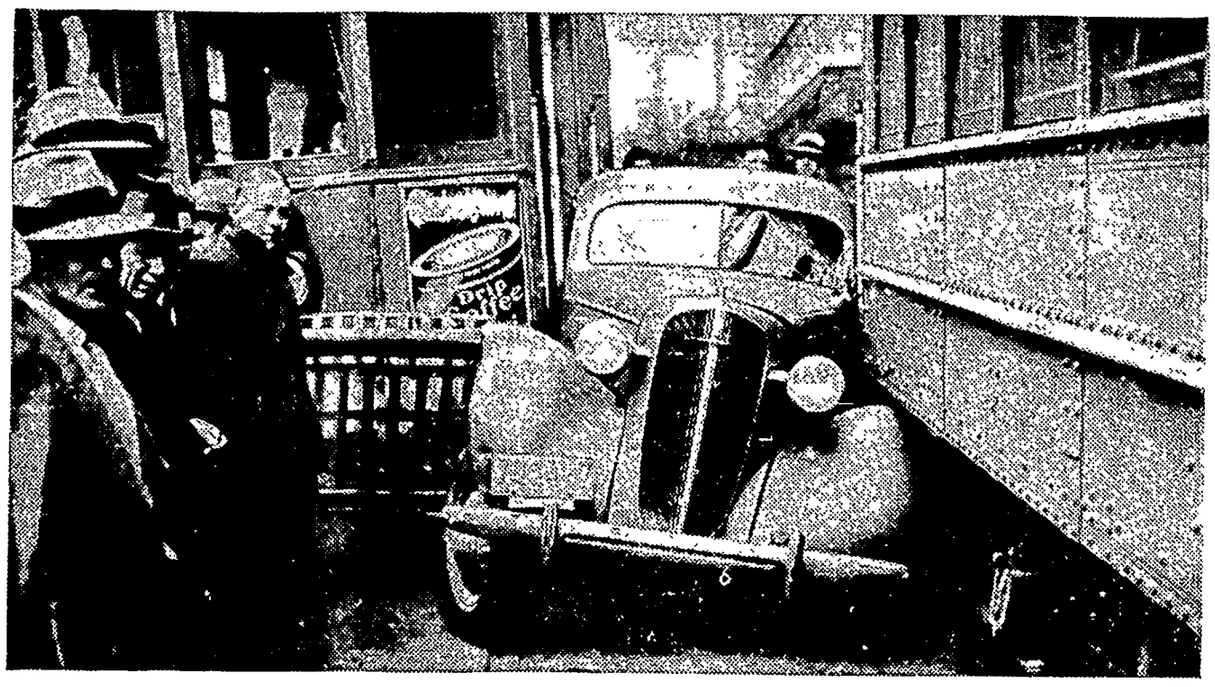
King Farouk I of Egypt, whose seventeenth birthday recently was observed throughout his nation by his subjects. The only son of the late King Fuad and Her Majesty, Queen Nazli, he acceded to the throne last April upon his father's death.

De Forest's New "Dynathern" Fights Flu



Dr. Lee De Forest, wizard of radio and talking pictures, took a look at the influenza epidemic and decided something ought to be done. So, he offered his latest electrical invention in Los Angeles, the "dynathern," to a world suffering from coughs, sneezes and aching muscles. Built on radio principles, the dynathern uses ultra-short waves over a small field. The patient is placed within the range of these impulses. It attacks the organs internally, relieving congestion.

Two Men Escape Uninjured in Freak Accident



Two men in an automobile crushed between two street cars luckily escaped injury in a freak accident in downtown San Francisco. John A. Toso, driver of the machine, said he attempted to get ahead of a street car. Another trolley car coming from the opposite direction cut him off with the result that he was crammed between them.

Devouring the Deed

He that is proud eats up himself; pride is his own glass, his own trumpet, his own chronicle; and whatever praises itself but in the deed, devours the deed in the praise.—Shakespeare.

"If the People Win, Who Can Lose?"

By RAYMOND PITCAIRN
National Chairman Sentinels of the Republic

"Nothing will ruin this country if the people themselves will undertake its safety; and nothing can save it if they leave that safety in any hands but their own."—*Daniel Webster*

As this is written citizens throughout the nation are preparing to exercise that individual responsibility for the safety of their country which election day entails

It is an immense responsibility In national affairs alone, it involves the selection not only of a Chief Executive, but of Senators from many states and Representatives from all

How will America meet it? Pre-election forecasts promise the heaviest vote in our history That is encouraging because the decisions then reached affect not only the safety and security of our Republic, but our personal affairs as well.

It means something to every American — whatever his years, his job or his daily activities. It extends to every citizen of voting age the opportunity to express what he or she may think.

Does youth, for example, desire the free opportunity for productive toil and its rewards that elder generations enjoyed?

Do the farmer, the wage-earner and the business man desire personal independence and the right to manage their own affairs and enjoy the fruits of their labor?

Do the housewives of America want government, whether Federal, State or Local, to hold down living costs by the exercise of a reasonable economy

Do Americans, as a nation, want to strengthen and safeguard their constitutional form of government, with its effective guaranties of a voice in government and freedom of religion and speech and action?

The ballot gives them all opportunity to say so.

For voting in America—as contrasted to elections in many nations abroad—is not merely an expression of loyalty to individual men It is, instead an **effective method of recording public opinion.** It is the greatest opportunity ever offered for registering the collective judgment of the people

And so long as the people exercise that judgment with sincerity, independence and intelligence, America is safe.

Swine may be poisoned by eating to much salt Several instances of salt poisoning have been reported by the United States Department of Agriculture.

Bulldog, "Sour-Mug," Has Changed From Old Habits

Probably the most pugnacious appearing, but one of the most amiable members of the dog family is the bulldog. He is the dour looking fellow with the mashed-in face, the wrinkled brow, bowed front legs and the pronounced turned - up lower jaw.

Because of the bulldog's expression he has been nicknamed the "sour-mug," observes a writer in the Philadelphia Inquirer. In reviewing the history of this breed it is noticed the dog has changed from a tugging, vicious baiter of bulls to one that is peace-loving, a perfect companion and intelligent despite his facial contour.

This dog's past was one of a dark shade. In fact, there was a time in England when bulldogs appeared headed for oblivion. Early in the 17th century the barbarious "sport" of bull baiting, a test of endurance between a dog and a bull, was frowned upon by folks possessing kindness to dumb animals.

Bulldogs used for this cruel practice were naturally more massive than those of the later type. The gallery of "sportsmen" gathered in a veritable "arena" to watch a bulldog grab the bull by the nose. It was a tugging battle to the death for either animal

The dogs were trained to hang on to their "prey," to tug and pull until the bull would fall to the earth exhausted Invariably, the dog was gored in this bloody one-sided battle. There were exceptions when the bulldog triumphed, and money changed hands.

Calcium and Phosphorus Important Body Minerals

The greater part of the body's mineral content consists of calcium and phosphorus, mainly combined with oxygen as "lime" in the bones and teeth These two mineral elements, states a writer in the Detroit News, are also important in the soft tissues and body fluids. The red cells of the blood are dependent on their content of iron. The proper contraction and relaxation of the heart muscle depend on the presence of the right proportions of calcium, sodium and potassium salts in the blood plasma

Copper, like iron, is believed essential in the process of hemoglobin formation in the blood. Manganese appears to have important relations to growth and development, to reproduction and lactation, Iodine is important as an essential constituent of thyroxine, characteristic product of the thyroid gland.

Potassium, sulphur, sodium, and chlorine are also essential to bodily health and are widely distributed in normal foods There are other mineral elements such as aluminum, zinc, flourine, etc, found in very minute amounts and their function is not so well known.

Horse Racing Terms

"To nose" is the term used when one horse leads another by the length of the nose To bet "on the nose" means to bet to win. The horse that "places" runs second and the one that finishes third "shows." To bet "across the board" on a horse is to wager money on the horse to win, to place and to show To parlay is to make a multiple bet on two or more horses in different races If the first wins, according to an authority in the Detroit News, the original bet and the winnings are bet on the second horse and if the second wins, the entire sum again is bet on a third horse, if it is a three-horse parlay, etc

"The Devil s Tower"

"The Devil s Tower" is situated in Crook county, northeastern Wyoming, and is probably unparalleled anywhere in the world as an example of columnar rock It is composed of a rock similar to granite, but known as phonolite, because of the metallic sound obtained when a thin piece is struck The structure stands 865 feet above the brilliantly colored foothill on which it appears to rest The diameter at the base is close to 1,000 feet. The top, which has an approximate area of an acre and a half, is covered with sagebrush, ferns, mosses, and grass

Epitaphs in Shorthand

Once epitaphs on tombstones and memorial tablets were engraved in shorthand so the family could freely express unkind opinions of the deceased—and still keep them from the public One such tablet, hanging in St Mary's Church in Sculcoates, England, states that the lady, who died in 1761, "was a poor sinner but not wicked, and ungodly but not unrighteous." — Collier's Weekly

The First Mirror

The process of depositing metallic silver on glass to produce a mirror was discovered by Baron Liebig, a German scientist, early in the Nineteenth century He found that by pouring silver ammonium nitrate, mixed with certain reducing agents, on a glass plate the silver would precipitate and form a film of pure metallic silver on the glass. From this discovery has evolved the present-day method of mirror manufacture.—Industrial and Engineering Chemistry.

Town and State .....

The Plow That Conquered the Prairie Sod

By ELMO SCOTT WATSON

THE pioneering Easterner, recently arrived in the new state of Illinois, looked with glowing eyes out over the broad expanse of open prairie.

"Why!" he exclaimed, "thar ain't no stumps to plow around!"

But he soon learned their absence didn't necessarily mean that his task of tilling this rich virgin soil was an easy one. True, here he wasn't in constant danger of being jerked from his feet and flipped through the air when the point of his plow struck a concealed root, as had happened so often back there while his yoke of plodding oxen wound in and out among the stumps of newly cleared timberland. Nor did he have to worry about a broken plowshare and the delay in his work until he could repair the damage done by that root. But there were plenty of other difficulties.

June Ohrstrom examines what has been preserved of one of the first three steel plows made by John Deere in 1837.

This sod, tough with the toughness of thousands of interlaced roots of the tall rank-growing grass, was very different from the loose gravelly soil he had known back East. Even when he used one of these great prairie-breaking plows, drawn by three yoke of oxen, its wooden moldboard, plated with iron strips, found this virgin land a hard foe to conquer.

It was rich soil—there was no doubt about that—rich with its decayed vegetation of a thousand years, and a man could raise marvelously abundant crops of wheat and corn on it. But there was no drainage and the heavy loam clung to the iron-shod moldboard where, as one plowing pioneer said, it "stuck like Brother Jonathan's gluepot" So always he had to carry a wooden paddle with him. Then, when his straining oxen couldn't pull forward another step, he'd have to jerk the plow out of the ground and clean it off with his paddle. But it was only a few ninutes more until the sticky muck had rolled up on the plowshare like balled snow on a man's bootheel and the cleaning process would have to be repeated all over again.

Under such conditions it looked as though these prairie lands, rich as they were, could never be farmed satisfactorily. Then, in 1837, just a hundred years ago, a Yankee blacksmith changed all that. He gave them a plow that would "scour" itself. His name was John Deere and he was the "Father of the Steel Plow."

* * *

The plow of the Eighteenth century American was a crude affair, differing little from that of his English ancestors. It had a wooden moldboard, usually with plates for turning the furrow. Often there was only a single handle which left one hand of the plowman free to guide his team of horses or to whack his yoke of oxen, but eventually he learned that he could do a better job with a two-handled plow. Even then his implement did little more than scratch the surface of the soil

The First Iron Plow.

In 1797 Charles Newbold of New Jersey completed and patented the first iron plow cast in a single piece but a strange superstition prevented its general acceptance The farmers of that day believed that a cast-iron plow poisoned the soil so that only weeds would grow in it and Newbold, who had sunk a small fortune in his invention, knew the bitterness of having it rejected by the men whom he had hoped to benefit.

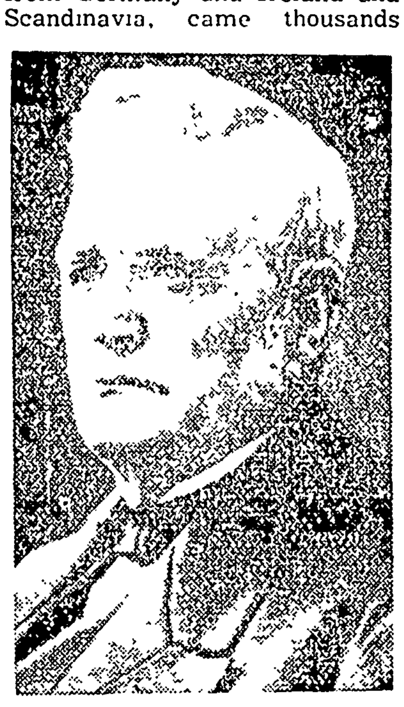
Two years later the versatile Thomas Jefferson, working out his theories by mathematical calculations, published a scientific discussion on the proper shape for a moldboard. One of the many men who carried on a correspondence with the "Sage of Monticello" was Jethro Wood, a Quaker living in New York state. Making use of Jefferson's ideas, Wood patented in 1819 an improved cast-iron plow Where Newbold's plow had been cast in a single piece, Wood's was so devised that the parts which were subjected to the greatest wear could be replaced when worn out or if one of them was broken.

The Quaker inventor was luckier, too, than the New Jersey man had been in issuing his model at a more favorable time for its acceptance By the beginning of the Nineteenth century interest in improved farming methods was quickened, stimulated by the founding of agricultural societies. One of them was the Berkshire Agricultural society in Massachusetts, founded by Elkanah Watson, who would become the "Father of the County Fair." Another was the Agricultural Society of Philadelphia which offered prizes and medals to stimulate agricultural experimentation. On one side of its medals was engraved a plow and oxen at rest with this motto "Venerate the plough."

Other inventors and manufacturers began to copy Wood's model and he spent so much money defending his rights that he died an improverished, embittered man But he had done so much to break down the prejudice against iron plows that by 1825 they were in general use. Plowing matches were held at county and state fairs to determine the best makes, new patents were taken out and new models were hurried on the market.

The Rush to the Middle West.

By this time, too, the influx of settlers into the Mississippi Valley was in full swing. The Indian menace had been removed when the Winnebago uprising in 1827 was crushed at its beginning to be followed five years later by Black Hawk's futile effort to stem the tide of white invasion. Thousands of New Englanders and other Easterners packed up their belongings and headed west. From across the Atlantic, from Germany and Ireland and Scandinavia, came thousands more—the vanguard of foreign immigration to the "Promised Land."



JOHN DEERE
"The Father of the Steel Plow."

Through the Erie canal by canalboat, through the Great Lakes by sailing schooner and down the Ohio by flatboat and barge and river steamboat they swarmed into the Middle West. They came a-horseback or on wheels They jolted over bumpy frozen roads in stagecoaches or in Conestoga wagons which sank down hub-deep in the mud when the spring thaws came. And tied to the side or the rear of those wagons there were always plows—plows with wooden moldboards or one of those new iron plows made by Jethro Wood or one of his many imitators.

But when they arrived at the end of their journey and set themselves to the task of breaking the prairie sod, they encountered the same difficulties experienced by the Easterner who rejoiced too soon because "thar ain't no stumps to plow around."

So it was for a few years in Prairieland. And then John Deere, the Yankee blacksmith, appeared on the scene

Deere was born February 7, 1804 in the village of Rutland, Vt , the son of William Ryland Deere, an English merchant tailor, and Sarah Yates Deere, daughter of a British soldier who had fought in the Revolution and then stayed in America to become a citizen of the new republic. Soon after his birth the family moved to Middlebury and in 1812 the elder Deere left his family there and returned to England, for reasons which are unknown. Unknown also is his fate for he never came back. So Sarah Deere continued to operate the shop until she died in 1826.

In the meantime young John Deere had apprenticed himself to Capt. Benjamin Lawrence of Middlebury to learn the blacksmith trade. His apprenticeship ended in 1825 and for the next few years he worked for others or in his own shops in various parts of Vermont. During these years Deere varied his routine of ordinary blacksmithing, such as shoeing horses "all around" for a dollar, by designing and making tools — shovels, hoes and pitchforks All of them had a ready sale for the Vermont farmers found them well-made and easy to handle (Later in his life Deere went back to Vermont and was delighted to find some of the tools he had made still in use after nearly 60 years).

The "Western Fever."

During these years also he had seen many of his friends and neighbors, infected by the "Western fever," pack up their goods and start out to seek their fortunes in the Middle West. But so far that Western bug hadn't bitten him. In 1827 he had married Demarius Lamb, a girl from the town of Granville, and she had presented him with three daughters and a son. The needs of his growing family brought sharply to his attention the necessity for improving his fortunes and the turning point in his career came in 1834.

In that year Maj Leonard Andrus sold his store in Vermont and went out to Illinois where he settled at a place called Grand Detour on the Rock river. Upon his return to Vermont he told his friends such glowing tales of the possibilities of this new country that many of them were persuaded to accompany him when he went back the following year.

Eventually John Deere also caught the "Western fever" and in 1836 he set out for the Illinois country, leaving Demarius, who was expecting another child, to follow him after she was able to travel. Deere set up a blacksmith shop in the little settlement of Grand Detour and soon had all the work he could handle —shoeing horses and doing repair work of one kind or another. As he listened to his customers talk about their plowing troubles he began thinking more and more about a solution for them. But he wasn't able to figure it out until one day when he visited the sawmill which Leonard Andrus and some others were operating near Grand Detour.

There he noticed a large circular saw of fine Sheffield steel which had been broken and cast aside As he saw how the sun shone on the metal, polished by the friction with wood, there flashed in his mind this thought here was the stuff for a plowshore that would scour! So he took the broken saw back to his shop and then—but let John Deere himself tell what hapened:

"I cut the teeth off the mill-saw with a hand-chisel. I cut a pattern out of paper for the moldboard and share. I laid the pattern on the saw and cut around it with a hand chisel, with the help of a striker and a sledge. I then laid the piece on the fire of the forge and heated it, a little at a time, shaping it as best I could with the hand hammer.

"After making the upright standards out of bar iron, I was ready for the wood parts. I went out to the timber, dug up a sapling, and used the crooks of the roots for handles. I shaped the beam out of a stick of timber with an axe and a drawing-knife. In this fashion, I succeeded in constructing a very rough plow."

Success!

Now that his plow was made, the next thing was to see if it would do what he hoped it would. The farmers around Grand Detour had heard about the new model which the blacksmith had fashioned but they were skeptical about its being any better than the plows they had brought from back East. So a large crowd of them were on hand for its first test.

The place selected for the trial was a field, owned by one Lewis Crandall, where, they said, no plow had ever scoured. They helped hitch one of Crandall's horses to the blacksmith's crude plow, Deere took hold of the handles made from sapling roots and Crandall slapped the reins and clucked to his horse to go ahead. The steel point bit into the gummy soil which began to cut and curl from the moldboard in a neat, smooth furrow. After an eighth of a mile they stopped and pulled the plow out of the ground.

"By cracky!" exclaimed one of the spectators who had been following them, "She's clean! No need for a paddle with that plow. She moves right along and polishes herself as she moves!"

His enthusiasm was echoed by the others. But it is doubtful if any of them realized fully the importance of the event they had just witnessed—important in the history of American agriculture and in the history of America itself.

In 1838 John Deere, while carrying on his blacksmithing work, made three plows. The next year he made ten and by 1842 he was building two a week to supply the demand for them. In 1843 he and Andrus formed a partnership and built a brick factory to house their growing business. By 1846 they were turning out 1,000 plows a year The next year the two men dissolved their partnership, Andrus remaining at Grand Detour and Deere moving to Moline, Ill , where he established the business which, by the time of his death in 1886, had become famous all over the world. In the meatime other manufacturers had entered the field to supply land-hungry Americans with the instrument by which the final act in conquering the wilderness was accomplished. But John Deere's fame was secure. In 1837, just a century ago, he won his right to the title which historians have since accorded him—"The Father of the Steel Plow"

Manure, Straw, Needed by Soil

Careful Return of Manure Is an Aid to Land That Needs Potash.

By L. B Miller, Associate in Soil Experiment Fields, University of Illinois.—WNU Service.

Careful return of manure and straw to fields provides a "soil security program" for those lands that are on the verge of a potash deficiency. In the growing of corn and grain crops, fully two-thirds of the potash content is in the cornstalk and straw. If these by-products of the farm are left on the land or are applied as manure, they return some potash to the "soil bank" to be used again.

A study of crop yield data over a 20-year period on six soil experimental farms on the gray soils shows that yield levels were as high with manure as with potash, basic treatments of limestone and phosphate having been used in each case. The manure was applied at the rate at which with careful management it could be accumulated on any live stock farm.

For the farmer who markets his crops as grain, the problem is somewhat different. At one soil experiment field the corn yields on limed gray silt loam on tight clay for the rotation ending in 1928 were 28 bushels Since that time yields have declined to 21 bushels.

This decline appears to be caused by potash deficiency for, with the application of oats straw at the rate of two tons an acre for each four-year rotation since 1929, the corn yields have been revived to an average of 45 bushels for the last four - year period. This treatment seems also to have satisfied the potash needs of other crops in the rotation. Analysis of the straw showed that each two-ton application contained about as much potassium as is supplied by 110 pounds of muriate of potash.

After limestone and clovers have boosted crop yields above submarginal levels, farmers will do well to watch for potash deficiency. Not that legume farming is a breeder of potash shortage in the soil, but as yields go up, greater demands are made upon soil minerals. When crop growth is sufficient to exhaust the supply of any one of the plant nutrients, the crop is handicapped.

A minimum acreage of soil-depleting cultivated crops such as corn and soy beans, together with the return of manure and straw, will go a long way toward making farms self-sufficient in their potash requirements.

Sash Greenhouses Make Plant Growing Less Work

Sash greenhouses have so many advantages over hot beds for growing plants from seed that every commercial vegetable grower should have one, believes C. H. Nissley, extension professor of vegetable growing at the New Jersey college of agriculture, Rutgers university.

In sash greenhouses, which are usually heated by a wood stove or with a hot water system, seed sowing and transplanting may be done in comfort, even during extremely cold weather, and watering and ventilating are easier because of the larger air space under the glass.

Last winter many of these structures were built. Some of them are located in the garage. With this arrangement, the heat is furnished to the garage and to the washing and packing house as well as to the greenhouse.

These structures are not expensive to build. An 18-sash greenhouse complete with boiler and head house, new sash and new materials should cost less than $300, not counting labor. Where sash is on hand, there may be no need of buying new. Instead of purchasing a new boiler, a good second hand one, purchased at a low price, may be used. For permanent structures, a concrete or hollow tile foundation and walls are recommended. Wooden sides may also be used if lumber is available.

In the Feed Lot

Dairymen who make the highest income from their herds plan their business so that the volume of milk production is maintained in winter months when prices are normally best.

* * *

An annual farm inventory will show a farmer just where he stands financially whether he is gaining or losing, and how much. The inventory also provides a valuable property list in case of fire.

* * *

A cemetery for cows on Langwater farm near North Easton, Mass, stands as a monument to some of the greatest dairy cows ever bred.

* * *

About 2½ million farmers are now marketing some or all of their farm products co - operatively through their 8,400 associations.

* * *

Horses free from parasites breed better, work better, are easier to handle and require less feed to keep them in good condition.

* * *

The locust makes good fence posts and, being a legume, improves the soil. It grows well on almost any type of soil.

vest Silk Prints Go Pictorial

By CHERIE NICHOLAS

re antidote to gloom, as a re-rest-fallen spir-unfailing means one up with that glorious feeling is nigh we recommend stepping in a brand new frock, the gayest, the he most animated in its and coloring you can find der your somber fur coat. o if you want to secure st, the most distinctive nding from among the and thousands of prints splay. Seriously is this dvice offered for it is a ew silk prints are that and alluring we have o be a fact that certain y attractive patterns are priced and displayed in g and by nightfall they not even a remnant left tale

silks look new—distinc- Those that unmistak-a new-this-season stamp g unique lines of thought. more than mere dress hat they have gone pictor-tive, interpretative. They eas, they entertain, they me of the better high-prints even go by name t would entitle a picture es them all the more in-There is, for example, a ing new silk print called es." The French love of films inspired Schiaparelli this amusing print with of famous stars printed scrolls simulating cin-The attractive daytime ered in the illustration s made of this star-en-k print, the color scheme cock blue and coral on beret topping this cos-rn far back on the head approved manner, so as perfectly groomed hair-latest style-correct off-ment.

for the dress shown to the same artist designer registers as "subway of Paris," and its motif carries out the idea quite realistically. This silk tunes perfectly to the gay young dress pictured to the left in the trio The dashing cavalier hat is a resort fashion such as bespeaks a coming springtime vogue. The turn-up-at-side silhouette is exploited in several Paris collections.

Strawberries, fresh strawberries! At any leading silk department where smartest silk prints are flaunting their fascinating colors and breathtaking patternings ask for "fresh strawberries," and the knowing salesperson will bring out a perfectly charming silk crepe print such as is used for the making of the winsome dress shown to the right in the group Appliques of the strawberries on net introduce an ornate accent in the bodice The strawberry corsage is dyed to match the color of the berries in the print.

Others among the new and novel pictured prints now so fashionable are enlivened with animated figures, such as golf players teeing off, or "doggie" silks with frolicsome Scotch terriers performing tricks, galloping horses, quaint undersea fish, butterflies on the wing and other motifs too numerous to itemize. Most unusual and of high-style importance are the new landscape prints; marine scenes, too, grace these silks. It is indeed a versatile story of romance, history, music and what not that the smartest prints of the season are telling.

First-choice silks for immediate wear play up vivid splotches of striking florals in breathtaking colors against black or some other preferred dark background. The wide-spaced flower motifs look newest, these in huge single flowers or in wide-set bouquets. A new and lovely silk print has artful bowknots in gay colors. In Paris black and white prints are acclaimed.

POULTRY FACTS

AIR-CONDITIONING BRINGS MORE EGGS

Protection From Cold Aids in Production.

By H H Mc Extension Poultryman, College of Agriculture, University of Illinois. WNU Service

Whether the poultry house is modernistic or futuristic in its design matters little to the average hen, but she does appreciate "air-conditioning" in the cold winter months and shows her appreciation by keeping on laying

Housing of poultry for winter is a different problem from housing other farm live stock The amount of heat developed by the birds is so insignificant from the standpoint of affecting room temperatures that those housing facilities are best which provide the hens with plenty of fresh air and at the same time protect them against extremely low temperatures.

Nearly every flock owner has seen egg production drop off after a severe cold spell. On the other hand experimental evidence indicates that heated houses with temperatures of 60 degrees Fahrenheit adversely affect the health, body, weight and egg-size of the birds.

In preventing slumps in egg production following cold spells, the use of heat to maintain an average temperature of about 40 to 50 degrees Fahrenheit has been found effective. For many flock owners, temporary heat during cold periods can be provided by the use of brooder stoves or some other common type of room heater

The kind of heating unit used will vary with the availability and price of fuel In the event of a cheap source of fuel, regular heating units might well be installed, such as hot water pipes laid in the floor or hung on one of the walls.

If heat is to be used profitably in poultry houses it is necessary that it be low in cost of operation and not represent a big investment To consider it more than a possible supplementary aid in getting winter eggs is a mistake

Lighting the Hen House Encourages Laying Flock

Putting on all-night lights will usually make the most stubborn flock lay. However, this is not recommended except for well-fed and well-housed birds. All the light there is will not make a hen lay an egg if she does not have the proper feed from which to manufacture the egg, asserts an authority in Hoard's Dairyman

The easiest way to light a chicken house is to hang a 15 watt bulb about 12 inches above the mash hopper, turning it on every night before dark and off in the morning. Those who do not have electricity may use an ordinary lantern instead.

It takes about two weeks of lighting to show beneficial results. Once lighting is started it should be continued until spring, if the lights are discontinued it will throw the birds off production When a small light is used, the chickens go to sleep at night about the usual time. Later in the night, when their crops are empty, they will get off the roost one or two at a time and get a lunch and a drink. Clean water should be kept near the feed and light where it can easily be found.

Turkey Feed

Turkeys twelve weeks of age should have whole grain scratch mixtures. They should always have both mash and scratch from then until they are marketed. Most growing mash mixtures contain 20 per cent or more of protein. Common grains contain about 10 per cent. Turkeys seem to need only about 15 per cent of protein for the last two months of growth, and hopper feeding of mash and grain provides about this much protein. Twenty per cent protein mash alone would not be economical.

La Fleche, French Breed

The La Fleche is a breed of French origin and, like the Crevecoeur, is not very popular in the United States The general type is somewhat like the Crevecoeur; the plumage color is also solid black. On the other hand, the La Fleche has no crest or beard but has a V-shaped comb which is larger than that of either the Houdan or the Crevecoeur. The standard weights in pounds, are: Cock, 8½; hen, 7½; cockerel, 7½; and pullet, 6½.

Trapnesting

There is nothing more interesting in the poultry business than trapnesting. All cannot do it because of other duties, but when it is at all possible, every flock should be trap-nested for at least six months of the year. The most important months are in winter. If a hen has proven herself to be a good, consistent producer, without too long a pause in her laying during the cold months, she will undoubtedly be a profitable layer.

Worthy of Your Pride!

MOTHER, between you and me Sis is getting to be a little show-off. Last night when Dick called, there she sat, big as life, right in the middle of things chirping about the new dress you made her: how you used a remnant left over from one of your dresses, and got it finished in one afternoon—she even had Dick feel the material.

Well, Elsie, you can't blame the child's appreciating herself in a new dress How about ourselves? Didn't you say your jumper was the talk of the Tennis Club meeting yesterday? And haven't I been spending more time before the mirror since I made my new "Stylish Stout" model? I actually feel like a new person in it—imagine me being vain at my age!

Flatters Stout Figure.

Oh, Mother, you're not vain and you're as young as any of us. You just were lucky to find a particularly flattering style for your figure. That soft jabot makes you look lovely and the whole thing is so slenderizing. But only an expert like you could make such a dress

It isn't being expert, Elsie, it is choosing a pattern that is deftly designed and giving full step-by-step instructions on how to proceed

Several Blouses.

I'm going to make another blouse for my jumper soon, Mother. I always admired that white pique shirt of Dick's, so I think I'll try it for my blouse, since the pattern is a lot like a man's shirt in design.

The Patterns.

Pattern 1229 comes in sizes 14 to 20; 32 to 42 bust. Size 16 requires 3⅛ yards of 39-inch material for the jumper and 1⅝ yards for the blouse Pattern 1847 is available in sizes 36 to 52. Size 38 requires 4¾ yards of 39-inch material.

Pattern 1882 is designed for sizes 2 to 10 years. Size 4 years requires 1¾ yards of 39-inch material.

New Pattern Book.

Send for the Barbara Bell Spring and Summer Pattern Book Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns. Interesting and exclusive fashions for little children and the difficult junior age; slenderizing, well-cut patterns for the mature figure; afternoon dresses for the most particular young women and matrons and other patterns for special occasions are all to be found in the Barbara Bell Pattern Book. Send 15 cents (in coins) today for your copy

Send your order to The Sewing Circle Pattern Dept, Room 1020, 211 W. Wacker Dr., Chicago, Ill. Patterns 15 cents (in coins) each.

Household Questions

Winter Salad—Mix one cup of celery with one cup of tart apples and half cup of walnuts Cut the celery and apples into very small dice and combine with mayonnaise or cream dressing. Add walnuts just before serving. Garnish with celery tips.

* * *

Sometimes ink stains can be removed from the hands by rubbing them with the inside of a banana peel.

* * *

You can produce your own sour milk for use in sour-milk recipes by simply adding a teaspoon of vinegar to each cup of fresh sweet milk.

* * *

If you want to make bread crumbs in a hurry and have not a sieve or a large grater, put the bread in the oven or under the grill a few minutes to dry, but not to get brown. Then rub the two pieces together, and you will have quite good crumbs for eggs and bread crumbing or for stuffing.

* * *

A good cleaner for glassware having a deposit of lime from hard water, consists of a mixture of one cup vinegar in one quart of warm water into which six or eight slices of raw Irish potatoes have been cut

* * *

If the roof should leak and stain your ceiling, cover the stain with block magnesia. Rub the block over the spot until the stain is covered, then smooth over with the tips of your fingers It works like magic

VEILS CONTINUE TO BE IMPORTANT NEWS

By CHERIE NICHOLAS

Veils continue to be news in Paris. With the flood of holiday parties, women seem always to wear little hats, oftenest of felt, with double veils floating over their faces. And that is the preferred position for the filmy things for lunch time, too.

Cocktail parties give a divided allegiance to veils, some of them over the face, but many draped over the back of the hat, making a frame for the face. Particularly amusing is one of Therese Peter's new creations. The tiny pointed skull cap—for it is actually that—is of hand-knitted gold thread. Two tiny feather nightingales ornament it at either side of the front, and hold the veil which is also embroidered in nightingales and sweeps back over the entire hat, hanging almost to the shoulders.

Violette Marsan, who is definitely a partisan of the small hat dipping a bit over the forehead, prefers her veils to be quite stiffened so that they may be turned back from the face or extended out from the face. These are shorter, not extending beyond the nose.

Co-Eds Bring Ear Muffs Back Into Fashion Again

When you hear a girl talking about getting out her ear muffs, don't think that this is the key line of a joke. For ear muffs are in vogue once more and before many weeks the chances are that most college girls and many others will be wearing them.

The bare-headed fad on college campuses has started the trend, but no one knows where it may lead to.

New Type Heels Out

Among the new covered heels, soon to make their appearance on smart dress shoes, are two models which owe their chic to sharp projections which jut out from the top of the inner surface and fasten under the instep.

OILY SKIN

was ruining her chances

PLENTY OF DATES NOW. DENTON'S FACIAL MAGNESIA MADE HER COMPLEXION FRESH, YOUNG, BEAUTIFUL

An oily, greasy complexion is a bar to romance. Men love a fresh, youthful skin. Denton's Facial Magnesia cleans out large, oily pores, smooths and firms the skin, gives a soft, even texture to your complexion. Even the first few treatments with Denton's make a remarkable difference.

Members Of North Iowa Experiment Association To Meet At Kanawha

Members of the North Iowa Experiment Association will meet at Kanawha on Thursday, March 11, for their annual meeting with specialists from the Iowa State College Extension Service and representatives of the American Crystal Sugar Company, Mason City. Nearly all of the 500 farmer-stockholders belonging to the association, largest of its kind in Iowa, are expected to attend the meeting.

KLEMME SHAMROCKS MEET LELAND IN FIRST ROUND OF SECTIONAL TOURNEY

Sports Writers Dope Goldfield, Goodell And Klemme District Contenders

In the first round of the sectional basket ball tournament to be held at Clear Lake this week Thursday, Klemme meets Leland at 7:00 p. m. The time schedule for class B follows:

Thursday

7:00 p. m. Klemme vs. Leland
8:00 p. m. Hanlontown vs. Swaledale

Friday

2:00 p. m. Crystal Lake vs. Ventura
3:00 p. m. Hayfield vs. Rock Falls
8:00 p. m. Winner Klemme-Leland vs. winner Hanlontown-Swaledale

Sports writers on the Des Moines Register staff have picked Klemme and Hanlontown as the favorites in class B at Clear Lake; Goodell and Latimer at Dows; Osawa at Ackley; Goldfield at Renwick; Hansell and Chapin at Sheffield; Kamrar and Blairsburg at Webster City; Clemons at State Center; Maple Hill expected to beat Ledyard at Burt. These are all in District six. The Register goes further to say that Goldfield heads the list of contenders to win District six, but that Klemme and Goodell are right on its heels.

Thompson, Mason City, Clear Lake, Britt, Nora Springs, Forest City and Garner appear in the class A sectional.

All broadcasting stations in Japan are members of one association, under direct control.

SHAMROCKS WIN IN BASKETBALL SECTIONAL

Zrostlik Slayer Pleaded Guilty; Rushed To Prison

AUTOLOADS OF OFFICERS WITH KILLER CONVICT

ife Sentence Follows Full Confession to Part in Zrostlik Murder

Two autoloads of officers "armed o the teeth," roared away from Iason City soon after daylight uesday for Fort Madison, taking homas J. Runyon, 31, Bethel, inn., to the state penitentiary o begin serving a life sentence r his part in the slaying of James rostlik, Britt farmer.

Runyon, who confessed late onday at Garner to participatng in the Zrostlik slaying, was eavily guarded on the trips from Iason City to Garner Those who ook him to Fort Madison over an nannounced route were Hancock ounty Sheriff Leslie Brower and s deputy, Elmer Katter, and two ate agents.

Movements Secret.

Meanwhile authorities, whose ovements have been surrounded y secrecy in connection with the rosecution of Runyon, were furished new clews to the other two embers of the bandit trio who ot down Zrostlik. In a complete nfesion, Runyon for three hours cited a series of crimes in North wa and Southern Minnesota hich one officer described as loodcurdling," and ranked Runon as Iowa "public enemy No 1"

Contents of the confession were uarded carefully by officers, but ere understood to furnish them ith extensive clews It was also lieved that the confession held formation on a series of North wa bank robberies as well as the rostlik slaying and other crimes.

Enters Guilty Plea

District Judge Henry Graven ntenced the boyish looking ngster after Runyon pleaded ilty to a charge of participating the killing.

Heavily armed deputies and trolmen guarded the courtroom. e show of force recalled state ents of prosecutors last Saturday at they feared a gangland invaon to shoot Runyon's way to edom or kill him because he ght talk to much.

HIGH SCHOOL MUSICIANS TO ENTER BRITT CONTEST

Forty-eight musicians will make the trip to Britt this week end to represent Klemme High School in the sub-district music contest. Klemme will compete against nineteen other Class C schools in eight events. Other schools competing in our class are Corwith, Crystal Lake, Fertile, Goldfield, Hanlontown, Joice, Kanawha, Kensett, Ledyard, Manly, Plymouth, Renwick, Rockwell, Swaledale, Thompson, Thornton, Titonka, Wesley and Woden

Students who will represent Klemme in this contest are Harold Abele, Evelyn Arnold, Edith Bachman, Allen Barz, Avis Barz, Doris Barz, Novella Bier, Ruth Blickenderfer, Margie Blummer, Elaine Buntenbach, Winton Etchen, Ronald Gibbs, Dorance Grange, Gladys Griffen, Ruben Grosshuesch, William Grosshuesch, Evelyn Havlik, Doris Johnson, Raymond Jorgenson, Theodore Kaduce, Carmen Kluckhohn, Arlene Kraus, Jacqueline Kudje, Patricia Kudje, Paul Lau, Verner Lau, Billie Lemke, Glenn Lewis, Lester Neuberger, Juanita Pavey, Ruth Ridder, Marie Schmidtt, Howard Schoenwetter, Paul Schuldt, Irene Spitler, Marvin Stokesbary, Irene Suckow, Wilma Swalve, Elsie Thiemann, Dwame Trees, Chester Ward, Elsie Ward, Marian Waterman, Nora Wellemeyer, Harold Wicks, Marjorie Wicks, and Raymond Wille.

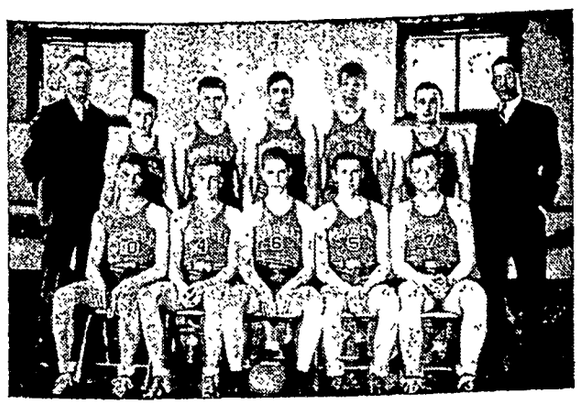
Infants Baptized

Franklin Rudolf, son of Mr. and Mrs. R. Bienert and Graydon Lee, son of Mr. and Mrs. Harvey Barz, were baptized at the Klemme Refomed Church Sunday morning by Rev. Calvin Grosshuesch.

Party Tuesday Evening

Mr. and Mrs. Fred Arnold and Mr. and Mrs. Jim Reed entertained at eight tables of bridge Tuesday evening in the rooms of the old bank building. Mrs. Walt Lemke and Carl Anderson won high prizes, Mrs. A. H. Dulmes and Dr. Raney the travel prizes, and Mrs. W. L. Thada and P M Wilson won low prizes. A lovely Lunch was served later in the evening Mrs Raymond Stoeber of Fenton was an out of town guest.

Goodell Cagers Win Sectional At Dows

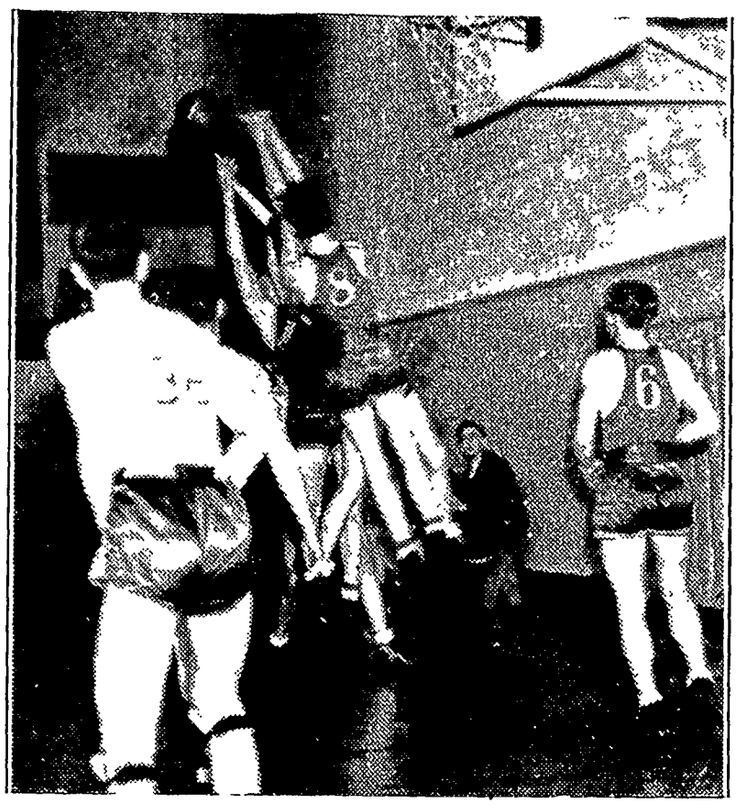


(Cut courtesy The Garner Leader)

Goodell, Seven Eagles Conference Champions and Champions of Hancock County won the Class B Championship in the sectional at Dows. They will be seen in action this week at Webster City to compete for District honors

In the back row, left to right are Principal Irwin Harder, Stanley Christensen, Elroy Latch, Virgil Sellers, Carl Ahlstrom, Donald Burk, and Supt. Russell Fish, coach. In the front row are the first string men, Kenneth Boller, Sam Dawson, Capt. Howard Dennis, Donald Zellie, and Raymond Hofer.

Klemme Defeats Rock Falls In Finals



Capt. Ted Kaduce. hidden by Truman Motland, is in the thick of the scrap under the Klemme basket in this flashphoto, taken as a favorite Klemme team won the Class B. sectional crown from Rock Falls Saturday at Clear Lake, 31 to 9. In the foreground is "Buster" Jorgenson, slim star at forward for the Shamrocks, while in the background Coack Kingery can be seen intent upon this bit of action. (Photo by Lock, Kayenaye Engraving). Courtesy Globe-Gazette.

WELCOME GIVEN BAKSET BALL TEAM MONDAY

Klemme High School sudents welcomed back their sectional champion basket ball team with an impromptu pep program in the assembly room Monday morning. Members of the squad took seats of honor in front of the room where they heard cheers and words of praise in their honor. Every member of the squad gave a short talk on what had been done at the sectional tournament and what was going to be done at the district meet at Webster City this week At the conclusion of the program, Captain Ted Kaduce presented the championship trophy to Coach Kingery, who in turn presented it to the school.

GOODELL HIGH SCHOOL WON SECTIONAL HELD AT DOWS

Seven Eagles Conference Teams Make Good Showing In Tournaments

Coach Russ Fish's Goodell High School basket ball team battled their way through the sectional tournament held at Dows, winning their final game from Latimer 20 to 16, while over at Burt, Woden another Seven Eagles Conference team downed Ledyard in the semi final 25 to 22 but lost to Seneca in the finals 22 to 11 At the same time the Klemme Shamrocks were winning their sectional at Clear Lake.

With Goodell and Klemme both winning a sectional title, and with Woden a runner-up, it would indicate that the teams in the Seven Eagles Conference are just plenty good.

Following is the time schedule for the district play at Webster City:

Wednesday Evening Games

6:00 Goodell vs. Seneca (B)
7:10 Belmond vs Webster City (A)
8:20 Kamrar vs. Ottosen (B)
9:30 Hampton vs Marshalltown (A)

Thursday Evening

6:00 Hansell vs Owasa (B)
7:10 Mason City vs Buffalo Center (A)
8:20 Klemme vs LaMoille (B)
9:30 Humboldt vs Iowa Falls (A)

Friday Evening

6:00 Upper bracket semi-final (B)
7:10 Upper bracket semi-final (A)
8:20 Lower bracket semi-final (B)
9:30 Lower bracket semi-final (A)

Saturday Evening

7:30 Championship (B)
8:45 Championship (A)

Shower Held In Honor Of Miss Mabel Schafer

A pre-nuptial shower was held at the Ed.Schaefer home last Wednesday afternoon in honor of Miss Mabel Schaefer, who has announced her approaching marriage to Mr Harold Ridder, son of Mrs August Ridder.

The afternoon was spent in playing games and recipes and hints of advice were given Miss Schaefer Gifts for Miss Schaefer were hidden about the house and she was instructed to hunt for them when an alarm clock started to ring and find them all before the clock stopped ringing

A nice lunch was served consisting of sandwiches, pickles, home made ice cream, cake and coffee

A burglar ransacked the home of E. A. Hardy at Oklahoma City, and numerous valuables lying around were left untouched the only thing stolen was a pumpkin pie, freshly baked by Mrs Hardy

Move Into District Play At Webster City

SHAMROCKS MEET LAMOILLE IN FIRST ROUND OF PLAY

Shamrocks First Game Will Be Thursday Evening At 8:20

Coach A. L. Kingery's Shamrocks, Class B champions of the sectional tournament held at Clear Lake over the week end, move forward another notch into state competition when they enter the district at Webster City on Thursday evening and will meet LaMoile at 8 20 o'clock.

A tired but happy band of Shamrock warriors rode into town Saturday night, the proud possessors of a beautiful trophy and Klemme's first sectional championship Coach Al Kingery's men had marched through the class B. competition at Clear Lake with three straight, decisive victories over Leland, Hanlontown and Rock Falls.

Klemme had been favored by Mason City sportswriters to win the meet, but no one expected them to win by such one-sided scores as they did The sectional championship carries with it the right to compete in the district tourney this week a Webster City

Take Leland 30 To 14

The Shamrocks started slow against Leland in their first tournament game Thursday night and were locked in a 4 to 4 tie at the first quarter. By half time they had pulled ahead to a lead of 14 to 7 and were starting to click in old time form. The third quarter saw Klemme far out in front to claim a lead of 29 to 9 at the end of the period. The second team played the last quarter of the game, and the score at the final gun was 30 to 14. Ted Kaduce was strong on tip-in shots in this game and led the scoring with nine points.

Win Semi-Final From Hanlontown

A powerful first half drive gave the green and white cagers their semi-final victory over Hanlontown. Paul Schuldt bombarded the bank board from long range for three baskets in the first quarter to set off the fireworks. Jorgenson and Grosshuesch continued the scoring charge, and the Shamrocks were never really in danger after hte first quarter Lemke played a masterful game taking the ball off the bank board, and Captain Kaduce was a power on both offense and defense

Drub Rock Falls In Final

Klemme and Rock Falls met in the Class B finals Saturday night at the Clear Lake sectional tournament and played before a capacity crowd. The Shamrocks ran up a 6 to 2 lead in the first quarter and then slackened their pace in the second period to allow the Falls cagers to cut the lead to 8 to 7 at the half. During the intermission, Coach Kingery gave his boys a good look at the championship trophy, outlined a few principles to folow in winning it, and ordered them to get possession of it as fast as they could The boys responded by literally playing the Rock Falls cagers off their tired feet. Every member on the Shamrock squad performed in brilliant fashion, and Rock Falls was held to two lone points the entire last half. Jorgenson led the scoring for the champions with twelve points.

CAUCUS HELD FRIDAY NIGHT; COMPLETE TICKET IS NAMED

A caucus was held at the town hall Friday night for the purpose of naming candidates for the coming town election to be held Monday, Mach 29th.

W. C. Keraus heads the ticket as mayor with the following named on the council: Julius Priebe, Wm. Kirkwood, John Etchen, Herman Paul and Lloyd Lau. Herman Stille was named as candidate for assessor.

Rumors are afloat that another ticket will be filed so the coming election should provide a little excitement.

Jack Wallulis, Oregon lumberjack, has shaved himself for three years with a double-bitted ax, one blade of which he ground to a razor edge.

Shamrock Players Who Won Class B Sectional Trophy

Here are Klemme's Shamrocks, sectional champions at Clear Lake in Class B, who will oppose LaMoille at 8:20 o'clock Thursday night in the district tournament at Webster City. From left to right, the Shamrocks are:
FRONT ROW—Bill Lemke, Paul "Herman" Schuldt, Capt. Ted Kaduce, Ray "Buster" Jorgenson, Rueben "Rube" Grosshuesch.
REAR ROW—Manager, Harold Abele, Harold Wicks, Verner Lau, Milton Paul, Elmer Trampel, Eugene Kluckhohn, Coach A. L. Kingery. (Photo by Sinclair, Kayenaye engraving). Courtesy Globe-Gazette.

Washington Digest

National Topics Interpreted
by William Bruckart

Washington. — I suppose most members of congress will deny it, but there certainly is every evidence of an agreement, an understanding, to let President Roosevelt's radical court reform legislation stew until the country is heard from. There is no doubt in my mind nor in the minds of other observers here that representatives and senators are anxiously awaiting word from their constituents because if any issue ever was loaded with political dynamite, the plan to pack the Supreme court of the United States with six additional judges surely contains highly explosive elements.

Political Dynamite

The facts I have mentioned in the above paragraph explain largely why there are so many senators and house members who remain noncommittal on the issue. They want to know which way to jump. Actually, I believe as many as half of them are going to try to determine which band wagon they ought to ride—whether they ought to go against the President or for him. In other words, the spot they are now on is not nearly so hot as the one upon which they may find themselves if they guess wrong at this time. No politician will ever jump from the frying pan into the fire knowingly.

In the meantime, the debate rages. Out and out supporters of President Roosevelt, the kind of men who follow him blindly because he is their leader, and the extreme opposition type who are against the President regardless of his position are battling for public attention. The radio is being used to an extent as great, if not greater, than occurred in the last campaign. Those who are committed for or against the President's reform proposition are anxious to sustain their positions and the remainder of the national legislature is egging on the more bold members in order that those who have not made up their minds can take advantage of word from back home.

In the meantime, as well, there are proposals and counter-proposals seeking a compromise. Few of them have any definite merit. Most of them, I believe, are purely and solely representative of floundering minds. Their sponsors entertain hopes that somehow, somewhere they will gain a streak of light that will guide them through to a proper answer politically.

There has been only one plan for giving the federal government more power that can possibly be described as sound. That is the original proposition by Senator Robinson of Arkansas, the Democratic leader of the senate, who announced early in the session of congress that he favored an amendment to the Constitution. While Senator Robinson did not then say so, nor has he said so since, the truth is that he and many others would like to see the people of the country have an opportunity to pass upon any program that would change the country's judiciary. The President regards this method as too slow. He thinks that any changes which he desires ought to be made at once and holds that the tremendous majority by which he was re-elected gives him authority to do so. Yet, as the picture now stands, there is every prospect of considerable delay and from the way I analyze the circumstances, delay will provide the vast majority of voters with an opportunity for determination of the question which is vital in this case: Does the country want to keep an independent system of courts or does it want to establish a precedent by which this administration or any other administration can influence those courts to do the bidding of the nation's Chief Executive?

* * *

Through many years and in every year there has been constant criticism of congress for delay in reaching conclusions. It is fortunate, in my opinion, that these delays constitute a part of our governmental system. They allow time for cooling off.

Safety vs. Speed

I think it will be generally agreed that every time legislation is rushed through congress ahead or as part of an emotional wave among citizens, there has invariably resulted unworkable, if not entirely unsound, statutes. Such is bound to be the result when men and women fail to think things through—when they fail to examine all of the phases of any problem.

President Roosevelt moved quickly, and I believe sincerely, in proposing the NRA and the farm relief plan under the agricultural adjustment administration. Yet, neither of these reform measures stood the test of workability; neither had been drafted upon a proper knowledge of the ends they were to serve and neither did justice to all of the people. It was only natural, therefore, that they should fall by the wayside.

These two laws are cited because they are the outstanding examples of emotional legislation. There are many others, most of them not as bad. But lately one offshoot of the NRA has arisen to plague the administration. I refer to the so-called Walsh-Healey law.

In order to refresh memories, let me explain that the Walsh-Healey law prohibits the federal government from buying products of mills or factories, or any fruit of labor, unless the supplying contractor has complied with the same minimum hours and wages that were a part of the old NRA codes. Unless the contractor agrees to produce the material which the federal government is buying in accordance with those terms, his bid must be rejected under the law.

When the Walsh-Healey law was passed, there were comments heard in several quarters that the time would come when the government itself would regret the legislation. That time has arrived.

Everyone is aware, of course, that Great Britain has started on a naval building program under which it will expend approximately seven and a half billion dollars in the next five years. American policy always has called for matching the British navy ship by ship. Fifteen years ago when the Harding disarmament program was written into treaty form, we destroyed ships so that our tonnage was the same as that of Great Britain. Now, with the world in a turmoil, with Great Britain announcing an unprecedented building program in order to protect its vast colonies and dominion from aggression, the need arises for a building up of our navy again. At least that is Mr. Roosevelt's view and he has wide support for it.

* * *

To build up the navy requires vast amounts of steel and other products of industry. Much of the naval building will be done in the navy's own yards. Thus, it has come to pass that the navy has been unable to obtain steel and other equipment since the manufacturers of the needed equipment are not willing to subject themselves to the terms of the Walsh-Healey law. In some instances where the navy has sought to buy material, the manufacturers have refused even to make an offer or state a price at which they would sell the required material and there is a very real possibility that unless the Walsh-Healey law is repealed or dodged, our navy building program may have to come to a halt.

Unable to Get Steel

The reason for this condition is that the Walsh-Healey law, with its prescription on minimum hours of labor and wages would place a burden on industry that it cannot bear and return its cost of production. The government, as a buyer, is a tough customer in any event. Its specifications are always more difficult than is the practice in industry. Add to that, then, the requirement that men may work only 30 hours a week and that their pay shall not be reduced from the rate of their compensation when they were working 40 hours a week and you have burdened any manufacturing establishment with a load that will break its back.

Right now, the Navy department is trying to find a way to get around the provisions of the Walsh-Healey law. President Roosevelt has said nothing publicly concerning his attitude but there are many who believe he himself feels the law is not working out the way it was intended.

It is quite a distance, of course, from the Walsh-Healey law to the present controversy under Mr. Roosevelt's plan to pack the Supreme court with six new judges if one stops his examination of the two questions at the surface. It is not difficult, however, to see a direct connection. The Walsh-Healey law was driven through congress in haste. The bad effects of it are coming now two years after its enactment. If the Supreme court reform proposal is driven through as quickly and with as little examination as the Walsh-Healey law, we will reap the reward sooner or later and probably for many years to come.

"Gnu" of Hottentot Origin

The name "gnu" is of Hottentot origin, and was in use by natives when white settlers first went to South Africa. The name "wildebeest" is a Dutch word meaning wild ox, and probably originated on account of the animal's habit of prancing and capering in antics suggesting those of a bull enraged by toreadors in a Spanish arena. It is said that the Boers, in early days, found that a red cloth excited these antelopes and was frequently used in hunting them. In addition to the white-tailed gnu, there is a species known as the brindled gnu or blue wildebeest, which is abundant in East-central Africa. Gnus have disproportionately large heads which give them a grotesque appearance. They have maned necks and distinctive tufts of hair on their faces. The bulls stand about four feet tall at the shoulders. The general color of the white-tailed species is a deep brown. Their horns are formidable weapons and under certain conditions the animals are dangerous.

Mussolini Receives Former Ethiopian Chieftain

Ras Seyoum, fiercest of the Ethiopian warrior chieftains during the recent Italo-Ethiopian war, is graciously received in Rome, by Premier Benito Mussolini. The dignified, bearded chief is now a peaceful friend of Italy, offering good advice, unofficially, from his Addis Ababa home.

"ISOLATES" LEPROSY

Dr. Earl B. McKinley, one of the world's foremost experts on leprosy, who has announced "isolation" of the true germ of leprosy. The doctor, dean of medicine at George Washington university, is in the Philippines for four months' research work in the Culion island leper colony, residence of 6,000 lepers.

Illini Gun Molls Show Prowess

Two expert marksmen are these University of Illinois coeds, Miss Mary Margaret Smith (left), of Waukegan, Ill., and Miss Marjorie Lynn of Paris, France. Each fired a "perfect," scoring 100 of a possible 100, in a postal match with the girls' rifle team of the Carnegie Institute of Technology, Pittsburgh, Pa.

Twin Brothers Marry Twin Sisters

A double romance was consummated in Washington, D. C., recently, when Phillip and Neno Bellante, twin brothers, married Fanny and Frances Bridget, twin sisters. The men are tap dancers and plan to teach their wives to dance to aid them in a stage career. Left to right: Neno Bellante; Frances and Fannie Bridget and Phillip Bellante.

KEEPS BRITONS FIT

His Gun Became a "Judge"

SOMEONE once observed: "The Declaration of Independence ted that all men are equal, but Colt revolver made that statent a fact." Certainly that was ved on the Western frontier ere the quality of man depended n his quickness of the "draw" where this little weapon beme the symbol of law in a laws land—it was judge, jury and h executioner all in one. Little nder then that it should become own as "Judge Colt."

The father of "Judge Colt" was a nnecticut Yankee, born in 1814. a boy Samuel Colt listened to erans talk about battles of the volution and especially about the ts of a rifleman named Tim Mur- who had a double-barrelled ri- If someone could invent a gun t would shoot five or six times hout reloading, that nation would e the world. But, of course, that s impossible, said the men of t day.

Young Sam Colt didn't believe it s impossible. So he began eximenting with a four-barrelled e but he couldn't make it work tisfactorily. Then he was apprened to a sea captain and from the llors he learned to carve out little jects in wood.

One day in the Indian ocean, ile idly watching the steersman the wheel, he noticed that reardless of which way the wheel s spun, each spoke always came rectly in line with a clutch that uld be set to hold it. As he tched he found himself visioning les in the rim of the wheel—holes ich successively came into alignent with a stationary opening. In flash he saw the answer to his oblem of a repeating gun. Then th "a jacknife that cost less than dollar he started to whittle out the undation of a fortune which was run into millions." From that odel came the revolver which first oved its value in the war with the minole Indians, won an even eater reputation in the Mexican ar and by the time the Civil war d begun was an indispensable rt of a soldier's armament.

Not only was Sam Colt the inven- of a weapon which vitally afcted military history, but he "was e first of the great American instrialists. Colt, not the modern tor car manufacturer, conceived d first utilized in his plant standdized machine production, dision of labor and the 'assembly e' He showed the way to the dern promoters of war . . . .he s the precursor of the modern unitions kings—a pioneer in the t of playing one nation against anher to increase his sales."

An Important Vice-President

T'S a standard joke that the vice president of the United States is out the most unimportant individual in our federal government less the President happens to die. that case he immediately bemes a very important man. But ere was one vice president whose gh place in American history is e to hi own death, rather than at of a President.

In 1884 Thomas A. Hendricks of diana, who had served as conessman, senator and governor d who had twice before been successful candidate for the Presncy and once before defeated for vice presidency, was elected e president when Grover Cleveld defeated Blaine, the Republin candidate. Hendricks died eight nths after his inauguration but death while in office was not ique. Four other vice presidents George Clinton, Elbridge Gerry, lliam R. King and Henry Wilson had suffered the same fate. But the first time in three-quarters a century America became aware the potential dangers in such a uation.

The Constitution provides that in e case of removal, death, resignan or disability of a President, e vice president shall succeed m But in 1885 the vice president s dead. Suppose now that the esident should also die, resign or removed from office. Who would en become President? Neither the nstitution nor any act of congress d provided for that emergency, d apparently no one had ever ven any thought to its possible reults.

So congress got busy and on Janry 19, 1886 it passed a law proding for a Presidential succession case the vice president could t serve. Under its terms the sectary of state would become Presint. In case he, too, would be unle to serve, the next in line would the secretary of the treasury d so on down the cabinet—sectary of war, attorney-general, stmaster - general, secretary of e navy, secretary of the interior, cretary of agriculture, secretary commerce and secretary of lar.

Thus in bringing about this ange Thomas A. Hendricks beme an "important" vice president but he had to die to do it!

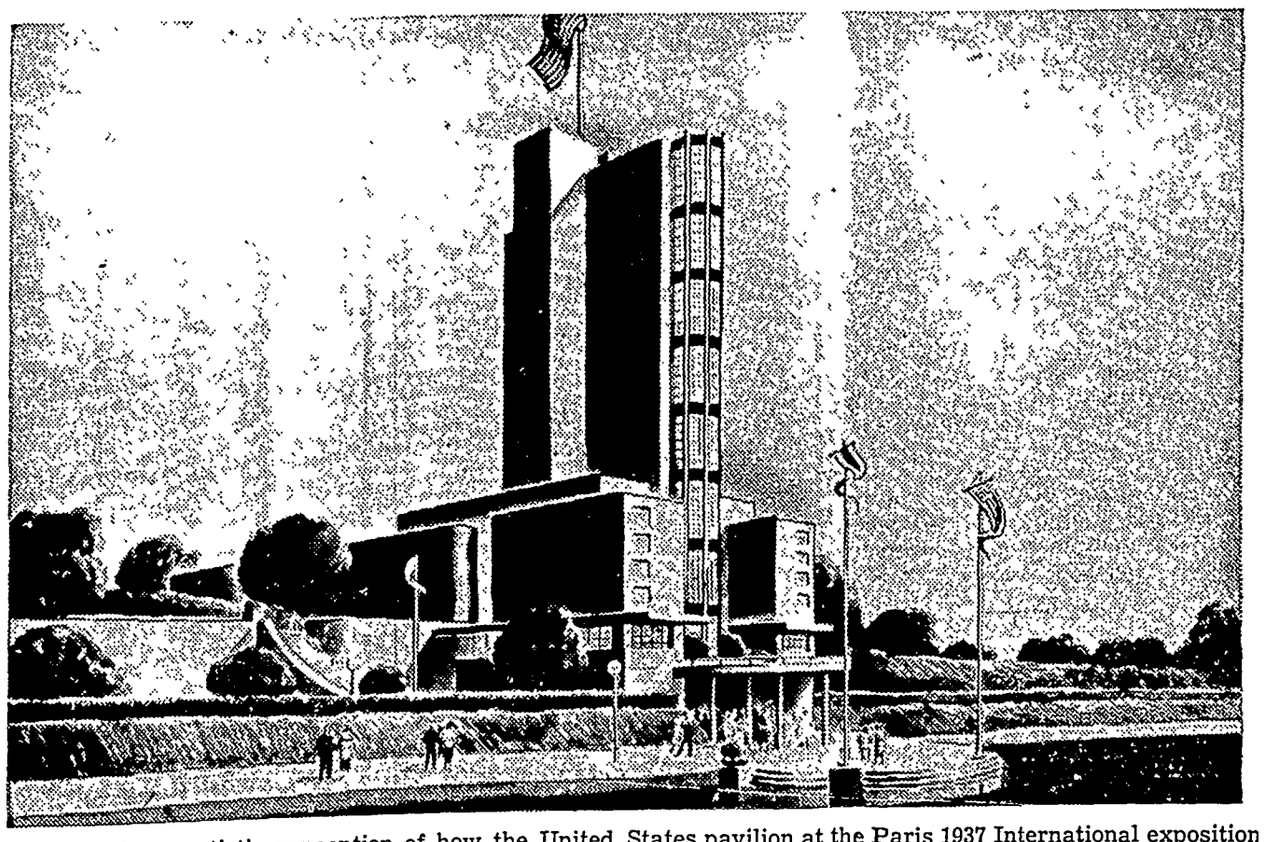
Architects Plan U. S. Pavilion for 1937 Paris Fair



Above is an artist's conception of how the United States pavilion at the Paris 1937 International exposition will look. Built of stone, steel and glass, the American building will rise near the new Twin Museums of Art on the banks of the Seine and will be one of the largest national pavilions at the exposition.

Dwelling on Grievances—

Power of Trouble Is Increased And Distributed by Talking of It

THERE is a curious and very much mistaken idea that by talking of our grievances and our troubles, we decrease their power over us to make us miserable. Instead, by dwelling on them we reinforce their power. We not only do this, but we scatter the seeds of their discontent, as we unburden our hearts, and a whole new crop of disturbing thoughts enters into the minds of those who bear with us during our outpouring of words.

Making Misery.

If the person to whom we speak is near and dear to us, our troubles weigh on them almost as their own. We are unwittingly the cause to them of an added weight of discordant thoughts, and perhaps they may be trying to get the better of their own bothers.

Sympathy Versus Help.

We have only to consider the effect on ourselves of listening to others talk of their worries, misfortunes, and hard luck, to realize the depressing power of such conversation. It is seldom we can do anything to help them. In fact persons who talk of their troubles seldom do it to get helpful suggestions. They are bespeaking sympathy and often are disturbed, hurt or annoyed, when they get advice, even though it be excellent. What is wanted is to hear expressions of understanding of their position as difficult, and to hear their actions considered wise. Is this not really what we, ourselves, hope to hear when we air our troubles?

Trouble Mongers

When we are awakened to the fact that talking of our woes adds to those of the listener without lessening ours, that we are implanting troubles in the minds of others, we surely will try to be more careful about giving vent to the misfortunes by talking about them. Moreover, if we do continue to be trouble mongers, no one will be eager to talk with us.

If, instead of dwelling on our grievances, we discuss pleasant topics, we are not only giving pleasure to others, but we are actually doing ourselves a kindness as well. We diminish our own depression by rising above our troublous thoughts, thus becoming conquerors in and through our conversation.

HERMAN PAUL, Mgr.

Agate Is Special Mascot; Many Kinds Are Reported

The agate is the special mascot of the farmer and gardener, notes a writer in the Montreal Herald. It was, however, believed to be powerful as a general mascot all over the world. In ancient Rome it was considered the most fortunate of all stones if mounted in a ring, and another Roman belief was that it would cure affections of the eyes. Eastern races, notably the Persians, considered that this stone conferred eloquence and brought to its owners good fortune by inheritance or through a document.

There was a superstition also that it made its wearers lovable and beloved. In one reference book it is stated that there are numerous kinds of agate—cornelian, amethyst, quartz, jasper and even the opal are classed in this section. There are star agates, moss agates and clouded agates. The milky white agates are often artificially stained—an art of ancient origin. In a brilliant green they are most salable.

Some fine agates come from Scotland and are there called Scottish pebbles. In the shops in the Highlands they are sold as souvenirs.

"Government of, By and for the People" Traced

According to Rev. H. Barker's "English Bible Versions," the first appearance of this phrase "government of the people, by the people and for the people," found in Lincoln's Gettysburg speech was in the preface of the old Wickliffe Bible, translated before 1384, in which it is declared that "this Bible is for the government of the people, by the people and for the people." The Home Book of Quotations states that a careful examination has failed to disclose this passage in the Wickliffe Bibles available.

Theodore Parker used the phrase in three different addresses, delivered in 1850, 1854 and 1858, to illustrate what he called the American idea of democracy. Daniel Webster used almost the same words in a speech in 1830. John Adams in an address in 1798 employed the phrase "a government made by themselves (the people), for themselves and conducted by themselves." Thomas Cooper in 1795 published a pamphlet in London entitled "Some Information respecting America" in which he stated "The government is a government of the people and for the people."

European, American Plan

When a hotel is operated on the European plan the guest pays a stipulated amount for his lodging only If he eats at the hotel he pays for his meals separately, just as if he were eating at an independent grill or restaurant. Under the American plan the guest pays for both lodging and meals at a regular rate. In the early history of the United States most of the inns and hotels were run on the American plan, but now there are very few hotels operated on this plan except in the smaller cities and at resorts. The European plan prevails in most foreign countries. In this country some hotels combine both plans, leaving it to the wish of the guest to pay a regular rate for lodging only or for both lodging and meals.

The Dry Tortugas

The Dry Tortugas are a series of islets, ten in number, at the extreme end of the Florida Keys, and extending some distance into the Gulf of Mexico. They form part of a county of Florida, and are low, barren and desolate, except where partly covered with mangrove bushes. The islets are of coral formation, and are defended by fortifications. On Bush or Garden Key is Fort Jefferson, and a lighthouse. During the Civil war the port was used as a penal station for rebel prisoners.

Indians Cruel to Dogs

The burning of a white dog was an annual religious festival of the Indian tribes of Ohio. After a pure white dog was found, his legs were tied together so that he could be hung onto a pole that stretched between two forked posts stuck in the ground. Underneath the dog was built a fire, and while the redskins yelled and danced around the primitive altar, the animal would be lowered to and then raised from the blaze. It was slowly tortured until life was gone.

Indians and Sign Language

Aside from Indians, most persons who become skilled at the art of pantomime or sign language employ gestures of face, hands and body to make themselves clear. Indians are noted for keeping straight faces when they talk with their hands, but then, Indians used this device often when dealing with unknown or enemy tribes.

Galileo

Galileo was born in Pisa, the house standing almost in the shadow of the leaning tower where in the Sixteenth century he proved the law of gravitation—a truth which nearly cost him his life because it was contrary to the teachings of the period.

Mr. and Mrs. Will Jurgemeyer and family were Sunday afternoon visitors at the Henry Johnson home near Garner.

Mr and Mrs. Ernest Helps entertained Mr. and Mrs Ted Dutheridge and Mr and Mrs Harold Shoafstall to dinner Sunday.

Swine Diseases Show Similar Symptoms

Owner Runs Great Danger From Wrong Diagnosis Or Delay

—Prepared by American Foundation for Animal Health

Delay in obtaining an accurate diagnosis is probably the farmer's greatest enemy today, in his fight to prevent losses in his herd from one or another of the common diseases affecting swine.

There are at least four swine diseases in which the symptoms are often so similar that it is difficult for anyone but a veterinarian to make an accurate diagnosis and outline proper treatment.

Hog cholera, erysipelas, swine plague, and infectious enteritis, all have a certain similarity in symptoms. Cholera, for instance, causes high fever ranging from 104 to 107 degrees. So does swine plague and also erysipelas. There is a tendency in all these diseases for the animals to withdraw from the herd, some showing complete prostration. Likewise, in all these diseases, loss of appetite, high fever, and other evidences of sickness are common symptoms.

An acute outbreak of erysipelas may so closely resemble an outbreak of hog cholera that it may require a laboratory examination to determine which disease is prevalent.

The layman may be the keenest observer and may have excellent judgment on the care and handling of swine, but with such similarity in symptoms, lesions and history between the contagious swine diseases, it does not seem wise to leave the destiny of one's herd in the hands of a person not scientifically trained to diagnose accurately The only safe course, when hogs begin to show any of the above symptoms, is to call a qualified veterinarian. Prompt action may save most of the herd. Delay may result in heavy loss.

Of course, there is no successful treatment for hog cholera. To wait until after cholera breaks out is generally too late in any case. The only safety against this disease is vaccination when the pigs are young. Immunity from cholera after such vaccination is generally good for the life of the hog, and is cheap insurance when performed by a competent veterinarian.

Napoleon an 8-year-old horse owned by Rolla E. Barnhart of Brazil, Ind., had always been the first in the stable to be fed, and apparently came to regard this priority as a vested right. When his owner happened to feed another horse first a few days ago, Napoleon bit off Barnhart's left ear and ate his cap.

Sunday School 10:00 a.m.
Morning Worship 11:00 a. m.

Sermon Subject "The Lesson of Sifting for Sainthood." Luke 22:31. Another sermon in the series."With Christ in the Deeper Lessons." This is the time to study the Passion week of our savior as we are in the Pre-Easter season.

A minister of the Gospel is fulfilling a divine call, "Go ye into all the world and preach the Gospel to every creature He that believeth shall be saved, andhe that believeth not shall be damned" The call did not eradicate the preacher; he is still a human being with human weaknesses, dispositions, temperaments. The members should pray for their preacher that he be the best preacher possible.

The public is invited to our services.

We will answer these questions Sunday morning:

1st. What was the name of Cain's wife?

2nd Where is a long discription of a perfect wife?

3rd What bridegroom gave a stag-party and schemed to get a linen shower?

COLLECTING BIRDS EGGS

Boys who make a habit of collecting the eggs of various kinds of birds may find themselves in trouble with Conservation Officers in the future. The Conservation Commission has set up strict regulations for the issuance of scientific collecting permits These permits are issued only to persons engaged in needed scientific investigatons, who are directly connected with some accredited education institution, and hen only when the person has been recommended by two reputable zoologists of the state. Only 33 such permits have been issued by the present Commission

SCHOOL NEWS

Grades 7 and 8

On Thursday night the eighth grade had a Monopoly Party at the school house. Jacqeline Kudje and Shirley Johnson had the most property and money at the close.

Those who received 100% in spelling are· Allen Barz, Jacqueline Kudje, Harold Swalve and Keith Stille

Grades 5 and 6

The folowing people were neither absent or tardy in the fifth grade the past six weeks: Robert Reed and Julia Bell

Those in the sixth grade being neither absent or tardy this six weeks are Billy Grosshuesch, Eugene Haberkamp, Robert Jahnke, Dean Merkel, Edwin Tiggeman, Betty Jean Etchen, Betty Jean Reed, and Caroline Schwartz.

The sixth grade langpage class has been writing original poems this past week. Next week we shall have some of them printed m our school news.

Mrs. Harry Gram visited our room Wednesday afternon. We always welcome visitors

Grades 3 and 4

We have had perfect attendance in our room this week.

The third graders are playing the "Reading Game" in reading class now We are going to use The Learn To Study Readers while were playing the game.

"The Calendar" is the new language unit the fourth graders are working on. They are making a class booklet and learning songs and poems in connection with the unit.

We are making fairy houses in art class. Next week we will make fairy flowers and trees.

We have started our unit on "Shelter" in third grade geography class.

Friday we had our first timed test in fourth grade arithmeic. Herbert Mueller and Edward Barz made the high scores. They added 10 examples m 8 minutes and both had 9 examples right. The addition examples were 3-figured numbers, 6 columns. This is an excellent record.

Grades 1 and 2

The following received A in spelling on Friday. Melvin Howard, Donna Heivelin, Robert Baack, Hellen Suckow, and Esther Hartbeck.

Thesee second graders received A in spelling: Roger Ridder, Elizabeth Goll, Dean Jacobs, Roger Bock, Peggy Lou Coobs, Clarence Larson, Phyllis Christiance and Willis Anderson.

The first graders made a merry-go-round. Mr. Galbreth helped us to put it on the Victrola so it will really go around.

We made fairy flowers one day this week.

KLEMME SHAMROCKS' RECORD FOR THE SEASON

Out of twenty-one games, including county and sectional tournaments, the Klemme Shamrocks have scored 721 points against their opponents 428, or a net gain of 293 points for the season.

The Shamrocks have won 15 games and lost six. The six games were lost by a total of 25 points, or an average loss of four points per game The Shamrocks have averaged 34 points plus per game as against their opponents' 20 plus per game, or a gain per game of 14 points for all games played.

Following is the record for the season:

Klemme	46 —	Corwith 24

FARM BUREAU LADIES MET AT ED. BECKER AND REV. HUENEMANN HOMES

Fifteen ladies spent a very pleasant day last Thursday, March 4th, at the home of Mrs. Ed Becker They assembled at 11.00 o'clock and prepared the dinner taught in the lesson on meat cookery. Mrs. C. J. Wille and Mrs. Ralph Elder are leaders of this group, but in the absence of Mrs. Elder, Mrs. W L. Thada and Mrs. C. J. Wille gave the lesson

Mrs. Awalt Yahnke invited the ladies to meet at her home for the next lesson which is the last one of the year. "Modern Trends in Bread Making" will be studied. All ladies interested are invited to meet at Mrs. Yahnke's in the near future;

Met At Huenemann Home

Twenty-one ladies met March 9 at the Rev. Huenemann home to learn about "Modern Trends in Bread Making." Miss Zollinger, H. D. A., gave the lesson.

In Mrs Weaver's discussion upon "Should a Homemaker Bake Her Own Bread" several good thoughts were brought out. In the first place, a great saving can be effected; in some cases a half. Then too, your home grown products can be used, and finally, dating back to Bible times it has always been homelike for mother to bake the bread.

The making of whole wheat bread with its many variations was demonstrated . The Knotted Roll, Braided Roll, Butterhorn and American Parker House Roll are some of the many variations. At noon the following menu was served Norwegian Filled Cabbage, Southern Spoon Corn Bread, Tomato Jelly Salad. Graham Cracker Rolls and Coffee.

This was the last lesson of the year and plans for Achievement Day, August 20th, were made. Both Ell and Liberty drew the lesson upon "Unusual Vegetable Cookery" to be demonstrated in their booths

A New Memorial to Stephen C. Foster, America's "Tragic Troubadour"

—By— *Elmo Scott Watson*

HE DIED poor but he left to his fellow-Americans a wealth of melodies which have been their favorites for nearly three-quarters of a century—such songs as "My Old Kentucky Home," "Massa's in de Cold, Cold Ground," "Old Folks at Home," "Come Where My Love Lies Dreaming," "Oh, Susannah" and "Nelly Was a Lady."

And now—such is the irony of fate—they are building a memorial which will cost half a million dollars to honor Stephen Collins Foster, in whose pocketbook was found, when he died, 38 cents in coins and "shin plasters," Civil war paper money. The memorial will stand on the campus of the University of Pittsburgh in the shadow of Pitt's famed Cathedral of Learning and it will be dedicated early this year during Pitt's celebration of its growth in 150 years "from log cabin to skyscraper."

Funds for the erection of the Foster Memorial building were raised by the Tuesday Musical club of Pittsburgh, in co-operation with the university and with musical clubs in 25 other states.

In it will be a "Foster shrine," containing the collection of Fosteriana which Joseph K. Lilly of Indianapolis, Ind., has gathered together at a cost of approximately $160,000.

This collection and its curator, Fletcher Hodges, who for six years directed the gathering of the original Foster manuscripts, first editions, books and personal belongings of the song writer, arrived at the Cathedral of Learning recently and began storing away these priceless relics of "America's Tragic Troubadour." As soon as the newly-completed stone work on the interior of the memorial is finished he will move the collection to its place in the shrine where, under the terms of Mr. Lilly's gift, they shall "belong to America."

The building in which this Fosteriana will find a home is adjacent to the main building of the Memorial which contains an auditorium seating about 750 persons, with rehearsal and reception rooms below. It has been built of stone to harmonize with the other buildings of the Cathedral quadrangle in the heart of Oakland, Pittsburgh's "civic center."

Depicts Foster Characters.

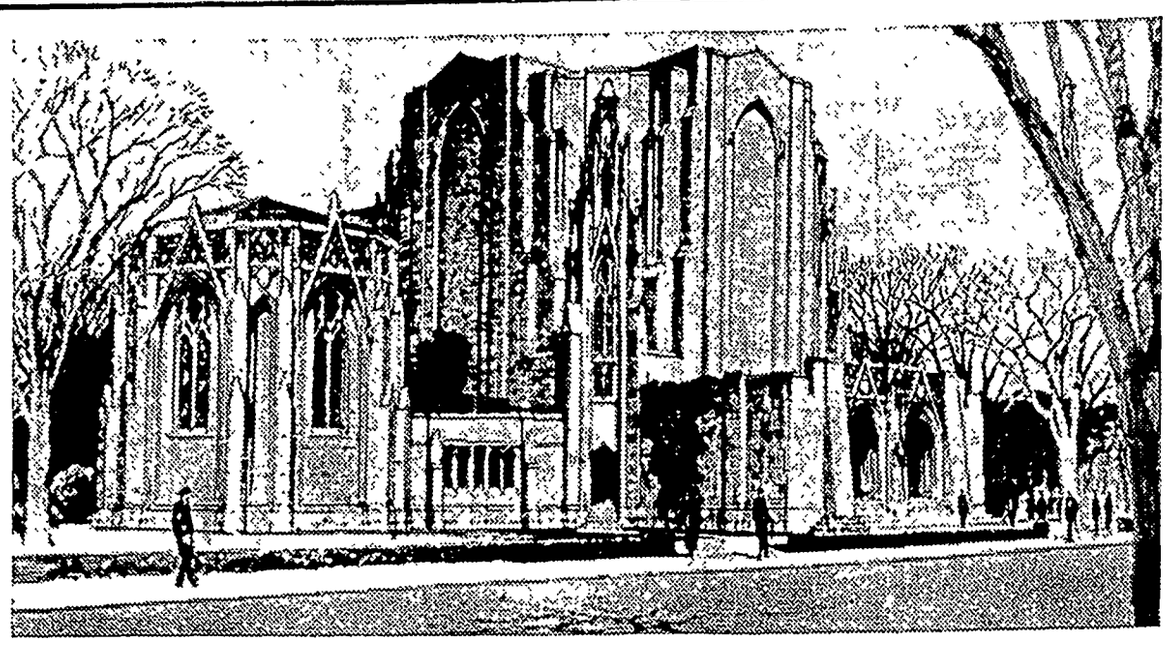
Leaded windows, with colored medallions depicting the characters in Foster songs, will be installed this spring. The memorial room, connected with the auditorium foyer by a covered passage, will house the Foster collection and will be open to the public. Students of Foster's life and times will have access to the research facilities of the Lilly collection.

The collection includes literally "everything under the sun" relating to the composer. There are hundreds of books in which he is mentioned—some in only a sentence—including some modern histories of jazz.

One of the rare personal effects is the pocketbook Foster carried when he died, containing the 38 cents and a scrap of paper on which was written, "Dear friends and gentle hearts," probably the last thing Foster wrote and the likely title for a song. It, too, is in the collection.

Eighteen letters written by Foster, principally to members of his family in Pittsburgh including his brother, Morrison, one of the few contemporaries to appreciate his genius, are also included.

Foster's melodeon, only four and a half octaves in range and, hence, not suitable for the fingering of a composer seeking a melody, is one of the valued articles.



Architect's drawing of the Stephen Collins Foster Memorial on the campus of the University of Pittsburgh. It will house a "shrine" containing a priceless collection of Fosteriana.

His Most Popular Song.

One large bookcase, ready for installation in the Foster Memorial, contains 500 phonograph recordings of every Foster song, some made especially, but most—including the Japanese version of "My Old Kentucky Home"—produced for commercial sale. Many songs, such as the most popular, "Old Folks At Home," which had 250 editions before 1900 and many more since, appear in several versions.

Second most popular, the classification based on numbers of editions published, is "My Old Kentucky Home," according to Mr. Hodges. "Massa's in de Cold, Cold Ground" ranks third, and for fourth place "Old Black Joe" and "Oh, Susannah" are tied.

Six of the rarest items in the collection are manuscripts from Stephen Foster's hand for songs containing both words and music. One notebook in the collection, 220 pages long, contains practically all his drafts for verses written between 1851 and 1860.

In addition to the Lilly collection the Foster shrine will display other contributions. One is the composer's flute, given to the university by the grandson of a personal friend of the musical genius.

Recently announced, too, was the gift to the university by the Andrew W. Mellon Educational and Charitable Trust of a portrait of Foster which belonged to the famed Thomas G. Clarke collection of American portraits.

STEPHEN COLLINS FOSTER
(From the portrait painted by Thomas Hicks in 1852)

A Portrait of Foster.

The portrait, 25 by 30 inches, and in an excellent state of preservation, shows the composer in a three-quarter length pose, and depicts him as a young man in his early twenties. It was painted by Thomas Hicks, a noted artist, for Firth, Pond & Co. of New York, who were the publishers of Foster's music. Foster gave the artist only one sitting. Whether the artist was not satisfied with the portrait or whether the publishing firm cancelled the order, cannot be ascertained and no definite statement can be made in this regard. Thomas Hicks, the artist, gave the portrait to William Hicks, a prominent merchant of Brooklyn, who was an admirer of Foster. William Hicks died in 1895. His widow gave the portrait to her granddaughter, Mary Elizabeth Post Holmes, who in turn gave it to her daugher, Mary Elizabeth Case, she being the last of the family to own the portrait, and who sold it in the summer of 1935.

The reason for erecting a memorial to Foster in Pittsburgh lies in the fact that he was born in the Lawrenceville section of that city, much of his career was spent there and his body lies in Allegheny cemetery, not far from his birthplace, beside those of his father and mother. Considering the place which he and his songs hold in the hearts of his countrymen, it is appropriate that the birthday of the nation should also be his birthday. For he was born on July 4, 1826, and at noon on that day the ninth child of William B. and Eliza Foster was ushered into the world to the tune of "Hail Columbia," "Yankee Doodle," "Hail to the Chief" and "The Star Spangled Banner," played by blaring bands as Pittsburgh celebrated the 50th anniversary of the signing of the Declaration of Independence.

William Foster was not present to welcome his youngest for, as a prosperous merchant trader and a leading citizen of the community, he had been made an assistant to the mayor of Pittsburgh in the conduct of the Independence Day celebration. So Eliza Foster endured her travial alone and it was she who named her latest - born Stephen Collins for the son of a neighbor and childhood friend of hers, a little boy who had died just before her own son was born.

The Child Musician.

The youngest member of a large family, Stephen was both petted and spoiled, but he seems never to have been very well understood by the other Fosters. He showed an aptitude for music early. When he was two, he would place his sister's guitar on the floor and, bending over it, pick out harmonies from its strings. When he was seven he was taken into a music store by one of his brothers. There he saw a flageolet, picked it up and was playing a tune upon it before his brother realized what he was doing.

At the age of thirteen Stephen was taken by his older brother, William, to Towanda, Pa., so he could attend Athens academy at Tioga Point, not far away. But the boy was homesick at Athens and spent much of his time with his brother at Towanda, attending the Towanda academy as well as the one at Tioga Point. He was not a particularly apt student and about the only importance there is to this period in his career is that during this time he composed his first music, "The Tioga Waltz," arranged for four flutes and written for the commencement exercises at Athens. On that occasion Stephen played the leading part himself, while three other students played the remaining parts.

In 1841 Stephen entered Jefferson college at Canonsburg, Pa., 18 miles from his home at Pittsburgh, and stayed in this institution just seven days. Then, overcome by homesickness, he left college, never again to seek a formal education. A year later he composed the music of his first song "Open Thy Lattice, Love," a poem written by George P. Morris which had appeared in a supplement to the New Mirror.

As a gay young blade of nineteen in Pittsburgh, Foster had a half dozen boon companions, youths of his own age, who met regularly twice a week to sing at Stephen's home. They brought their banjos and guitars with them, and called themselves "Knights of the Square Table." It was for this group that Stephen wrote many of his finest and earliest songs, including "Louisiana Belle," "Uncle Ned" and "Oh, Susannah." The latter was immediately taken up by all the minstrel shows, of which there were a great number then on the road.

For this song Foster received $100, an event which determined his career for him. "Imagine my delight in receiving $100 in cash!" he wrote later. "Though this song was not successful, yet the two $50 bills I received for it had the effect of starting me on my present vocation."

Disputed Authorship.

Then E. P. Christy, head of Christy's Minstrels, asked him to write a song for him to sing before it was published and the result was the world-famous "Old Folks at Home" or, as it is more familiarly known, "Suwanee River." By permitting Christy to sign his name instead of Foster's to this song, the composer obtained an advance of $15. Later he received more than $2,000 in royalties from its sales but he had a great deal of difficulty in establishing his authorship for Christy copyrighted it in his own name.

The decade 1850 to 1860 was Stephen Foster's heydey. In 1850 he was married to Jane McDowell. In 1852 he wrote "Massa's in de Cold, Cold Ground"; began efforts to have himself acknowledged as the rightful author of "Old Folks at Home," and with his wife took that memorable steamboat trip to New Orleans, the rich fruit of which was to be the song, "My Old Kentucky Home," copyrighted in 1853.

But Foster's married life was not a happy one. He and his wife lived for a few years with Stephen's family in Pittsburgh, then moved to New York. There the composer yielded more and more to the temptation of strong drink until at last his wife left him, mainly because she had to earn a living for herself and their child, Marion.

Foster died on January 13, 1864, in Bellevue, a charity hospital in New York City. In his clothes they found the small purse containing 38 cents and a slip of paper with five pencilled words on it. They were "Dear friends and gentle hearts." Says John Tasker Howard in his biography of Foster:

"No doubt this was to have been the title of an unwritten song, but whatever its intent, the phrase describes quite perfectly the dear friend and gentle heart who added 'Old Folks at Home' and a dozen other immortal songs to the world's spiritual riches."

POULTRY

USE GOOD EGGS TO GET GOOD CHICKS

Incubators Cannot Produce Without Quality.

By Roy S. Dearstyne, Head North Carolina State College Poultry Department.
WNU Service.

Some poultrymen are more optimistic than businesslike in their methods. This is especially true of those who assemble all kinds of eggs, good or bad, for hatching purposes.

You can't get more out of your incubator than you put into it, and poultrymen are urged to be more careful in selecting eggs for hatching.

Hatching eggs should come only from high quality, healthy, vigorous birds. They should be normal in shape, have well calcified shells, and weigh more than 23 ounces to the dozen.

They should be gathered several times a day and stored in a warm place to avoid chilling, as eggs that have chilled too much will not produce good chicks. A temperature of 40 to 60 degrees is best. Hatching eggs should not be kept in storage for more than seven to ten days.

The incubator should be carefully cleaned, disinfected, and tested before the eggs are placed inside. Likewise, the brooder and brooder house should be cleaned and tested before any chicks are put in to grow. The brooder should be started in operation at least 24 hours before the arrival of the chicks, so as to give it time to become evenly warmed throughout.

Destroy subnormal or cull chicks. Do not brood more than 300 chicks in one unit, and allow a square foot of floor space for every two chicks. Watch the temperature closely; overheating is worse than a slight chilling.

Winter Season Adds New Burdens to Poultryman

The winter management and feeding of poultry places an important burden on the shoulders of farmers, declares C. F. Parrish, extension poultryman at the North Carolina State college.

It is during the winter months that baby chicks are hatched and started. The grower who pays careful attention to the selection of quality eggs for hatching and then feeds and manages the chicks properly is in a good position to make a substantial profit from his birds.

However, the farmer who uses haphazard methods of selecting hatching eggs is likely to get a devitalized crop of pullets and cockerels.

If possible, the poultryman should purchase his chicks from an accredited hatchery. Then the chance of having a poor quality flock will be minimized.

Mating Purebreds, Mongrels

The practice of mating purebred cockerels with mongrel females is carried out in many instances, but is not recommended, says an authority at the North Carolina State college. The mongrel birds are already of questionable value and, while there may be an increase in egg production, better and more rapid results would take place if the mongrel females were replaced with purebred chicks. Where chicks are bought be sure that they come from an accredited hatchery and eggs from a blood tested flock.

Poultry Notes

Market eggs at least twice a week.

* * *

Poultry on many farms are managed principally by women.

* * *

A common mistake made in heating laying houses is to provide too much heat.

* * *

Artificial light in the poultry house is important to prevent a molt in early-hatched pullets.

* * *

Chicken mesh wire should be placed over the dropping boards so that the hens cannot walk on them.

* * *

Poultrymen say hens cannot maintain a high egg production during winter months unless they are properly managed.

* * *

The poultry population of Massachusetts increased 30.7 per cent between 1930 and 1935. Six million chickens are now raised annually in the state and two and a half millions are kept for layers.

* * *

Litter from poultry pens has about four times the fertility strength as ordinary barnyard manure.

* * *

No feed should be fed except in hoppers or troughs, and waste from milk and water containers should be reduced to a minimum.

* * *

Records kept for five years on Ohio poultry flocks show that the money received for eggs makes up 87.8 per cent of all income from the flock

My Favorite Recipe

Barbecue Chicken

Broil the chickens in the usual way and when they are done pour over them this sauce:

Melt two tablespoonfuls of butter in a saucepan, add the same quantity of vinegar, a teaspoonful of made mustard, a strong dash of tobasco, a teaspoonful of worcestershire sauce, a teaspoonful of sugar, a saltspoonful of salt and half as much pepper. Blend together, heat to a boil and pour over chickens. Serve in 5 minutes.

re Columbus Landed.

nd greatest event in all our Western Hemisphere, in fact, occurred right here in these islands. That was on October 12, 1492, when Columbus discovered America, in the form of San Salvador.

On this island, facing the open Atlantic, is a monument set up by the Chicago Herald in 1891 to commemorate the landing of the great navigator. Here also a lighthouse rises, but not to show modern ships how to anchor where the Santa Maria did; rather, to help them keep safely away, for few visitors venture now where Columbus set up the Cross and traded trinkets with the shy Lucayans.

All these Lucayans—about 40,000 —were enslaved by Spaniards, sent to work in Hispaniola mines, and the Bahamas left quite uninhabited. Yet, in time, these islands were to become not only a historic stepping stone by which Europeans and Africans reached our shores, but the stage for almost incredible adventures.

Enmity toward England, after the loss of the Great Armada, brought sanguinary conflicts, which in time became notorious for the nautical brigandage of the buccaneers. For generations these outlaws were the cause of constant diplomatic friction between London and Madrid, as when English sailors, seized from the Boston ship, Blessing, were stripped by Spaniards, tied naked to mangrove bushes on a Bahama cay, and left to die of thirst in plain sight of each other.

Famous is the story of "Jenkyns' Ear." When Spaniards took an English ship commanded by a Captain Jenkyns, it is written that they cut off one of his ears and handed it to him, telling him to take it home and show it to his king! This ear, in a bottle, he exhibited later in the house of commons.

Even Virginia and the Carolinas dreaded these Bahama pirates, especially one Edward Teach, or "Blackbeard." With his last command, the Queen Anne's Revenge, mounting 40 guns, Blackbeard and another pirate leader spread terror all along our South Atlantic coast.

When, in desperation, the British government finally sent that iron-fisted governor, Woodes Rogers, to harg pirates and make Nassau safe for honest traders, it began the first normal life it had ever known. That was in 1718, and the motto put on its coat of arms was, "Expulsis Piratis, Restituta Commercia."

"Pirate Treasure" Still Hunted.

Today Blackbeard, his long whiskers worn in three beribboned braids tucked into his waistband among his many pistols, is but a memory—or a favorite model for Nassau masquerade parties. Yet hunting pirate treasure is still a constant adventure. Always, just around the corner, is a mysterious man with an "old map" for sale.

"Feast, then famine, that's been our history," an Englishman born in Nassau will tell you. "Over and over again, in the last 300 years, hordes of people have swarmed into Nassau, on every errand from selling slaves to running rum; these boom periods meant lots of easy money, but there's been many a lean time in between."

When Liverpool used to send 100 or more "blackbirders" to Africa each year, and when our own American-built craft were in this traffic, as many as 74,000 blacks annually used to be sold into the West Indies, of which the Bahamas got their share.

After Cornwallis yielded at Yorktown, loyalists flocked to the Bahamas, bringing their slaves, silverware, and other personal effects. On plantations of cane and cotton developed by these royal refugees rose another tide of profits. This ebbed when slaves were freed, and when competing agriculture grew up in the States.

Agriculture Has Failed.

Loyalists, departing for England after this land boom faded, turned their farms over to ex-slaves or other retainers; lacking skill, capital, or sufficient energyy, these latter failed. Farming declined. An easier living—if on a lower standard — was offered by the sea. Hence today the once productive fields are idle and brush-grown.

Andros island, for example, named for an early governor of the Massachusetts colony, was once the scene of much sisal growing, well-known families in England being the owners. Now all that is abandoned.

Yet today a new kind of prosperity, wholesome and satisfying, is coming to Nassau. This is its rise as a popular winter resort, which compensates for the vanished revenue of former more exciting days.

Silk Print for Your Easter Frock

By CHERIE NICHOLAS

FASHION foresees as tremendous a vogue for prints as ere eye hath witnessed. What with gay and flowery, bursting-with-color silk prints massing together in a scene of riotous beauty, as they are at the dawn of this new season, the Easter style parade promises to be a colorful pageant.

The beauty of the super-lovely prints brought out this season transcends all that has gone before. Some of them look as if nature itself had thrown clusters of flowers on black or navy grounds and in their own graceful way petals and leaves had fluttered down in pretty confusion. This tendency to depart from the conventional adds to the fascination of the new prints.

One of the charms of a colorful and chic flowery printed silk dress or ensemble is that it breathes the very breath of spring even if snows may not yet have melted out of sight. Then, too, clad in a rapturous gay print you are sure to look lovely regardless of features, avoirdupois or the color of your hair. As to the practical side of the question a vivacious print has a most fetching way of taking kindly to the idea of being worn under your fur or your smart new spring cloth coat which is something to think about, seeing that Easter comes so early this year.

For a fashion "first" the demand centers mostly about the dark-ground types with emphasis on wide spaced effects. Huge floral patterns both for daytime and evening in a maze of vivid colors is the new note for silk prints. There is also a pronounced trend in favor of strikingly bold black and white effects. Also enthusiasm is running high for paisley and cashmere prints with an oriental beauty that baffles description. Very new too, and outstanding are the flower-striped silk prints.

The high-style costume to the left in the illustration is fashioned of one of the very smart black crepes printed in white with crown motif, no doubt inspired by the coming coronation. The modish square-shouldered black wool cape is lined with the dress silk. The little black straw pillbox has roses encrusted in the crown with petals spattered on the draped veil.

To the right, the print that fashions this model is black crepe spaced with flowers in bright chartreuse yellow. Similar prints are carried out in gorgeous multi-color. The bodice and sleeves are draped in accordance with latest style dictates. The skirt is sunburst-pleated. The tiny cap worn far back on the head is last word millinery.

The more widely spaced the smarter for prints, which gives zest to designers to play up the idea with originality so that one flower cluster will position at the very most effective spot on the bodice while another remote bouquet will find its way to exactly the strategic point it should to show off to best advantage on the skirt. Note the lovely dress centered in the group. The very fragrance of violets is caught in this gray silk crepe frock with huge bunches of violets scattered over the ground. A lovely Easter corsage completes this violet symphony. It is really quite the thing to wear flowers, artificial or natural, matching the flowers in the silk print. Green straw braid with a cluster of violets makes the pert hat and green suede gloves are worn with it. If it's a cold Easter wear this lovely gown under your gray Persian lamb coat.

DUSTY-PINK WOOL

By CHERIE NICHOLAS

A pastel wool frock for spring, and you will be right up-to-the-moment in style. Among the fascinating colors there is no lovelier than the new much-exploited dusty-pink. The attractive two-piece dress pictured is made of a highly fashionable dusty-pink tropical worsted. Allied with a multi-colored knit swagger coat the color scheme tunes in delightsomely to a gladsome spring day. Jet buttons and a black patent belt add to the prestige of this fashionable costume.

COTTON LACES IN FAVOR FOR EVENING

By CHERIE NICHOLAS

Cotton laces have been popular for a couple of seasons past, but most often these have been associated with the sports and daytime frocks for summertime, and in the sturdy types of laces that suggest fabrics. This season, however, they are seen in great quantity and variety for evening, and are competing in favoritism with the prints and sheer fabrics. These cotton laces for evening are the sheer and crisp types, and are delightfully novel and varied in their patterns. They usually follow simple classic lines, not too formal in cut, and are especially nice for young girls. They are most effective when worn over rustling taffeta slips, and this of course makes them the more desirable to the debs and sub-debs.

Hemlines Focus Fashion's Spotlight on Smart Heels

There's no longer any need for women to depend on the chance swish of a skirt to reveal the sparkling heels on their evening shoes. To make certain that heels get the notice they deserve, French designers are sponsoring evening gowns with skirts draped up a trifle at the back.

This is in line with the trend for bringing back views to the forefront of style.

Charm Motif

If you have fallen for the fad of charms in your costume decoration, you'll want a quilted suede bag which displays a charm motif. Some of the same figures which are popular for chain bracelets are presented on the leather surface. Animal themes are featured most but they are far from realistic.

First Stirrings of Spring

THE chic young miss above, center, says, "I make my own clothes. I learned sewing from Mother first, got a touch of it in school, and a real exposure in 4-H activities. I choose this dress for Spring because it looks like Spring, and because it takes the minimum of time and money. Puff sleeves and princess lines give a formal note if I wish to impress the folks (which I often do) and the peplum jacket is added for frivolous reasons—when I want to feel a bit sophisticated, and it makes a sweet all-occasion dress."

A Practical Choice.

The Lady on the Left says, "I'm practical. I choose patterns that I can cut twice; then I have a gingham gown to set me off in my kitchen and an afternoon dress in which to entertain the Maggie-Jiggs club. The all-of-a-piece yoke and sleeves make me look years younger, the shirred pockets give the decorative note every dress needs, and I can run it up in an afternoon."

Three-Purpose Pattern.

The Girl in the Oval has a far-away look in her eyes. She says it's because she wears glamorous blouses like this one. She cuts her pattern three times—no less—and evolves a blouse in eggshell for her velvet skirt; one in velveteen for her tweeds, and the third in metallic cloth for after-five activities. "The skirt with its simple well directed lines is equally well suited to tweeds for sport, velvet for dress and wool for business," says Madam.

The Patterns.

Pattern 1832 (above left) comes in sizes 32 to 44. Size 34 requires 4¾ yards of 39 inch material.

Pattern 1263 (above center) is designed in sizes 12 to 20 (30 to 40 bust). Size 14 requires 4⅜ yards of 39 inch material for the dress and 2¼ yards for the jacket—to line it requires 2¼ yards of 35 inch material.

Pattern 1958 (above right) is available in sizes 14 to 20 (32 to 46 bust). Size 16 requires 2⅝ yards for the blouse in 39 inch material and 2 yards of 54 inch material for the skirt.

New Pattern Book.

Send for the Barbara Bell Spring and Summer Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns. Keep Health

One would rather lose wealth than health. It requires as much wisdom to keep one as the other.

Uncle Phil Says:

Doubt, the Pernicious Weed

A suspicious person raises a large crop of doubt.

Add one new word to your conversational vocabulary every day; first you will surprise your friends, then floor them, then lose them.

Life is made up of getting and giving and forgetting and forgiving.

As long as there is one crack-brained nation in the world, the others have to build battleships.

Whatever is required to make him happy, that is what a man wants; and in most cases, it is not a great deal.

Most agreeable discovery a man makes at middle-age is that he has a good reputation.

Time for All Things

Men noted for efficiency almost never appear to be hurried. They seem to have plenty of time for every task that comes to them. Likewise they have ample time for leisure.

Conceit is deceptive, but it is rarely perceptive.

Scores are your real friends in a small town, but they will talk about your affairs as they expect you to talk about theirs.

A lover's quarrel is the sauce that seasons the courtship.

Don't Irritate Gas Bloating

If you want to really GET RID OF GAS and terrible bloating, don't expect to do it by just doctoring your stomach with harsh, irritating alkalies and "gas tablets." Most GAS is lodged in the stomach and upper intestine and is due to old poisonous matter in the constipated bowels that are loaded with ill-causing bacteria.

If your constipation is of long standing, enormous quantities of dangerous bacteria accumulate. Then your digestion is upset. GAS often presses heart and lungs, making life miserable.

You can't eat or sleep. Your head aches. Your back aches. Your complexion is sallow and pimply. Your breath is foul. You are a sick, grouchy, wretched, unhappy person. YOUR SYSTEM IS POISONED.

Thousands of sufferers have found in Adlerika the quick, scientific way to rid their systems of harmful bacteria. Adlerika rids you of gas and cleans foul poisons out of BOTH upper and lower bowels. Give your bowels a REAL cleansing with Adlerika. Get rid of GAS. Adlerika does not gripe—is not habit forming. At all Leading Druggists.

MODERN

"Simmer-Save" Cooking

SAVES TIME, FOOD AND FUEL WHEN USED WITH

SHELLANE Bottled Gas

The "SIMMER-SAVE" is the most economical and convenient gas burner ever developed It gives outstanding advantages over the ordinary burner when SHELLANE bottled gas is used.

The "SIMMER-SAVE" burner makes it possible for the homemaker to SAVE gas in top burner cooking—to eliminate pot watching and boil-overs, to preserve the valuable vitamins and mineral slats.

"SIMMER SAVE" results in the saving of approximately 35 per cent of the gas used in top burner cooking. It eliminates excess steam and moisture. "Simmer Save" is clean. no burned or blackened pans and kettles.

Before you buy any kind of stove or range for cooking, be sure to investigate "SIMMER-SAVE" equipped gas ranges and SHELLANE "bottled" gas. Tis modern cooking method is available to the farm homemaker as well as the housewife in town.

We will be glad to explain how YOU can have this modern cooking aid at a low cost. There is no oligation, just phone:

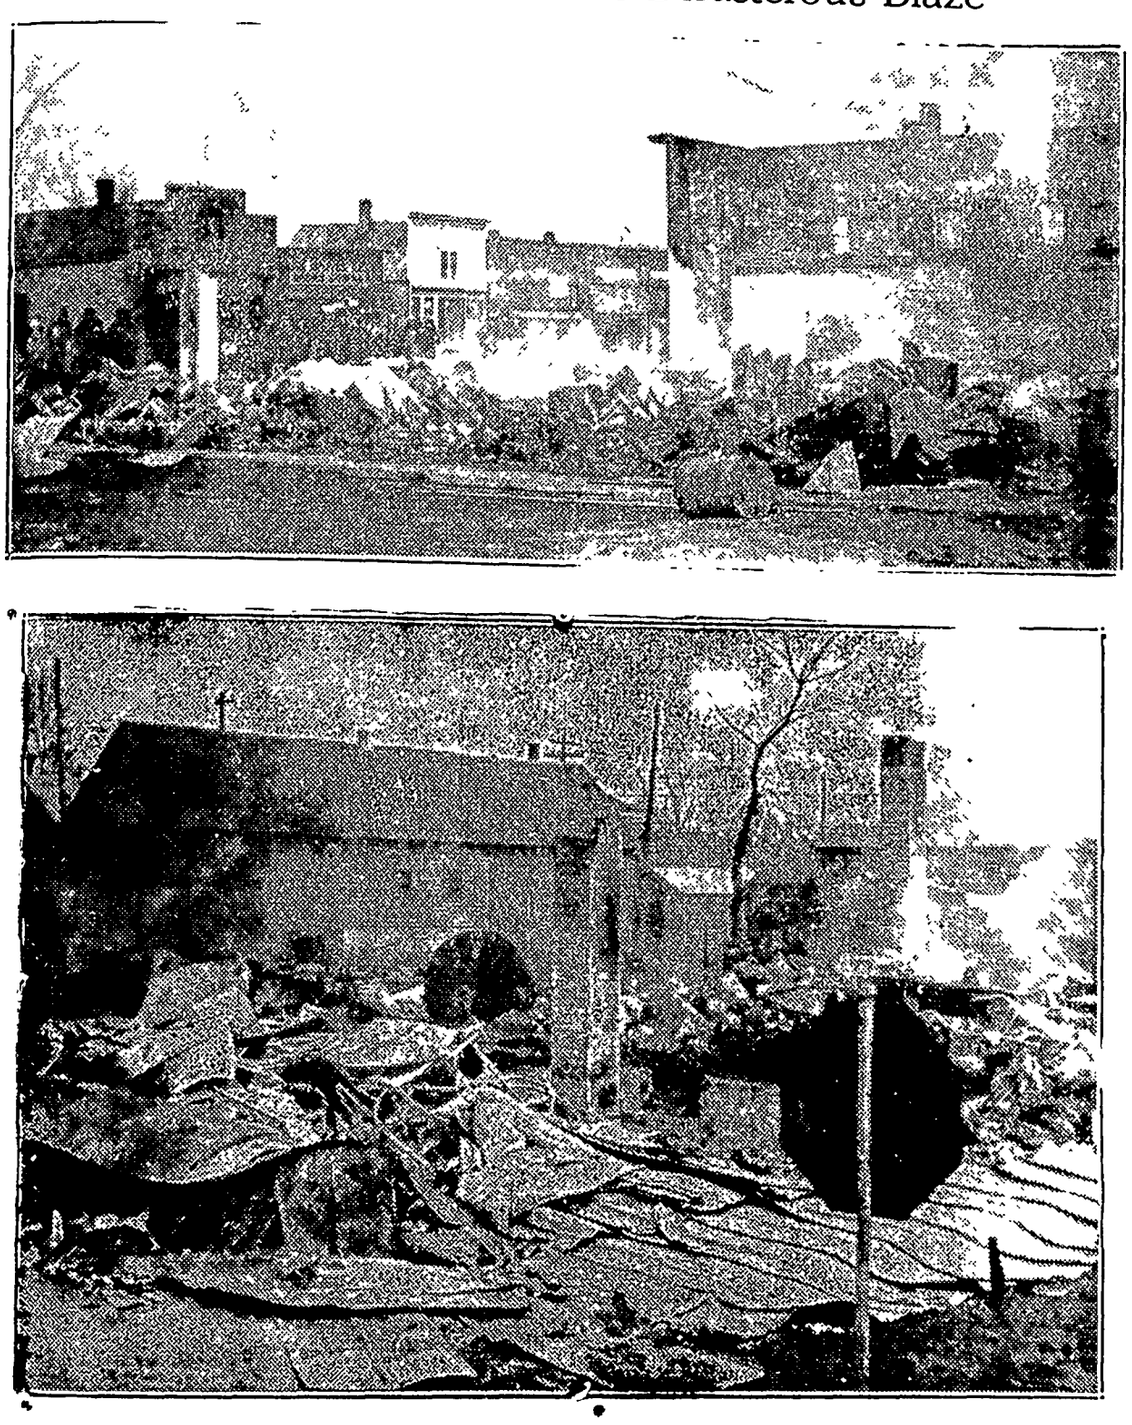
THIRD OF LOCAL BUSINESS BLOCK RAZED IN FIRE

Ruins After Klemme's Disasterous Blaze



Ruins of three business structures in Klemme are shown in the above photo, looking northeast toward Main Street. In the foreground is what is left of Jacob's double front hardware store, next the post office and then the Stott grocery store, in the basement of which the fire started. Damage which was done to the Klemme Food Market can also be seen. The lower photo shows a closeup of the hardware store, wreckage of which contained a melted mass of bicycles, pans and other hardware equipment. (Photos by Lock, Kayenay Engravings.) Courtesy Globe-Gazette.

Jacobs Hardware, Stott's Grocery And Post Office A Mass Of Ruins

IDENTITY OF SECOND BANDIT IS MADE

Early Arrest of Third In Zrostlik Slaying is Anticipated

GARNER—A first degree murder charge was filed Saturday against Clair Gibson, 31, in the murder of James Zrostlik and his arrest m the near future was predicted by authorities. Two have been connected with the murder, nd the prosecution of Gibson will ing the slaying case to a close, was said

Charges against Gibson were d by County Attorney, W. D Daly, who just returned from Milbank, S Dak in company with Sheriff L M Brower and Eppo Gremmer, Sr. and his son Eppo, Jr, of near Woden. The two Gremmers identified positively the exhumed body of Robert Markword, 39, as one of the three bandits who terrorized the Gremmer family after slaying Zrostlik.

The Hancock county group made a fast trip to Milbank, 800 miles, a record time Friday

Identification of Markword was made by comparison of fingerprints, scars and by a cowgirl tatooed on the arm of the man. It was known Markword bore a similar tatooed figure.

Iowa state agents made the trip to examine the body, descripions of which led them to believe it was that of Markword—one of three members of the Thomas J. Runyon bank robbery gang which allegedly shot down Zrostlik on an Iowa highway 18 months ago.

Officers had been tracing Markword since last July At the time he was buried, his identity had not been established.

Zrostlik was slain while enroute to early mass with his family Nov. 2, 1935, near Duncan. He stopped his car to offer aid to occupants of another wrecked car. They seized his car. When he protested, he was shot and hurled into a roadside ditch.

Thomas Runyon, recently captured in Witchita, Kans., was sentenced last week to life imprisonment in Iowa penitentiary on pleading guilty to second degree murder charges.

NORTHERN LUMBER COMPANY INSTALLS POWER MACHINERY

The Northern Lumber Co. have added a complete line of motorized wood working machines to their workshop equipment. The new machines include a 10 inch table saw; jointer; drill press with mortising equipment; a band saw and shaper.

With the installation of this new equipment the shop is now in a position to turn out mill work of various types and practically everything in the way of cabinets can be made right in the shop.

The Northern Lumber Co. has one of the finest wood working shops in North Iowa.

Five In Confirmation Class At The Reformed Cuhrch

Five young people constitute the Confirmation Class at the Reformed Church, Winton Etchen, Harold Swalve, Della Kaduce, Elnore Schuldt and Elsie Christians. The class will be examined before the congregation Sunday, and confirmed on Good Friday, March 26th.

BLAZE EARLY SUNDAY MORNING WORST IN KLEMME'S HISTORY

JACOBS WILL BUILD NEW MODERN STORE

KLEMME FOOD MARKET DAMAGED BY FLAME AND WATER

Garner Fire Department Rendered Valuable Assistance Fighting Fire

Fire of unknown origin, which started in the basement of the Earl Stott grocery store early Sunday morning spread rapidly and razed three Klemme business places, the Stott Grocery, the Post Office, and the E. F. Jacobs hardware store, and damaged the Klemme Food Market and also a warehouse at the rear of Jacobs store

The fire was discovered shortly after midnight by Fred Henschen who roomed above the post office in the Day building. Henschen, who was awakened by the smoke, turned in the alarm. The Earl Stott family, who had an apartment at the rear of their store, also in the Day building, had gone to Titonka shortly after 11:00 o'clock.

The Klemme fire company arrived on the scene shortly after the alarm was turned in, but had difficulty in locating the fire, which evidently was burning along the floor joists and then spread to a side wall and up along the ceiling. Dense smoke filled the Stott store and it was impossible to enter the building.

After the flames broke out a call was put in for the Garner fire department who arrived in a few minutes with their modern fire truck and booster pumps.

All mail and equipment was moved from the post office and when it was apparent the Jacobs store and the Klemme Food Market were in danger, contents of those places were removed as rapidly as possible. A large part of the stock of the Jacobs store was removed before smoke and danger of flames made it hazardous to continue work there.

The two companies of firemen concentrated their efforts to hold the fire to the two buildings and kept streams of water playing on he Jacobs warehouse and the Food Market in an effort to save the buildings Nearby houses south of the blazing buildings were in danger from flying embers, and several small fires broke out but were soon controlled

Plate Glass Windows Broken

Practically every window in the Wellemeyer Building across the street north of the burning buildings was cracked by the heat. A number of windows in the State Savings Bank building across the street west of the Jacobs Building were also cracked.

Much credit for confining the blaze to the two double front buildings is due to the Garner firemen fighting the blaze with their high pressure equipment. Two lines of hose were strung from the booster pumps and the Klemme department had two lines of hose from the hydrants. This was a severe test on Klemme's 1,500 foot well, but there was plenty of water to spare and at no time was there any danger of running short of water. The Klemme fire department did excellent work with the equipment they had to work with and stayed right on the job until every possible danger had been taken care of.

Need For Equipment Seen

Klemme has more than an adequate supply of water to take care of any fire, but the firemen lack equipment to fight with. The costly blaze estimated at $30,000 to $40,000, showed the urgent need for a modern fire truck and equipment for Klemme.

Post Office Lost No Time

Postmaster John Day had a force working all day Sunday and by Monday morning was open for business in cramped quarters in the old State Bank Building The mail,, supplies and equipment were all moved without the loss of a single article. Plans are being made to locate the post office in its present location permanently.

Jacobs Again Open For Business

E. F. Jacobs will conduct business temporarily in quarters at his warehouse. The warehouse will be re-arranged so that trade can be taken care of and service rendered. The Jacobs hardware stock is scatter all over town and every available garage, barn and empty building is stocked full of hardware. However, in a few days the "store" will swing right back into full-time business.

Plans To Re-Build At Once

As soon as the ruins can be cleared away, Ed will start building operations. Plans are being drawn for a modern, up-to-date store building to be built on the site of the old wooden structure. The new building will be of brick, double-front, with full basement and modern equipment and conveiences Until the new building is completed Mr. Jacobs will conduct business at the warehouse and from storage space in the State Bank Building.

Larson Back In Business

C. A. Larsen had o force of men at work moving stock back into his Klemme Food Market Monday and is rapidly getting his store back in order Quite a bit of damage was caused by fire, water and smoke and his building will need repairing

A large part of all the losses in Sunday morning's blaze was covered by insurance.

Card of Thanks

We sincerely appreciate the help given us by the people of this community, by the firemen of Klemme and Garner for their efforts and good will in trying to save our building and stock in the recent fire. We would like to thank each one individually, so please accept this as a personel "Thank you."

Ed. F. Jacobs
Chris Jacobs

WE THANK YOU

We want to take this means of thanking the people of this community for their patronage during the time we have been in business. We also want to thank you for kindness and sympathy shown us after the fire.

Sincerely
Mr. and Mrs. Earl Stott
and Keith

Shamrocks Lost In District At Webster City

HAMROCKS LOSE TO LAMOILLE IN DISTRICT

uperior Height Nets 25 To 15 Victory For LaMoille

The Klemme Shamrocks wrote e finish to one of the school's os successful basketball seasons hen they dropped their first me in the ditrict tournament at ebster City last Thursday night. quintet of giant basketeers from aMoille turned back Coach Kingy's men by a score of 25 to 15 to t them out of the running for rher state honors.

The game was much slower than ose played by Klemme in the ctional meet. The two big teams emed to cramp each other's style, d the action was never very fast. LaMoille forward by the name Lively lived up to his name to ell, however, and his total of six eld goals and one free throw oved to be the undoing of Klemn's sectional champs. Another ively at guard made five points, the Lively brothers really beat e Shamrocks single-handed

Schuldt was the cheif scorer r Coach Kingery's men, in fact e got all the field goals that were ade with two of his famous long ots and one side-arm thrust om the edge of the court Laoille's defensive men made numous fouls in holding down the lemme offensive attack, and the hamrocks made good on nine of eir fifteen free throw chances to keep them in the running till near the end of the game.

HIGH SCHOOL BASKETBALL GAMES OVER WOI AT AMES

All of the daytme games of the state high school basketball tournament in Des Moines March 18, 19 and 20, will be broadcast over WOI, radio station of Iowa State College at Ames.

"Andy" Woolfries, enthusiastic fan and long experienced announcer of these tournamets, will be at the "mike" to give a vivid eye-witness account of the games in progress. The first game will be on the air at 10, Thursday morning, March 18. Again at 2: on Thursday more games will be announced.

Friday the broadcasts will begin at 2:30 and at 1:30 on Saturday.

Sixteen teams, champions of the various sectional tournaments representing the winners among 852 state high school teams, will be competing at Des Moines. There will be eight each of class A and class B teams.

KLEMME DOES WELL IN MUSIC CONTEST

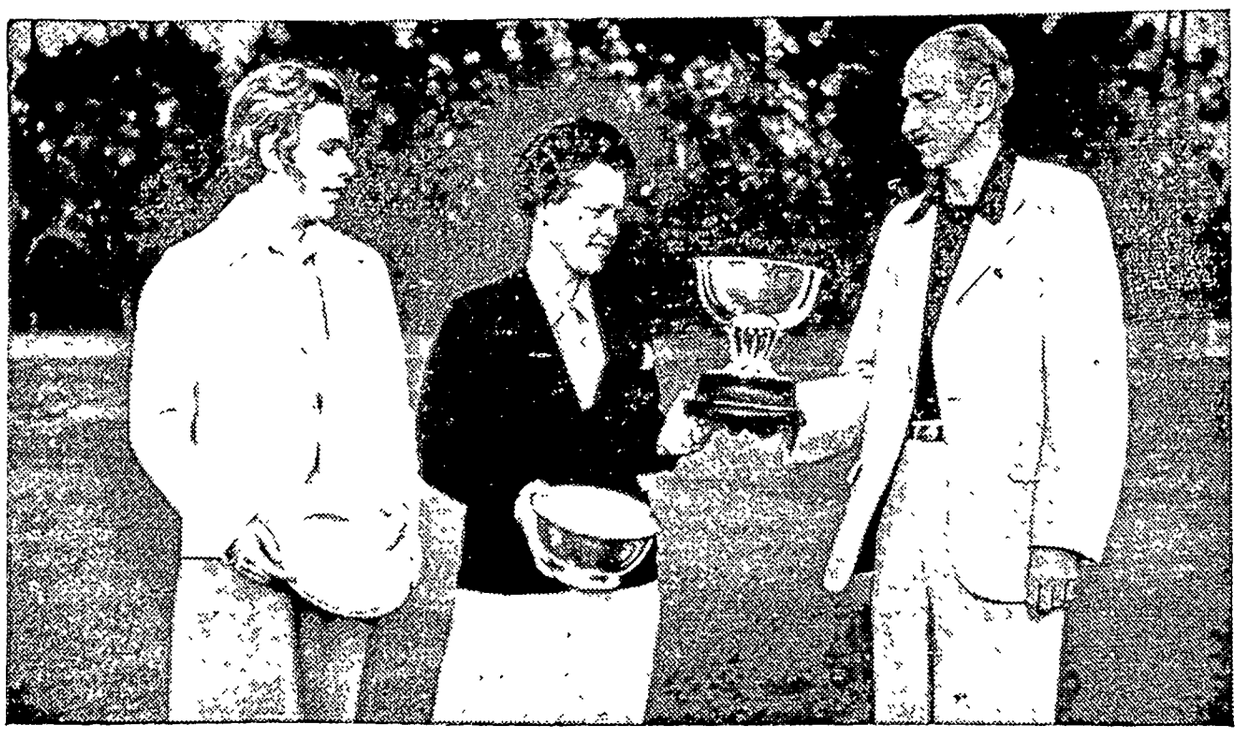
Klemme High School musicians made a very creditable showing in the sub-district music contest at Britt last week end when they won four ratings of excellent and four of good in the eight events which they entered.

Carmen Kluchohn, playing the saxaphone solo, "Alpine Echoes." won a rating of excellent in a field of seven players. Elaine Buntenbach received an excellent rating with her trombone solo entitled "The Message." Howard Schoenwetter sang "Who is Sylvia" as a tenor solo to win the third excellent marking out of the four soloists entered.

The girls glee club received many favorable comments both on its appearance and the quality of its singing and was awarded a rating of excellent in a crowded field of fourteen entrants.

The other numbers competing for Klemme were the girl's sextete, mixed chorus, orchestra, and baritone-bass solo by Glenn Lewis. All of these numbers were regarded by the judges as having many strong points, and much credit was given the director, Mr. Elstad, for the work he had done in training them.

Patty Adds Another Trophy to Fast Growing List



Patty Berg, nineteen-year-old, red-haired Minneapolis golf sensation, center, receives the trophy emblematic of victory in the Palm Beach women's annual golf championship matches, from Pierre L. Willis, director of the Palm Beach Country club where the matches were played. Helen Detweiler of Washington, D. C., whom Miss Berg vanquished, four up and three to go, in the final round, watches the presentation.

"Once in Forty Million Births"

It could happen only "once in 40,000,000 births" was the verdict of Detroit physicians commenting on the twin personalities of the Pauline Taylors, No. 1 and 2 shown above. Although not related the girls have the same name, were born on the same day, Sept. 20, 1920. Pauline Taylor No. 1 was born at St. Ignace, Mich., No. 2 at St. Catherine, Ont. They attended an intermediate school in Detroit three years ago and have been inseparable ever since.

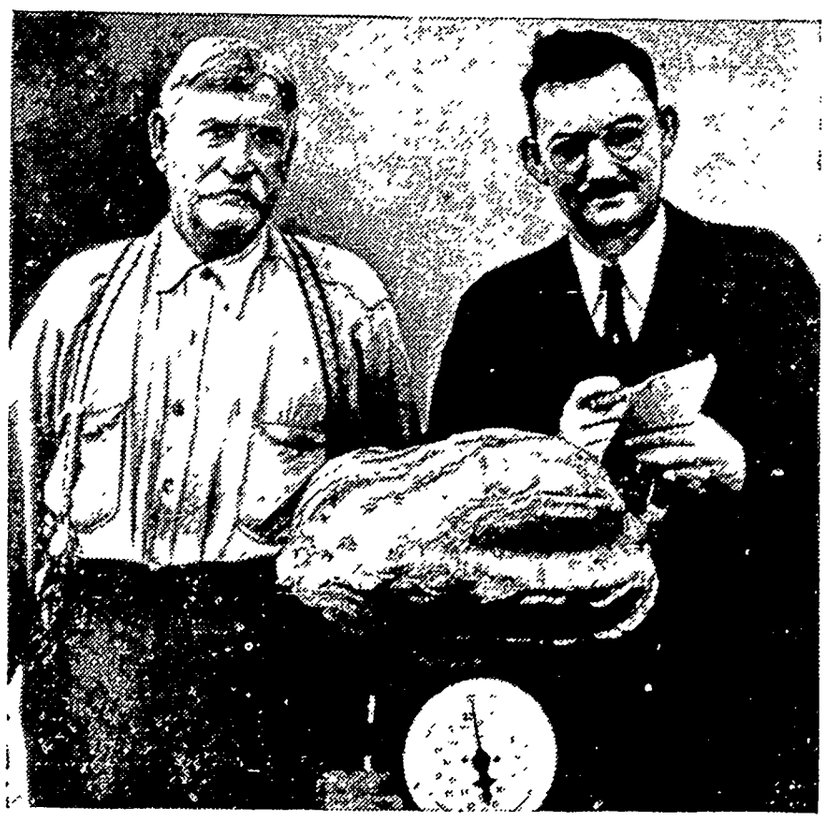
YOUNGEST WAR VET

Melvin Garrison, thirty-three, of Springfield, Ohio, who is said to be the youngest World war veteran in the United States. At the age of thirteen, he ran away from the Ohio Masonic home and enlisted in the United States army. At fourteen he was corporal of a machine gun squad at the front. He was wounded four times.

EXPLORERS' CHIEF

A new distinction for variously distinguished Vilhjalmur Stefansson, world famous American explorer, scholar and author, was his recent election as president of the Explorers' club, New York. Renowned for his many expeditionary studies of Arctic archeology, anthropology, ethnology and geography during the past quarter-century, Stefansson holds degrees, medals and other high honors.

Sweet Potato Is Size of Watermelon



S. A. Lawton (right), county agent, U. S. Department of Agriculture, and D. B. Hudson of Jacksonville, Fla., weighing a 23½ pound sweet potato, said to be the largest in the department's history. The potato, which shrunk considerably in size since it was dug, is 16 inches around the belt and 31 inches long.

California Oarsmen Vie for Varsity Crew Places

Volunteers for the crew at the University of California are shown answering Coach Ki Ebright's call to crew practice. From the enthusiasm of the candidates there should be plenty of competition for places on the coveted varsity crew.

UNCOMMON AMERICANS

By Elmo Scott Watson

© Western Newspaper Union

Pathfinder of the Seas

HE NEVER took part in a battle but his name deserves rank with those other American naval heroes — Jones, Decatur, Lawrence, Perry, Farragut and Dewey. His career was a perfect example of the saying that "peace hath its war." For Matthew Fontaine Maury was one of the greatest benefactors of all those who sailed the seas in his day and mariners still honor his name today.

Born in Virginia in 1806, Maury joined the navy as a midshipman at the age of nineteen. During his long voyages he became impressed with the scanty information that was available about prevailing winds and ocean currents Strangely enough, an accident on land gave him his opportunity to do something about it. He was in a stagecoach smash-up in Ohio which made him a cripple for life.

As a result, he was placed in charge of the depot of charts and instruments in Washington out of which developed the hydrographic office and the naval observatory. Here he started collecting all available information on the meteorology of the ocean which he compiled from a great number of old log books of naval vessels. The result was his first Wind and Current Chart, issued in 1847.

About 5,000 of these charts were distributed to shipmasters, who found them amazingly useful, shortening voyages by days and weeks. "It was as if a friendly wizard in seven-league boots had suddenly risen out of the waves to lead merchant vessels by the shortest and quickest paths." So they were glad to heed Maury's request to send him the results of their observations of winds and weather and he began issuing more charts. Within a few years 200,000 copies of the charts were being used by mariners of all nations and it was estimated that the annual saving to the shipping of one nation alone was $10,000,000.

The outbreak of the War Between the States was a tragedy for Maury in more ways than one. Loyalty to his native state forced him to resign when Virginia seceded but, due mainly to the jealousy of a superior officer, his usefulness to the Confederacy was hampered and his career in its service was not a distinguished one. After living for a while in England, he returned to America and to a professorship at the Virginia Military institute where he wrote a geography series which is still in use. He died in 1873, "full of years and honors" and one of the finest monuments in Richmond today perpetuates the fame of this "Pathfinder of the Seas."

"President for a Day"

A CITY in Kansas, a county in Missouri and part of the name of a great railway system bear his name, but David R. Atchison is best known in American history as the man who, it has often been asserted, was "President for a day." A native of Kentucky who emigrated to Missouri in 1830, Atchison was serving as a senator from that state in 1848 when Zachary Taylor was elected President to succeed James K. Polk.

On March 3, 1849, Vice President George M. Dallas, presiding officer of the senate, announced "the close of my official term being near at hand, I conform to an established and convenient practice by withdrawing from the deliberations of this body." On the motion of Senator Benton of Missouri, Senator Atchison was then appointed president pro tem of the senate for the remainder of that session of the national congress.

March 4, the traditional Inauguration day, fell on a Sunday and the President-elect not only had religious scruples about being inaugurated on the Sabbath but doubted the legality of such a proceeding. So the inauguration ceremonies were set for Monday, March 5.

Friends of Atchison claimed that, since President Polk's term ended on March 3 and Taylor's did not begin until March 5, there was an interim of one day in which the senate was the only continuing governing body. Since Atchison was president pro tem of the senate and thereby acting vice president (Dallas having resigned) he was also acting President between the administrations of Polk and Taylor, i. e. "President for a day."

Atchison himself never made any such claim and declared that the office of President was vacant from noon Saturday to noon Monday. Asked once how he enjoyed his short term in office he replied that he really did not know because he slept through most of it after an exhausting last day session of the senate. Constitutional authorities agree with Atchison in regard to the vacancy existing in the office of President on March 4, 1849, but one edition of the biographical congressional directory credits Atchison with being "President for a day" and that legend still persists.

Experiences of Life—

Their Significant Interest and Some Ways to Meet Them

By Lydia Le Baron Walker.

THE journey through life is filled with experiences from the time we are born to the day we die. Without them life would be dull and uninteresting. The more experiences are crowded in-

A Child Is Puzzled Over Some of Her Experiences and Believes Mother Is Free From Such Things.

to our lives the fuller and more interesting they become.

When we are in the midst of events that have elements of danger or when they are of momentous proportions with matters at stake that may be disastrous, should things turn out differently from our wishes, the mind is too excited or too much engrossed with results to grasp anything but the immediate moment.

Reviewing Experiences.

However, on looking back over the past, we discover what thrilling times we went through, and how the experiences stand out as dramatic and of significant interest. Often we find ludicrous features entered into the experience but we had no eyes to see them at the time. We can laugh over them and actually enjoy the remembrances of what were breath-taking events when they happened.

Since life is so full of experiences some of which turn out felicitously, and others not so satisfactorily, there must be a good reason for our having to go through the events. I remember when I was a little girl and there was something which, to me, seemed very important to decide rightly, how I envied grown-ups. They always knew just what to do! The fallacy of this assumption we all know, but we do not all appreciate how dull life would be if it were true, and how development would be retarded. There is no age limit to the series of experiences.

Learning by Experience.

The benefits of our life experiences come through our way of taking them, and on our wisdom of decisions when these require our consideration. If we think of ourselves only we become selfish, hard, and difficult. If we decide with a larger vision of results, and of the best good to others as well as to ourselves, we become fine and strong characters. By the exercise of good judgment and by making the best of things we learn to develop well by experiences.

"Quotations"

The desire to leave something to one's children is certainly one of the most powerful motives for individual achievement.—*Bruce Barton.*

There are two insults which no human will endure; the assertion that he hasn't a sense of humor, and the doubly impertinent assertion that he has never known trouble.—*Sinclair Lewis.*

I prefer the happiness of our unorganized imperfection to the gloom of organized perfection in other countries.—*Mayor F. H. LaGuardia.*

There is no reason why education against crime should not be a primary factor in our common schools.—*J. Edgar Hoover.*

The Armenians

The present boundaries of Armenia, a Socialist Soviet republic created in 1918, in no sense coincide with the former Armenia, much of which is now in Turkey. The ancient Armenia was in Asia Minor; present-day Armenia is in Europe. The Armenians are Caucasians belonging to the Iranian group of the Indo-Germanic family.

Trifles Make Perfection

Trifles make perfection, but perfection is no trifle.—Michelangelo.

History in Stamps and Stamps in History

By ELMO SCOTT WATSON

WHETHER he wants to or not, the average American is going to learn a lot more about the history of his country during the coming months. And he's going to be absorbing that knowledge daily—every time he gets ready to mail a letter, in fact. For the United States Post Office department has begun issuing some new stamps, known as the Army-Navy series, which bear the portraits of heroes in both arms of the service, some of whom have never before been thus honored.

All of these are oblong in shape and, in addition to the portraits of our military and naval heroes shown in ovals at the left and right of the stamp, they show in the center a view of some patriotic shrine or some historic American scene. For instance, the new one-cent army stamp, placed on sale for the first time on December 15, bore a view of Mount Vernon, the home of George Washington, with portraits of Washington and Gen. Nathanael Greene, of Revolutionary war fame in the ovals. The new one-cent navy stamp showed portraits of John Paul Jones, commander of the Bon Homme Richard, and John Barry, commander of the Lexington, our two outstanding sea captains during the Revolution and between them a picture of typical warships of that period.

On January 15 the two - cent Army-Navy series was placed on sale. The army stamp showed

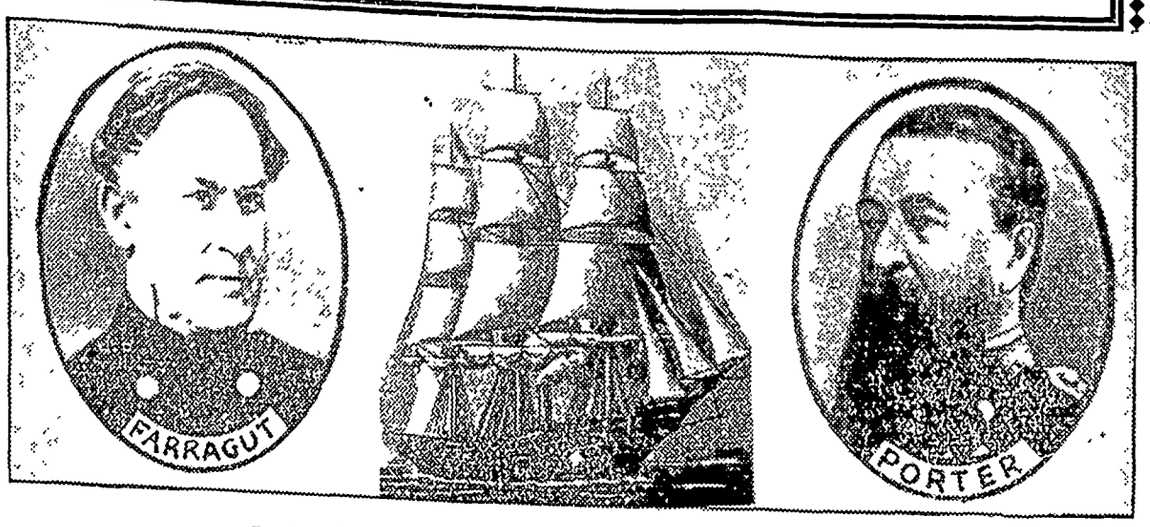
THE LAST MEETING
Reproduction of the Painting, Proposed for the New Lee-Jackson Stamp.

portraits of Gen. Andrew Jackson and Gen. Winfield Scott in the ovals with a view of Jackson's home, the Hermitage at Nashville, Tenn., between. The navy stamp pictured Commodore Stephen Decatur, hero of the War with the Barbary Pirates, and Commodore Thomas MacDonough, hero of the battle on Lake Champlain during the War of 1812, in the ovals against a background of naval vessels of the 1812 period.

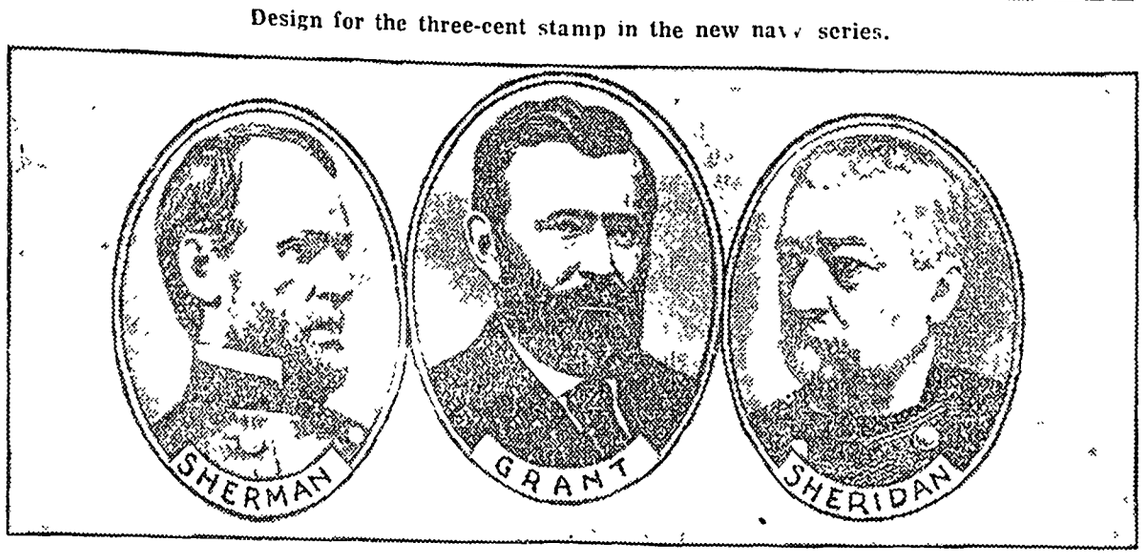
On February 18 the three-cent Army-Navy series was released in Washington. Both stamps honored Civil war heroes. On the army stamp appeared portraits of Gen. William Tecumseh Sherman on the left, Gen. Ulysses S. Grant in the center and Gen. Philip T. Sheridan on the right. On the navy stamp appeared the portraits of Admirals David G. Farragut and David Porter with a battleship of the Civil war period between.

Two Great Confederates.

Last year President Roosevelt announced that a stamp bearing the portraits of Gen. Robert E. Lee and Gen. "Stonewall' Jackson was to be included in the Army-Navy series devoted to the heroes of 1861-65 and the post office department recently issued a statement that the Lee-Jackson stamp was to be the next one placed on sale. The President's announcement was enthusiastically received in all parts of the country and particularly in the South where it was regarded as evidence that official Washington had forgotten the prejudices engendered by the war between the states and was recognizing the fact, which historians long ago recognized, that Lee and Jackson were two of the greatest soldiers in the history of this country. Now that time has healed the wounds of that war, both men have come to be revered almost as much in the North as in the South. Both had previously served their country with distinction, both counselled



Design for the three-cent stamp in the new navy series.



Design for the three-cent stamp in the new army series.

against secession and both made the only choice which they could honorably make when their native state of Virginia left the Union.

In addition to having the portraits of Lee and Jackson on the proposed stamp, it was suggested that the central design should be a reproduction of the painting "The Last Meeting" by Julio, which shows the two great commanders parting just before the Battle of Chancellorsville where Jackson received the wound which later proved fatal. This suggestion has the indorsement of the United Daughters of the Confederacy and if it is followed this stamp will be a memorial to the strong bond of affection and respect which existed between these two great soldiers and great men.

Another suggested series of stamps which has been enthusiastically approved in many sections of the country is one that would honor outstanding members of the Indian race. So far only two Indians have had that distinction, and in only one of those two cases was it done to pay tribute to an individual. When the Jamestown series of commemoratives was issued in 1907 the five-cent stamp bore the portrait of Pocahontas, the heroine of the incident in which Capt. John Smith (so he said) was saved from death. Incidentally, Pocahontas was one of only three women whose faces have ever appeared on our stamps. Martha Washington was the first, as was befitting the first "First Lady of the Land," and the other was Queen Isabella of Spain, whose picture adorned one of the Columbian series of 1893.

The Typical Indian.

The other member of the red race whose portrait you will find on a stamp (it was on the blue 14-cent issue of 1922) was so honored, not because he was especially famous in our history but because of the artistic merit

POCAHONTAS
The Indian "Princess" Who Was One of the Three Women to Be Honored by Having Her Picture Reproduced on a Stamp.

of his typically Indian countenance. He was Chief Hollow Horn Bear of the Brule Sioux.

Although Hollow Horn Bear never achieved the renown of such Sioux notables as Sitting Bull, Red Cloud, Crazy Horse or Rain-in-the-Face, he was an interesting character. Born in Sheridan county, Nebraska, in 1850 he went on his first war trail at the age of sixteen when his father led a party against the Pawnees. During the next decade Hollow Horn Bear took part in many skirmishes against United States troops and in raids on the laborers who were building the Union Pacific railroad west. After the conquest of the Sioux in 1876-77, Hollow Horn Bear settled down on the Rosebud reservation in South Dakota where he became a staunch advocate of "traveling the white man's road."

He was made captain of the Indian police on that reservation and in 1881 it fell to his lot to arrest his predecessor, Crow Dog, for the murder of the great Brule chief, Spotted Tail. Five years later he resigned and was

HOLLOW HORN BEAR
Only Indian Chief Whose Portrait Has Ever Appeared on a Stamp.

appointed second lieutenant of the police but was again compelled to resign on account of ill health. When General Crook was sent with a commission in 1889 to make an agreement with the Indians for the sale of their lands, Hollow Horn Bear was chosen by the Sioux as their speaker, since he was considered by his people to be their best orator.

Friend of Presidents.

In later years he became a well-known figure in Washington where he went frequently on missions to the "Great White Father" and he had a personal acquaintance with every President for more than three decades. He was a member of the Sioux delegation which called upon President Harrison in 1891 to discuss with him the future status of the Sioux who had taken part in the Ghost Dance uprising in 1890-91. After riding in President Roosevelt's inaugural parade in 1905 Hollow Horn Bear, accompanied by four other chiefs, Geronimo of the Apaches, Quanah Parker of the Comanches, American Horse of the Ogallala Sioux and Little Plume of the Blackfeet, was presented to Roosevelt by Commissioner Leupp.

He saw President Taft become the "big chief" in 1909. In February 1913 when ground was broken for the national Indian Memorial at Fort Wadsworth on Staten Island, L. I., Hollow Horn Bear was the leader of the 29 Indian chiefs, who took part in the dedication exercises. President Taft broke the ground for the memorial and as he stepped back, Hollow Horn Bear came forward from the group of chiefs and upturned a second bit of earth using a thigh bone of a buffalo for a spade. Then he made a speech in reply to the address of the President.

From New York the Sioux chief went to Washington to be present at the inauguration of President Wilson. During this visit he called upon the commissioner of Indian affairs and on the walls of the commissioner's office he saw the rifle which had been taken from him when the military ordered the confiscation of all Sioux arms at the close of the Ghost Dance war. Hollow Horn Bear recognized the weapon by a rawhide wrapping on the barrel and it was returned to him.

This, however, was Hollow Horn Bear's last appearance in Washington. He rode in President Wilson's inaugural parade but in the inclement weather of that March day contracted a cold and the old chief who had defied death on countless war trails for more than half a century died of pneumonia in a Washington hospital on March 15, 1913. In addition to his portrait appearing on a stamp, a photograph of Hollow Horn Bear is said to have been the original for the portrait of the Indian chief which appeared on the five dollar bill, series of 1899.

Minnehaha Was First.

Besides the portraits of Pocahontas and Hollow Horn Bear there are only a few other instances in which the original inhabitants of this continent have been represented on our postage. The earliest use of an Indian subject appears to have been in 1875 when an idealized picture of Minnehaha, the fictitious heroine of Longfellow's famous poem "Hiawatha," was shown on the $60 periodical stamp.

Several values of the Columbian series show minor Indian figures, most noteworthy of which are the one-cent with an Indian in the right panel of the vignette and the ten-cent, which shows Columbus presenting natives at the court of Spain.

Likewise, the trans-Mississippi series included several Indians in incidental pictures. The one-cent showed Marquette with several Indians, and the four-cent, Indians hunting buffalo. The one-cent Jamestown issue had small oval medallions showing Indian portraits, and the five-cent value portrayed Pocahontas as its feature. The Hudson-Fulton stamp of 1909 showed a minute Indian in a canoe in the fore-ground as a foil to the steam-propelled Clermont of Robert Fulton. The Carolina - Charleston commemorative stamp showed an Indian as one of two figures in the central feature of the design.

THE FIRST POSTAGE STAMP
Issued in England in 1840.

So the rumor that the post office department might issue a series of stamps honoring famous members of the Indian race as individuals has aroused the interest, not only of stamp collectors but also of non-collectors who are conscious of the part which these chiefs and sachems and warriors, whoever they are to be, have played in the history of our country.

Household Questions

Items of Interest to the Housewife

Don't treat your stockings carelessly. Put them on carefully, and be sure that feet and leg seams are straight. The slightest twist will alter the position of reinforced splicings, and wrinkles always run into holes.

* * *

To make lace look new, squeeze in hot, soapy water, then in cold water, and then in milk to stiffen it. Press on the wrong side with a fairly hot iron.

* * *

One gallon of coffee will serve 25 medium sized cups. The size that would accompany a dessert after a dinner.

* * *

Chocolate stains may be removed by washing in cold water or by soaking in boiling water to which borax or a little glycerin has been added.

* * *

Dishes that have contained sugar or greasy articles should be soaked in hot water before washing.

* * *

When blankets are to be washed for the first time they should be soaked over night in cold water and then rinsed. This is to remove the sulphur used in bleaching. After this they should be soused until clear in a lukewarm lather made with boiled soap and water, and then rinsed well in clear water.

* * *

A couple tablespoons of molasses will make beans brown nicely.

* * *

Horseradish Sauce — This condiment gives the tang to hot roast beef. Mix together two tablespoonfuls of grated horseradish, one tablespoonful of brown sugar, a good pinch of salt, a teaspoonful of made mustard and two tablespoonfuls of vinegar. Lastly, add a quarter-pint of cream, or the yolk of an egg and a little milk.

* * *

Using Beef Fat — Pour off the fat from the pan in which the roast of beef has been cooked. Put it in a bowl and let cool until it starts to harden. Then beat well with a fork. Afterwards it may be used in place of lard.

Their Wisdom

Angels do not "fear to tread" anywhere; only, being angels, they know better.

DEAF or HARD OF HEARING?

By all means send for a free booklet called "EARS" which will prove both interesting and instructive. It describes the world's great-estaid to better hearing by means of the genuine ACOUSTICON, through which new joy and happiness can be brought into your life. Write Marion Ware, Acousticon, 520 5th Ave., New York City, and the booklet will be mailed to you without any obligation whatever.

Not Half-Way

The gates of friendship swing both ways.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder may be burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. *Doan's* have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. *Ask your neighbor!*

COMMUNITY HALL AT GARNER CONSIDERED; SUPPORT INDICATED

GARNER—The building of a community hall and possibility of constructing a recreational center here has been widely discussed the past few days A meeting attended by 22 farmers, professional and business men met and appointed A. M Rosendahl as temporary Chairman and William Baggs as temporary secretary Committees were appointed to make investigations and other meetings are to be held in the near future to dsicuss if a large building is to be erected here

FOUR LAMBS BORN TO EWE AT HANLONTOWN

HANLONTOWN—By all indications 1937 is to be a prosperous year as the unusual happens quite frequently The latest report comes from the James Kell farm, one mile east, that one of his sheep brought forth four living lambs one night last week Two are already being fed on bottles to assist mother sheep in rearing them Several farmers in this vicinity report twin calves this spring

---

Miss Lona Parsons of Bristol, Eng., stole a purse to get a night's experience in jail, but instead she got three months.

INFORMATION WANTED

A big business man was cruising along at 60 miles per hour when there was an awful roar and a little baby car came alongside The big business man snorted and put his foot down on the accelerator He increased his speed from 60 to 70, 75, 80 and 90—still the little fellow kept alongside. Suddenly the little felow put his window down and shouted: "Hey, do you know anything about the cars?"

The big felow said "Yes, make them.

"Then," said the little fello "can you tell me how to get out second gear?"

SCHOOL NEWS

Grades 7 and 8

This week we have been doing some soap carving in our art class. We have attempted to carve animals and other objects. Some of them look very fine.

Both the seventh and eighth grades have been studying the newspaper this week. We plan to issue a school paper very soon.

Those who received 100% in spelling are Allen Barz, Della Kaduce, Jacqueline Kudje, and Melvin Coobs

Grades 5 and 6

We are sorry to lose Colleen Gram from the sixth grade She is moving to Clarion

Barbara Johnson has been absent the past week because of illness. We hope she will soon be able to return to schol.

In sixth grade history we have been studying the lives and paintings of Paphael, Micheal Angelo and Leonardo DaVinci. On Thursday afternoon each child had a copy of Leonardo DaVinci's famous painting "The Last Supper." We borrowed a large picture from the Methodist church which aided us a great deal in our study. We thank them for lending it to us.

In geography we have been learning about Czechoslavakia and their glass making industry We have a glass display in our room.

Grades 3 and 4

Miss Hanson's boys and girls invited us into their room to see their play about "The Tar Baby." We enjoyed it very much.

In music class on Friday we used the toy insruments and kept time to the "Shoemakers Dance" We hope to be able to play it for the first and second graders some time next week

We entertained the first and second graders and Miss Hanson in our room Friday. Our program was a summary of our Language work on he unit "The Calendar."

We made crayon drawings of a fairy horse in our art class.

Grades 1 and 2

On Wednesday we invited the third and fourth grades, Miss Azeltine and Supt. Galbreth in to see some of the second graders play "The Tar Baby."

Miss Allen let us borrow her daffodil one day. There were two blossoms and a bud on it and we enjoyed having it in our room. We cut daffodils from paper and mounted them and Miss Allen chose the best ones to put up in our room

The second graders have a new poem chart. So far Peggy Lou has the longest list of poems.

NEWS FROM GOODELL AND VICINITY

Harvey Hubbard was a Kanawha caller Saturday evening.

Miss Iris Sherwood spent the week end with her parents.

Mr. and Mrs. Bell visited at the Russel Bell home.

Mr and Mrs. Emmet Hoyt, of near Ventura, spent the week end at the Charlie Halfpop home.

Friends of the Kissingers are sorry to hear that Mrs Kissinger is not gaining very fast. She is still in he hospital in Iowa City.

Quite a few from here attended the reception dance in Garner Saturday night in honor of Mr. and Mrs. "Butch" Merkel.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington.—Many times in these columns, I have called attention to the confusion that has come to be so much a part of the federal government's general administration. I have talked about the bluster and the ballyhoo and the cross purposes at which so many pieces of the New Deal program have operated, and another outstanding example of this condition now appears.

More Confusion

Two governmental agencies, one a strictly New Deal agency, the other with a beginning in the Hoover administration, find themselves working directly in opposition to each other—and in the end taxpayers will pay.

It is not the fault of the Home Owners Loan corporation that it finds itself in a position where it is going to be landlord to something like 160 000 pieces of real estate—largely homes.

When the government went into the business of loaning money on private residence it had experience upon which to base its program. Many years ago the farm loan system was organized with none too happy results In the late days of the Hoover administration, however, three or four politicians were able to drive through the legislation creating a system of government loans on residences as distinguished from farms.

I predicted in these columns some three years ago that the government, through the HOLC, was going to be the proud possessor of a lot of real estate. My statements at that time were based upon what I had seen happen in the case of the loans on farms. The article brought me direct criticism from two or three places in the government—but at this time I can report that the HOLC, before another year passes, will own something like 160,000 homes.

It is always difficult for a mortgage or bank institution, privately owned, to dispose of property which it has been forced to repossess through default of the borrowers. It is much more difficult for the federal government to dispose of that type of property, try as it may to get rid of the parcels.

So, we find one governmental agency serving as a landlord on a wholesale scale and with signs portending moves by politicians that will in the end cost the taxpayers hundreds of millions of dollars. These politicians are proposing legislation in congress to cut the interest rate on the loans now in default and other loans as well; the principal of the loans on the defaulted mortgages and they are seeking means by which those in default may have unlimited time in which to make the payments in a way that, superficially at least, makes the proposals appear actually as an outright gift to those who have bought homes under the government loan plan

There is no way to tell now what will happen to these various proposals. Undoubtedly, most of them will fall by the wayside and receive no consideration in congress. Yet, on the basis of observation of many such movements, it does not seem far wrong to guess that the politicians in congress will accomplish something in the way of reduction of these debts where the defaulters bring pressure to bear on the home town political machines.

* * *

Now, concerning the other governmental agency involved in the game of cross purposes that I mentioned. I refer to the federal housing administration. Like the Home Owners Loan corporation, it is not the fault of the housing administration that it finds itself in a tough spot. It is commanded by the President and by congress to proceed with a gigantic housing program, to loan money on new homes wherever it can persuade contractors to build and individuals to buy. It is to be remembered also that loans on these properties are guaranteed—the legislation calls them insured loans—and that makes the federal housing administration liable in case the new home buyers fail to meet their commitments.

Cross Purposes

The housing administration announced its program to encourage wholesale home building throughout the nation only recently and it was by coincidence, I am sure, that the housing program was announced almost simultaneously with the determination by the HOLC to start foreclosure proceedings in order to maintain its own solvency.

Thus, to bring the picture to a focus, we find one governmental agency that has loaned hundreds of millions of dollars on residences being forced to foreclose in order to protect the money it has spent, at least in part, and a second governmental agency entering the field simultaneously with a gigantic program in which more hundreds of millions will be expended and more people encouraged to place themselves in debt.

I cannot criticize the housing administration policy any more than I can criticize the program of the HOLC. The point is that there is simply no co-ordination in government policies as they concern these two agencies, and consequently, one group is building new homes and another is taking over old homes for which the buyers have been unable to pay. In my humble opinion, it does not make good sense.

I have heard considerable talk among influential New Dealers to the effect that new homes will sell more easily than the old ones and therefore the housing administration plans are held to be justified. Yet, it does seem to be a perfectly natural and logical thing that new homes become old homes as time elapses and there are many who believe that the government, because it has guaranteed the loans on new homes, will have to take over a large percentage of them as well. That is, it will have to take over at least a normal percentage because whether the loans are made by private financing companies or by the government, a considerable number of buyers are unable to fulfill their obligations. It is not always the fault of the buyers. Sickness, loss of jobs or a thousand and one other circumstances may develop that prevents the buyer of a home from carrying through his cherished dream of own the roof over his head. It is the way of life that a certain percentage will, and of necessity must, fall by the wayside.

* * *

I never have been able to agree that the federal government has any business in the field of financing homes or extending credit to individuals. I have always criticized the Hoover administration for creating the Reconstruction Finance corporation and the Roosevelt administration for expanding its operations. The principle is wrong because it uses money either borrowed by the government or paid into the Treasury by the taxpayers to finance, to build up, personal funds of individuals or corporations.

Wrong Principle

It seems quite clear to me that the HOLC, following the experiences of the farm loan system, justifies the conclusion that the federal government cannot successfully engage in that field. In the first instance, I think it is bad business for government to go beyond the protection of life, liberty and property, with all the implications carried in those three words as a governmental policy. Further, and with much more emphasis, I am sure that any time government engages in that field it opens the way for politicians to be tempted, to be forced, to do things in a legislative way that cannot be justified as economically sound.

Earlier in this article, I suggested the difficulty always surrounding the sale of property that has been taken back from the original purchasers. Officials of private mortgage companies and other financial institutions have grown many a gray hair in their efforts to recover money loaned in cases where the borrowers have met with unfortunate circumstances. The government, finding itself in the position of the private lender insofar as repossession of property is concerned, has about one-half the chance of liquidation that the private lender would have. And beyond that, there is too much chance for favoritism, scheming and even crookedness when the government attempts to do a job like the HOLC now is facing. I say that regardless of the honest purpose that I know characterizes the present HOLC management.

* * *

It may not have occurred to some but the fact that the federal government through the HOLC will own all of these houses which had to be taken back, means that the federal government becomes a taxpayer in every city, county and state where it owns these homes. At the rate things are going and assuming that the ratio of delinquencies and defaults continue as they do for private lending agencies, another four years will see the HOLC in possession of a minimum of 250,000 parcels of real estate. Of course, I imagine, the local tax collectors will be glad to see the federal government taking over the property because they will then collect their taxes. But where does that money come from? Sooner or later, directly or indirectly, it comes from the taxpayers of the nation. It is not a pleasant outlook.

U. S. a Taxpayer

And who knows but what there may be more decisions like that of the Florida judge who refused to grant the foreclosure plea of the HOLC attorneys on a twelve hundred dollar mortgage on the home of a carpenter.

Control of Lice on Cattle Urged

Long-Haired Stock Suffers From Insects; Breed in Cold Weather.

By E. J. Perry, Extension Dairyman, New Jersey College of Agriculture. WNU Service.

Lice breed most rapidly in cold weather on long-haired livestock and frequent examination of dairy cattle and prompt treatment of infested animals are necessary to prevent the pests from retarding growth of young stock and reducing the milk flow in the producing herd.

Although the presence of lice on long-haired live stock is nearly universal, their prevalence depends a great deal upon the state of nutrition of the animal and the extent to which the owner will tolerate the parasites.

The two main groups of lice affecting cattle are the sucking lice and the biting lice. Of the two forms, the sucking lice are the more injurious The three common species are the short-nosed, sucking blue louse, the long-nosed, sucking blue louse, and the biting red louse Sucking lice are large in size and have pointed heads and blue bodies, while the biting louse is smaller with a yellowish-white body and a broad, round, reddish head.

A louse passes its whole life on the animal. It lays eggs on the hair near the skin, where they hatch in about two weeks, and then two weeks later the young females begin laying eggs The locations preferred by sucking lice are the head, the sides of the neck, the back and the inner surface of the thighs The biting lice are usually on the withers and the base of the tail but they may be discovered on other body parts Among the common symptoms are rubbing, licking, restlessness and loss of hair

A thorough spraying or wash with four to five per cent creolin solution or any of the coal tar preparations is effective in controlling lice Nicotine sulphate also destroys lice when diluted with water so that the solution contains not less than five one-hundredths of one per cent of nicotine. Raw linseed oil can also be used to great advantage and can be applied in cold weather. One pint, when put on with a stiff bursh, will treat four or five cows Since it is difficult to destroy the eggs, there should be at least two applications at 16-day intervals to make sure that all newly hatched lice will be killed. The animals should be inspected for a time after the second application to determine whether a third one is necessary. Vigorous daily grooming with a stiff brush is an important step against infestation.

Time Is Ripe to Plan Home Vegetable Garden

It is time to think about home vegetable gardens, says Lee A. Somers, extension specialist in vegetable gardening, College of Agriculture, University of Illinois.

In listing the secrets of success in the production of vegetables in the home garden, Somers asserts that it pays to locate the garden in a spot that is fertile, well drained and free from shading. It is also important that the size of the plot be sufficient to permit ample plantings of a full assortment of vegetables without crowding.

Orders for seeds, fertilizers, fungicides and insecticides may well be placed in advance of the planting season. It is recommended that seed selection be limited to the best varieties and to most vigorous seeds and plants of these varieties. As soon as the garden is planned, the seed order can be placed with a reliable seed house.

Much garden seed is planted far too deep, Somers believes, and also suggests that a thought be given this spring to the timeliness of applying insect control measures and to keeping ahead of the weeds by frequent shallow cultivation.

Wool Tailleur for an Early Easter

By CHERIE NICHOLAS

THE calendar announces an early Easter. Supposing the weather should happen to go temperamental. Just merely supposing it should by any chance happen to cloud a bit, rain a bit, possibly send down a snowflake or so, then, oh then, comes that ever haunting "what-to-wear" question.

And the answer? A practical, ultra modish tailored wool outfit is the logical answer if you want to be ready for rain or shine. Smartly, simply fashioned, it must be of a swanky wool weave in latest approved color with fashion-right accessories that add the final accent of chic. The illustration pictures what we are meaning to say. Perfect is this trio of "what-to-wears" for Easter or for any spring day, be it sunshiny or cloudy.

Before we describe in detail the stunning tailleurs pictured we want to say a word in regard to outstanding colors for spring. We are going to talk mostly about black, navy, beige, gray and the new pastels. Many best-dressed women are selecting black cloth suits with which they plan to wear frilly lingerie blouse or neckwear, adding white doeskin gloves and a white boutonniere. As to navy, it's big news for spring, navy wool twills especially for the classic suit. And there's beige! It, also, is staging a most exciting comeback. In the pastels you'll adore the new "dusty pinks," also various soft blues, "rusty" yellows and misty greens.

You will be hearing the expression "softly tailored" frequently this season because most suits have lost their mannish lines and the trend is to graceful, subtle silhouettes. Note, for example, the charming youthful suit to the right in the picture. No femininity is sacrificed.

Smart in either black or navy is the lightweight wool that styles this distinctive spring model. The skirt is short and slim and the cutaway jacket buttons up to a "young" round collar. The short blouse is of white satin. The pillbox hat with jaunty quill and piquant face-veil is decidedly chic.

Pastel blue wool kasha makes the three-piece cape costume centered in the group. Capes are very important this season, emphasizing as they do the softly tailored theme. A slightly flared skirt is topped by a short-sleeved, front-buttoned jacket with body of jacket and sleeves made in one piece, stitched onto a yoke. The matching cape with fitted shoulders ties at the chin under the jacket collar.

It is to be expected that the three-piece tailored ensemble to the left be in the smart widely-exploited beige color, for as we said before beige is definitely "in" this spring. With the jacket this very lovely three-piece becomes a smart suit, just such as will fit into the Easter style program admirably. Without the jacket you have a winsome light wool dress which will come in perfectly for mild spring days. The matching beige fur is a smart detail for the fur-trimmed suit is conspicuously present in advance style displays. Note the off-face hat of Breton influence, for this is the very latest for hat and hairdress. The black doeskin gloves and strap-handle bag "say it" with fashion emphasis.

© Western Newspaper Union.

SMART PLAID TWEED

By CHERIE NICHOLAS

Plaid woolens for spring! You'll be "tops" in fashion if you come out in a full-length reefer coat, a picturesque cape suit, a classic jacket suit or with a short box coat of plaid woolen. It's English, it's Scotch, it's both. Due to the interest shown in the coming coronation, woolens take on a decidedly English accent this spring. The coat pictured is of imported tweed with coronation red prominent in its coloring. The white toya hat has red grosgrain inserts in complement to the red in the plaid.

GLOVES PROMINENT IN SPRING STYLES

By CHERIE NICHOLAS

Soft, oozey glace kidskin, that makes the hands look long and slender, is very much in fashion now. The styles shown by Aris for formal afternoon wear are exceedingly chic and those marvelous 16-button evening gloves in glace kid or suede reach the nth degree of extravagance.

Mokado, the superlative quality French doeskin, is the supreme in that leather. It is washable, which accounts for its continued popularity. Nothing could be handsomer than a pair of six or eight button handsewn doeskin gloves. The longer lengths, by the way, are smarter this season than the short, either in white, black or fetching new colors.

While the plain, classic slipon remains most acceptable, the costume glove is more interesting and more fun to wear. Then, there are all sorts of touches, such as handwhipping, embroidery, stitching, thong lacing and so on, that give the new gloves distinction.

Pendant Earrings

Earrings have regained prestige and since ears are sometimes covered by the coiffure this means the pendant type will be worn as well as the clip. Simple necklines add to the possibilities of earrings.

Silver Threads

The current coin of fashion is silver gleaming on crepe or satiny backgrounds. A blouse with the glitter of silver—needn't be expensive at all—will turn your suit into a five o'clock costume.

Berets High in Back

Some of the new berets are high in the back and notched at the edge.

$3,000,000 Memorial to Honor Thomas Jefferson

Architect's rendering of the $3,000,000 memorial to Thomas Jefferson, in Washington, D. C., plans for which were recently approved by a special congressional committee. Designed by John Russell Pope of New York, the building will embody ideas which inspired Jefferson in his own great architectural achievements. The monument will occupy the most important vacant site in the Washington scheme of public buildings.

Well-Dressed at Little Cost

IT WAS some job, Ladies of The Sewing Circle, to get these three lovelies together to pose for the camera this week. They're under the strict tutelage of Dame Fashion just now, learning the latest lessons on how to be well turned out this Spring without benefit of a private mint. You can understand, then, why the co-ed above, center, sort of jumped the gun, so to speak, and was already on her way when the camera clicked.

A Frock That Clicks.

Speaking of things clicking, don't think that new princess gown she's wearing isn't doing it in a big way. Can't you see from where you're sitting that it is simple to sew besides being a figure-flatterer of the first order? The buttons half way and a neat little collar in contrast are all its lively lines need to complete the perfect balance—chic vs. simplicity. Take a tip from this stylish student and figure it out for yourself in cashmere or velveteen. The style is 1202 and it can be had in sizes 12-20 (30-38). Size 14 requires 4⅞ yards of 39 inch material plus ⅜ yard contrasting.

Go Print for Spring.

The charming young lady above, left, has chosen to model a very dainty and rather picturesque little frock for she believes you'll be interested in this style as a fitting gesture to Springtime. Especially in a modern print, featuring, say, pussycats or deep-sea flowers, would this frock be tempting. The skirt is bias-cut for artistic reasons, and the circles of contrast aid and abet its gracefulness. Let yourself go print then, come Spring. Style 1257 is designed in sizes 12-20 (30-40 bust). Size 14 requires 4⅝ yards of 39 inch material. Eleven yards of bias binding is required for trimming as pictured.

Gay House or Street Frock.

Lest you begin to think every day is Sunday for our starring trio, the trim-looking young lady above, right, wants you to concentrate now on her new gingham gown. Not an ordinary bread-and-butter cotton version, but a beautifully cut, carefully planned dress for general service. The linked button front is enough to give it first place on your Spring sewing list if Sew-Your-Own designers know their clients as well as they think. However, there's more to recommend it: a young becoming collar, a simple yoke-and-sleeve-in-one construction, and a slender action-built skirt. Put them all together they spell CHIC—that little word with a vast meaning. Style 1267 is for sizes 34-48. Size 36 requires 4 yards of 35 inch material plus 1⅛ yards contrasting.

New Pattern Book.

Send for the Barbara Bell Spring and Summer Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns. Interesting and exclusive fashions for little children and the difficult junior age; slenderizing, well-cut patterns for the mature figure; afternoon dresses for the most particular young women and matrons and other patterns for special occasions are all to be found in the Barbara Bell Pattern Book. Send 15 cents (in coins) today for your copy.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr, Chicago, Ill. Patterns 15 cents (in coins) each.

LAST BLIZZARD

Today, Wednesday, North Iowa is having a regular, old time blizzard. March "came in like a lamb" and this may be the wind-up when March "goes out like a lion." Here's hoping.

WELL-BALANCED MEALS

Balanced meals are troublesome to many homemakers who try to work them out scientifically.

The formula used by nutritionists of today, says Miss Ruth Cessna, extension nutrition specialist at Iowa State College, is quite simple

For a balanced diet, she says, follow this plan· Serve milk every day in some form either to drink or in soups, desserts, or as cheese; serve meat, eggs or fish once a day if possible; serve vegetables and fruits daily, especially potatoes, tomatoes, green leafy vegetables and the yellow ones. Each person needs each of these kinds of foods each day. If a meal is lacking in any one kind, the defeciency may be made up at the next meal

TRADITION LINKS EASTER "BUNNY" WITH NEW MOON

Tradition abounds in popular American customs that surround Easter eggs and "bunnies," familiar to every child who has been taught the occasions signifigance.

The connection between Easter and the rabbit is said to come from the fact that the hare is a symbol for the moon, which determines the date of Easter In Egyptian, the name of the hare also means "to open," hence the association of the hare with the opening of new life at spring festivals.

The egg is an obvious symbol of the spring awakening The bright colors of painted eggs symbolize hues of the Easter sun and the joy which follows the white of winter In Germany where both Easter rabbits and eggs originated, children are told that if they are good a white hair will steal down the chimney and hide brightly-colored eggs in the house. In many foreign places the Easter hare is as important a figure as Santa Claus at Christmas.

If young men in some English villages can catch a hare and present it to the parson before 10 a. m. on Easter Monday, the rector is bound by an old law to give them 100 eggs, a calf's head and a groat.

Egg rolling on the White House lawn, a popular Easter custom at Washington, began soon after the close of the Civil war Originally the annual affair took place on the Capitol terrace When authorities complained that children were harming the turf, President Hayes and his wife invited youngsters to do their egg-rolling on the White House lawn. The event has been annual ever since

THANK YOU, FOLKS!

We wish to thank everyone, the Klemme and Garner fire departments,and all who assisted at the fire and who helped us save supplies and fixtures from the post office We appreciate your efforts and good will.

Mr. and Mrs John Day

C. A. Larsen, Prop.

Thanks, Everybody

I wish to take this means of thanking the business men and people of Klemme for their generous gift of money, which I will put to a good use. Consider this as a personal "Thank You.

Fred Henschen

PILGRIMAGES DETERMINED EASTER DATE

Easter was originally dated to suit the convenience of pilgrims who needed moonlight in their annual treks to Ressurection festivities.

Footsore and weary, they plodded both day and night to reach sacred shrines for this observance Hence it was decided that Easter shall fall on the Sunday following the first Paschal full moon after March 21 The occasion may therefore vary over a period of 35 days—from March 22 to April 25.

Lent, great period of fasting in Christian churches, grew from a 40-hour to a 40-day ritual as it came down through the ages. While most Christians commemorate Good Friday as the day of the Crucifixion, Mohammedans also celebrate it as the day of Adam's creation. Among ancient Germans, this date was sacred to the goddess-mother, wife of Odin.

The association of Easter Sunday with the arrival of spring arises from a coincidence The day occurs almost simultaneously with the ancient Roman celebration of the vernal equinox

Many customs have grown up around the Easter observance In England, figs are always eaten on Palm Sunday to commemorate Zaccheus. the publican, who being "little of stature," climbed into a tree to see Jesus pass by the way through Jericho.

Easter eggs and "bunnies" are traditions among American children at this season of the year. In Germany, spring lambs are sold for the Easter feast.

Highest Point In Iowa Is Scene Of Wedding

TOP OF PILOT KNOB CHOSEN AS SETTING FOR MARCH NUPTIALS

An interesting wedding ceremony was performed on the top of the tower in Pilot Knob state park, at noon, March 18, in which Harold Ridder of Nora Springs and Miss Mabel Schaefer of Klemme were the principals and the Rev W J. Suckow, Congregational minister at Alden, and uncle of the bride, acted as the officiating clergyman. A sunny landscape, blue skies and a brisk but sunwarmed air made the day ideal for the purpose

The reason they both chose this particular spot for the marriage ceremony is that they are great lovers of nature and are especially fond of Pilot Knob park and its many beauties

The bride, a daughter of Mr. and Mrs. Edward J. Schaefer, attended the Klemme schools and was graduated from the high school as valedictorian of her class. Later she was graduated from the Iowa Teacher's college at Cedar Falls. She taught for a time in the rural schools of Liberty township and in the consolidated schools at Meservey For the past five years she has been a teacher in the fifth and sixth grades of the Rowan consolidated schools.

Mr. Ridder of Nora Springs, the son of Mrs. Ida Ridder of Klemme, attended the Klemme high school. He and his brother, Ben, operated the Eric Josten farm in Librety township for 16 years. Recently he became the owner of a farm south of Nora Springs, where the young couple will live.

VIRGINIA PETERSON, 13, IS BEST STUDENT SPELLER IN HANCOCK

Wins Contest Second Consecutive Year

GARNER — Virginia Peterson, 13, rural student of Madison township, taught by Miss Perry, won for the second consecutive year the Hancock county spelling contest held at Garner Saturday afternoon in the high school auditorium Sixty-nine students were entered.

C. H. Tompknis, grade school principal pronounced the words and Mrs. Bella Peterson, deputy county superintendent was in charge The Katter trio sang during a recess. Judges were Miss Dodd, principal of Britt school, Supt. Thorsen, Kanawha, and Supt. Galbreth of Klemme. The Garner Lions club donated $10 in prizes, $5 to the winner and other amounts to eight other students to remain on the floor last.

Miss Peterson is the daughter of Mr. and Mrs Harry Peterson. She will again enter the state contest.

Klemme Student Stays

The Klemme school was represented by Keith Stille, who made an excellent showing. Sixty-nine boys and girls took part and fifty-one went down ahead of Keith.

Dr. and Mrs. A. H. Dulmes entertained at four tales of bridge at their home Friday evening. High scores were won by George Lawhorn and Mrs. E. F. Jacobs; low scores by Richard Ax and Mrs. Will Kirkwood, and travel prize by Mrs. W .L. Thada. Lunch was served.

ROAD NOTES

By C. F. Merten, County Engineer.

The following road program was adopted by the Board of Approval and the Board of Supervisors on March 15, 1937. The estimated cost of the proposed work is $60,800.00 and as we probably will not have quite that much available during the 1937 construction season some of he work may be deferred until next year However we shall try to give each township a fair share of the construction.

County Trunk Roads.

Orthel Township—Graveling between sections 35 and 34.

Local County Roads.

Bingham Township—Grading and graveling between sectcions 24-25; 34-35.

Crystal Township—Grading and graveling between sections 20-21; 28-29; 23-26; bridges between sections 11-12; 26-27.

Madison Township—Grading and graveling between sections 29-32; 30-31; through south half of 3; through 22.

Ellington Township—grading and graveling north of sections 1, and east half of 3; between sections 12-13; 16-21;17-20.

Orthel Township—Grading and graveling between sections 4-5; 20-21. Bridge south of section 36. .. Britt Township—Grading and graveling east of section 1, between sections 2-3; 14-15; through section 12.

Garfield Township—Grading and graveling through section 1; between sections 14-23; 28-29; 32-33.

Concord Township—Grading and graveling between sections 12-13; 25-26; through sections 33; 34; 35.

Avery Township—Grading and graveling between sections 34-35; 35-36; 10-15; 21-28.

ELMER LARSON AND MARJORIE BACHMAN MARRIED LAST WEEK

Miss Marjorie Bachman, daughter of Mr. and Mrs. Ed Bachman, and Elmer Larson, son of Mr. and Mrs. John Larson, were married at Forest City last week Wednesdady.

After the ceremony a big wedding dinner was served at the John Larson home at six o'clock. The occasion was also the birthday anniversary of Mrs .John Larson and all of the Larson children and their families, except Bessie of Iowa City, were present.

The young couple were both raised in this community and have a large host of friends who extend best wishes. They will farm west of Klemme on the Larson place and will reside just across the road from the Larson's new home.

Mr. and Mrs. Elmer Larson, accompanied by Mr. and Mrs. John Larson, are enjoying a trip and are visiting relatives in Indidana.

They Could Lick Their Weight in Wildcats

By ELMO SCOTT WATSON

HOWEVER numerous may have been the faults of the American frontiersmen, modesty of the shrinking violet variety was not one of them.

Muscular, reckless, daring, bumptious, boastful—he gloried in his prowess and he told the world about it!

Typical of his self-esteem was the characterization which the riflemen, who marched with Andrew Jackson to New Orleans late in 1814 to repel the attempt of a British army to capture that city, applied to themselves. Every man, according to his "tell," was "half a horse and half an alligator."

And so, when "Old Hickory" and his frontier riflemen had won that amazing victory over "Old Packenham" (General Pakenham) and his red coats, the fame of these backwoodsmen was spread across the land. Then Samuel Woodworth (yes, the same Samuel Woodworth who wrote "The Old Oaken Bucket"!) sat himself down and celebrated their feat in a song which he called "The Hunters of Kentucky." First sung in a New Orleans theater in 1822, it was published in a crude little book of songs and ballads four years later. It was also printed in Boston as a broadside and it became a veritable "hymn of faith" of every frontiersman on every American frontier.

It was whined out by cowboy singers (the real, not radio, kind) around campfires or on night herd duty. It was roared out by lumberjacks in their bunkhouses or by goldseekers in mining camp saloons And today it is still sung in many a mountain cabin in the Appalachians

Perhaps not every frontiersman boasted that he was "half a horse and half an alligator." Perhaps he stated, a little more modestly, that he was the kind of fighter who could "whip his weight in wildcats." So when James Daugherty decided to bring together a collection of old-time tales which would "make some image or pattern that might suggest the sprawling fecundity, the vast human drama of the old frontier" he chose for the title of his book the highly-appropriate "Their Weight in Wildcats."

"I have tried to call up the robust images, the wild processionals, the swift, fierce action and encounters — and all this feebly with a tiny brush, a scrap of paper, a pot of ink, and a large enthusiasm," he says in explanation of the illustrations which he drew for the book. (Some of these illustrations are reproduced with this article by courtesy of the Houghton Mifflin company, publishers.)

"The immense lore behind these few tales and sketches is, it seems to me, a vast Iliad and Odyssey in the raw," says Mr. Daugherty further. "From it writers and painters and sculptors will be taking themes and building up glorious songs and dramas and colossal carved and painted friezes and facades and processionals as long as the genial, tough, cantankerous spirit of America endures."

* * *

Because Mike Fink, the "King of the Keel-Boatmen," so perfectly typified this "tough, cantankerous spirit" of the men who could "whip their weight in wildcats," it is appropriate that his

PAUL BUNYAN
Master Woodsman.

picture should be the frontispiece of the book and that one of the stories about him should be the first one in it. It is "The Disgraced Scalp - lock," taken from "The Hive of the Bee-Hunter," written by T. B. Thorpe and published back in 1854. Listen now to Mike as he "talks big":

Well, I will walk tall into varmint and Indian; it's a way I've got, and it comes as natural as grinning to a hyena. I'm a regular tornado—tough as a hickory — long-winded as a nor'wester. I can strike a blow like a falling tree—and every lick makes a gap in the crowd that lets in an acre of sunshine. Whew, boys! If the Choctaw divils in them 'ar woods thar would give us a brush, just as I feel now, I'd call them gentlemen. I must fight something, or I'll catch the dry rot—burnt brandy won't save me."

The fact that the "Choctaw devils in them ar woods" were peaceable Indians didn't deter Mike Fink in the least. To demonstrate his skill with the rifle, for which he was famous and of which he was inordinately proud, he shot the scalplock from the head of a Cherokee named Proud Joe To avenge this insult Proud Joe and a party of his friends followed the flatboat on which Fink was working down the river, attacked it one night and in the fight which resulted one of the boatmen and two Indians, one of them Proud Joe himself, were killed.

More Admirable Qualities.

Such is the picture of the more ruthless and brutal side of these frontiersmen who could "whip their weight in wildcats." More admirable are some of their other qualities as revealed in the tales which Mr Daugherty has collected in his book.

For instance, the backwoodsman's resourcefulness is illustrated by the amusing anecdote from John M Peck's "Life of Daniel Boone" (published in 1847) which tells how that famous pioneer outwitted the band of Indians who tried to capture him one day in the cabin where he was curing tobacco. Boone pretended that he was glad to see them, offered to give them some of his tobacco and then when they were completely off-guard crushed the dry leaves in his hands and hurled the stinging dust into their faces. Then he sped for the safety of his cabin.

How Davy Crockett Kept Warm

The story of "The Captivity of Simon Kenton," as reprinted from Henry Howe's "The Great West" (1855) is not only an illuminating example of the amazing endurance and indomitable will-to-live of the typical frontiersman but, as a later biographer of Kenton has said, "for its momentous succession of perils, transitions and hairbreadth escapes, has no parallel in all the adventurous annals of western border history." Equally thrilling is the story of "The Fight in the Canyon" from "The Adventures of Big-Foot Wallace, the Texas Ranger and Hunter" by John C. Duval (1870) It reveals also the chivalrous side of the frontiersman's character in that Wallace gave his Indian foe a Christian burial after he had killed him. And for a variation on the "whip their weight in wildcats" theme is another story of this hero of the Lone Star state—"Big-Foot Wallace Whips His Weight in Wolves"—truly an Homeric feat IF it can be believed in all its details.

MIKE FINK, KING OF THE KEEL-BOATMEN.

Where Fact Leaves Off.

The trouble is one never can be sure where fact leaves off and fiction begins in these tales. For closely allied to the frontiersman's boastfulness of his own prowess was his fondness for telling "tall tales."

Davy Crockett may not have originated this pleasant American diversion of telling "whoppers" but he was one of the earliest and most skillful exponents of the art. For who else but this immortal bear-hunter and "coonskin congressman" could have invented (and made believable) such an ingenious method of keeping himself from freezing on a cold night as the one he tells about in "A Narrative of the Life of David Crockett of the State of Tennessee, Written by Himself"? Here is his version

My blood was now getting cold, and the chills coming all over me. I was so tired, too, that I could hardly walk; but I thought I would do the best I could to save my life, and then, if I died, nobody would be to blame. So I went to a tree about two feet through, and not a limb on it for 30 feet, and I would climb up it to the limbs, and then lock my arms together around it, and slide down to the bottom again. This would make the insides of my legs and arms feel mighty warm and good. I continued this till daylight in the morning, and how often I clomb up my tree and slid down I don't know, but I reckon at least a hundred times.

Two Immortal Liars.

Whether Jim Beckwourth or Jim Bridger was "the biggest liar in the West" has never been satisfactorily settled. Both men are dead these many years but

JOHNNY APPLESEED

the art of telling tall tales did not die with them. It lingers on to this day in the yarns which the lumberjacks tell about that master woodsman, Paul Bunyan, and Babe, his big Blue Ox, and in the songs which the negroes sing about John Henry, who was "the steel-drivinest man that ever lived." It survives in the tale of "The Big Bear of Arkansas," first told by T B. Thorpe in "The Hive of the Bee-Hunter" in 1854 and still repeated in many a cabin home in the Ozarks.

For these folk tales are a part of our frontier heritage They are as much that as are the tales of legendary feats by such heroes as Daniel Boone, Simon Kenton, Davy Crockett and Kit Carson—yes, even Johnny Appleseed, for his story is also included in this book (One wonders what the gentle Johnny would think when he found himself in such company—with Mike Fink, the ruthless rifleman, and Lewis Wetzel, the brutal "Injun-killer." One reviewer of this book has suggested that Johnny would "have licked his wildcat by prayer!") They are the kind of stories that never grow old and they will be repeated over and over, as Mr. Daugherty suggests, "so long as the genial, tough, cantankerous spirit of America endures."

THE HUNTERS OF KENTUCKY

By SAMUEL WOODWORTH

YE GENTLEMEN and ladies fair,
Who grace this famous city,
Just listen if you've time to spare,
While I rehearse a ditty;
And for the opportunity
Conceive yourselves quite lucky,
For 'tis not often that you see
A hunter from Kentucky.
Oh Kentucky, the hunters of Kentucky!
Oh Kentucky, the hunters of Kentucky!

We are a hardy, free-born race,
Each man to fear a stranger;
Whate'er the game we join in chase,
Despoiling time and danger,
And if a daring foe annoys,
Whate'er his strength and forces,
We'll show him that Kentucky boys
Are alligator horses.
Oh Kentucky, the hunters of Kentucky!
Oh Kentucky, the hunters of Kentucky!

I s'pose you've read it in the prints,
How Packenham attempted
To make Old Hickory Jackson wince,
But soon his scheme repented;
For we, with rifles ready cock'd,
Thought such occasion lucky,
And soon around the gen'ral flock'd
The hunters of Kentucky.
Oh Kentucky, the hunters of Kentucky!
Oh Kentucky, the hunters of Kentucky!

You've heard, I s'pose, how New-Orleans
Is fam'd for wealth and beauty,
There's girls of ev'ry hue it seems,
From snowy white to sooty.
So Packenham he made his brags,
If he in fight was lucky,
He'd have their girls and cotton bags,
In spite of old Kentucky.
Oh Kentucky, the hunters of Kentucky!
Oh Kentucky, the hunters of Kentucky!

But Jackson he was wide awake,
And was not scar'd at trifles,
For well he knew what aim we take
With our Kentucky rifles.
So he led us down to Cypress Swamp,
The ground was low and mucky,
There stood John Bull in martial pomp
And here was old Kentucky.
Oh Kentucky, the hunters of Kentucky!
Oh Kentucky, the hunters of Kentucky!

A bank was rais'd to hide our breasts,
Not that we thought of dying,
But that we always like to rest,
Unless the game is flying.
Behind it stood our little force,
None wished it to be greater,
For ev'ry man was half a horse,
And half an alligator.
Oh Kentucky, the hunters of Kentucky!
Oh Kentucky, the hunters of Kentucky!

They did not let our patience tire,
Before they show'd their faces;
We did not choose to waste our fire,
So snugly kept our places.
But when so near we saw them wink,
We thought it time to stop 'em,
And 'twould have done you good I think
To see Kentuckians drop 'em.
Oh Kentucky, the hunters of Kentucky!
Oh Kentucky, the hunters of Kentucky!

They found, at last, 'twas vain to fight,
Where lead was all the booty,
And so they wisely took to flight,
And left us all our beauty.
And now, if danger e'er annoys,
Remember what our trade is,
Just send for us Kentucky boys,
And we'll protect ye, ladies.
Oh Kentucky, the hunters of Kentucky!
Oh Kentucky, the hunters of Kentucky!

Electric Eel to Be Investigated in His Habitat

Working of His Power Plant Will Be Studied

New York.—What happens to an electric eel when another electric eel hands it a dose of its own medicine?

This is one of the questions being taken to the Brazilian tropics by Dr. Richard T. Cox of the New York university physics department, who has left for an extended research visit in Para, Brazil, near the mouth of the Amazon, a favored haunt of the "shocking" elongated fish whose ability to generate and discharge paralyzing "jolts" of electricity is one of the classic riddles of biophysics.

Among the pieces of apparatus which Dr. Cox is taking with him is one calculated to deliver electrical discharges like those of the eel itself. His plan is to put his eel into contact with the device, "give it the works," and then make a careful scientific record of the fish's reaction. This is something that has never been done in the aquarium studies thus far undertaken in temperate lands.

Will Study Its Power Plant.

Even more intimate studies of the electric eel's internal power plant and its workings are planned by Dr. Cox. He plans to block off various parts of the eel's system of electric organs, either by sectioning nerves or with anesthetics, and thus to make analytic studies which have never been possible under aquarium conditions, where the supply of specimens is so limited that only studies of surface reactions have been possible.

A prime part of Dr. Cox's research apparatus will be the cathode ray oscillograph, a relatively new instrument which has proved a most powerful tool in the hands of physicists and engineers studying the nature and rates of sudden electrical discharges. Modern apparatus of this kind has never been used in electric eel studies, he says.

Why He Goes to the Eels.

One reason why Dr. Cox is going to the tropics where the eels are, instead of having the eels brought to him, is that these peculiar fish do not survive the voyage north at all well, so that it is better economy for him to go where they are plentiful and where he can consequently afford to use up a few without constantly having to keep an anxious eye on a diminishing supply in a tank.

Dr. Cox will have with him his wife, Mrs. Shelby Shackelford Cox, as artist and general assistant, and a biologist, Robert S. Mathews, graduate student at Columbia.

Spectroscope's Eye Useful in Finding Impurities in Iron

Cambridge.—How the powerful eye of the spectroscope is used in industry to analyze metals, particularly in testing steels and alloys for impurities, was explained to the symposium on metals at the Massachusetts Institute of Technology here by Prof. George R. Harrison, director of the institute's spectroscopy laboratory.

Even such small amounts as one part in ten thousand of some metals, such as aluminum or magnesium, will greatly alter the properties of steel, it has been found. Thus the inclusion of one old automobile crank case of the wrong type may spoil tons of steel.

The spectrograph, he explained, constitutes a quick and accurate method of checking steel for such impurities.

X-Rays Aid Study of Poison Sprays

Ithaca, N. Y.—X-rays are being used by Prof. G. F. McLeod of Cornell university to get exact data on how poison sprays containing sulphur behave as they stick to leaves, and what becomes of the sulphur after the marauding insect or caterpillar has bitten out and swallowed some appetizing but lethal green pieces.

The rays used in the photography are of the kind known as Grenz rays; they are like X-rays but have somewhat greater wavelengths, intermediate between X-rays and ultraviolet.

Even the himself has made one of us "fireside chats" telling should be given the new

meantime—and some more bedfellows—we find the uliar cross currents operat- ong some of the religious here are many who fear court packing plan will void onal guarantees of re- reedom. They fear even- rol of the churches by the aving in mind, no doubt s happened to religious groups in Germany and Soviet Russia.

Editorials from the Catholic press are being circulated privately among many legislators and against these are some Protestant preachers who take the position that the Supreme court is out of date and ought to be reformed. Numerous Jewish leaders are opposing the reform but among the Jews are many who feel that President Roosevelt is right.

Then there is the split among the farm leaders. I refer to farm organizations with national spokesmen. Some are for the change and some against it.

Uppermost in the minds of all of the opponents seems to be a fundamental fear that to change the court will open the door through which dictators may walk. To illustrate the type of statements coming forth from observers of national reputation as regards this point, I am going to quote from a recent expression by the distinguished columnist, Westbrook Pegler. Lately he wrote:

"All of a sudden, Mr. Roosevelt discovers that the Supreme court is largely senile and demands quick action on a proposal which, if adopted, would create an easy precedent for the most cynical packing of the Supreme court by someone of the type of Huey Long or Warren Harding, Mussolini or Hitler in years to come. It might not be many years either . . . All dictators pack the courts by legal means as a preliminary to the promulgation of their dictatorial laws. After that it is comparatively easy to take over, because the courts belong to the dictator and do as he orders."

There can be no question, of course, that the thing Mr. Roosevelt proposes to have congress do for him is legal. Since, however, it is legal in this instance, it will be legal, of course, for someone else to come along after Mr. Roosevelt and pack the court with men of his own choosing, men who will decide questions as the then President desires them to decide. There is no limit to what may come if once the door is opened. Senator Wheeler, the Montana Democrat who has long been outstanding in the liberal character of views he holds, has added to this thought the expression that if the door is to be opened, the people must do it—not the congress that was elected without voters having heard the proposition mentioned.

* * *

They Make Mistakes

As the fight of packing the Supreme court waxes warmer, one can not help noting how even clever politicians make mistakes. There are many who believe that Mr. Roosevelt made a grievous error in proposing revision of the Supreme court in the fashion he chose while there are others who say that he was elected by such a tremendous majority that he will have the people behind him regardless of the character of proposition advanced to congress.

It is interesting to note how many congressmen and senators are dodging the issue. Their silence is positively thunderous because they do not know how the people back home feel about the general proposition. There are others who have come out boldly for one reason or another in support of the plan and there are some 33 or more in the senate who have determined their position already and are ready to fight to the finish to stop passage of such a law.

Then there was the mistake which Senator Robinson of Arkansas, the Democratic leader, made in the senate the other day. He vigorously denounced what he termed propaganda and a conspiracy to defeat the President's plan. He called attention to much newspaper and editorial comment in opposition and accused all of those people indiscriminately with being part of a gigantic conspiracy against the court pack.

The humor of the Robinson outburst seemed not to be apparent to the otherwise kindly mannered senator whom I very much admire. What he did by an hour-long attack in the senate was to re-emphasize all of the criticism of the President's plan.

One might refer in this connection also to the explosive type of speech made by Harry Hopkins, relief administrator. Of course, everyone knows that Mr. Hopkins has made his life's work that of looking after suffering humanity. He is on the government pay roll in such a job. Mr. Hopkins attacked all opposition to the President's plan because he said it was in the interest of humanity to do so. The relief administrator made his appeal direct to all of those receiving federal money through relief rolls and that obviously will be taken up by opponents of the President's plan who undoubtedly will say as some already have hinted that Mr. Hopkins is trying to muster relief classes to bring pressure upon congress.

POULTRY FACTS

QUALITY OF EGGS NOT ALWAYS SAME

Fall and Winter Supply Is Found Much Better.

Supplied by the New York State College of Agriculture.—WNU Service.

Do newly-laid eggs from the same hen or from different hens vary in quality, and does this quality vary with the season of the year? These are questions that three Cornell poultry investigators undertook to solve the past year.

During a ten-day period in the middle of each month, for one year, all of the eggs from a flock of 70 single-comb white Leghorns were examined and the egg qualities recorded. The measures of quality used were firm albumen, the proportion of outer thin albumen and the yolk as to height, width, and color.

No seasonal change in yolk color was apparent; but the yolk color may be affected by feed.

The individual records of the eggs of representative birds showed that after April there is a lowering of yolk quality in eggs from both pullets and hens. Also there was a marked increase in the amount of outer thin, water-white, albumen which continued until July when it began to decrease. This character varied less than the others.

The change in the firm albumen was similar to the changes in outer thin albumen and yolk. The scientists say that eggs show a decided change in quality beginning in March or April, and this change toward lower quality continues into the summer.

The poultrymen say these results agree with common knowledge, especially of cold storage dealers, who pay a premium for spring eggs, or "April eggs," as they are known to stand up better in storage.

Small Laying Flocks May Be Fed by Hopper

Farm flock owners who find it inconvenient to feed laying hens at regular hours each day should find the results of an experiment on hopper feeding conducted by the Michigan State college of interest and value, says J. C. Taylor, associate extension poultryman at the New Jersey college of agriculture, Rutgers university.

Two pens of Leghorns and two pens of Rhode Island Reds were fed corn and oats and a laying mash containing 20 per cent crude protein in hoppers during the experiment, Taylor reports. The feed was available to the birds at all times. In addition, approximately two pounds of wheat were fed daily in the litter to keep the litter from packing.

Satisfactory egg production was obtained by the hopper feeding of corn and oats and 20 per cent protein mash and no difference in mortality was found when compared with flocks fed according to the usual method.

The use of artificial lights increases the success of the hopper feeding. This method may solve the feeding problems of the general farmer who cannot practice the recommended regularity of feeding laying birds.

Balanced Egg Mash Ration

Soybean oil meal, costing approximately one-third less than meat scrap, may successfully replace part of the meat scrap in a balanced egg mash ration, says H. H. Alp, extension poultryman, college of agriculture, University of Illinois. A possible protein combination to be used with 400 pounds of mash might be made up of meat scrap 50 pounds, soybean oil meal 50 pounds, steamed bone meal 10 pounds, ground limestone 5 pounds, and salt 5 pounds.

For Poultrymen

Scales on the legs of poultry are caused by a mite which burrows under the scales and eats into the flesh.

* * *

Buffing the dirt off slightly-soiled eggs leaves them in much better condition than washing.

* * *

Fowl-pox has been reported from nearly all the countries. The disease not only attacks chickens but may also attack pigeons, turkeys, geese, and quail.

* * *

An egg is a highly perishable product and should be handled accordingly — it must be protected from high temperatures if the quality is to be maintained.

* * *

Oftentimes birds once vaccinated remain permanently immune. Sometimes they do not. No general rule can be formulated.

* * *

A temperature of 50 to 60 degrees Fahrenheit is best for hens in batteries. Some provision for heating is necessary, though seldom used.

* * *

The La Fleche hen lays a white-shelled egg. The color of the beak is black; the ear lobes are white; the shanks and toes are black or slate color.

"Keep A-Goin'"—

Persistence in Efforts Likely to Bring About Fulfillment of Ambition

PERHAPS it is my fondness for violets that made me stand and watch him. Anyway, there he was, with a wonderful basket of scented loveliness tempting the homeward-going throng on a Saturday afternoon.

"Violets, violets, lovely violets. Quarter a bunch. Lovely violets."

Like an unending song, his husky voice cried his wares, and during the ten minutes that I stood near him on the pavement, watching and listening, he kept up his cry.

Unable to resist the temptation, I bought a bunch, and even as he served me, he punctuated the deal with: "Violets, all fresh and lovely."

Persistence Counts.

I remarked, as I waited for my change, that he had a large basket to dispose of.

"Yes," he said, "that's right, gov'nor. But they'll all go. ('Ere you are, sir, lovely violets, all fresh.) Only you 'as to keep a-goin'. Everybody's in a hurry to get 'ome, and if you ain't persistent—(yes, lady, smaller bunches fourpence)—you don't sell 'arf as many. 'Ere you are, sir, your change. Thank you very much. Violets, lovely violets. All fresh!"

I walked away with my purple bunch—and a lesson in my mind. "Keep a-goin'." What a motto! It reminded me of a little jingle that is oft quoted by a rolling-stone friend of mine, who brought it back from the West of Canada, where he first heard it. It goes like this:

If it rains or if it snows,
If it's calm or if it blows,
What'll happen no one knows,
So keep a-goin'.

A well-known athlete once told me that he had won many a second and third prize by simply keeping on. Dogged does it. Even when he realized that he couldn't beat the winner, he set his mind on being in the first three, and got there.

A Motto for Many.

Keep a-goin' is a motto not only for rolling stones and athletes and violet-sellers. It is a motto for housewives who are faced with a tiring washing-day, for families who are faced with no very brilliant outlook for the future, for those who are apt to lie down under the weight of present troubles.

Nothing stands still. Things either get better or worse, and they are far more likely to get better if we persist in our efforts to make them so.

Take heart. This year, England is to crown a new king. This year, too, we may crown some individual ambition with fulfilment. We can do it, I know, if we "keep a-goin'."—Editor of London Answers.

Big Minds, Few Words

As it is the mark of great minds to say many things in a few words, so it is that of little minds to use many words to say nothing.
—La Rochefoucauld.

THE GREATEST TRACTION TIRE EVER BUILT FOR FARM USE

THE Firestone Ground Grip Tire is without equal for traction. It is in a class by itself. In fact, the design and performance of this tire are so unusual that the United States Patent Office has granted a patent on it. Firestone provides one traction tread—Ground Grip—for cars, trucks, buses, tractors and farm implements.

Ground Grip Tires give your tractors greater drawbar horsepower, saving 25% in time and 25% in fuel. Your Firestone Implement Dealer or Tire Dealer has an economical plan for cutting down farm implement wheels, applying uniform diameter rims so a few sets of Firestone Tires fit all implements. Start today putting your farm on Firestone Ground Grip Tires and save time and money.

If you are ordering a new tractor have it delivered on Firestone Ground Grip Tires — the greatest traction tires ever built for farm use.

GOODELL U. B. CHURCH

Rev. W. E. Dye, S. T. D., Pastor

Miss Zelda Elmbrink, S. S. Supt.

Sunday School 10:00 a.m.
Morning Worship 11:00 a. m
Sermon subject "The Lesson of the Empty Tomb" Communion and Baptisms will be included in this service

Good Friday we will have "Special Service" between 3:30 and 4 30 when the sermon subject will be. "The Lessons From Calvary's Spoils." We should spend this time in the Church remembering that Christ, and not Jesus alone, died for our Sins.

The Bible question to be answered Sunday morning is: "How many people have risen or to have been raised from the dead as recorded in the Bible?"

Saturday the Ladies Aid will hold a Bake sale in the Community Hall

SCHOOL NEWS

Grades 7 and 8

Ione Tanner is a new member in the seventh grade class.

Last week and this week we have been working on newspaper work in both English classes We elected certain people to interview people and report the news for a newspaper that we plan to issue soon.

Those who received 100% in spelling are: Dorothy Baack, Allen Barz, Shirley Johnson, Jacqueline Kudje, Marjorie Lemke, Harold Swalve, Duane Trees and Ellen Kilgore.

Grades 5 and 6

LuVern Tanner is the new member in the fifth grade He has been attending a rural school.

Colleen Gram returned to school Tuesday morning.

We are happy to know that Barbara Johnson is feeling better

In art class we have been learning the necessary steps in book binding Tuesday we completed our books.

Grades 3 and 4

Many of the children in the 4th grade wrote original poems during language period

We read a Japanese poem in third grade language class Mary Lou Netland and Ruth Bell copied the poem Carol Back and Ronald Brinkman drew pictures of the poem

The third graders made baskets and decorated them with Easter designs.

Mary Lou Netland brought a star design to school We read "The Story Of Our First Flag" Then we wrote our story about making the flag. We learned how to cut a star with "one snip" of the scissors just as Betsy Ross did Mary Lou made a flag using her star design

We are studying children of Other Lands" in both grades. Most of this unit is taken care of in language, reading and geography classes Most of the fourth grade work is centered around Holland and the third grade work is centertd around Japan

Grades I and 2

We have a new pupil in second grade. Her name is Delores Tanner

Shirley Stille brought a fern to school We planted it in one of our newly painted flower pots

Elizaeth Goll had a birthday party on Thursday Her mother came to visit school and was here for the party

The second graders have new English work books

Easter Island

Easter Island, mysterious dot of land 2,000 miles off the west coast of South America, was discovered on Easter Sunday, 1722, by the Dutch Admiral Roggeveen.

When elephant trainers wish to give their elephants a treat they give them water directly from a hose into their mouths. an elephant prefers receiving its drinking water in this way to drinking it from a tank by means of its trunk.

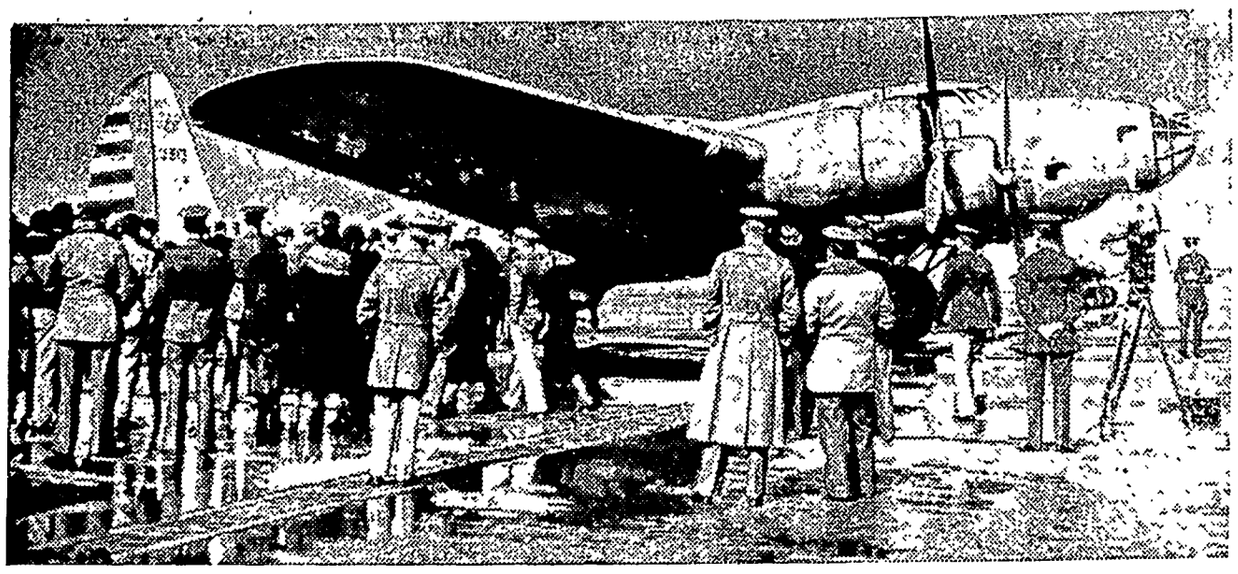
"Flying Fortress" Is Last Word in Air Fighters



Uncle Sam's giant "flying fortress" attracted plenty of attention after arrival at the general headquarters air force base at Langley field. This giant Boeing bomber, multi-motored, heavily gunned, all-metal—and mighty speedy—is the last word in air fighters.

Yes, You Are Seeing Double

You might think this was done with mirrors, but you're wrong. It's the De Sutter twins, two of Chicago's leading feminine basketball players, looking at each other through an empty picture frame. Left to right, they are, Marion and Mercele. In the event you still believe this clever piece of photography was done with a mirror, look below the frame where you can see two sets of legs.

HARVARD'S OLDEST GRAD

Henry Munroe Rogers, oldest living graduate of Harvard university, who observed his ninety-eighth birthday anniversary recently by going to his law office as usual at 10 Postoffice square in Boston, where he practices as the oldest member of the Boston Bar association. Mr. Rogers was graduated from Harvard in 1862, went to war in the navy that year and returned to Harvard for other degrees in 1866 and 1867.

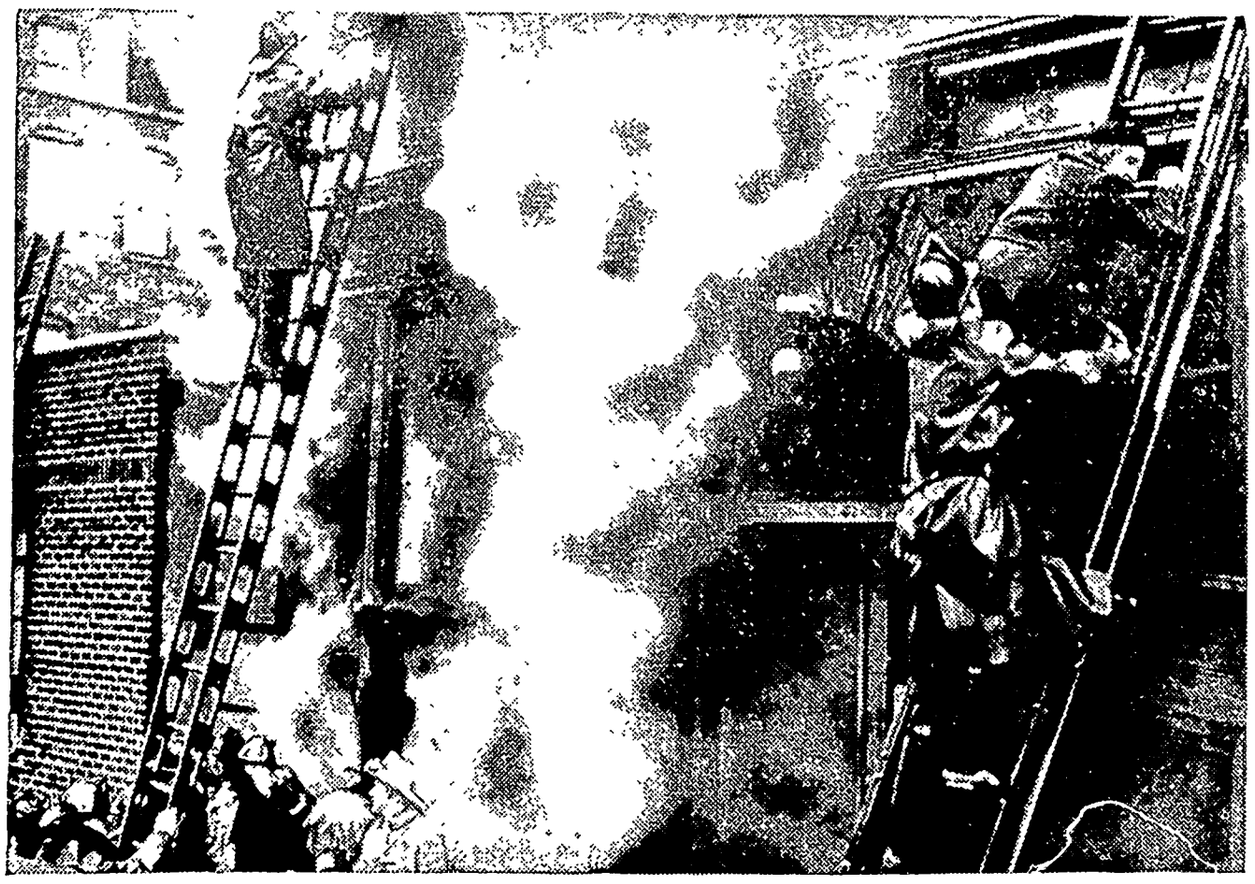
ON CORONATION LIST

Only ten years old, Lord Montague of Beaulieu (above) is the youngest peer to be included on the invitation list to the coronation of King George VI of England. He succeeded his father, the second baron, at the age of three. Lord Montague's mother is now the Hon. Mrs. Edward Playdell Bouverie.

Leaders Happy Over C. I. O. Recognition

Left to right, David J. McDonald, Phillip Murray, seated. Standing, left to right, Van A. Bittner, Clinton S. Golden and Lee Pressman, attorney for the C. I. O., union officials who won an agreement with the Carnegie-Illinois Steel corporation, for recognition of the C. I. O. to bargain in matters concerning union employees of the steel company.

Firemen Save Lives in Conflagration in Lynn



Thrilling rescue by firemen of a woman trapped on the third floor of a burning building in Lynn, Mass., is shown in this unusual photograph. Several other dramatic rescues including that of a baby who was tossed over the roof featured the fire battle.

UNCOMMON AMERICANS

By Elmo Scott Watson

© Western Newspaper Union

Great Father, Great Son

RARELY does a great father transmit his genius to his son. But the Hopkinsons of Philadelphia were exceptions to that rule.

Francis Hopkinson, born in 1737, was the first scholar entered at the University of Pennsylvania (then the College of Philadelphia) and was graduated from its first class. He held several positions of importance in Penn's colony, then moved to New Jersey. There he was a member of the provincial council until he was elected to the Continental congress from New Jersey and thus became one of the signers of the Declaration of Independence. But other facts make him more notable than almost any of the other 55 signers of that document

He wrote an allegory in which he recounted the wrongs of the colonies and did much to fan the spirit of revolution. He wrote the famous song "The Battle of the Kegs" satirizing the British scare over an attempt to blow up their ships with a crude submarine invented by a certain David Bushnell, and this song became the favorite of Washington's soldiers.

But most important is the fact that evidence exists which shows that he was the designer of the first Stars and Stripes as our national flag (the Betsy Ross tradition to the contrary notwithstanding) and that he had a hand in designing the first Great Seal of this nation.

His son, Joseph Hopkinson, born in 1770, followed closely in his father's footsteps. He also was graduated from the University of Pennsylvania, studied law and held several positions in the state and federal government. He helped found the Philadelphia Academy of Fine Arts, served as its president for many years and was vice-president of the American Philosophical society which his father had helped found.

But he is best remembered for a song which he wrote—thus emulating his father again. It was "Hail Columbia" which was the only national song of this republic until Francis Scott Key wrote "The Star Spangled Banner."

First "America's Sweetheart"

LONG before a popular movie actress was given the title of "America's Sweetheart" there was another. Ask any man of fifty years or upwards and he will tell you her name. It was Annie Oakley.

She was born in a log cabin in Darke county, Ohio, in 1866 and her full name was Phoebe Anne Oakley Mozee. Her father died when she was six and one of the few possessions which he left was a Kentucky long rifle. Little Anne, who was something of a tomboy, soon began using this weapon to help fill the family larder with quail, squirrels and rabbits. She became an unusual markswoman and the fame of her skill spread to Cincinnati where hotel keepers had been buying the game which she killed.

When she was fifteen a noted sharpshooter named Frank E. Butler came to Cincinnati. He was accustomed to issue a challenge to all comers in a shooting match. This challenge was taken up by one of Anne's hotel-keeping patrons who urged her to shoot against Butler. The girl not only won the match but she won Butler's heart as well and a year or so later they were married. She began taking part in her husband's shooting act and, being a skilled showman, he pushed her more and more into the limelight and kept himself more and more in the background.

Then "Buffalo Bill" Cody organized his Wild West show and in 1885 the "Butler and Oakley" act joined it. But it wasn't long until the second half of the act was the whole act and as Annie Oakley she started on the career which made her the idol of Young America. "Little Sure Shot" she was named by the famous chief, Sitting Bull, when he went out with Buffalo Bill's show and as "Little Sure Shot" she became famous, not only throughout America but all over Europe as well.

When Cody took his show abroad her marksmanship thrilled everyone who saw it—and that included dukes, princes and kings.

One of her stunts was to use playing cards as targets and these cards, punctured by her bullets, became treasured souvenirs. In those days showmen who handed out free passes always punched a hole or two in them, thus saving a miscount when the day's proceeds were counted. Once a baseball magnate looked at a card which had been so thoroughly perforated that little was left. "Huh! Looks like Annie Oakley's shot at it!" he grunted. And from that day free passes became "Annie Oakleys."

The name of this remarkable woman whose career came to an end in 1926 is thus perpetuated in our "slanguage." But in the hearts of thousands of Americans today, the boys of yesteryear, it is enshrined as "America's Sweetheart."

Smart Knit Blouse and Skirt

Pattern 5655

Like a gay addition to your "all year 'round" wardrobe? Of course you would! Then take a tip and knit this fetching blouse. You'll love the laciness of a pointed yoke, so prettily set off by plain stockinette stitch, and are sure to adore the snug fit of ribbing 'cross the hips. Ribbing also bands the simple sleeves. Knit it of soft-colored string or yarn, in one of the new shades! In pattern 5655 you will find instructions for making the blouse and skirt in sizes 16-18 and 38-40; an illustration of the blouse and of all stitches used; material requirements.

To obtain this pattern send 15 cents in stamps or coins (coins preferred) to The Sewing Circle Household Arts Dept., 259 W. Fourteenth St., New York. N. Y.

Write plainly pattern number, your name and address.

Household Questions

Lukewarm wash water, lukewarm rinse water and a moderately warm place for drying are best for washing woolens.

* * *

Peroxide of hydrogen will remove perfume stains from linen bureau scarfs.

* * *

Shell fish such as crab, lobster or shrimp should be stored in a mild salt brine (1 teaspoon of salt to a cup of water). Flavor will be maintained and spoilage reduced with this type of storage.

* * *

A little crushed ice added to the cold water in a bag makes it comforting to fevered brows for a longer time than cold water alone.

* * *

Surveys have shown that once-a-day dish washing represents an economy of time.

* * *

Add two tablespoons of shortening to the griddle cake batter and it will not be necessary to grease the griddle.

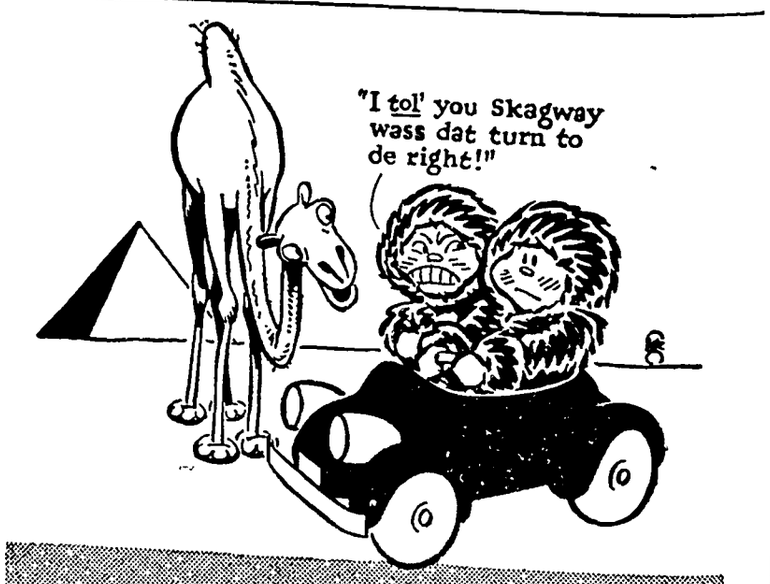
GLAD

TRADE MARK

Glad news indeed for the millions and millions of people who like the famous Smith Brothers Cough Drops:—

Smith Bros. Cough Drops are the only drops containing VITAMIN A

This is the vitamin that raises the resistance of the mucous membranes of the nose and throat to cold and cough infections.



GO FARTHER
BEFORE YOU NEED A QUART

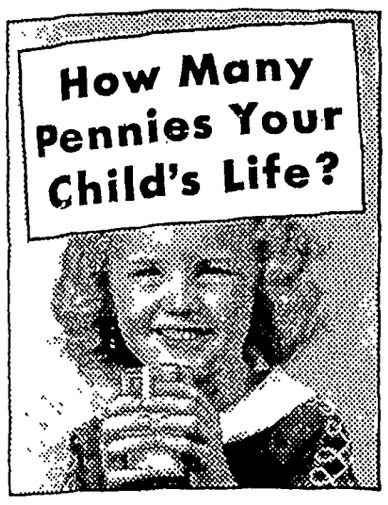
Prove it for yourself with the "First Quart" test. Drain and refill with Quaker State. Note the mileage. See how much farther this oil takes you before you have to add the first quart. The reason is: *"There's an extra quart of lubrication in every gallon."* Quaker State Oil Refining Corp., Oil City, Pa. The retail price is 35¢ per quart.

All Is Not Gold—

For 50 years one of the most popular exhibits in Blackburn museum has been "a nugget of pure Australian gold" weighing 7½ ounces.

Tempted by the high price of gold, the museum committee recently obtained the permission of the council to sell it. The gold was sent to a London firm of assayers, who replied that the nugget consists merely of braziers' metal and lead, and does not contain a particle of gold.

How Many Pennies Your Child's Life?



Don't Try to "Save" on Home Remedies—Ask Your Doctor

There is one point, on which practically *all* doctors agree. That is: *Don't give your child unknown remedies without asking your doctor first.*

All mothers know this. But sometimes the instinct to save a few pennies by buying "something just as good" overcomes caution.

When it comes to the widely used children's remedy — "milk of magnesia" — many doctors for over half a century have said "PHILLIPS." For Phillips' Milk of Magnesia is the standard of the world. Safe for children.

Keep this in mind, and say "PHILLIPS' MILK OF MAGNESIA" when you buy. Comes now, also in tablet form. Get the form you prefer. But see that what you get is labeled "Genuine Phillips' Milk of Magnesia." 25¢ for a big box of the tablets at drug stores.

ALSO IN TABLET FORM: Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

PHILLIPS' MILK OF MAGNESIA

To Strive

To strive with an equal is a doubtful thing, with a superior, a mad thing, with an inferior, a vulgar thing.—Seneca.

Beware Coughs from common colds That Hang On

No matter how many medicines you have tried for your cough, chest cold or bronchial irritation, you can get relief now with Creomulsion. Serious trouble may be brewing and you cannot afford to take a chance with anything less than Creomulsion, which goes right to the seat of the trouble to aid nature to soothe and heal the inflamed membranes as the germ-laden phlegm is loosened and expelled.

Even if other remedies have failed, don't be discouraged, your druggist is authorized to guarantee Creomulsion and to refund your money if you are not satisfied with results from the very first bottle. Get Creomulsion right now. (Adv.)

Old Age Is Deliberate

Young men soon give and soon forget affronts; old age is slow in both.—Addison.

WOMEN OF ALL AGES

Mrs. Thomas Johnson of 616-15th Ave., S. E., Cedar Rapids, Iowa, said: "I was weak and had headache and pains associated with functional disturbances. Dr. Pierce's Favorite Prescription made me feel like a different woman. I wasn't so nervous, ate and slept better, and was troubled very little with headache or backache. It is wonderful for expectant mothers, too. I found it just fine as a tonic to increase the appetite." Buy now!

Culture Needed

The enjoyment of art demands a certain degree of culture.

WNU—N 11—37

Sentinels of Health

Don't Neglect Them!

Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of an excess of toxic impurities. The act of living—*life itself*—is constantly producing waste matter the kidneys must remove from the blood if good health is to endure.

When the kidneys fail to function as Nature intended, there is retention of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all worn out.

Frequent, scanty or burning passages may be further evidence of kidney or bladder disturbance.

The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Use *Doan's Pills*. They have had more than forty years of public approval. Are endorsed the country over. Insist on *Doan's*. Sold at all drug stores.

Scenes and Persons in the Current News

1—Gubernatorial conference discusses unemployment and relief problems. Conferees, left to right, seated, Governor Horner of Illinois, Governor Lehman, New York, and Gov. Charles F. Hurley, Massachusetts. Standing, left to right, Governor LaFollette, Wisconsin, Governor Benson, Minnesota, and Governor Quinn, Rhode Island. 2—Prof. Fred D. Fagg, Jr., of Northwestern university, newly appointed director of the bureau of air commerce. 3—Former Gov. Paul V. McNutt of Indiana left after he had been sworn in as high commissioner for the Philippines.

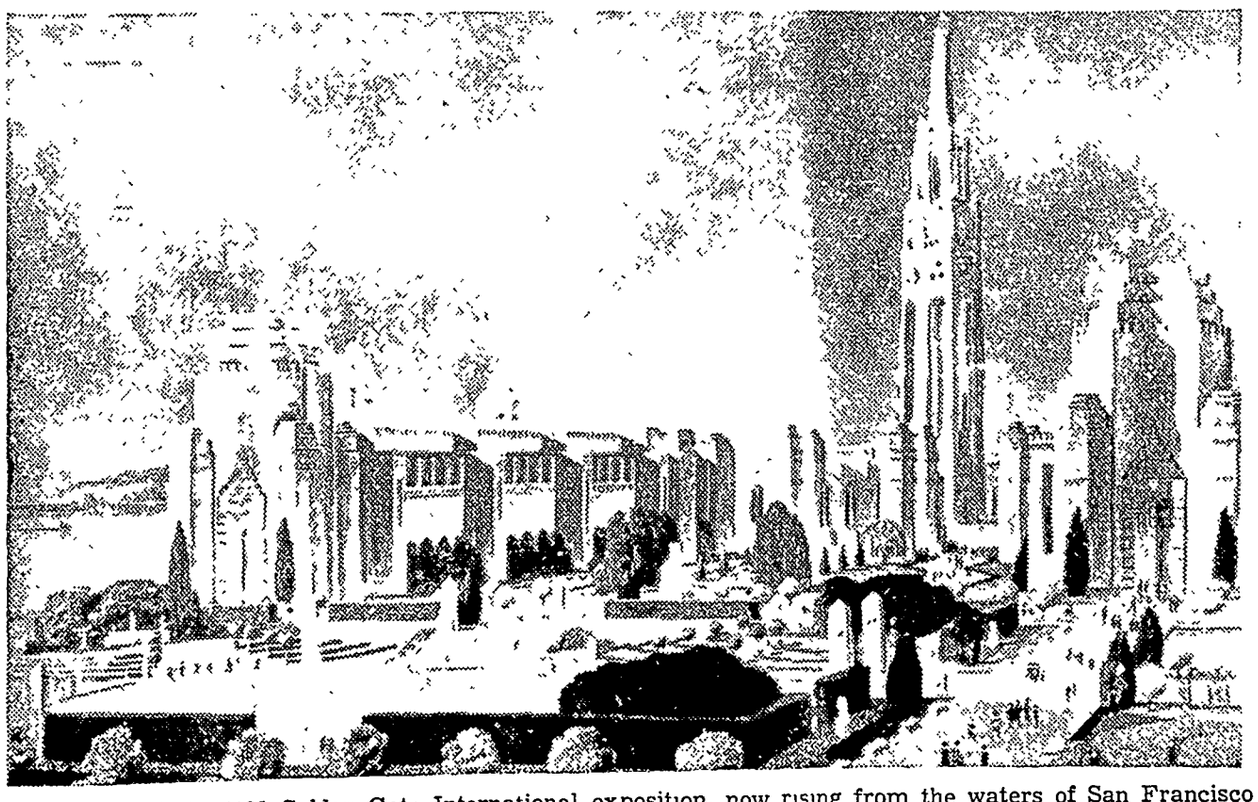
Busy Bees in Spring Training Camp

A twirling trio of the Boston Bees unlimbering their starboard flippers on the opening day of the spring training season at the club's camp in St. Petersburg, Fla. From left, they are: Ira Hutchinson, Lou Fette and Vic Frazier.

NEW SOVIET OFFICIAL

A recent photograph of Vice Premier Valery Ivanovitch Mezhlauk, who has been appointed to the post of commissar of heavy industry of the U. S. S. R. to succeed Gregory K. Ordjonikidze, who died recently. Mezhlauk is well known in the United States, having traveled extensively about industrial centers here.

Vision of the 1939 Golden Gate Exposition



A vision of the 1939 Golden Gate International exposition, now rising from the waters of San Francisco bay. This is Architectural Artist Chesley Bonestell's conception of that section of the 400-acre exposition which faces Yerba Buena island and the Bay bridge, and is at right angles to the main gateway.

LAST OF BLUE EAGLES

Miss Diana Rogovin, sole survivor of the huge NRA Blue Eagle staff which numbered over 5,000 employees at the height of national recovery administration activities, just before it was invalidated by the Supreme court, photographed at her desk in Washington, where she is completing a history of the NRA.

Savant Discovers New Comet

Dr. Fred L. Whipple, of the Harvard observatory, who announced recently the discovery of a new small comet in the constellation Canes Venatici (the hunting dogs), is shown in his office at Harvard university, checking over negatives made at night of the stars. The comet, which has a tail about "one degree long" and is of the twelfth magnitude, was discovered by the astronomer when he examined a photographic plate he had taken.

Spring—Fashions—Sewing

ARE the robins showing interest in real estate out your way—and have the kiddies been hinting that it's about time to go barefoot—have you been trying to get a little house cleaning done—and have you noticed a few of the town's rabid sportsmen out poking around on the fairways—have you had any knights of the road stop by for a hand-out or seen any gypsies—in short, is it Spring out your way? That, of course, brings us to the omnipresent subject of fashions, and this in turn to the ubiquitous topic of Sew-Your-Own.

One in Silk; One in Cotton.

If you're a devotee of trim lines and real comfort make this new all-occasion dress for yourself (Pattern 1973) in two versions: a silk print in which to greet the bright new season; a cotton one for day in, day out service. There's no daytime occasion too auspicious nor a household task too menial for one or the other of these versions. For completeness, then, and simplicity as well, there's no substitute for this stylish number. It is designed for sizes 36 to 52. Size 38 requires 3⅝ yards of 35 inch material.

Two Versions From One Pattern.

And see what the Chic Twins have, two lovely blouses with but a single purpose—to make you look your very veriest. They're combined to make Pattern 1271 the biggest hit of the season. Think of the endless variety these clever bits of fashion will give your wardrobe. Especially now will ensembles be worn, and to have certain success with these one must choose the blouse carefully. Wear the notched lapel model with casual sports outfits and the ruff-collared style with the more tailored suits. Puff sleeves and saucy peplums are particularly intriguing features of both blouses. Either is available for sizes 12 to 20 (30 to 38 bust). Size 14 (top model) requires 2 yards of 39 inch material or 2⅛ yards for the other. Remember, both are included in Pattern 1271.

Sewing Easy; Frock Charming.

Pattern 1259 is truly an Ode to Spring—one that's fit for print, too. A bright nosegay, for instance, will be just the thing to promote your charm and grace. The far-reaching collar and grosgrain ribbon tie will indeed become your pretty face. The puff sleeves and smart cuffs fairly snap with chic. Simple to make, delightful to wear, this frock deserves to be called an Ode to Spring. It comes in sizes 12-20 (30 to 40 bust). Size 14 requires 5¼ yards of 39 inch material plus ¾ yard contrasting. The bow requires ⅝ yard ribbon. In full length size 14 requires 6⅛ yards of 39 inch material.

New Pattern Book.

Send for the Barbara Bell Spring and Summer Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned, easy-to-make patterns. Refinement Bent

Decency arises from a natural predilection for refinement.

Gas, Gas All the Time, Can't Eat or Sleep

"The gas on my stomach was so bad I could not eat or sleep. Even my heart seemed to hurt. A friend suggested Adlerika. The first dose I took brought me relief. Now I eat as I wish, sleep fine and never felt better." —Mrs. Jas. Filler.

Adlerika acts on BOTH upper and lower bowels while ordinary laxatives act on the lower bowel only. Adlerika gives your system a thorough cleansing, bringing out old, poisonous matter that you would not believe was in your system and that has been causing gas pains, sour stomach, nervousness and headaches for months.

Dr. H. L. Shoub, New York, reports: "In addition to intestinal cleansing, Adlerika greatly reduces bacteria and colon bacilli."

Give your bowels a REAL cleansing with Adlerika and see how good you feel. Just one spoonful relieves GAS and constipation. At all Leading Druggists.

KLEMME ELECTRIC RATES REDUCED AGAIN!

The electricity you are now using and have been using since your last meter reading date will be billed under the following new low net rate schedule:

RESIDENCE SERVICE
The first 30 KWH used per month @ 8.0c per KWH
The next 30 KWH used per month @ 6.0c per KWH
The next 30 KWH used per month @ 4.0c per KWH
All over 90 KWH used per month @ 3.0c per KWH
Minimum Monthly Bill, $1.00.

COMMERCIAL AND OR POWER SERVICE
The first 50 KWH used per month @ 8.0c per KWH
The next 50 KWH used per month @ 6.0c per KWH
The next 50 KWH used per month @ 5.0c per KWH
All over 150 KWH used per month @ 3.5c per KWH
Minimum Monthly Bill for Lighting, $1.00. Consult Division Manager for Power Minimum.

The increased use of electricity is largely responsible for this rate reduction as well as other reductions that have been made in the past.

10 years ago 25 kilowatt hours cost $3.50
5 years ago 25 kilowatt hours cost $2.75
2 years ago 25 kilowatt hours cost $2.50
TODAY 25 kilowatt hours cost $2.00

A few years ago your electric bill was for lighting only Today the same amount will buy not only considerable more light but many other services as well.

10 years ago $2.25 bought 16 kilowatt hours.
5 years ago $2.25 bought 20 kilowatt hours.
2 years ago $2.25 bought 22 kilowatt hours.
TODAY $2.25 buys over 28 kilowatt hours.
Now $2.25 buys 75 ptc. more electricity than it did ten years ago.

UP, UP, UP goes the cost of practically everything you buy,b ut the cost of ELECTRIC SERVICE continues DOWN, DOWN, DOWN

Truly—Electricity Is Today's Greatest Bargain

IT DOES MORE AND COSTS LESS
THAN ANYTHING ELSE YOU BUY

wo Seven Eagle Teams Place Men On Honor List

EMME AND GOODELL BASKETEERS HONORED IN STATE SELECTION

o Leading Seven Eagles Teams Again Draw State Wide Attention

n the poll conducted by the Io- Daily Press Association, of ich the Mason City Globe-Gaz- is a member, the best basket l players from all over Iowa re named, and the results print- the Globe-Gazette and other Io- dailies last Friday.

A first all-state team was named, owed by the second and third ms and the over-flow of players cted were grouped in an hon- ble mention list. Klemme and odell were the only teams in ncock County this year to have s on the honorable mention list.

orgenson of Klemme and Boller Goodell were listed as forwards; nis of Goodell and Schuldt of mme as guards; and Kaduce of mme and Dawson of Goodell centers on the honorable men- roll.

The first team contained the nes of Mathews, Budolfson, O'- nor, Hunt, Beisser, Close, Per- and Bonwell as all-staters. The nd team chosen: Creno, Fjell- n, Siegel, Flemming, Green, hn, Barger and Alderson. The d team selection being Mile- , Langstaff, Arns, Irvine, Shel- Harris, Bone and Fletcher

The Iowa Daily Press selection y far the "most representative" in Iowa and is chosen by a y of 1,000." Every nook and ner of he state is carefully gone r to find the outstanding play- and is not just the opinion of man, as are some of the polls ducted.

CULTY LOSES TO INTERCLASS CHAMPS

The "three old men" of the high ol faculty aided by the print- devil and one member each from the high school basket- squad, almost made good on r challenge to the champion ior class basketball team Mon- when they pushed them hard ing the entire time of their fea- game, only to lose by a score 4 to 33

The juniors allowed the faculty use of Ted Kaduce the first and Ruben Grosshuesch the half, but even that much ng blood in the lineup could quite overcome the handicap old age The juniors playing r second game of the day were ng to the last Schuldt's uncan- eye for he basket spelled de- for the teachers. He was dan- ous from any angle or distance made over half of his team's nts.

The game was close and hard- ght throughout. There was nev- more than three or four points erence in the score, and for the t part, it see-sawed back and h on a one-point margin.

Perhaps next fall if the class of 3 successfully defends its tilte the class tournament, the peda- s will oil up their creaking ts once more and battle for re- ge.

dge Club Met At Home Of Mrs. Jorgenson

Mrs. R. A. Jorgenson was host- to the U Delt Em bridge club Thursday afternoon. High and ond high scores were won by s. F J Arnold and Mrs. George whorn; low and second low by s. Jacobs and Mrs. Raney and vel prize by Mrs. Wilson. Mrs. ry Galbreth was a guest. nch was served.

JUNIORS WIN INTERCLASS BASKET BALL TOURNEY

Sophomores Are Runners Up

The junior class won undisputed right to the interclass championship Monday by turning back the sophomores 26 to 15 in the final game of the spring class tournament. The juniors also won the fall tournament, so they have a clear title for the year.

In the first game of the tournament played last week, the juniors staged an astounding last half rally to tie the rival seniors in the final minutes of play, ad then went on to beat them in the overtime period by a score of 31 to 25 Jorgenson and Trampel were high point men for the winners Kaduce led the senior attack.

The other first round game between the sophomores and freshman was a walkaway for the bigger and more experienced sophomore team. The first year men put up a game battle but could not cope with the sharp-shooting sophs. The final score was 44 to 5. Grosshuesch was high point man of the game with 17 points. Gibbs was second with seven Grange led the freshman scoring.

In the final game Monday afternoon, the sophomores battled the champions on even terms for almost three quarters but weakened in the final period to lose by a margin of 11 points. The juniors had Grosshuesch bottled up in this game, but Paul and Kluckhohn slipped in enough shots to keep their team in the running most of the time Jorgenson and Schuldt got four field goals apiece to lead the junior attack.

FREE THROW CONTEST HELD AT SCHOOL

In a free throw contest held at the school last Thursday, Raymond Jorgenson and Ruth Blickenderfer were declared winners in the boys' and girls' divisions respectively Eleven boys and five girls survivied the qualifyng round and entered the final round where they shot ten throws to decide the championship.

In the boys' dvision, Ruben Grosshuesch started by caging 3 out of 10. Then Raymond Keeper and Eugene Kluckhohn got 5 and 6 respectively to make the competition a little harder Jorgenson was next up, and he decided the championship then and there by dropping in ten straight. He went on to run his string to twelve just to ward off any possible competition. Kluckhohn's score of six was good for second place, and Keeper clinched third place by winning a play-off with Lester Neuberger, who also got five in the first round.

Marion Waterman was the first of the girls to make half of her shots, and her score of five won second place for her. Ruth Blickenderfer came up next and dropin six to win the title. Gladys Griffen was third with a score of four.

KLEMME FARMER SOLD TEAM OF HORSES FOR $700 CASH MONEY

Who says there is no market for horses? Last week Hugh Hummel sold a fine team of sorrel mares for $700 cash money

Donald Alexander, of Owatona, Minn, came along, looked at Hugh's fine horses, asked how much? Hugh though he would place the figure high enough as he was not anxious to sell the team Hugh said "Seven hundred dollars cash." "Sold," says Mr. Alexander and that was that.

But Hugh had an exceptionally fine team. Well matched sorrel mares with white manes and tails, weight 3800 pounds and as pretty a team as anyone could want to see.

SCHAPER FUNERAL WAS HELD ON TUESDAY

CHARLES CITY—Funeral services for William Schaper, 72, were held Tuesday afternoon in the Hauser funeral home with the Rev. W. F Belling officiating and burial was in the Riverside cemetery Mr. Schaper died Sunday in the hospital at Osage after an illness of 14 days caused by a stroke of apolexy He is survived by two children, Mrs Gladys Guilfoyle, Chicago, and Walter C. Schaper, Atlanta, Georgia, both of whom were with him when he died. He has two sisters, Mrs Rose Tanner, of Klemme, and Mrs Edith Nuckollis. Pasadena, Cal. Mrs. Schaper died four years ago

Mr Schaper had been a resident of this city for 26 years.

SCHOOL NEWS

Grades 7 and 8

Ellen Kilgore, Marjorie Lemke and Shirley Johnson have been absent from school this week. Several were absent on Wenesday because of the weather

We are planning to have a Monopoly party next week. Duane Trees and Billy Zabilka were chosen to serve on the entertainment committee. Keith Stille, Melvin Coobs, Lorraine Buntenbach, and Jacqueline Kudje were chosen to serve on the food committee.

The eighth grade has been very busy contributing material for our newspaper which will be issued next week.

Grades 5 and 6

Many were absent from our room on Wednesday because of the stormy weather.

LaVonne Larsen and girl friend visited our room on Tuesday afternoon We always enjoy having visitors.

Thursday afternoon in drawing class we made original Easter pictures. Then we had chocolate bunnies as treats. This was our Easter party.

Grades 3 and 4

We entertained Miss Hanson's room at an Easter party in our room Thursday After the party the "Easter Rabbit" brought us a chocolate Easter treat. It was Harlan's birthday, too He brought treats for the room

We are reading the "Japanese Twins" by Perkins as part of the study of Japan

The fourth graders made original Holland booklets this week

We are beginning a unit on safety in our health classes. We are making a "play highway" to show the proper place of people when walking on highways

Edward Barz brought pictures of Easter Rabbits to school. We wrote poems about the pictures in language class. On Tuesday we invited Miss Hanson's room, Mr Elstad and Mr. Galbreth to hear our poems. Our toy orchestra played the "Shoemaker's Dance" for them, also.

Grades 1 and 2

The second graders have decided to build a Toy Shop in a corner of our room. Committees were appointed to work on the various parts of the shop.

Rose Schaefer was absent on Wednesday and Thursday.

We made Easter Posters on Tuesday.

Willis Anderson had a birthday party on Tuesday.

The first graders are reading a new book.

Are Visiting In The East

Mr and Mrs. Leonard Lau and baby son left Tuesday evening by rail for New York City Enroute east they will make stops at Chicago, Washington D. C. and other cities to visit with friends. In New York City. they will visit with Mrs. Lau's parents, Mr. and Mrs. Koblenz and other relatives. Mr Lau expects to remain in the east until about the middle of April, but Mrs. Lau and baby son will remain in New York for a few weeks longer.

$85 AN ACRE PAID FOR FARM AT EAGLE GROVE

EAGLE GROVE — The John Roinson farm of 123 acres, east of Greenwood park, has been purchased by Henry Maland of Jewell, for a consideration of $85 an acre, a total of $10,455. This property was sold during the big land boom, 20 years ago, for $437 an acre, but finally reverted back to the Robinson estate. The sale as above, was made with the approval of the court.

SUPER-HIGHWAY TO GO BY KLEMME

Designation of a north-south U. S super-highway from Port Arthur, Texas, to Port Arthur, Canada, which would pass near Klemme Iowa, and the aproximate geographical center of the nation has been requested of congress by the Texas Highway Eight Association, representing cities on the route in this state.

The proposed route, through Texas, Oklahoma, Arkansas, Kansas, Missouri, Iowa and Minnesota, would have one terminal in the southeast corner of Texas, at the site of the greatest concentraion of oil storage and refining in the world, and also some of the nation's best harbors.

It would traverse the East Texas timber belt and oil fields, Western Arkansas' mining area, and the agricultural, livestock and fruit section of the mid-western states Connecting with such cities as Kansas City, Des Moines and Minneapolis-St Paul, the proposed highway would be the shortest route across the nation through some of its most thickly populated sections and most productive agricultural and mineral areas.

The proposal calls for ultimate creation of a four-lane highway with one terminal on the Great Lakes and the other on the Gulf of Mexico. The magnitude of the project would be in keeping with the economic development of the area to be traversed proponents point out.

Roof Fire Extinguished

GARNER—The roof of the house on the Roy Quintus farm just south of Garner, caught fire near the chimney Friday afternoon. Quick work of the Garner fire department in extinguishing the blaze saved the home from great damage. This was the eighth time the fire department has been called in and out of town since the first of the year.

Daughter Is Born

GOODELL — Mrs. Ray Harrelson of Ames came to care for Mrs. Ralph Stoksbary and new daughter, who has been named Eva Marie. This is the Stokesbary's fourth child.

OLD BANK BUILDING MAKES GOOD PLACE FOR POST OFFICE

Post Master John Day has about as nice a post office as any place in north Iowa. The equipment, which was moved into the old State Bank Building following the fire, has now been permanently installed.

A part of the old bank room equipment has been remodeled and the boxes installed. The arrangement is both convenient and well arranged for looks.

Auxiliary Will Meet

The Legion Auxiliary will meet on Thursday evening, April 8th, at the home of Mrs. W F Pavey.

METHODIST CHOIR MAY PRESENT EASTER CANTATA AT LATER DATE

Poor Condition Of Roads Made Crowd Small At Concert

The Easter Cantata presented by the choir at the Methodist Church Sunday evening was perhaps the outstanding musical entertainment that the choir has ever presented.

Because of the poor condition of the roads the crowd was rather small and the Cantata may be presented at a later date when the roads are good.

The various choir, group and solo numbers were well presented under the direction of Mrs. Zabilka. Mrs. Matt Smith played the piano accompaniment for all the numbers.

HANSON WILL MANAGE KANAWHA EXPERIMENTS

KANAWHA—Mr. and Mrs. Everett Hanson have moved into the apartment joining the office of Dr. L. W Eller. Mr. Hanson has just returned from a three months' course of agricultural work at the Iowa State college at Ames and will manage the Northern Iowa experimental station at Kanawha under the direction of Dr. C. S. Reddy of Ames.

SCHOOL PLAY WILL BE GIVEN AGAIN, SATURDAY, APRIL 3

"Here Comes Charlie," a three act comedy will be presented at the community hall at Goodell on Saturday evening, April 3rd On account of bad weather and roads the play will be repeated on Saturday night. The play is given under the direction of Miss Evelyn Lenz, teacher in Twin Lake District No. 6.

JIM REED PURCHASED GARAGE BUSINESS AT GOODELL

Jim Reed, who has worked as mechanic at the Klemme Auto Co for the past couple of years, has purchased the garage business at Goodell of Henry Wagge

The Reed family expect to remain in Klemme, we understand, for several weeks, or until school lets out for the summer vacation.

Mr. Reed is an experienced mechanic and should make a success of the business at Goodell.

Bobby Reed Had Birthday Party Saturday

Bobby, son of Mr and Mrs. Jim Reed, celebrated his eleventh birthday Saturday by having a party to which he invited eleven of his friends as guests. Mrs. Reed had prepared a nice lunch which was enjoyed following an afternoon in play and games.

Hereafter Policeman Reynolds Ferguson of St. Louis will be inclined to let any man and wife on his beat do their fighting in peace. He entered a house to quell a family disturbance recently, appearing just as the wife threw an alarm clock at her husband The husband ducked and the cop took it on the chin. The couple went to jail, the policeman to a hospital.

PAUL GRANGE WILL BE KLEMME'S NEW MAYOR

Lloyd Lau Is Only New Member On Council For Next Two Years

On the surface Monday's election seemed a rather quiet affair and no one seemed very excited about it, but when the polls closed a few over two hundred had cast their vote, which is the largest number that have voted on a town election.

Grange Is Mayor

Paul Grange was elected mayor by a large majority vote over W. C. Keraus Grange polled 128 votes and Keraus 69.

There will be but one change on the council as the result of Monday's election. Lloyd Lau will be the new member to replace G. A. Goll who was not a candidate.

John Etchen lead the field in the council race receiving 137 votes; Wm. Kirkwood was next with 132, C. A. Larsen 119, Lloyd Lau 111, Julius Priebe 110. The vote on the balance of he council was as follows: Herman Paul 94, Jorgenson 91, Heyman 84 and Wellemeyer 75.

Assessors Put On Race

The race for town assessor was close with Henry Suckow nosing out H. J. Stille by ten votes. Suckow polled 103 votes and Stille 93.

C. G. Waterman, who was unopposed for the office of town treasurer received 145 votes.

Card Of Thanks

I wish to thank all of those who voted for me at Monday's election. I will endeavor to give you the best of service as Town Assessor.
Henry Suckow

MONUCE, SCHOOL HEAD AT GARNER, SIGNS UP FOR JEFFERSON POST

GARNER—Supt. J. R. Mounce, in the Garner high school for 11 years and elected to the position again, has signed a contract with the school board at Jefferson in Greene county. Mr. Mounce has held the position at Garner for the longest period in the history of the local schools. A. E. Rankin, now of Hampton, was here nine years.

Mr. Mounce, a native of Keosauqua, came here in 1926 from Donnellson where he was superintendent of the schools for seven years. He is a member of the American Legion and now holds the highest office in the Masonic lodge and has taken an active part in Garner's civic enterprises.

Mrs. Mounce was last year worthy matron of the Eastern Star lodge and holds offices in several club organizations. With their three sons, Hollis, 14, Keith, 12, and Kenneth, 8, they plan to leave for their new home in Jefferson in June.

CHRISTIE-WALDIE

GOODELL — Verner Christie, son of Mrs Archie Christie, and Doris Waldie, daughter of Mr. and Mrs A J Waldie of Dickey, N. Dak., were married March 18 in the M. E. parsonage at Dickey by the Rev. B. Frisbee. They were attended by his cousin, Miss Matilda Cuypers, and her brother, Irwin Waldie, both of Dickey They have returned to Goodell and will be at home on the bridegroom's farm north of town.

Kanawha Bans Fireworks

KANAWHA—The town of Kanawha is in accord with the state legislature. The council passed an ordinance prohibiting the sale and use of fireworks within the city limits. The American Legion Auxiliary met with the council, requesting the passing of the ordinance.

Peasant Trend in Children's Clothes

By CHERIE NICHOLAS

BE AS colorful as you will in fitting out the little folks in new spring togs for fashions both adult and juvenile have gone madly, wildly, gaily peasant this season. Vivid colors, quaint and naive silhouettes, amusing details, wealth of embroidery done in bright yarns or metal thread, applique of wee posies cut out of gay felt after the manner of Tyrolean and Dalmatian costumes—what more could designers ask in way of inspiration in creating clothes to fit into the scheme of childhood's realm!

It lends to the glamor and romance of this all-pervading peasant influence in costume design for little folks that many of the fashions are authentically reproduced in current style collections. The specialty shops and children's sections in the larger stores are in many instances showing actual reproductions of the picturesque dresses and boleros and gay little hats and caps as worn by the peasant folk of the Tyrol and in Dalmatia. Even when not a faithful copy there is almost sure to be a touch of embroidery or a bright little feather or novel painted buttons or some one accent or another that bespeaks peasant origin.

You can see by the attractive fashions pictured that the younger generation is looking its cunningest in its new peasant-inspired clothes. The enthusiasm of a vast audience knew no bounds when the little folks who modelled these winsome outfits came shyly, prettily, smilingly down the runway at one of the series of breakfast style clinics held recently in the spacious Merchandise Mart in Chicago, that huge structure which is so alive with throngs of merchants, manufacturers, designers, buyers and sight-seeing out-of-town guests the very air vibrates with activity.

No end of applause greeted the child who wore a colorful Dalmatian costume featuring a gaily embroidered hat-and-bolero ensemble—see it shown to the right in our illustration. The dress is of natural colored linen, the bolero in bright blue enlivened with typical Dalmatian embroidery.

Under her Tyrolean coat the older little girl centered in the group wears a typical Tyrolean skirt with embroidered shoulder-strap top together with a sweater in green. Her Scotch cap of blue straw with a green feather complements her princess-cut coat held over her arm. Princess coat plus peasant dress thus do both princess and peasant influences reflect in current vogue. The sweater worn guimpe fashion, is ever so Tyrolean with its touches of bright embroidery at the neckline. This is a fashion of utmost practicality.

The tot with her beloved bunny in arms wears a peasant-type dress of Venetian wine dimity. It is fashioned to create the impression of two pieces. The full skirt suggests the much-talked-of dirndl dress which is being so widely exploited in connection with Austrian peasant fashions. Of course, to catch the true Tyrolean spirit there must be hand-embroidery on the waist which there is together with wee pearl buttons that adorn the front of the dress.

Your young daughter and son may not be twins but if they are to be correctly dressed moderns this spring they'll be costumed alike in gay peasant fashion. Note the youngster sketched below who has gone as authentically Tyrolean as a native in his gaily embroidered suspender suit. Every little girl's wardrobe is supposed to include a sweater. This season sweaters (see the outline sketch) are made irresistibly attractive with colorful yarn-embroidered little flowers.

BROWN AND BEIGE

By CHERIE NICHOLAS

Choose beige for your spring costume, for beige is a fashion-first color on the new season's program. Here is an ultra smart ensemble. This suit is fashioned of lightweight cloth in the new beige for which everybody is calling just now. To give it a high-style accent this young woman chooses to contrast her beige costume with brown tortoise shell catalin jewelry. As our Parisian sisters who are past masters in dress have long pointed out the detail is the real secret in achieving style prestige.

TWO TONES OF ONE COLOR IS LATEST

By CHERIE NICHOLAS

Fashion's latest move is to use two tones of one color for the costume ensemble. Per example a navy blue cloth three-piece has the skirt and cape of the navy with a lighter blue for the blouse and the cape lining. In the same manner light gray is worked with dark, brown or perhaps rust with beige, dubonnet with a related pink and sonon.

The light-top dress which is such a general favorite is often designed this season with a skirt of the dark color, the top bodice developing in a lighter tone of the same color.

Then again the scheme is carried through with the suit, say in brown smartened with lighter brown or beige accessories, or in navy with light blue scarf, gloves and perhaps a chiffon scarf veil in the lighter blue on the hat for the scarf hat is very smart style for spring.

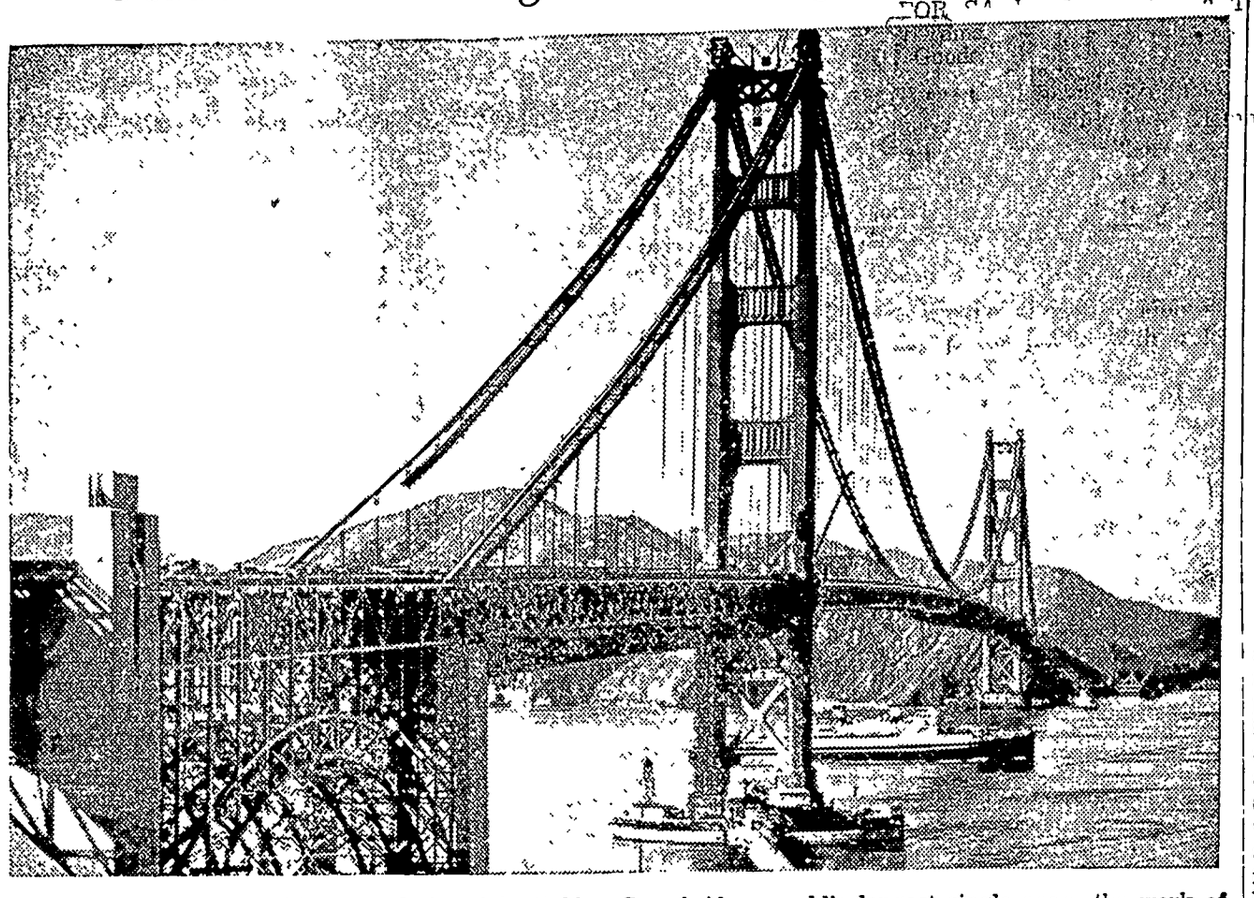
Wear Flowers

A flower corsage or boutonniere is almost inevitable this spring with your dress or suit. Smart vogue calls for large flowers to correspond with the huge florals in printed fabrics.

Sports Jewelry

Light, natural colored wood, inset with narrow strips of catalin in four different bright colors provides a really smart accessory for strictly sports clothes.

Golden Gate Bridge Is Nearing Completion



Heralding the approaching completion of the Golden Gate bridge, world's longest single span, the work of stripping away the catwalk construction on the west cable was undertaken. This photograph, taken from the San Francisco side, shows a portion of the catwalk that had already been removed.

Wife Joins Search for Paul Redfern in South America

Mrs. Gertrude Redfern, of Pittsburgh, Pa., wife of Paul Redfern, long-lost aviator, who will accompany an expedition leaving New

York for South America, to attempt to solve the mystery of her husband's disappearance. Redfern disappeared on August 25, 1927, on an attempted non-stop flight from Brunswick, Ga., to Rio De Janeiro.

Return of the Touring Roosevelts

Col. and Mrs. Theodore Roosevelt shown as they arrived in New York recently aboard the S. S. Washington, after an extensive European tour, which included visits to important capitals on the continent.

Five Generations of Family Meet

Five generations of one family gathered in Chicago when this picture was taken. Left to right are shown Mrs. Lillian Lapp, thirty-seven, grandmother; Mrs. Elmer Wendt, seventeen, the mother; Great-great-grandfather Samuel Field, eighty, holding baby Elizabeth Ann Wendt, five months old; and John Bagley, sixty-two, great grandfather. Baby Elizabeth was christened on the day this unusual picture was made.

INTERNATIONAL BANKER

Sir Otto Niemeyer, a director of the Bank of England, whom the board of directors of the Bank for International Settlements elected to fill for three years the new post of chairman of the board that it is creating.

Society Belles "Sweep" the Polo Matches

View during a recent "gymkana" at Pinehurst, N. C., for society folks. The women are shown sweeping very cleanly to put the men at a loss. Phyllis Stevenson, of Glen Cove, L. I., is shown on the ball.

Kitten Twins Pose For Your Pleasure

Pattern 5766

The Kitten Twins, as much alike as peas in a pod, pose obligingly for your needle. Embroider this plump, cuddlesome pair and you'll have the gayest wall panel ever—a panel that will be a delight in any room! Just single and outline stitch, in silk, cotton or angora wool and it's ready to be lined and hung! In pattern 5766 you will find a transfer pattern of a wall hanging 14½ by 18 inches; a color chart; material requirements; illustrations of all stitches used; directions for finishing wall hanging.

To obtain this pattern send 15 cents in stamps or coins (coins preferred) to The Sewing Circle Household Arts Dept., 259 W. Fourteenth St., New York, N. Y.

Write plainly your name, address and pattern number.

Short-Lived Governments

France has had 100 governments—premiers and their cabinets—or an average of one every eight months since becoming a republic for the third time in 1871. Not one has served a full term of four years because each has been forced to resign the first time that one of its bills was voted down by the National Assembly, an act which is indicative of a lack of confidence in the cabinet. —Collier's Weekly.

YOUNG WOMANHOOD

Mrs. Frank Mather of 201 No. Bluff St., Beatrice, Nebr., said: "Sometime ago I was in a weakened condition. I had to force myself to eat, had lost weight and felt very tired and wornout. Headache associated with feminine pains was another complaint. I took Dr Pierce's Favorite Prescription as a tonic and I relished my meals, gained weight and strength and was relieved of the headaches due to functional disturbances." Buy now at drug store.

NO MORE TELL TALE WRINKLES

New Cream Smooths Skin. Use Magnesia to Bring Back Youthful Complexion—Look Years Younger.

Don't let wrinkles rob your face of youth. Men admire, women envy a fresh young complexion. Denton's Facial Magnesia gives it back to you. Its magnesia base smooths tired skin, clears the pores, revives skin texture.

Watch the years wipe away

With the Denton Magic Mirror you can actually see the day by day improvement in your complexion. You can see big, ugly pores grow smaller, become unnoticeable; the skin turns smooth and firm; wrinkles gradually go away. It is not long before your face looks and feels years younger.

SAVE MONEY WITH THIS REMARKABLE OFFER

Here's your chance to try out Denton's on the most liberal offer we have ever made. We will send you a full 12 oz. bottle of Denton's Facial Magnesia (retail price $1), *plus* a regular size box of famous Milnesia Wafers (known throughout the country as the *original* Milk of Magnesia tablets), *plus* the Denton Magic Mirror (shows you what your skin specialist sees)... all for only $1! Don't miss cashing in on this extraordinary offer. Good for a few weeks only. Write today.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington.—Developments that have taken place and are taking place in the fight precipitated by President Roosevelt's plan to reform the Supreme court of the United States show some phases not hitherto evident in political fights. One of these, I believe, portends important changes in the political alignment in this country. I have reported to you in these columns many times evidences of a growing trend toward a new political alignment and I can say now that nothing which has taken place since Mr. Roosevelt took his New Deal into the White House has given such impetus to this coming realignment as his proposal that congress pass a law giving him authority to name six more justices for the highest court.

Sees New Alignment

The information coming into Washington these days shows very plainly that the Roosevelt court packing proposal is calling forth opposition from both of the major political parties. In other words, the opposition to the President's move is probably nonpartisan to a greater extent than any issue before the American people in the last 50 years It will be remembered that the late President Wilson's proposal that the United States enter the League of Nations falls within that period of time and while there was both Democratic and Republican opposition to Mr. Wilson's program, it can not be said to have extended among the rank and file of the Democratic party, then in power, to the extent that Mr. Roosevelt's court packing project has permeated the lists of Democratic voters.

I have endeavored to gain the views of many individuals respecting the prospects of a new political alignment but few of the men whose judgment is best politically are willing to make a guess. A considerable number of them say frankly that they are unable to guess. On the other hand, however, there was general agreement that Mr. Roosevelt, by suddenly tossing his court program into the lap of congress, has given momentum to a movement that for some months appears to have been simply marking time.

There are certain facts on this phase of the court battle that appear obvious. They are influential and important as well.

Take for example the fact that Mr Roosevelt does not have the backing of the so-called solid South for his proposition. Now, the Democratic party for three-quarters of a century has maintained the South as a stronghold of its party. Indeed, in every presidential and congressional election, Republican politicians began calculating what the Democratic strength could be at the maximum by conceding 13 states to the Democrats. How different is the situation, now.

* * *

One can go through the lists of representatives in congress from the South and find them rather evenly divided. One will find among Mr. Roosevelt's opponents in this battle numerous senators and representatives who have supported him on every other item of legislation that he has recommended to congress. Now, however, the story is different.

Different Story

Another interesting phase of the legislative situation is that the bulk of the true and constant liberals in the senate and the house have taken a stand against the proposition of increasing the Supreme court from nine to fifteen members.

These two points do not represent all of the factors opposing the President's plan by any means, but I think it can be definitely said that if Mr. Roosevelt is defeated in his demand at this time, the two factors that I have named will have been the deciding influences.

Having influences like those just mentioned expanding in their scope, portends, as I suggested above, a considerable shake-up in party affiliation of a lasting kind. I do not mean to say that all of the liberals who are opposing the plan and all of the Democrats who are opposing the court-packing will refrain from supporting Mr. Roosevelt on other issues in the future. I do mean to emphasize, however, that some of them will not return to the ranks of Roosevelt stalwarts.

Thus it becomes rather obvious, I think, that the conservative ranks in congress will be inoreased to the extent that some of the defections, caused by Mr. Roosevelt's court proposal, result in permanent adherence to other philosophies.

So it seems to me that the future holds the probability of a sharp line of demarcation between radicals and conservatives. How they will be identified and what labels they may wear is immaterial. We are due to have a conservative party and a radical party in this country and its shape and character is being molded under the driving fire of the controversy precipitated by Mr. Roosevelt's demands for six more Supreme court justices.

* * *

In a previous article I discussed the bitterness that has permeated the Supreme court controversy. This bitterness is growing and no one can tell how terrific it is going to be. Yet, while the political leaders make charges and countercharges, it seems to me to be almost pathetic that the nine judges of the Supreme court must sit quietly by and say nothing. They can not defend themselves against the criticisms leveled at them by President Roosevelt and his associates.

Growing Bitterness

I have searched the records as far as I have been able and I have yet to find where any justice of the Supreme court of the United States ever has expressed himself publicly on any occasion when the court was assailed. It is a rule that is strictly adhered to by the nine justices whom Mr. Roosevelt has described as "the nine old men." Therefore, we see them as the center of one of the greatest political battles in history, wholly unwilling to besmirch their dignity or their records by answering back.

The recent "fireside chat" by Mr. Roosevelt was replete with innuendoes and inferences that the members of the court are quite incapable of doing their job; that they are living in an age that is dead and, consequently, unable to see things as the rest of the country sees them today. Mr. Roosevelt's speech at the victory dinner of the Democrats was purely politics and his fireside chat in explanation of his court program was 90 per cent politics. But the Supreme court is not in politics. It strikes me as being almost a tragedy that these "nine old men" can not defend their honor and their record after a lifetime of service to the American people.

I do not take much stock in the many tirades that have filled the air and columns upon columns of newspaper space that the present justices are incapable of doing their job. There is so much untruth, so many unwarranted conclusions in those tirades that it amounts to a gigantic campaign that will mislead the people of the nation. Assuming that some of the justices are too old to do their job and assuming further that some of them may be too conservative to deal with present day problems, it yet seems to me to be an indisputable fact that there is nothing in life that can take the place of experience and the lessons thus learned.

* * *

While Mr. Roosevelt was taking a vacation in the warm sunshine of Georgia, the case in behalf of the court packing proposition was ably presented to the senate committee on the judiciary. His spokesmen were Attorney General Cummings and Assistant Attorney General Robert Jackson. They did their job well. They met some of the most vicious questions from committee members that I have ever heard and they met them with a smile. True, opponents of the program among those senators were not satisfied at all with the explanations advanced by the President's spokesmen. That fact, however, does not take away from the two witnesses the credit that is due them.

Able Spokesmen

And thus for the first time we have what must be regarded as official arguments. I mean these arguments are to be distinguished from fireside chats and political speeches concerning the merits of the President's plan. Likewise, for the first time we have a frank admission that Mr. Roosevelt's purpose in asking congress to give him authority for appointing six additional judges is to give him men on that court who will see present day problems as the President sees them.

In view of Mr. Jackson's statements to the committee, we can look back upon some of the speeches made by New Deal spokesmen some months ago and can realize from them and present developments that Mr. Roosevelt had the general purpose of packing the court in mind for some months. This circumstance seems to explain also why the President and his advisors refused to accept the recommendation of Prof. Raymond Moley in 1934. At that time, Professor Moley, a member, if not the number one man, of the Brain Trust, urgently pressed for the New Dealers to go to the country with two constitutional amendments. He wanted the people of the country to understand that these amendments would permit enactment of certain types of laws. He thought that the congressional elections of 1934 was the time to present the questions to the voters. It must be said that Professor Moley's proposition was one of the fairest and soundest to be made. It is a method prescribed by the Constitution itself.

You Need Not Stop Reading in Order to Rest the Eyes

Good Advice Given by Ophthalmologist

Cambridge, Mass. — Read when, where and how you like, but insist on sufficient illumination, use glasses if glasses are necessary, and have a periodic eye examination every two or three years.

This is the fundamental principle for the care of the eyes, Dr. Theodore L. Terry, instructor in ophthalmology at the Harvard medical school, declared in an address here.

Do not try to save your vision by avoiding reading, sewing or the movies, he advised, because eyes do not wear out. It is disease, he declared, that destroys vision.

To avert disease he advised periodic examinations. Often, he said, diseased conditions can be discovered in such examinations before the patient notices any symptoms. Naturally the eyes are then much more amenable to early treatment than when the maladies progress.

Some Danger Signals.

Aside from these regular examinations, however, Dr. Terry also urged examinations when any blurring of vision, inflammation or pain in the eyes, or headaches related to their use, is noticed Important danger signals, he warned, are rainbow-like halos around artificial lights, and blurred vision early in the morning which clears as the day advances.

Any eye examination, he emphasized, should invariably include a general survey of the eye as a whole because that organ very frequently can be used as a barometer of disease in some other part of the body. At times, he said, evidence of other dangerous diseases have been found in eye examinations, and, again, many are amenable to treatment if discovered early. Included among diseases of this type, he cited, are kidney disorders, tuberculosis, syphilis, various blood diseases, several types of poisons and even brain tumors.

The Eye Grows.

Periodic check-ups, he continued, are also important to meet changing conditions of the eye, for that organ, like the fingernails and the hair, has the ability to grow throughout life. Thus, even adults occasionally need changes of glasses, possibly every two years. If glasses need to be changed every few months, he warned, it may be the beginning of a serious disease, maybe glaucoma, diabetes or cataract.

While improper glasses do not produce permanent damage to the eyes, except in the case of crossed eyes or possibly in nearsightedness, they may be responsible for ocular fatigue, sleepiness and headaches.

Concerning crossing of the eyes, Dr. Terry said that in many instances it can be corrected by glasses if they are used soon after the condition begins, even in children eighteen months of age. An operation corrects the appearance but does not restore normal eye condition. A misalignment in the adult, he said, is usually due to a spasm or paralysis of one or more of the eye-turning muscles and may indicate serious trouble.

Ground Fire Found Bad Medicine for West's White Pine

Washington.—Fire in the forest, which is now actually used in the South as a tool for the control of yellow pine timber growth, is still wholly "bad medicine" so far as western white pine is concerned.

So declares E. F. Rapraeger of the U. S. Forest Service, who has recently completed a study of fire effects in the great historic timberlands of Idaho, which Lewis and Clark saw on their famous exploration trip during the presidency of Thomas Jefferson. Mr. Rapraeger has studied extensive areas of Western white pine in this region, and finds that the effects of even "mild" ground fires are never beneficial.

Bad In Three Ways.

He found that fire damage was discernible in three different ways: through understocking and reduced yields, through decay started in burn - wounds on the trees and through the encouragement of excessive branching which results in rough timber of lowered market value.

Mr. Rapraeger concludes: "Evidently complete protection from fire is essential from infancy to maturity if the aim is to grow Western white pine of high quality."

Hayfever a Product of Civilization, Says a Scientist

Ragweed Flourishes on Newly Denuded Ground

THOSE unfortunate persons who must sneeze and sniffle their way through every summer and fall, unless medical treatment or vacation resorts can give them relief from hayfever, are paying the price of civilization.

This view of a miserable ailment was recently presented by R. P. Wodehouse, scientific director of the Arlington Chemical company, to members of the American Institute of New York city.

An enormous increase in ragweed and certain other hayfever-causing plants is a by-product of our modern civilization which has disturbed the soil and its natural balance of vegetation, Dr. Wodehouse pointed out. Ragweed plants were scarce before civilization came along to plow up large sections of land, dig ditches for sewers, level off stretches for roads and otherwise disturb the vegetation. Other plants cause hayfever, but ragweed causes more than half the cases of this ailment which afflicts three out of every hundred Americans.

Hayfever Is an Allergy.

Hayfever belongs in the group of diseases called allergies. An allergy is an extreme sensitiveness to some particular substance, such as pollen, which is not generally irritating.

The hayfever patient and others who suffer from allergies, however, are not invariably abnormal, Dr. Wodehouse suggested. It is their environment which is abnormal. Dr. Wodehouse said that allergy is seldom evident with respect to those things old in the experience of the human race.

Pine trees, he pointed out, produce far greater quantities of pollen than ragweed plants, but no one seems to get hayfever from pine pollen.

Immune to Pine Pollen.

"The human race," he said, "must certainly have been cradled in an atmosphere of pine pollen and has ever since been subjected to annual exposure to it. We are all immune to pine pollen and to a certain extent to the pollen of most of our deciduous forest trees."

Ragweeds cannot grow in competition with other plants, but when the ground is disturbed for any reason, the ragweed is the first to take possession of the newly denuded ground. Civilization has made a ragweed paradise of this continent, Dr. Wodehouse maintains, and the "end is not yet in sight, for the ragweeds are still on the increase as more and more areas are laid open to them."

Newly Found Matter May Be Remedy for Bleeders' Disease

NEW YORK.—A brown-gray, shapeless mass of solid material obtained from blood by two Harvard university scientists, Drs. Arthur J. Patek, Jr., and F. H. L. Taylor, may hold the key to the solution of the problem of hemophilia. This is the hereditary bleeders' disease which threatens the life of the Count of Covadonga, one-time heir to the throne of war-torn republican Spain.

This brown-gray stuff when suspended in a solution of ordinary salt in a test tube, effectively hastens the clotting time of hemophilic blood, the scientists report to the journal, Science, published here.

The material was obtained from plasma, the fluid part of blood. Both the solid material and plasma from normal blood are effective in hastening clotting of hemophilic blood. They evidently contain some as yet unknown substance which clots blood and which is lacking or ineffective in the blood of hemophilia sufferers.

Efforts to identify this substance are now under way. Apparently, the Harvard scientists point out, it is associated with an already known blood constituent, prothrombin, or is a modification of prothrombin.

Barbecued Camel an Old American Dish

Washington.—Try asking for barbecued camel at a roadside refreshment stand some time, if you want a real, old-fashioned American dish.

You won't get it—"no camels today:" But 10,000 or maybe 20,000 years ago, when the earliest known Americans, called Folsom men, were alive, you could have eaten camel steak with them, broiled over a blazing camp fire.

Paleontologists of the Smithsonian institution have identified as "camel" some of the bones found by a Smithsonian expedition at the only known dwelling site of Folsom man, in northern Colorado. Bison was another meat familiar to these oldest Americans.

POULTRY

SPECIALIST URGES EARLIER HATCHING

Birds Mature Sooner Than Later Variety.

By C. M. Ferguson, Poultry Specialist, Ohio State University.—WNU Service.

Summarization of the records from 29 Ohio poultry farms shows that the 10 having the highest income had early - hatched flocks which averaged 168 eggs per bird while the 10 farms with the lowest income had a flock average of 145 eggs per bird.

The hens with the better production average made most of the gain in the period between October 1 and February 1, and the birds were able to make an early start in laying because they were mature sooner than late-hatched birds. The early start in egg-laying is important not only in total number of eggs but in having the production start when prices for eggs are normally the highest during the year.

Poultrymen who are debating the problem of buying chicks early must consider that a large part of the growth period of the early-hatched chick will take place in months when feed prices will still be high. Some flock owners are considering whether it will be economical to buy sexed chicks to avoid feeding the cockerels.

There are several advantages for early chicks besides the fact that they reach maturity in time to produce fall eggs. Brooder temperatures can be maintained more evenly in cold weather than in warm weather if coal burning brooders are used. Some parasites depend upon flies as intermediate hosts and early chicks escape from infestation. Coccidiosis is less troublesome when the ground is frozen.

Early chicks, brooded indoors, must be protected from overcrowding. The average colony house will hold only 300 chicks safely and this number should not be exceeded even when the chicks are small unless the brooder house has protected sunporches where chicks can run in mild weather.

Tells How to Keep Size in the Laying Strains

Experienced poultrymen generally agree that most heavy laying stocks of fowls tend steadily to degenerate in size. This is not a condition peculiar to production bred fowls. All stocks of animals and birds bred to high performance in any respect, or to rare excellence in appearance, tend to degenerate in the same way, and invariably do so unless breeders take special care to prevent it.

The breeder among my acquaintances, states a poultryman in the Boston Herald, who succeeded best in keeping up the size of a very heavy laying strain told me that he did it by the constant rigid application of this simple rule: Breed males for stock purposes only from the heavy laying females which maintain or increase their weight in their first year's laying, and use only those males which at maturity are of standard weight for their breed.

The effects of this rule do not fully appear for several years after it is adopted. For two years after beginning to employ it the proportion of hens below average weight continues to be considerable. After that it is practicable to discard all hens not of satisfactory size from the breeding pens, and with both sexes of good size the proportion of undersized offspring will be no longer troublesome.

Pullets Should Be Culled

The pullets are laying. They are, therefore, mature. At least most pullets are far enough along that the slow developers can be detected and above all, this year of all others, it is a time for cold-blooded culling. These slow growers will never pay for feed and the poultryman should cast off all sentiment and cull, and cull; cull until only the best remain. But the best should be retained.

Candle Incubator Eggs

All eggs should be candled on the seventh day and the dead germs and infertiles removed. A homemade candler may be made by placing a lamp in a box that has a four inch opening at the top. A one and one-half inch hole should be cut in the side of the box and on a level with the flame. In candling place the large end of the egg in the side opening and remove all those showing clear with the yolk slightly visible.

Rations for Cold Days

On cold days there is no better stimulant to heavy egg production than a warm crumbly mash, moistened with skimmilk. When liquid skimmilk instead of water can be given to laying hens, and ground alfalfa hay is kept before the layers at all times, then corn, wheat and oats will serve to complete the ration, provided cod liver oil is given when the flock is kept indoors, and some form of grit is supplied at all times. —Prairie Farmer.

Household Questions

Cretonne slip covers will retain their color better if washed in bran water.

* * *

Sweet Prunes—A very delicious as well as unusual way of serving prunes for breakfast is to soak them in fruit juices. Whenever a jar of fruit is opened save the juices and put a few prunes in the jar. When they have become swollen they are ready to be eaten.

* * *

Keep the top on the milk bottle so the milk does not absorb ice box or refrigerator odors from other foods.

* * *

To make perfect muffins combine all dry ingredients, then add liquids quickly, stirring but not beating. Do not stir after ingredients are moistened. Fill muffin pans two-thirds full and if mixture looks lumpy it will smooth out during baking.

* * *

Rugs should be turned around every six months. Frequent turning causes them to wear evenly.

* * *

Agateware is easily chipped, so don't scrape out food that becomes stuck in it.

* * *

Home Made Crackers—Sift together one-fourth a teaspoonful of salt and one cup of pastry flour. With a knife or tips of the fingers work to a dough with water, sweet milk, or thin cream (the last is preferable). Knead slightly —just enough to get into shape—then roll into a very thin sheet, stamp out with cutters, or cut into rectangular pieces with a sharp knife, prick with a fork, and bake a delicate brown.

* * *

Clear boiling water will remove tea stains from table linen.

* * *

A little salt added to an egg before beating makes it light and easier to beat.

NATURE RAMBLES
By
Bill Bents

To be in perfect tune with Nature is to love and understand the great out-of-doors at all seasons of the year Each season with its varying heat and cold, its sun and wind, plays some important part in the balance of Nature. The moisture which has found its way into the rocks, when frozen, causes them to fall away and eventually go back to the soils. The fallen parts of plants, in the same way, are quickly decomposed. some tree and fruit seed cannot grow without the help of freezing to break down he moisture-proof covering and allow the outside moisture to enter. And lastly, the freezing destroys the surplus insect larvae which has not found a suitable protection.

The deep snows of winter form a protecting blanket. As this melts away in the early spring we find that vegetation is very much alive and some early flowers may be in bloom.

Even in the deep of winter we can find many signs of life if we go to a atural area where Nature is in balance. An unpastured woods with its undergrowth offers the most. Here is fod and shelter for all forms of wildlife Here may be heard the songs of the cardinal, jay, chickadee and nuthatch, the chatter of sqirrels and hte cry of a hawk or owl Along the spring creeks mamy be found a few summer birds which have found food and shelter and remained in these friendly places.

Along our rivers the scenery may be even more picturesque. With the absence of leaves the interesting rock formations stand out to arrest your attention. The north facing bluffs offer the most beauty at this time of year. Here the deep moss remains a bright lively green The bright scarlet dogwood and green-brier livens up the undergrowth. The white birch in their setting of evergreens offer their defiance to any artist.

Although we think of all trees and shrubs as lifeless at this time of year ,they are very much alive Their roots in moist soil below the frost line are reaching out and storing food and moisture for the early spring growth If we notice leaf buds at this time of year and then again a few months later we find that they have developed considerably during this so-called rest period —Cresco Plain Dealer.

LINCOLN, Nebr. -Gov R. L. Cochran signed the controversial five cents a gallon gasoline tax bill Wednesday

CONSERVATION WEEK

Conservation Week is from April 1st to April 7th and will be observed throughout the Nation.

FEEDING GAME

During the three winter months of December, January and February, the Conservation Officers built and supervised the building of 3,461 feeding stations in 90 counties of the state and have distributed 120,197 pounds of feed for wildlife in 90 counties

Officers estimated that the following number of game birds and animals were fed at the stations 48,280 pheasants, 11,476 quail, 1,563 Hungarian Partridge, 10,097 rabbits and 3,613 squirrels.

Conservation Officers have succeeded in getting County Superintendents of schools interested in sending winter feeding pamphlets to school teachers, asking them to devote a short period each day to the winter feeding of wildlife.

Mr and Mrs Robert Marshall were Friday evening visitors at the Harlow Helps home

Mr and Mrs Dwight Helps and family were entertained to dinner Easter Sunday at the Henry Helps home.

Mrs. Robert Roths and children were Sunday dinner guests at the Fred Bachman home.

Miss Gertie Trampel who is assisting with the work at the D. A. and Herbert Marshall home spent Sunday at home.

PLUM IS BEST STONE FRUIT FOR IOWA, HOLSINGER SAYS

"Varieties of stone fruits such as the plum, cherry, peach and apricot can be grown on almost any farm in southern Iowa," says C. V. Holsinger, extension horticulturist at Iowa State College. "The plum and Cherry do well in northern Iowa. But the best stone fruit of the lot is the plum, whcih is both winter hardy and drouth resistant."

For the greater part of Iowa, Mr Holsinger recommends four Minnesota plums, the Underwood, Monitor, Tonka and Superior. These varieties should be interplanted with a variety like Surprise to assure pollination. Most plums are not self-fertile. Blossoms are fertilized with pollen from other tame varieties or wild plum trees.

Mr Holsinger recommends two "sand cherries," the Sapa and Opata hybrids produced by Prof. N E. Hanson of South Dakota State College Both varieties will bear fruit at two or three years of age, and although the plums are small they grow profusely Waneta a plum also developed in South Dakota, is especially good in areas where better quality ones will not grow.

For southern Iowa, such sweet plums as Green Gage and Lombard can be grown These plums are more or less self-fertile.

KLEMME LOCAL NEWS ITEMS

FOR SALE—Three Bronze Turkey Toms. Herbert Greiman, R. F. D., Goodell, Iowa. 2tp

There must have been thousands of wild ducks flying over Klemme Monday evening. Shortly after dark until a late hour the ducks could be heard as they winged their way northward.

Mrs. Hulda Wiles and Mrs. Eva Sullivan drove to Des Moines Saturday and visited with relatives and friends until Tuesday. Geraldine Smid assisted at the cafe during Mrs. Wiles absence.

Byrnes Missman and Bessie Larson, who are students at Iowa University, came home last week Wednesday to enjoy a few days of spring vacation visiting with home folks.

Rev Wm. Zabilka drove to Des Moines last Thursday morning to see his daughter, Gladys, who was ill. He reported that Gladys was much better and would be well again in a few days.

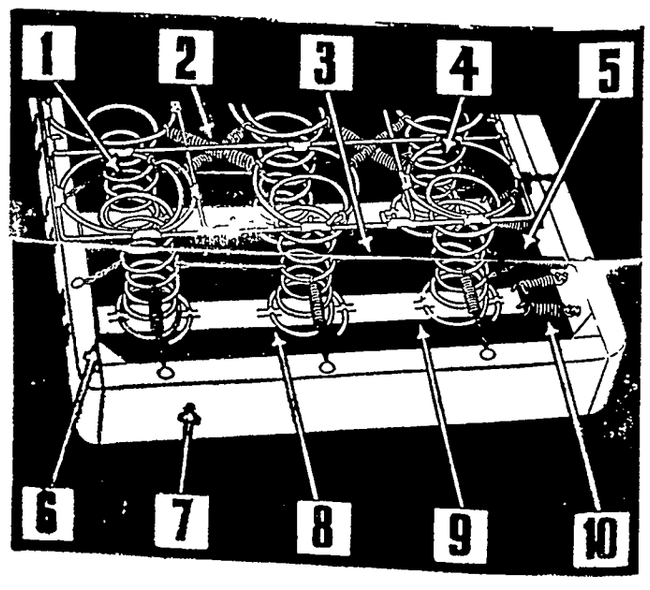
Supremacy... THROUGH SCIENCE



PERMALUX

...THE GREATEST ADVANCE IN FURNITURE CONSTRUCTION IN 50 YEARS

SUPREME . . . each in its field . . . the Diesel-driven streamlined train of today and PERMALUX *All-Steel Spring Construction*... *both* are products of the bold imagination of the scientific mind. This is particularly true in the case of PERMALUX . . . the first great improvement in furniture design in 50 years. PERMALUX suites are softer, more luxurious . . . and longer-lasting than suites made with burlap spring suspension. Every spring is securely anchored in life-time "full floating" steel bands. NO twine or webbing to break loose, causing the seats to sag. The entire spring assembly is open to full view . . . made entirely of silver-white steel. Sanitary. GUARANTEED to outlast the upholstering and the frame.

Drop in TODAY and see our new PERMALUX designs. You'll be delighted with their soft comfort and rich luxury. Terms for every budget.

FEATURES WHICH MAKE PERMALUX THE FINEST VALUE OBTAINABLE

1 Extra deep, full double-cone springs made of the best highly tempered premier wire.
2 Cross helical top formation permits individual spring action.
3 Stabilizer wires prevent springs from buckling.
4 Beautiful silver finish.
5 Chains and helical springs prevent construction side-swaying.
6 Full action hinge at front, linking the steel supporting band flexibly to the frame.
7 Extra heavy frames; ebony finished on the inside . . . and the davenport is further strengthened by curved wooden cross supports. Extra heavy twill top covering used instead of the customary burlap.
8 Coil springs secured crimped into the steel supporting band.
9 Wide, flat steel supporting band . . . which supports all of the weight placed upon the davenport or chair, instead of the usual method of the coil springs supporting the weight.
10 Helicals at end of steel supporting bands assure floating effect.

PERMALUX SEAT SPRING STEEL CONSTRUCTION IS PATENTED

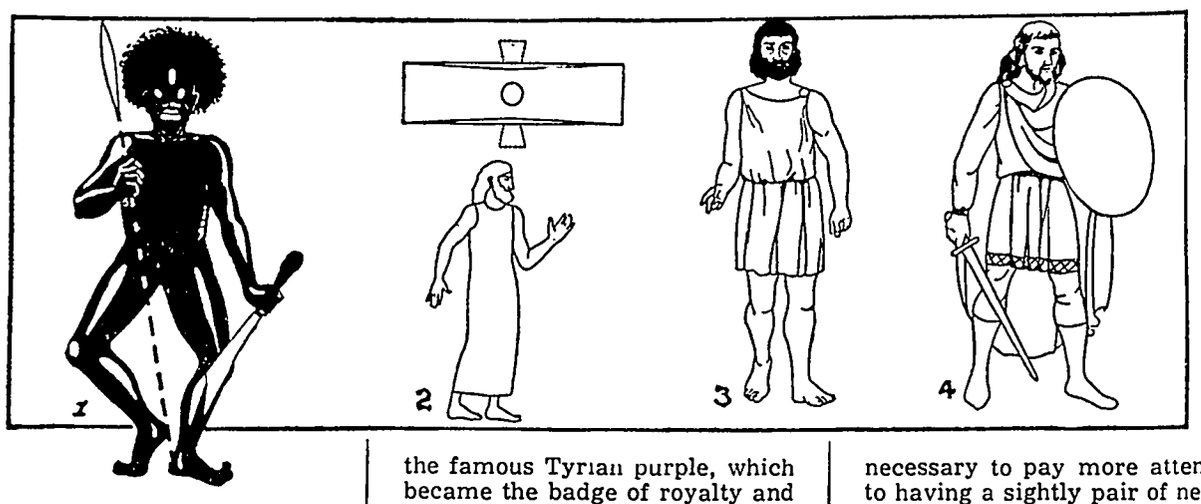
OLDSMOBILE — CHEVROLET

HOMO SAPIENS—Changes in His Costume Through the Centuries . . .

BY ELMO SCOTT WATSON

EASTER is almost here and, of course, there's going to be plenty of talk in the newspapers and elsewhere about the new raiment in which Milady will array herself for the annual Easter morning parade. 'Tis always thus—Easter finery interpreted in terms of its feminine wearers.

So, for a change, why not talk a bit about clothes (always an appropriate subject around Easter time) in terms of their use for masculine



adornment? Of course, it's not such a colorful subject when thus limited. For Mr. Average American, in his "conventional black," or his standardized blue serge, or even in his gray or brown or mixed "business suit," is not a particularly eye-filling spectacle.

True, he sometimes "lets himself go" in the buying of neckties which shout for attention and occasionally in putting on socks with variegated pattern or shirts that are a bit startling, to say the least. But generally he keeps the two latter items fairly well hidden. In fact, about all he expects to be in the Easter parade is a sort of sober background for gorgeous femininity on this day and to enhance her loveliness and brilliance by the contrast between her habiliments and his.

But just to prove that he could make a color splash, too, if he wanted to do so, let's glance back through the centuries to see what the well-dressed man of yesteryears wore. In other words, let's stage an Easter fashion parade, masculine model, and forget for a moment Milady and her finery.

When man first began to justify

his name of Homo Sapiens and walk erect, clothes were about the least of his concern. If he wore them at all, it was for protection from the elements, not for adornment.

So we have as the first "manikin" in our masculine fashion parade the dusky gentleman illustrated in Figure No. 1 above. He lived about 10000 B. C. and his costume was what some unknown poet has described in this jingle:

Both the king and his people
were black as shoes
Because that the climate was
torrid;
And all that they wore was a ring
through the nose,
And a patch of green paint on
the forehead.

However, such items as paint and metal rings, put on to frighten an enemy, to impress a neighbor (for even in those days they tried to "keep up with the Joneses") or to woo a sweetheart, are not properly clothes.

When man began to be a bit modest (or perhaps it was the necessity for warmth which dictated his decision) he began using animal skins thrown across one shoulder and fastened with a thorn under the other arm. Thus he left his fighting arm free to wield his weapon against any foe, man or beast It's quite probable that the favorite skin he wore (not counting his own, of course) was the brilliantly striped tiger pelt or the attractive spotted skin of the leopard leaving Mrs. Homo Sapiens to wear the less conspicuous pelts.

Forerunner of Red Flannels.

Mr. H. Sapiens made his next step forward in the matter of clothing when he discovered that fibers stripped from trees and felted together in some crude way made an adequate substitute for skins, even though it must have been somewhat scratchy. But somewhere back in the dim vistas of time he learned the art of weaving and the sister art of dyeing so that he began to make handsome, durable and fine fabrics from cotton, flax, wool and silk and to color them. The Lydians gave to mankind the famous Tyrian purple, which became the badge of royalty and the ancient Egyptians added their bit to dress decoration.

About 1600 B. C. Mr. Homo began wearing a garment called the kalasiris (No. 2), a long, straight-hanging, rather close-fitting garment, both with and without sleeves, which looked something like the modern kimono. The ancient Greeks improved upon this costume somewhat with their simple tunics (No. 3) fastened at the shoulder and held in at the waist with a girdle. The Romans, however, went in more for the long, loose and flowing robes, and the toga of the high-class Roman was dear to his heart. It was of ample proportions, as much as 18 feet wide and banded with purple to indicate high rank.

Although the Romans despised bifurcated garments (which is a polite way of saying "pants") as being the mark of slaves, Roman soldiers, after the First

century A. D., wore a primitive sort of trousers, which were rather tight and came down only to the calves of the legs. The Roman paenula, worn from the Second to the Fifth centuries, was a cape-like garment, probably a development of the toga, which dropped down over the head and fell in folds in front and behind.

The tunic replaced the toga because it was simpler and allowed greater freedom of movement.

The clothing of men in central and western Europe shows the Roman influence with variations, characteristic of their times and their race. In the costume of the Frankish citizen (No. 4), worn A. D. 400 to 600, may be seen the familiar tunic, but the sleeves are gathered at the wrists, there is an embroidered girdle and embroidery at the bottom of the tunic and short trousers are worn under the stockings. A cloak (No. 5) fastened at the right shoulder with a clasp completes the costume.

From the Eleventh to the Thirteenth century clothing such as shown in No. 6 was worn. The upper garment, a descendant of the tunic now known as the pour-

point, had become so short that finally it was just about long enough to cover the body. The lower garments were tights, made of an elastic material, similar to the modern jersey.

If the costume of the Frenchman of this period is comparatively simple, his German brother (No. 7) more than made up for it with his display Although the coat of this German burgher of the Twelfth century is long, it is divided front and back up the body so as to drape on each side when he was riding With a wealth of handsome materials to choose from, he adorned himself with this costume with its different patterns of goods used on the right and left sides and the ornamented sleeves and cuffs.

The Working Man's Costume.

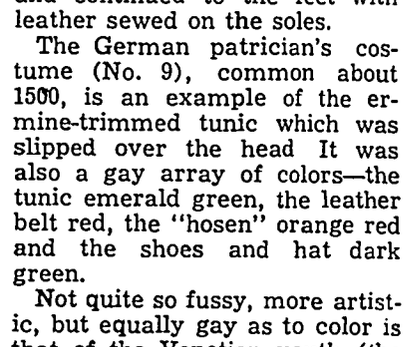
The costume of the French workman of the Fourteenth century (No. 8) shows not only a development of the combination hood and cape which the French called "capuchon" and the German "kapuze," but it also shows the increasing tendency to tightness of the trousers. Heretofore not so much attention was paid to this article of dress, but as the tunic became shorter it was necessary to pay more attention to having a sightly pair of nether garments. (That means "pants," too) The tunic was red, held in by a black steel-trimmed girdle, the hat was black, the capuchon

green and the trousers were gray and continued to the feet with leather sewed on the soles.

The German patrician's costume (No. 9), common about 1500, is an example of the ermine-trimmed tunic which was slipped over the head It was also a gay array of colors—the tunic emerald green, the leather belt red, the "hosen" orange red and the shoes and hat dark green.

Not quite so fussy, more artistic, but equally gay as to color is that of the Venetian youth (the "drugstore cowboy" of his day) with his brick red cap and tights, his gold collar clasp and necklet and his crimson velvet cape lined with blue brocaded velvet as illustrated in No. 10. The young Englishman of the Sixteenth century (No. 11) improved upon this costume with his striped trunks of Spanish style, his long, pointed shoes, his corslet of leather or steel, his scalloped collar, and the jaunty feather in his hat.

Although the English style in trunks appears gay enough, it was mild in comparison to those affected in Spain where the fashion was so extreme that



in order to hold the trunks in shape the young Spanish swells stuffed them with wool or cotton. Sometimes they extended nine inches from the body and were slashed lengthwise from top to bottom, with insertions of contrasting colors in the slashes.

The Swedish gentleman of that period (No. 12) wore a costume in which the clothes designers of his time used a great deal of imagination, as witness the puffy red and white striped sleeves on the yellow surcoat, the red trousers, the white vest and gauntlets and olive sash, a brown hat with a plume and swaggering soft leather boots, and a starched Elizabethan ruffed collar.

Now if you are inclined to laugh at the foregoing costumes, Mr. Homo Sapiens Americanus, take a look at No. 13 and reflect that if your ancestors were members of Capt. John Smith's Virginian colony they would be wearing just such an outfit as that. It consisted of a doublet with long oversleeves hanging from the shoulders, padded breeches fastened with "points" of colored velvet or cloth, collar and cuffs of starched linen, silk stockings fastened with garters tied in a bow, felt hat with embroidered band and plume, low shoes tied with laces and gauntlets of soft leather

Or if you trace your ancestry

from the patroons of New Amsterdam you can see in No. 14 how that ancestor dressed. Shades of the simple three-button sack coat of today!

If you can claim among your ancestors a signer of the Declaration of Independence it is probable that he wore such an outfit as is shown in No. 15, when he stepped forward to sign that immortal document The collarless coat was plain, but the ornamentation was provided by a waistcoat of contrasting color, a white neckcloth with a starched frill tucked into the vest, velvet cuffs on the coat sleeves and shirt sleeves made of soft cambric, having frilled extensions which fell down over the hands

Early American Styles.

Men's clothing in the early days of the Republic was a combination of survivals from the foppishness of colonial times and of the simple more or less standardized suits of today. The costume (No 16) prevalent during the first half of the Nineteenth century is colonial in its knee breeches, stock tie and cocked hat, but the coat is a promise of the type of such future garments that were to be adopted. Over in France at about the time of the French Revolution the type of coat known as the swallow tail or pen point (No. 17) became popular and it was also worn in England and the United States with a few modifications.

The notch in the lapel of this coat marks the origin of the notch in the collar as we know it today and in other respects it

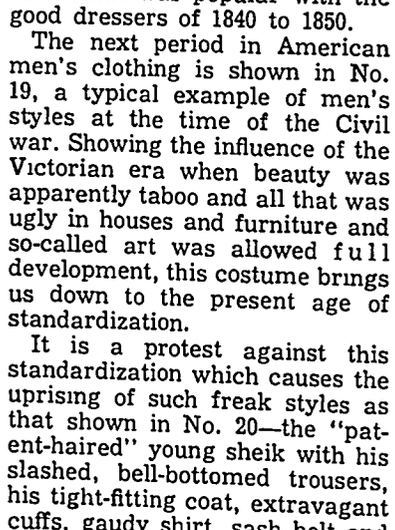
was a logical forebear to the costume shown in No. 18. Here Americans definitely assumed long trousers and this Chesterfield outfit was popular with the good dressers of 1840 to 1850.

The next period in American men's clothing is shown in No. 19, a typical example of men's styles at the time of the Civil war. Showing the influence of the Victorian era when beauty was apparently taboo and all that was ugly in houses and furniture and so-called art was allowed full development, this costume brings us down to the present age of standardization.

It is a protest against this standardization which causes the uprising of such freak styles as that shown in No. 20—the "patent-haired" young sheik with his slashed, bell-bottomed trousers, his tight-fitting coat, extravagant cuffs, gaudy shirt, sash belt and sport shoes, of only a few years ago. Remember him?

There haven't been so many "outbreaks" of this sort in recent years and today correct dress for men changes little from year to year. There may be some significant alterations in cut, fashions in color combinations and styles in accessories, but fundamentally correct dress does not change. On the whole it's pretty drab, when compared to the gayety of women's attire. So they will probably continue to be the center of attraction in the annual Easter parade.

But it has been worthwhile, hasn't it, to demonstrate, as this



article nas tried to do, what men could exhibit in the way of sartorial splendor if they wanted to hark back to the example of their ancestors But suppose they did. Can't you just hear the Little Woman saying sweetly: "All right, dear, just go ahead and make a spectacle of yourself!"—only she wouldn't say "spectacle!"

She Modeled Lincoln

IN THE rotunda of the United States Capitol at Washington stands a statue of Abraham Lincoln. Among all the sculptured likenesses of the Great Emancipator this one is unique. It is the only one which was modeled from life and it is the work of a young girl.

Vinnie Ream was her name and she was born in Wisconsin in 1847. As a girl she amused herself by sketching the Indians whom she saw when her father, a surveyor, took her with him on his trips in the West They were crude sketches but an old Italian who saw them recognized her latent talent and encouraged her.

When she was fourteen her father secured a position for her as a copyist in the post office department at $50 a month. She became acquainted with Clark Mills, the famous sculptor, and while watching him at work, exclaimed, "Oh, I could do that if I had some clay!" Mills told her to help herself and he was delighted with the progress which she made.

Then Vinnie Ream conceived the idea of modeling President Lincoln from life. When this was first suggested to him he refused, but after talking to the girl and becoming impressed with her earnestness, he gave his consent with the understanding that she was to come to the White House every afternoon during his rest period. She was not to talk and he was to sit, walk, or lie down to take a nap, as his mood dictated.

So for five months she spent part of every afternoon in his study. As he lay on the couch she took life masks of his face and hands. As he walked about or sat at his desk, she sketched his figure again and again.

After Lincoln's assassination congress decided to erect a statue in his memory and asked sculptors to submit sketches. Many famous artists responded but the work of this sixteen-year-old girl was the one selected. In 1869 congress advanced her $5,000 and she went abroad to study and complete the statue. After nearly two years of steady work she finished it and it was unveiled in 1871. When the statue was placed in the rotunda of the Capitol an old servant who had lived in the White House exclaimed "the real Lincoln has returned to us."

Vinnie Ream later married Lieut. Richard L. Hoxie but continued her work as a sculptor until her death in 1914. She made many other statues and modeled medallions and busts of many notables, both here and abroad. But she is best remembered as the only sculptor who ever modeled Lincoln from life and the pioneer woman sculptor of America.

Soldier-Painter

IF YOU think of a painter as an impractical idealist, revise that view before applying it to Charles Willson Peale. Born in Maryland in 1741 he was apprenticed to a saddler at the age of thirteen and was such a good workman that he won his freedom by the time he was twenty. Then he went into business for himself and later formed a partnership with a chaisemaker who promptly absconded with all of the firm's money. To get out of debt Peale next tried clock and watch making and set himself up as a silversmith.

Becoming interested in painting, Peale took lessons from a Swedish-American artist and paid for them with a saddle which he had made. Next he spent two years studying under Copley in Boston and then went to England to learn more from the famous Benjamin West. Returning to this country a few years before the Revolution, he began painting portraits of Colonial celebrities, one of which was destined to make him famous. It was the picture of a young colonel in the Virginia militia named George Washington.

At the outbreak of the Revolution Peale, who was an ardent patriot, organized a company of militia and became a captain. For the next three years he mixed painting and soldiering, winning distinction in both. Next he went into politics and in 1779 and 1780 served as a member of the Pennsylvania assembly.

After the war, Peale gathered together all of the portraits of Revolutionary leaders he had painted—including several of Washington—and started a picture gallery in his home, which was so popular that he had to seek larger quarters. In 1802 he opened the famous Peale museum on the second floor of Independence hall. There he exhibited not only his paintings but also a remarkable collection of natural history specimens he had collected.

At the age of eighty-one Peale turned from portraiture to paint religious pictures. When he died in 1827 he left behind him a collection of 269 portraits and historical scenes as a memorial to one of America's greatest painters and also one of her most versatile geniuses.

Dairy Cows' Feed Should Be Ample

Cutting Down Ration Lowers Production of Milk as Well as Profit.

By W. J. Fraser, Professor of Dairy Farming, College of Agriculture, University of Illinois.—WNU Service.

At least three-fourths of the dairy cows in the nation are underfed at some time during the year. This cutting off the top of the ration cuts off the top of the milk which the cow would otherwise produce and in which lies the profit.

For the past two years the average annual production of the 25,000,000 dairy cows in the United States has been only 161 pounds of butterfat a cow. The best one-third of Uncle Sam's immense dairy herd produced an average of 220 pounds of butterfat, the middle third averaged 157 pounds of butterfat a cow and the lowest producing herd, more than 8,000,000 cows, averaged only 106 pounds of fat a year.

Into the board and keep of the poorest two-thirds of this vast herd, or more than 16,000,000 cows, goes the productive power of an area of good land larger than the states of Illinois and Iowa combined, as well as the money and energy of a million farmers and their families.

Reasons given for such low production are that many cows are not capable of making good production even if well fed, a large percentage of the bulls are unable to sire good production and many purebreds are poor producers.

Furthermore there is much detrimental mixing of different breeds in the same herd. Then too, in addition to many heifers being poorly raised, both cows and heifers lack proper care in many instances.

Despite this showing, great progress has been made in the breeding, feeding and care of dairy cattle in the past 30 years. We have learned that we can feed dairy cows well and much more economically on good continuous pasture during the summer and an abundance of good legume hay throughout the winter, if these are raised on good fertile soil and properly harvested and stored.

Horses Should Be Kept in Best of Condition

It is poor economy to bring horses through the winter in a thin condition and then attempt to put them in good flesh by feeding liberally after the working season has begun, says W. H. Peters, chief of the animal husbandry division at University Farm, St. Paul.

Horses should maintain their weight or be in a gaining condition throughout the winter, Peters states, so that they will enter the spring work season in shape to furnish efficient animal power. They may be brought through the winter satisfactorily on low grade roughages, but farmers should watch them carefully to see that they are maintaining their weight. If not, the roughages should be supplemented by 6 to 9 pounds of farm grains daily for each animal. If good roughages are available, the horses will remain in good condition with little or no grain—not over 4 pounds per horse daily.

As soon as the horses are put to work, the grain ration for each animal should be increased to about 1¼ pounds of grain per 100 pounds of live weight. Grains may consist of corn, oats, other farm grains, or a mixture of them. Molasses may be substituted for a portion of the grain, Peters says.

"Run Out" Soils

"Run out" soils, so called, are always low in humus or vegetable matter. In the case of clay this usually results in an increased tendency to get hard or bake. The great probem, therefore, is to get back into the soil as much humus as will overcome this tendency. In clay soils, or in almost any soil, it is almost impossible to have too much humus. The trouble with a run out clay soil is to get something to grow on it that may be turned under and help loosen the soil up as well as add to the humus.

Helps for Farmers

Live stock and poultry need plenty of fresh, clean water.

Spoilage of corn in most cribs occurs directly under the elevator chute where the silks, husks and shelled corn have collected and prevented ventilation and drying.

It's a Party Sure Enough!

AND the girl holding the curtains back, just looking on, might be joining the fun except for her misconception that "party" clothes are hard to sew. She made the neat sweet house model she's wearing with no trouble at all—but—

And Here's the Story.

"Marge, did you really make your pretty dress all yourself? It looks so elaborate; I'd be afraid to cut into chiffon like that for fear I'd ruin it."

"Be yourself, Rose. It doesn't take a bit more skill to make my dress than yours. The pattern explains everything. You can't go wrong. I get a double kick out of making a party frock—I feel important sewing it and elegant wearing it. I couldn't begin to have so many party clothes if I didn't belong to The-Sew-Your-Own!"

Mother Made Daughter's Dress.

"Joanie, dear, aren't you beginning this party business pretty young?"

"No, Auntie Rose, of course not. I've another one just like it that Grandma made for me. It's red and it has blue bands around it. I'm going to wear it to school tomorrow.

"Well, I see where I've got to get some silks and crepe, pluck up my nerve, and have clothes like other people. I wanted to join the Jolly Twelve but I just felt I didn't have anything to wear. Now I've decided to join The Sewing Circle and make a real fashion debut, come Spring!"

The Patterns.

Pattern 1237 is for sizes 34 to 46. Size 36 requires 4⅔ yards of 35 inch material plus five-eighths of a yard contrasting.

Pattern 1241 is cut in sizes 14 to 20 (32 to 44 bust) Size 16 requires 4⅝ yards of 39 inch material and 1½ yards of ribbon for the belt together with 3 yards of machine made trimming.

Pattern 1852 comes in sizes 2 to 8 years. Size 4 requires 2⅛ yards of 35 or 39 inch material. To trim as pictured 6 yards of ribbon are required.

Send for the Barbara Bell Spring and Summer Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned easy-to-make patterns. Interesting and exclusive fashions for little children and the difficult junior age; slenderizing, well-cut patterns for the mature figure; afternoon dresses for the most particular young women and matrons and other patterns for special occasions are all to be found in the Barbara Bell Pattern Book. Send 15 cents (in coins) today for your copy.

Send your order to The Sewing Circle Pattern Dept., Room 1020, 211 W. Wacker Dr., Chicago, Ill. Patterns 15 cents (in coins) each.

Why Laxatives Fail In Stubborn Constipation

Twelve to 24 hours is too long to wait when relief from clogged bowels and constipation is needed, for then enormous quantities of bacteria accumulate, causing GAS, indigestion and many restless, sleepless nights.

If you want REAL, QUICK RELIEF, take a liquid compound such as Adlerika. Adlerika contains SEVEN cathartic and carminative ingredients that act on the stomach and BOTH bowels. Most "overnight" laxatives contain one ingredient that acts on the lower bowel only.

Adlerika's DOUBLE ACTION gives your system a thorough cleansing, bringing out old poisonous waste matter that may have caused GAS pains, sour stomach, headaches and sleepless nights for months.

Adlerika relieves stomach GAS at once and usually removes bowel congestion in less than two hours No waiting for overnight results This famous treatment has been recommended by many doctors and druggists for 35 years Take Adlerika one-half hour before breakfast or one hour before bedtime and in a short while you will feel marvelously refreshed. At all Leading Druggists.

w Did Old Book Find Its Way Here?

LIARY GREIMANN FOUND OLD GERMAN BOOK PRINTED IN 1695

One day last week Hiliary eimann, young farmer living 4 les north of Klemme, found an book in German print while naging around in the library of Peace Reformed Church north Klemme on Highway 69. Mr. eimann found the old book back a corner on a shelf behind other oks. The book is a small pocket e volume entitled "The Confes- ns of an Atheist." It was print- London in 1695 in ancient style rman type which is hard for the dent of today to read. However, v. Huenemann has been able to d the book and Mr. Greimann tes that he has been able to nslate a greater part of it. The ginal manuscript was evidently English origin and was later nslated into the German lan- age.

ALBERT BARZ HONORED BY FAMILY GATHERING ON BIRTHDAY ANNIVERSARY

First Hundred Years The Hardest; Has Reached The Half Way Mark

Last Thursday was the first day of April and also Albert Barz's birthday He didn't think his fif- tieth birthday was any different than the other fory-nine he had observed until that evening when he heard "Happy Birhday" being sung outside the window

Over fifty relatives were out- side and were invited into the house It was a real surprise for Mr. Barz and he was again surpris- ed when they started handing him birthday gifts All had a lot of fun while he was unwrapping the seemingly unlimited number of packages.

Miss Ethel Braz, daughter of Mr. and Mrs. Albert Barz, had charge of the entertainment and a big time was enjoyed playing the games and doing the stunts she had planned.

After the evening's entertain- ment and visiting a nice lunch was served consising of hot meat sar d- wiches, coffee, pickles, angel food cake, cup cakes and brick ice cream, which had the figures "50" inside. Mrs. Barz had also baked a nice birthday cake for her hus- band which was surmounted by fifty candles. At the proper time Mr Barz was asked to blow out the candles. He took in lots of air, let it all go at once in the direc- tion of the candles, and every one of he fifty went out at once. Some- one remarked, "he should have been an auctioneer!"

Those present, including their families were Will Barz of Garner, Fred Barz, Herman Barz, Henry Barz, Leslie Hartbeck, Martin Barz, Walter Rosendahl, Harvey Barz, Marvin Barz, Rev. Gross- huesch, all of this community and Mrs. Lena Scroeder, Edmund Jos- ten, Emma Kothenbuetal and Mil- dred Thiemann, also of this com- munity.

Mr. Barz received birthday cards from his sisters in Minneso- ta who were not able to be present, and also a birthday gift from Mr and Mrs. Cleo Engle of Sheboygan, Wisconsin

"The First Hundred Years Are The Hardest," according to one writer, but Albert has enjoyed the first fifty and expects to enjoy the next fifty even more.

FISHING SEASON IS NOT OPEN

There are no open seasons on any species of fish at the present time Many believe that the season opened Ap- ril 1st. Since the first an- nouncement about the trout season opening on April 1st was published several weeks ago, the Supreme Court rul- ed the regulations of the Conservation Commission in- valid For that reason there is no open season on trout or any other species of fish un- til the Legislature fixes open seasons.

The open season on trout and bullheads will open on the day the laws are pub- lished, provided the seasons recommended in the bill now before the Legislature are not changed.

No trout have been stock- ed by the Commisssion in any of the trout streams this spring as is the practice. It is planned to withhold stocking until the open season is fixed by the Legislature.

HE NEEDS A "NEUTRALITY ACT" TOO!

The Iowa legislature is expected to consider a neutrality act for Iowa motorists between April 5th and 10th, in the form of a constitutinal amendment, urged by the motor clubs of Iowa, to require that all motoring taxes be used for highway construction, maintenance and safety, according to Mr R. E. Rhoades, Executive vice president of the Motor Club of Iowa.

With the automobile already taxed at $50.11 or 28 per cent of its value annually as compared to the real estate taxes of 2.86 per cent, and with special committees from the Iowa House and Senate preparing new proposed taxes on motoring, the Motor Clubs of Iowa are asking the Legislature to adopt Senate Joint Resolution No 5, by Howard Baldwin, which proposes an amendment to the constitution to guarantee that the already enormous tax on motorists will be used only for highway purposes

However, it is the belief of the club that unless Iowa motorists from all over the state urge their Representatives and Senators to adopt this resolution, the legislature may be too busy with less important matters to adopt this vitally needed protection or neutrality act to the pocket books of Iowa motorists.

Leo Heyman Has Miraculous Escape In Tractor Accident

LEO HEYMAN INJURED BY TRACTOR FALLING OFF FROM TRUCK

Leo Heyman, who is employed at the Northern Lumber Imple- ment Company, narrowly escaped a serious accident last Thursday Mr Heyman had delivered a trac- tor to a farm near Palsville and was unloading it from the truck Planks had been put up to run the tractor down and Leo had started the tractor engine and was on the tractor seat driving it off the truck when one of the planks broke and the tractor tumbled to the ground. Heyman, who was unable to leap free, fell wih the tractor which rolled over him and injured one of his legs. Fortunately, the exhaust pipe on the tractor struck the ground in such a way that it held the heavy machine off the ground or Leo might have been crushed

Leo considers himself lucky that a badly bruised leg and torn liga- ments are about the extent of his experience. However, he will be forced to navigate on crutches un- til the torn ligaments and bruised muscles have healed.

MIGRATORY BIRDS HAVE BEEN DECREASING AT RAPID RATE

The decreasing numbers of mi- gratory birds present a problem that must be met squarely by co- operation of farmers and wildlife conservationists, declares G. O. Hendrickson, zoologist at Iowa State College. How to water and graze stock without disturbing ducks is a paricularly important problem at this time.

About 95 per cent of the wild ducks nest within 220 yards of the water, but they will not nest if disturbed by stock. It is estimated that there were 150 million ducks in North America when it was first settled. Now, however, according to recent Biological Survey re- ports, the number has dropped to 40 million.

MISS SENA CHRISTIANS BECAME BRIDE OF MR. HARRY CHRISTENSEN

Wedding Took Place At Reformed Church Sunday Afternoon

On Sunday afternoon at 12.30 o'clock Miss Sena Margaret Chris- tians became the bride of Mr. Harry LuVerne Christensen of Hubbard, Iowa. The ceremony was performed by Rev. Calvin Gross- huesch and the bridal couple were attended by Mr. and Mrs. Lloyd Smith.

The bride who is a daughter of Mr. and Mrs. John Christians of Ell township, wore a navy blue silk dress with ripped cord jacket and gray accessories to match and carried boquets of pink roses and sweet peas. Mrs. Smith, the bridse- maid, wore a silk printed flowered dress with white accessories. The groom wore a suit of oxford gray.

The bride has lived all her life in this community. She graduated from the Garner High School in 1934 and has been at home since. Mr. Christensen's parents reside at Hubbard, Iowa.

After the ceremony a wedding dinner was served at the Lloyd Smith home and thirty-five imme- diate relatives were entertained. The table was decorated in blue and white and a decorated wed- ding cake baked by Mrs. Art Tib- bets served as the center piece. The Misses Elsie Christians and June Allen were waitresses.

The happy couple are enjoying a wedding trip visiting places of interest in Iowa. They will live on a farm northeast of Klemme.

Why the world is unfair to left- handed persons and the troubles nature has wished on "Southpaws" told in the AMERICAN WEEKLY, the magazine distributed with NEXT SUNDAY'S CHICAGO HERALD AND EXAMINER.

SENIOR CLASS WORKING ON PLAY TO BE GIVEN SOON

MR. AND MRS. WILL AX CELEBRATED 35 WEDDING ANNIVERSARY

Mr. and Mrs Will Ax held "Op- en House" at their home from one o'clock to five Sunday afternoon in honor of their 35 wedding an- niversary which was on Saturday, April 3rd. During that time forty- six relatives came to exend con- graulations and best wishes. The guests were all treated to a piece of wedding cake, baked and beau- tifully decorated by the Garner Bakery. The afternoon was spent in singing songs and visiting. A request number, "When Sweet- hearts Grow Old Together," was sent in by Mr. and Mrs. John Neu- berger, of Ventura, to KGLO at Mason City and was heard during the afternoon. Mr. and Mrs. Ax re- ceived many lovely gifts and flow- ers as a remembrance of the hap- py occassion.

The following neighbors pleas- antly surprised them Sunday ev- ening Mr. and Mrs. Will Utt and family, Mr. and Mrs. Will Grei- man and family, Mr. and Mrs. W. J. Anderson and family, Mr. and Mrs. Carl Wille and family, Mr and Mrs. Joe Stokesbary and Harold Boland. A delicious lunch was served by the self-invited guests. All report a most enjoyable time.

LAMB HIGH IN NUTRITIONAL VALUE AND IS ECONOMICAL

Meat-eating America may turn to consuming more lamb if it wishes to follow good economic and dietary principles, for on a basis of price per pound and food value. lamb ranks high.

Lamb meat according to Fred J Beard, Iowa State College meat specialist, is high in protein con- tent, in phosphorus, in iron and in calories. And it is a good source of some of the necessary vitamins. In addition, Mr. Beard points out, lamb is plentiful and it can be us- ed economically to vary the usual meat diet.

Nutritional experts recommend lamb for the child's diet; and homemakers suggest such com- binations as· Leg of lamb with currant mint sauce; roasted ribs of lamb served with peas and creamed potatoes wih perhaps a cranberry salad; or a roasted stuffed shoulder of lamb upon which a few slices of bacon have been cooked: or baked lamb loaf or lamb croquettes. and lamb Irish stew with dumplings

Classis In Session

The Minnesota Classis of tne Reformed Church is in session this week at Garner. Rev. Calvin Grosshuesch and Mr. Henry Jost- en are delegates from the Klemme congregation.

SENIOR CLASS PLAY TO BE GIVEN APRIL 22 AND 23

NEW FIRES, the 1937 edition of the senior class play, will be given Thursday and Friday, April 22 and 23 at the Klemme High School auditorium. The play is a three- act comedy by Charles Quimby Burdette and is guaranteed to give a full evening of laughs and enter- tainment.

NEW FIRES is the story of a city family that had been ordered by the head of the house to take up residence on a farm in he Ozark Mountains of Missouri. The con- flict between city habits and country ways is highly entertain- ing.

To top off the complications, a visitor brings scarlet fever to the house, and the family is quaran- tined. A love affair between the contry doctor and the eldest daughter prospers during the im- prisonment of the family, and con- ditions in general weave them- selves into a happy ending.

A new cyclorama curtain will form the background for the stage in this play. This a new type of stage equipment for the local school. It has been installed by the school board at considerable ex- pense and represents the latest form of curtain background.

BASKET BALL SQUAD TO BE HONORED AT BANQUET

Klemme's sectional champion- shipship basket ball squad will be honored at a banquet in the school gymnasium next Monday evening. A substantial dinner, served by the mothers of the boys, will be fol- lowed by a program of speeches and the presentation of letters.

The speech program is open to the public, and friends and fans are invited to come to the gymnas- ium at about 7:30 for this part of the program. Coach Judge Grims- ley of Mason City will be the main speaker of the evening. Mr. Grims- ley is one of the outstanding high school coaches in the middle west. Local fans have followed his teams for many years and will be glad for the chance to hear him speak.

BE READY

When the new fishing laws go into effect, be ready to limber up the casting rod, but first buy your license. The new licenses are now on sale at the County Recorders' offices.

Leader Wins In Court Case Started By Clark

JUDGE DECLARES FOR DEFENSE IN ACTION FOR OFFICIAL PAPER

GARNER—Judge Henry Craven late Wednesday handed down a decision in favor of the defendent in the action brought by the Gar- ner Herald against the Garner Leader and Signal. The plaintiff sought to have the Leader's sub- scription list disregarded as fraud- ulent. as a basis for being named an official paper of Hancock coun- ty.

Judge Craven's opinion, cover- ing 40 typewritten pages, ratiffied the supervisors' action in naming the Signal an official publication. The Britt News-Tribune also had been named an official publication and was not involved in the litiga- tion.

The contest opened March 10, with 40 witnesses called for the plaintiff and five for the defen- dant. Attorneys for the Leader were Hastings and Senneff of Britt and for the Herald, Shum- way and Linnan of Algona.

Washington Digest

National Topics Interpreted
by William Bruckart

National Press Building Washington, D. C.

Washington.—Immediately after the armistice in 1918, the country was suddenly awakened to the fact that living costs were extraordinarily high. It was a condition that struck close home to everyone. It was a condition that developed an unusual emotion. There followed, naturally, a wave that engulfed hundreds of thousands of people who felt that they were being subjected to high prices that were unjustified.

Living Costs

Most people will remember how "H. C. L." became an expression as common and one that figured in as many puns and jokes and wise cracks as the alphabetical agencies common now to the New Deal. It was a type of propaganda that came along spontaneously because the condition affected so many people.

The reason I have recalled that circumstance is because we are again headed straight into another era of "H. C. L." We have not reached the top of living costs by any means. It takes more than a fortune teller or crystal gazer to predict what is going to happen in the way of increased commodity prices. Suffice it to say, however, that a "vicious cycle" has started whirling and in the midst of the situation stands a very confused consumer, representative of all of the people in the United States.

There undoubtedly will be an increase in the propaganda concerning living costs again. Indeed, there already is a rather far-flung propaganda which results from the increased cost of living but it is directed rather on a slant and not pointed accurately into the heart of the condition now confronting us.

Undoubtedly a great many people have not thought of the frequent and recurring attacks on business and business practices as having anything to do with the increased living costs. But the truth is that this type of propaganda springs directly from the sporadic cries that are coming from many localities about the higher prices—complaints that the dollar does not go very far in buying food across the grocery counter.

It seems to me that it is time for some calm thinking about this situation. It seems to me further that public officials everywhere ought to be honest enough to analyze the situation and tell the public what the real causes are. If this is not done, there again will be undoubtedly a perfect deluge of propaganda in protest against high living costs and the bulk of the people who suffer from these increased costs will not know the reason any more than they understood the reasons that brought about a counterpart of the present outlook back in 1918 and 1919.

* * *

In any examination of an economic condition, one must dig considerably below the surface to find the factors that have operated to bring about the results visible to the eye. Such is certainly the case in the present situation. One can not fairly say that the present booming prices in food have just happened. In truth, things never happen; they are brought about. They have been brought about in the present circumstance by factors that date back to 1933 and include numerous governmental policies that have been initiated since that time.

Seeking the Cause

The trained economist will describe present conditions as due to inflation—which indeed they are. But inflation is such an all-inclusive term that the real story lies hidden.

In an effort to spur and encourage production and aid recovery, President Roosevelt devalued the dollar. He reduced its gold value.

During 1933 and 1934 there came numerous pieces of legislation including the NRA and the AAA, each designed to foster increased prices and to build up the level of wages for industrial workers.

Subsequently, President Roosevelt sponsored legislation which had as its end and aim federal control of wages for workers. This legislation sought to give the federal government power to force business interests to recognize labor unions and to accept labor union scales of pay—all to the end that labor should be paid a greater percentage of the returns received by business.

* * *

There came also legislation designed to increase the price of silver and the United States Treasury was directed by this law to buy millions of ounces of silver and to use that silver in our currency. In the meantime and recurring almost constantly the New Deal administration, from President Roosevelt on down, maintained a barrage of attacks on business interests seeking wider employment of labor at increased wages. Coupled with these attacks was violent criticism of banks and bankers. They were charged with being an obstacle to recovery because they were not lending money. It did not matter to the critics that no one wanted to borrow money; the criticisms were continued because loans simply were not being made and no examination of the reason why loans were not being made ever was undertaken.

Then Came Strikes

Next in the chain of events and still continuing came labor troubles. The New Deal avowedly was on the side of labor and against employers. Strikes followed in increasing numbers.

The results of this combination of factors and circumstances now are showing. Considered from any angle, one can not fail to see why they constitute a cycle of events that lead to higher prices.

When the dollar was cheaper by devaluation, more dollars were required to feed a family than had been required before. Workers felt this sting. They demanded more dollars in pay for their work. Pressure from the New Deal administration together with labor's use of the strike weapon forced business to pay higher wages.

But, business must live. It can not live unless it gets back its costs of production. Agriculture can not subsist unless it receives a reasonable price for its production. Neither agriculture nor industry will go ahead unless there is a reward in the shape of a profit. Consequently, neither agriculture nor industry is going to absorb these increased costs alone. The natural and the only way it has to get back those expenditures is by charging higher prices to the buyers of those products. Thus, we have the complete cycle—and the consumer, as usual, is the goat. The consumer pays and if that consumer be not in a position to enforce a higher return for the services he renders, he is caught between the upper and nether millstones. It appears that the consumer is fast getting himself into the grip of that vise.

* * *

In connection with this increasing price level, and the dangers inherent in the general situation, I think credit ought to be given to President Eccles, of the Federal Reserve board of governors, for the bold statement he made a few days ago. Mr. Eccles warned the country very frankly what the dangers are in a situation where labor continues to clamor for a greater share of the profits of commerce and industry and where labor's leadership seeks to take advantage of the inability of employers to protect themselves.

Credit Eccles

The Eccles statement took occasion to link labor's position with the general money market and the effect labor's position is having on the country as a whole. He referred to the demands of some labor leaders for a working week of 30 hours and while not completely discarding that theory, he gave the very definite impression that shorter hours do not constitute a solution for our present problem.

"Increased wages and shorter hours," said Mr. Eccles, "when they limit or actually reduce production are not at this time in the interest of the public in general or in the real interest of the workers themselves. When wage increases are passed along to the public, and particularly when industries take advantage of any existing situation to increase prices far beyond increased labor costs, such action is shortsighted and an indefensible policy from every standpoint.

"Wage increases and shorter hours are justified and wholly desirable when they result from increasing production per capita and represent a better distribution of the profits of industry. When they retard and restrict production and cause price inflation, they result in throwing the buying power of the various groups in the entire economy out of balance, working a particular hardship upon agriculture, the unorganized workers, the recipients of fixed incomes and all consumers.

"The upward spiral of wages and prices into inflationary price levels can be as disastrous as the downward spiral of deflation. If such conditions develop, the government should intervene in the public interest by taking such action as is necessary to corect the abuses.

"The remedy for a price inflation when the country has unused man power, natural resources and capital, is through more, not less production, through an orderly, balanced use of these three fundamental factors and not by creating a needless, artificial shortage of any one of them."

Thus we have brought into bold relief a criticism of the final factor entering into the present increasing price level. I refer to the artificial shortage in food products that resulted from the ridiculous crop control program that was accomplished through AAA. We are now paying the price for the destruction of 6,000,000 little pigs.

I said at the beginning of this discussion that a calm examination of the factors involved was necessary now if it ever were necessary in history.

Scenes and Persons in the Current News

1—Sit-down strikers in a New York 5 and 10 cent store are served dinner in the store's cafeteria. 2—Senators Royal S. Copeland of New York, David I. Walsh of Massachusetts and Edward R. Burke of Nebraska, who are active in opposition to President Roosevelt's plan to reorganize the Supreme court. 3—Dowager Queen Marie of Roumania, whose recent serious illness caused grave concern.

Unique "Blanket" for Egg Queen

Miss Muriel Wolfson is the girl adorning the bathtub in this picture, her only "blanket" being several dozen eggs. She was recently elected queen of the egg festival held recently at Laurel-in-the-Pines, near Lakewood, N. J.

MICKEY CATCHES AGAIN

After many months out of uniform, Mickey Cochrane, manager and catcher of the Detroit Tigers, is pictured here as he donned his war paint for a workout with the Tigers during their spring training trip in Florida. Cochrane was forced out in the later part of last season by injury and illness. He is now in the pink and rarin' to go. The tigers are regarded as pennant threats again this year, although much of their success admittedly depends upon the ability of Hank Greenberg to escape injuries and regain his 1935 slugging form.

HEADS WISCONSIN U

Clarence A. Dykstra, city manager of Cincinnati, who announced his acceptance of the post of president of the University of Wisconsin. Mr. Dykstra will succeed Dr. Glenn Frank, who was deposed recently by the executive committee of the university regents. Dr. Frank lost his job at the Madison school by only one vote of the committee.

Life a la 1937—Baby Born in Trailer

That the auto-trailer has really become home sweet home in America is indicated by the above photograph which shows one of the first babies to be born in a trailer. Anna Abbey, the newcomer, who was born in a Sarasota, Fla., trailer camp, is pictured here in her rolling home with her parents, Mr. and Mrs. Clayton Abbey, of Buffalo, and her brother, Lyle.

Running Horse Used as "Prompter" for Trotter

A graphic picture illustrating the vast difference between the gait of a trotter and a running horse. The trotter (left) is Southland, Hambletonian candidate, owned by C. W. Phellis of New York, and piloted by his trainer, Fred Egan. The runner, at right, does not even boast a name and is shown here being used as a prompter for the trotting horse during a workout at Seminole park, near Lakeland, Fla. Note the smooth rhythmic action of the trotter and the jumping, galloping motion of the runner.

'Happy Bluebirds' Motifs for Linens

Pattern 1315

Bluebirds are for happiness—as runs the legend. This dainty pattern in 10-to-the-inch crosses will add a cheery touch indeed to your towels, pillow cases, scarfs or cloths. Do these simple motifs in natural color, or two shades of one color. Pattern 1315 contains transfer pattern of two motifs 5¾ by 12¼ inches; two motifs 6 by 7¾ inches and two motifs 5½ by 7 inches; and four motifs 3⅛ by 3¼ inches; color suggestions; illustrations of all stitches needed; material requirements.

Send 15 cents in stamps or coins (coins preferred) for this pattern to The Sewing Circle Needlecraft Dept., 82 Eighth Ave., New York, N. Y.

Write plainly your name, address and pattern number.

Uncle Phil Says:

Rich Food in Small Doses

Books that improve your mind are often hard to read. Take them in small doses, but continuously.

Live each day as if it were worth while—and the day before it, plan to make it more so.

A woman means it when she says she would rather live in a hut with a man she loves than in a mansion with one she doesn't; and still hopes and wishes that hut husband would strike it rich.

The greatest of faults is to be conscious of none.

Wisdom Must Be Earned

Authority can be conferred upon you, but not wisdom. It has to be earned.

Pride is worth something that keeps man or boy out of low company.

Men still start with a shoestring and make a fortune; and nobody yet understands how.

Every flowering weed may have its chance some day, when the florists take an interest in it.

Youth takes its fun where it finds it; and is an adept in finding it in trifles.

A FARMER BOY

ONE of the best known medical men in the U. S. was the late Dr. R. V. Pierce of Buffalo, N. Y., who was born on a farm in Pa. Dr. Pierce's Favorite Prescription has for nearly 70 years been helping women who have headache and backache associated with functional disturbances, and older women who experience heat flashes. By increasing the appetite this tonic helps to upbuild the body. Buy of your druggist. New size, tabs., 50c, liquid $1.

"Quotations"

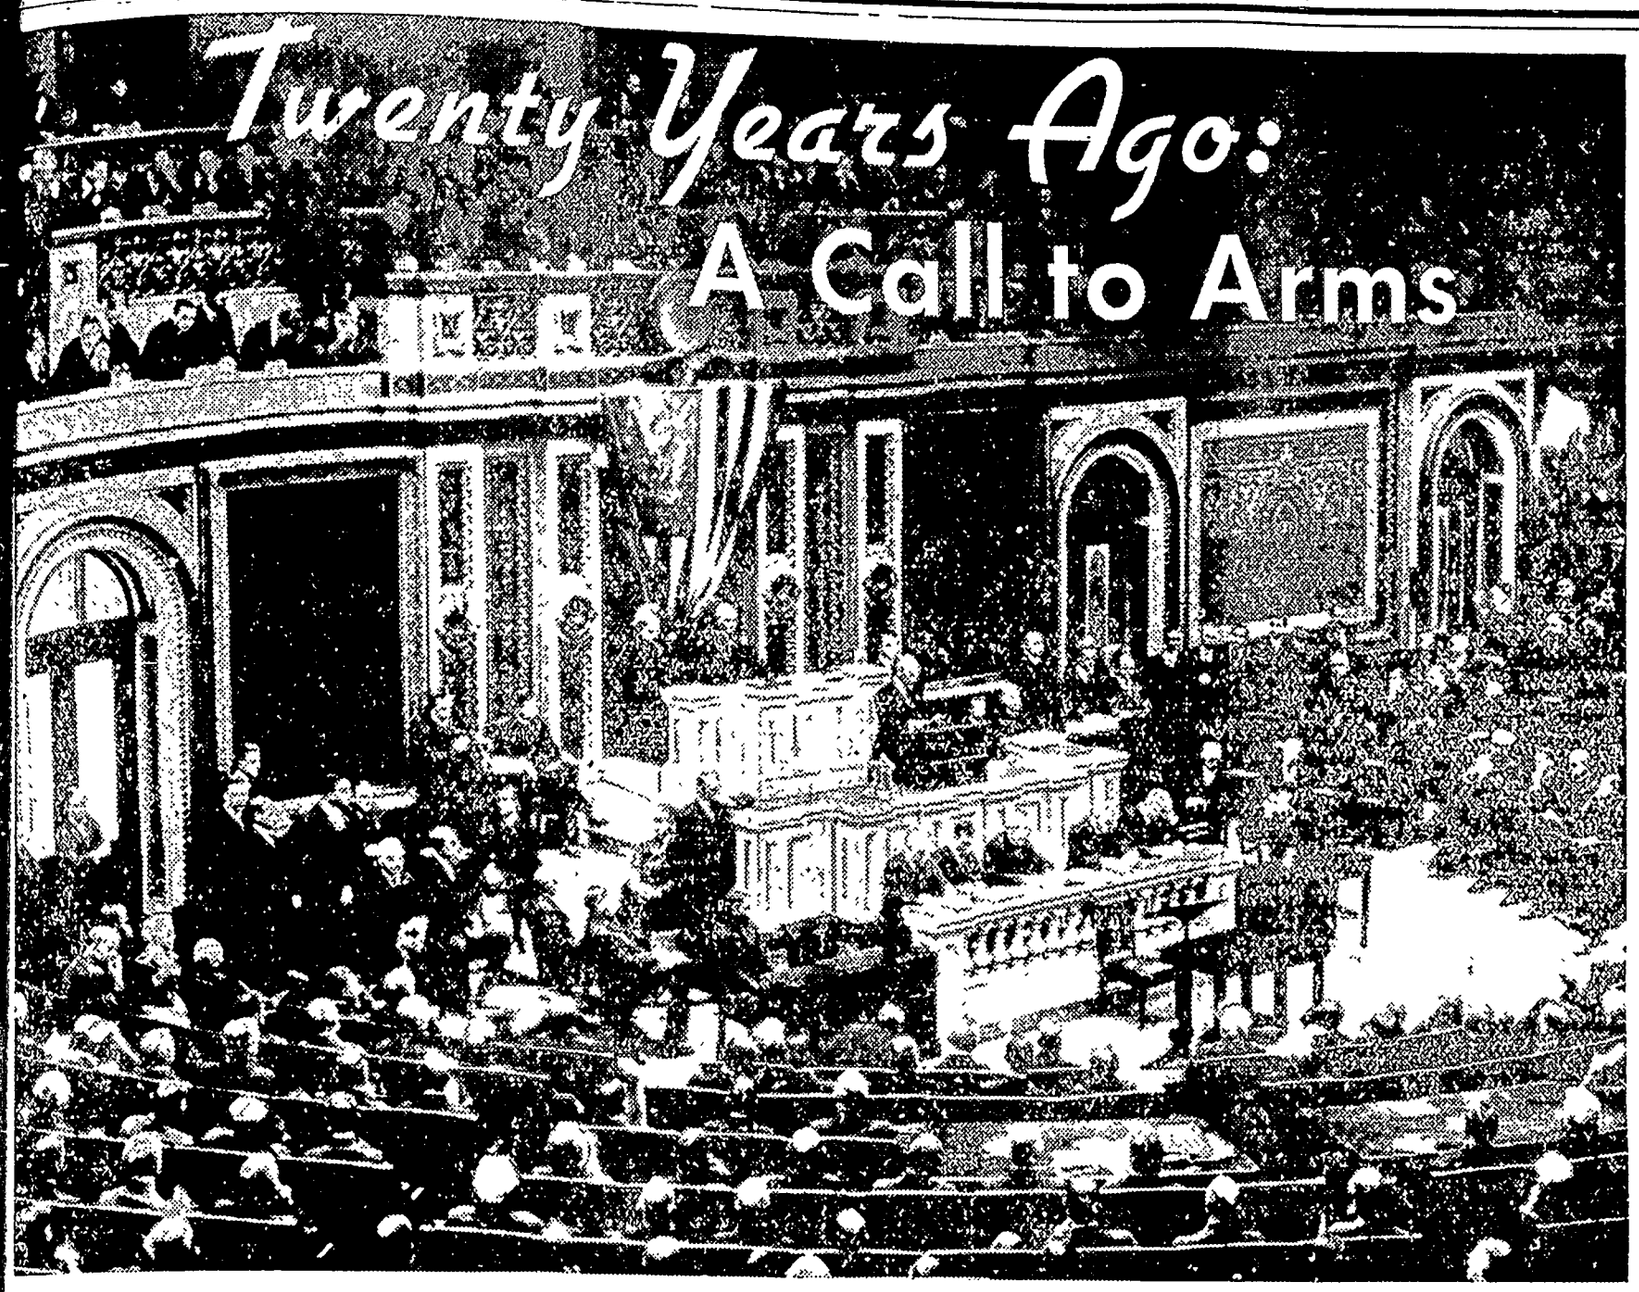
For all the cruelty and stupidity in the world today, man has not done so badly in so brief a period.—*Henry Morgenthau.*

There can be no permanence for a nation whose people have only a selfish interest in its welfare.—*John J. Pershing.*

The people today no longer get their excitement from reading poetry—they get it from machines going fast.—*John Masefield.*

It is vain to trust in wrong; as much of evil, so much of loss, is the formula of human history.—*Theodore Parker.*

The old-fashioned boyhood ideals are what will keep this country going.—*Franklin D. Roosevelt.*



President Woodrow Wilson delivering his war message to congress, April 2, 1917.

By ELMO SCOTT WATSON

FOR two months it had been apparent that the march of events was slowly but surely turning the footsteps of a nation toward the path which would lead it into the gigantic conflict raging across the Atlantic. And, ironically, this was the nation whose people only two months earlier had re-elected its Chief Executive partly because of the plea in his behalf: "He kept us out of war."

The first significant step in this march of events had been taken on January 31, 1917. The German high command, gambling desperately to end the two-year stalemate, announced that on the next day it would begin unrestricted warfare and that American shipping entering the war zone would be limited to one vessel a week.

When Secretary Joe Tumulty entered the office of the President in the White House and laid on his desk a copy of the Associated Press dispatch containing that news, Woodrow Wilson read it slowly, then re-read it. A look of surprise, then incredulity, then stern determination passed across his face. "Tumulty, this means war," he exclaimed. "The break that we have tried so hard to prevent now seems inevitable."

The next day the President met with his cabinet and told them of the "astounding surprise" of this latest act of that "madman who must be curbed"—Germany. But even with this crisis thrust upon him, he was determined not to do more than sever diplomatic relations with Berlin nor take any action until there was an "overt act" on the part of the Central Powers. He repeated that determination the following day when he appeared before the congress to tell it that we had broken, diplomatically, with Berlin.

The First Overt Act.

During the next month that "overt act" was committed. The Ancona, an American ship, had been sunk in the war zone. Again Woodrow Wilson appeared before congress to announce a policy of "armed neutrality" and to ask authorization for mounting naval guns on our merchant ships.

The house readily granted him that authority but the senate, with 76 in favor of the resolution and 11 opposed—enough to block the unanimous consent necessary to bring the matter to a vote—wrangled for three days. Then at 12 o'clock, noon, on March 4 the session came to an end. Four minutes passed by, during which time the United States technically had no President. Then Woodrow Wilson stood before Chief Justice White, raised his right hand and again took the oath of office to guide the nation through the four stormy years which he realized full well were ahead of him.

During the next two weeks events marched slowly to a climax. On March 20 the cabinet again assembled in the executive offices of the White House. The President told his aides what they already knew — three more American ships had been sunk by German submarines. Several American seamen were missing. These were "overt acts." What was the next step for the American government to take? The congress was due to convene on April 16. Should he call it in extra session before that date?

Unanimous for War.

Their advice was that he should. They were unanimous for war. So he issued a proclamation calling congress together on April 2.

Then followed a period of waiting—waiting—waiting. The cabinet met at regular intervals but the matter of war was not discussed. Between meetings the President spent most of his time in his study on the second floor of the White House. There, day after day and far into the night, Woodrow Wison wrestled with his problem, went through his Gethsemane alone.

Came the second of April. The senate, a continuing body, convened officially and after 12 minutes adjourned. Over in the house of representatives they were electing a speaker and other officers and ratifying committees. After eight hours and ten roll-calls they were ready for business. In the White House the President was dining with members of his family. As they finished, a delegation from congress arrived with the message that the senate and the house were ready to receive a communication from the President.

Outside the Capitol a great throng milled about, kept in order by two troops of cavalry that had ridden over from Fort Myer. Inside, the galleries of the house were packed. Even the seldom-used diplomatic gallery was filled. Two outstanding figures in it were Ambassador Jusserand of France and Ambassador Spring-Rice of Great Britain. The day they had long hoped for had arrived.

A moment after Speaker Clark had called the house to order, the doors at the rear of the chamber opened and a doorkeeper announced: "The vice president of the United States and the members of the United States senate." In the midst of a hushed silence Vice President Marshall and the elder statesmen of the republic filed into the room and took their seats. Then, as the slight figure of a scholarly-looking man appeared, congressmen and spectators alike surged to their feet in a storm of handclapping and cheers.

Wilson's Momentous Message.

It died down as Woodrow Wilson stepped to the reading desk just below the dais where Marshall and Clark sat. He began to read.

"I have called the congress into extraordinary session because there are serious, very serious choices of policy to be made, and made immediately, which it was neither right nor Constitutionally permissible that I should assume the responsibility of making."

His hands trembled slightly as he turned the pages of his manuscript. His voice was low. His listeners leaned forward to catch every word as he recounted the events of the past two months and stated his bill of particulars against the German government.

"The present German submarine warfare against commerce is a warfare against mankind. It is a war against all nations . . . The challenge is to all mankind. Each nation must decide for itself how it will meet it. The choice we make for ourselves must be made with a moderation of counsel and a temperateness of judgment befitting our character and our motives as a nation. We must put excited feeling away. Our motive will not be revenge, but only the vindication of right, of human right, of which we are only a single champion."

Through the hushed chamber there was a rustle of uncertainty, just the slightest hint of impatience. What was he going to ask of the congress? And then . . .

"With a profound sense of the solemn and even tragical character of the step I am taking and of the grave responsibilities which it involves, but in unhesitating obedience to what I deem my constitutional duty, I advise that the congress declare the recent course of the imperial government to be in fact nothing less than war against the government and people of the United States; that it formally accept the status of a belligerent which has thus been thrust upon it and that it take immediate steps not only to put the country in a more thorough state of defense, but also exert all its power and employ all its resources to bring the government of the German empire to terms and end the war."

So it was to be war! As the President uttered those words, Chief Justice White, who was sitting in the front row of chairs below the speaker, dropped the hat he had been holding and brought his hands together high over his head. That explosive sound set off a torrent of noise which filled the chamber for a moment, then died down quickly as the low voice continued:

". . . We have no quarrel with the German people. We have no feeling towards them but one of sympathy and friendship. It was not upon their impulse that their government acted upon entering this war . . .

". . . We are glad, now that we see the facts with no veil of false pretense about them, to fight thus for the ultimate peace of the world and for the liberation of its people, the German peoples included; for the rights of the nations great and small and the privilege of men everywhere to choose their way of life and obedience. The world must be made safe for democracy. Its peace must be planted upon the trusted foundation of liberty . . ."

And so on the quiet voice continued for 32 minutes—interrupted no less than 23 times by the applause of its hearers. At last it came to that most splendid passage of all:

"It is a distressing and oppressive duty, gentlemen of the congress, which I have performed in thus addressing you. There are, it may be, many months of fiery trial and sacrifice ahead of us. It is a fearful thing to lead this great peaceful country into war, into the most terrible and disastrous of all wars, civilization itself seeming to be in the balance; but the right is more precious than peace, and we shall fight for the things which we have always carried nearest our hearts—for democracy, for the right of those who submit to authority to have a voice in their own governments, for the rights and liberties of small nations, for a universal dominion of right by such a concert of free people as shall bring peace and safety to all nations and make the world itself at least free. To such a task we can dedicate our lives and our fortunes, everything that we are and everything that we have, with the pride of those who know that the day has come when America is privileged to spend her blood and her might for the principles that gave her birth and happiness and the peace which she has treasured.

"God helping her, she can do no other."

PRESIDENT WOODROW WILSON

Records Help in Improving Sheep

Systematic Check Is Urged to Produce Better Wool and Mutton.

By L. K. Bear, Animal Husbandry Specialist, Ohio State University.—WNU Service.

One line of pencil work a year for each ewe in the farm flock may help materiallly in improving the returns from wool and mutton, as a written record is a great aid in culling inferior animals.

Profits from sheep depend a great deal upon producing lambs and wool which will bring top market prices and that is impossible if the breeding flock lacks uniformity. Fine wool ewes should shear from 10 to 14 pounds of wool which will grade Delaine or fine combing, and coarse wools should shear 8 to 11 pounds that will grade as combing wool.

Records kept at shearing time will furnish a basis for taking out of the flock those ewes which have light fleeces or which produce wool of a poorer grade than the flock average. The owner of the flock knows at shearing time which ewes should be discarded but it is doubtful if he can remember the fleece weights unless a written record is kept or the culls are marked.

Many of the light lambs that are not ready for market when the others are ready for sale are late lambs caused by shy breeding ewes or they are unthrifty lambs from ewes which are poor milkers. Ewes in either of these classifications should be discarded, and, again, a written record will help in identifying the culls.

Simple record forms that provide means for keeping a check on each ewe in the flock have been prepared by the departments of animal husbandry and rural economics. One line across the sheet provides space for all the records needed on a ewe for a year. County agricultural agents can supply these flock record forms upon request.

Seeds Should Be Kept Dry While in Storage

Crop seeds protected from dampness in storage will have a better chance of germinating and producing strong plants even when handicapped by unfavorable weather.

Dampness in storage has a tendency to start the germinating process, and this weakens the seed, explained Dr. R. F. Poole, plant pathologist with the North Carolina Agricultural Experiment station.

Irish potatoes stored in banks should be aired frequently to prevent decay.

Corn, small grain, and other seed should be kept in lead-proof buildings with adequate ventilation to prevent the accumulation of too much moisture.

However, this does not mean that the seed should be openly exposed to infestation by insect pests, Dr. Poole cautioned.

Goats for Food

In some sections of the United States many goats of the milk type, especially kids, are annually consumed, states a writer in the Missouri Farmer. In some parts of the South kids are considered as a delicacy and are in demand. They are sold for slaughter when from 8 to 12 weeks of age. The flesh of young goats, or kids, is palatable and has a flavor suggesting lamb. If properly cooked, the meat from a mature milk goat is also good eating, provided the animal has been properly fed and is in good condition. The prices of goats sold on the market for slaughter are always considerably less than those received for sheep. Goats do not fatten and carry flesh like sheep.

Salt for Asparagus

At one time gardeners felt that unless salt was applied to asparagus beds they could not look for best results, but it has been demonstrated beyond question that it is not necessary. Its application, however, will do no harm and it will certainly keep ordinary weeds from growing. As much as 500 pounds to the acre may be used, but whether this will kill couch grass I cannot say, says a grower in the Montreal Herald. Apply in spring. If rhubarb plants are lifted and divided in spring, no stalks should be picked from them during that summer.

Infant Artichoke Industry

A plant for the processing of Jerusalem artichokes into food products and eventually (it is hoped) into power alcohol is being erected at Gering, Nebraska. Farmers and businessmen of the region are reported to be interested in the possibilities of this crop because of its ability to withstand drought.—Country Home Magazine.

Balanced Ration Pays

A comparison of a herd feeding a balanced ration and one feeding corn alone was made with the following results in the Linn No. 3, Iowa, C. T. A., writes Otto Bruns, tester, in Hoard's Dairyman. A herd that was fed a balanced ration was also fed according to individual production, and produced butterfat at a cost of 11.5 cents per pound. The herd that was fed corn alone had a production cost of 24.9 cents per pound, a difference of 13.4 cents.

My Favorite Recipe

By Billie Burke
Actress

English Mock Cheese Cake

1½ cupfuls flour
¾ teaspoonful salt
¼ cupful boiling water
¾ cupful butter
¼ cupful butter
⅞ cupful sugar
1 cupful fresh-grated coconut
2 eggs
2 teaspoonfuls cream
1 teaspoonful vanilla

Make a rich pie paste of the flour, salt, three-quarters cupful of butter and the boiling water. Roll out, cut in rounds, and line muffin tins with it.

Make a filling of the quarter cupful of butter, well creamed; add the sugar and well-beaten eggs, cream and vanilla. Fold in the coconut, fill the lined tins, and bake in a moderate oven until a delicate brown, and they are set. These may be topped with whipped cream when they are cool.

Don't Sleep When Gas Presses Heart

If you want to really GET RID OF GAS and terrible bloating, don't expect to do it by just doctoring your stomach with harsh, irritating alkalies and "gas tablets." Most GAS is lodged in the stomach and upper intestine and is due to old poisonous matter in the constipated bowels that are loaded with ill-causing bacteria.

If your constipation is of long standing, enormous quantities of dangerous bacteria accumulate. Then your digestion is upset. GAS often presses heart and lungs, making life miserable. You can't eat or sleep. Your head aches. Your back aches. Your complexion is sallow and pimply. Your breath is foul. You are a sick, grouchy, wretched unhappy person. YOUR SYSTEM IS POISONED.

Thousands of sufferers have found in Adlerika the quick, scientific way to rid their systems of harmful bacteria. Adlerika rids you of gas and cleans foul poisons out of BOTH upper and lower bowels. Give your bowels a REAL cleansing with Adlerika. Get rid of GAS. Adlerika does not gripe—is not habit forming. At all Leading Druggists.

GOT RID OF BIG UGLY PORES

PLENTY OF DATES NOW...DENTON'S FACIAL MAGNESIA MADE HER SKIN FRESH, YOUNG, BEAUTIFUL

Romance hasn't a chance when big ugly pores spoil skin-texture. Men love the soft smoothness of a fresh young complexion. Denton's Facial Magnesia does miracles for unsightly skin. Ugly pores disappear, skin becomes firm and smooth.

Watch your complexion take on new beauty

Even the first few treatments with Denton's Facial Magnesia make a remarkable difference. With the Denton Magic Mirror you can actually see the texture of your skin become smoother day by day. Imperfections are washed clean. Wrinkles gradually disappear. Before you know it Denton's has brought you entirely new skin loveliness.

EXTRAORDINARY OFFER
—Saves You Money

You can try Denton's Facial Magnesia on the most liberal offer we have ever made—good for a few weeks only. We will send you a full 12 oz. bottle (retail price $1) *plus* a regular sized box of famous Milnesia Wafers (known throughout the country as the *original* Milk of Magnesia tablets), *plus* the Denton Magic Mirror (shows you what your skin specialist sees) . . . all for only $1! Don't miss out on this remarkable offer. Write today.

Shakespeare Was Versed in Music, Plays Reveal

Lovers of music usually are amazed by the number of references to music and the thorough knowledge of music displayed in Shakespeare's plays, observes a writer in the Indianapolis News. "Twelfth Night" is considered as opening with one of the finest eulogies on music. "The Taming of the Shrew" opens with a music-teaching scene. Musical instruments he mentions include viols, violones (double basses), trumpets, fifes, recorders (flutes with mouthpieces), bagpipes, cornets, serpents, virginals, lutes, organs and oboes. "Hamlet" contains a description of how to play the recorder. Closely aligned to the musical instruments are the dances referred to. He mentions such early classic dances as the bergomesque, theromanesca or gaillard, the pavane, courante and gigue, as well as the English country dances known as the morris dance, hornpipe, brawl and hay.

"The Carman's Whistle," an old English ballad, is referred to in "King Henry VIII"; "Oh, Willow, Willow," another ballad, is introduced in "Othello," and "Greensleeves," a famous ballad, is twice mentioned in "Falstaff." "It was a Lover and His Lass," lyric written by Shakespeare in "As You Like It," was set to music by eighteen composers an early one of whom was Thomas Morley.

Shakespeare's lyrics, "Who Is Sylvia?" and "Hark! Hark! the Lark!" inspired two of Schubert's finest songs.

Eighteen settings have been made of the former.

"The Tempest" has been the inspiration for fourteen settings as an opera; the "Merry Wives of Windsor" has had eight settings.

"Measure for measure" was used as a basis for an opera by Richard Wagner in his youth. Incidental music to "Midsummer Night's Dream" by Felix Mendelssohn contains the latter's famous "Wedding March."

Other plays by Shakespeare which have been the inspiration for either operatic or symphonic settings include "Comedy of Errors," "The Taming of the Shrew," "Winter's Tale," "King Richard III," "King Henry IV," "King Henry VIII," "Macbeth," "Othello," "Hamlet," "Romeo and Juliet," and "King Lear."

Hyrax, Odd Little Animal, Is About Size of Rabbit

The hyrax or coney, an animal about the size of the rabbit, is rodent-like in general appearance, having long front teeth and pointed muzzle. However, it does not have the usual five toes and strong claws of the other members of the gnawing family and anatomically resembles more closely the elephant and rhinoceros than any other species living, says Nature Magazine of Washington.

The toenails are short and rounded like those of the huge pachyderms. The large front teeth, at first glance resembling the strong gnawing teeth of the squirrel, are not flat and chisel-shaped, but instead are three-sided and pointed like the fangs of the great cats. These upper teeth grow throughout the animal's life as do elephants' tusks.

In structure, the seven cheek teeth of both jaws resemble those of the rhinoceros and its extinct relative, the palaeothere.

Speed of Animals, Birds, Fish

For centuries man has been trying to assess the speeds of animals, birds, and fishes. According to tables the fastest speeds in the kingdom of Nature, says a writer in Pearson's Weekly, are· Canvas-back duck, 72 miles per hour; golden plover and teal 70 miles per hour; blackcock and swift, 68 miles per hour; pheasant and grouse, 60 miles per hour; merlin and wild goose, 55 miles per hour; homing pigeon, 55 miles per hour. The gazelle, the reed buck and the cheetah are given as the fastest animals, all being able to run at 60 miles per hour; while buffaloes, ostriches, jackals, and giraffes are listed in the 35 mile per hour class. The lion seems to be one of the slowest. He is only assessed at 30 miles per hour, the same speed as the wild pig. The fastest fish is the tuna, at 45 miles per hour, followed by the pike with 15 miles per hour Trout and salmon can only do 12 miles per hour.

700,000 Words by Signs

The human arm, which includes forearm, wrist and fingers, can produce about 700,000 distinct signs, according to scientists Sign language is, therefore, far richer and more expressive than human speech. Further, states a writer in Pearson's Weekly, it is very simple and it has no language barrier to overcome. Experts consider that it is the best possible foundation for building up a real universal language, particularly because signs have been a natural means of communication since prehistoric times.

Return Lightning Explained

Return lightning is described as a quite small electrical discharge that takes place here and there from objects on the earth's surface directly with lightning flashes This discharge is quite insignificant to the main flash, but is powerful enough to cause explosions, to start fires and even take life.—Rocky Mountain Herald.

Quaint Wording, Carving on Scottish Tombstones

Students of history and those interested in ancient habits of life find much in the celebrated handicraft work on Scottish tombstones. Throughout the kirkyards of Scottish border towns there are innumerable tombstones whose quaintness of word or conceit of carving renders them of absorbing interest to visitors, says J. W. O. von Herbulis, American director of the Anchor Line, who tells how one need not be morbid to visualize the "march of time" depicted on Scottish sculptural images.

In the church yard at Ashkirk is the remarkable sculpture work of early craftsmen when the dawn of true Scot dialect was at its prime. Here one finds the first tendency of the reversed NS and the use of W for U with William phonetically spelled as Wileam. Stonemasons, dykers and sometimes friends of the departed, whose only qualification for the job would appear to have been their zeal, produced many of the curiosities seen in Westerkirk churchyard, which includes the classic stone hawed and carved by Thomas Telford, the great engineer, in memory of his father. Among the decorative stones are the "Book of Life" monuments seen at Dryburgh. Here we see the idea adapted to show that the departed studiously pursues a life of knowledge in the hereafter. In the same kirkyard, which resembles many to be found in Northern Scotland, are the monuments of skulls and cross bones and the hourglass which later was substituted for cherubs and angels.

Guatemala's Banana Crop Is Always Picked Green

In Guatemala there are thousands of acres of banana plantations, so many of them that banana raising is one of the major industries of Central America, writes Martha M. Wendt in the Chicago American.

Each banana plant in cultivation has a "child plant" beside it to take up the work where the "mother" left off. Eight months' time is required for a "stem" or bunch of bananas to mature, and each plant bears but one stem. The plants are cut down by the natives with a machete, and the bunch of bananas cut off.

Bananas are always picked green. The "stems" are placed standing in the refrigerated compartments of the ship, instead of being laid one on top of the other. Some ships carry more than 50,000 bunches of bananas, which are distributed to all parts of the world.

After they arrive at their destination, they are carefully handled by trucks or refrigerator trains, until they finally reach the market or the corner grocery store, where they are allowed to ripen fully.

The Three-Mile Limit

The 3-mile limit, as recognized and practiced by the majority of countries, was adopted between Great Britain and the United States. Toward the close of the Eighteenth century Bynkershoek, in his "Dominion of the Sea, 1702," had adopted the principle of self-protection. Since fortresses can give effective protection within range of their cannon, he argued that respect was not due to the presence of cannon, but to the fact that the state was in a position to enforce respect, says the Literary Digest. This could be done from any point along its shore. Hence his well known doctrine: "Terrae dominum finitur, ubi finitur armorum vis" (A nation's power ends at the limits of its arms). The maxim became international law, for the protection of shore fisheries and for neutrality.

Ancient Derbies and Plugs

In the eighties the lining of the $3 derby or the $6 plug often decided its selection. There were wonderful red, blue, orange, green, and pink satin linings with the hatter's name stamped thereon in gold and every purchaser likewise was entitled to his initials in gold letters gummed inside. A very popular hat was the pearl gray "plug" worn with a gray frock coat. The white plug was greatly in favor with the political clubs and brown derbies reigned in different shades from soft fawn to a rich crimson color.

Limes Traced to India

The lime is indigenous to India and was probably introduced into the Western hemisphere by Columbus on his second voyage. Some time later they were found growing wild in the Florida keys. In "The Log of the Mayflower," Azel Ames states that they were brought to Plymouth by the Pilgrims. Another record states that George Washington ordered a sloop captain bound for the West Indies in 1776 to bring back a barrel of limes, "if you find them good and cheap."

Bitter Literary Controversy

One of the bitterest literary controversies in history was over the identity of an unknown person who, under the pseudonym of "Junius," wrote a series of satirical political letters to the London Public Advertiser between 1769 and 1772. From that day, speculation has been rife and numerous books and pamphlets have been written to prove that he was at least forty different famous individuals.—Collier's Weekly.

DO YOU KNOW FISH

Fry are newly hatched fish. When a fish begins to fend for itself it is considered as having advanced the fry stage

Fingerling are young fish above the fry stage and less than a year old

There are several characteristics of a minnow (a) A single dodrsal fin; (b) Scaleless head; (c) With the exception of the carp and goldfish the dorsal fin has less than ten rays; (d) There are no teeth on the jaws. (Minnows are not necessarily small fish.

There are seven fins on a typical fish.

The legal length of a fish is the total lentgth measured from the snout along the side of the fish to the longest extent of he tail fin.

Standard length is more accurate than "legal" length as legal length was designed to measure fish having tail fins with equal lobes Fish that have the vertebral column extending backwards in such a manner that the upper tail lobe greatly exceeds the lower portion of the tail fin, can hardly be accurately measured by using "legal" length measurements

There are many reasons why a clump of bulrushes is beneficial to fish Some of them are· provides protection cover; aereates water; provides attachment for food organisms, breaks light intensity and keeps water cooler; provides spawn attachment and furnishes food for animal life which in turn becomes food for fish

AVOID LOSSES IN GROWING PIGS

—Prepared by American Foundation for Animal Health

Although American farmers have made wonderful progress in developing both fertility and quality of swine there is still an appalling though largely preventable loss among pigs at birth and during the suckling stage.

Poor selection of breeding stock and failure to supply proper rations to sows before farrowing time accounts for a high percentage of still-born litters.

Contagious abortion (Bang's disease) and the annual outbreaks of swine flu among brood sows, are two other prolific sources of loss.

The best insurance against future trouble among suckling pigs is to have them farrowed in clean, well ventilated and suitably disinfected quarters.

Scrubbing sows with a stiff brush soaked in a soapy antiseptic solution just before farrowing time is advised.

Just after birth the navel stump of pigs should be disinfected to prevent the common crippling losses from so-called joint ill and suckling pneumonia.

Nutritional anemia or blood deficiency is a common and fatal trouble among pigs that are farrowed indoors during early spring months.

It can be prevented by proper handling and medicinal treatment.

A few weeks after farrowing, the pigs should be moved to clean ground, so they will avoid picking u pthe "yard diseases" harbored in old yards and buildings. This "McLean System" requires rotating the hog lot, just as a farmer rotates his corn ground, and is one of the best steps that can be taken to insure a healthy herd of swine

Two or three weeks after weaning, the pigs should be vaccinated against hog cholera by a veterinarian. Proper immunization at this age takes less serum and virus, and will last through the lifetime of the animal. The farmer should be sure, however, to have the veterinarian check all pigs to determine their state of health before vaccination; otherwise serious losses may occur.

Many fine pigs are lost at castration and ringing time, because of lockjaw or tetanus. Such losses can be prevented by boiling the castration knife, keeping the hands clean, and by disinfecting the surgical wounds. Pigs should also be kept out of mudholes and wallows for a few days after castration or ringing

A baby born to a colored couple, flood refugees in Forest City, Ark, has been named Highwater, reports Miss Dollye Clark, WPA worker

PROTECT THAT BIRD'S NEST

About this time of the year the songbirds begin to arrive from the south and locations for nests are being selected If you have one tree in your yard the chances are you will have at least one bird's nest in it. Chances are that your's or he neighbor's cat will locate the nest also.

Cats are well equipped to climb trees if they can sink their claws into the bark. When the eggs hatch out and the young birds appear, even while moherbird is sitting on the eggs, cats seem to know it. The cat is the bird's dangerous enemy.

It is not necessary to kill the cat. There is a better way. Wrap a piece of tin around the tree well up on the trunk. The tin should be beyond he cat's jump. It should also be wider than the cat is long. For some reason, cats' Claws will not hold on tin.

SCHOOL NEWS

Grades 7 and 8

This week we published our newspaper. We called it the "Midget Times" Everyone in the eighth grade contributed something.

On Friday night we had a monopoly party in the gymnasium. Refreshments were served.

Grades 5 and 6

This week the fifth grade completed their language work books.

The sixth grade people will make a map representing the exploration period this week.

Eunice Larsen had a visitor in school Monday morning.

Grades 3 and 4

The fourth graders have their booklet about Holland on display.

The third graders have started their big book about Japan. Last week they read about "Japanese Homes." Pictures were drawn and riddles and stories written for the book.

We had Toy Orchestra practice several days last week. We are learning "The Norwegian March." We hope to have some new instruments soon.

You should see our highway and highway signs. We learned a song named "Swing Along With Safety." Herbie Mueller and Carol Bock made Safety posters. We made Safety rules. We enjoy our Safety Unit.

The fourth graders are going to take a trip to Norway. Mr. Elstad told us about his trip to Norway We enjoyed it very much

Grades 1 and 2

We have been working on our Toy Shop Peggy Lou, Dean and Clarence designed the wallpaper. Willis, Phyllis, Carol and Roger Ridder made the cash register. Several of the boys worked together on the counter.

We wrote letters to Harvey Schuldt and Keith Stott this week.

Donna Heivelin, William Welker and Esher Hartbeck got A in spelling on Friday.

Peggy Lou Coobs, Phyllis Carol Christiance and Roger Ridder have the longest lists on the second grade poem chart.

ITEMS OF INTEREST FROM AVERY TOWNSHIP

Mr and Mrs. Fred Bachman and son, Wayne, were Mason City visitors last Monday.

Mr. and Mrs. Harlow Helps and Merlin and Louis were dinner guests at the parental Henry Helps home Tuesday.

Harmen Trampel and Mrs. Paul Cavitt spent Tuesday at the John Trampel home.

Mrs. Clarice Rooks was a business caller at Garner Wednesday.

Mr. and Mrs. Robert Roths and son, Dale, were visiting at the Bert Closson home at Mason City Wednesday.

Mr and Mrs. Harlow Helps and family were callers a the D A. and Herbert Marshall home Wednesday morning.

Mr. and Mrs. John Trampel and Melbourne and Miss Anna Trampel were Forest City visitors Wednesday.

Mrs. Earl Jewel of Des Moines returned to her home Friday after helping to care for her aunt, Mrs D A. Marshall for several weeks. Mrs Frank Ruth of Marshalltown returned to her home also after about a week spent at the Marshall home.

Harmen and Clarence Trampel were visiting at the Mrs. August Trampel home Sunday afternoon.

Mrs. Harry Gibbs and son, Asa, and daughter Isabel were at Mason City Friday to get Miss Harriet who attends business college there

The Missionary Society of the Methodist Church met at the home of Mrs John Waddingham Thursday afernoon.

Gilman Marshall and John Ruth of Illinois were callers at the Mrs. Hannah Halfpop home in Meservey Saturday.

Mr. and Mrs. Paul Kramer and family and Mr. and Mrs. Robert Roths and family were Sunday afternoon visitors at the Fred Bachman home.

Mr. and Mrs. Robert Roths were visiting at the Harlow Helps home Sunday.

Mr. and Mrs. John Harms and family were Sunday visitors at the Lars Harms home.

Mr. and Mrs. Harness Cunningham left for their home at San Jose, Illinois, after a week spent at the D. A. and Herbert Marshall home.

ITEMS OF INTEREST FROM ELL TOWNSHIP

Mr. and Mrs. Armour Mullin and Mr. and Mrs. Awalt Jahnke and sons were Sunday guests at the parental Ben Mullin home.

The follow-up meeting for Districts 8 and 9 of Ell township was held at the Awalt Jahnke home Friday afternoon. The lesson was on bread baking. A fine lunch was served to the twelve ladies present.

Mr. and Mrs. A. E. Alford and sons, of Blairsburg, spent Sunday at the Verner Stromer home

Mr. and Mrs. Clarence Lemke and Mr. and Mrs. Melvin Neuberger and daughter spent Tuesday evening at the Lewis Neuberger home. The occassion was in honor of Donald Eugene Neuberger's sixth birthday which was on that day and Melvin Neuberger's which was on Thursday, April 1st. Home made ice cream and cake was served.

Mr. and Mrs. Charlie Fritzel visited at the Jake Hess home Sunday afternoon.

Mr. and Mrs. Aaron Stromer and family were entertained to dinner at the Herman Stromer home Sunday

AVERY - TWIN LAKE NEWS ITEMS

Mr. and Mrs. Ed. Weisbrod, of Fenton, visited at the Edwin Josten home Wednesday.

David Schwichtenberg was at Chicago on business over the week end.

Mrs. Frank Sandrey visited her daughter, Mrs. Walter Merkel at Mason City, Wednesday.

Mrs. Dick Swalve, Carrie and Clarence visited Mrs. Ben Swalve Friday afternoon.

Mr. and Mrs. Albert Priebe and daughters visited at the Henry Buseman home Sunday evening.

Ladies aid meets in the church basement Wed. April 14th., 2:30 Mrs. Tony Boller, Hostess.

"Stop, Look, Read, Heed!"

You can revile the Christian Religion like a Moslem. You can knock it like an Atheist. You may question it like a Buddhist You may "slam" it like a prig Yoo may laugh at it like a "society bud" But this great fact remains— it is the only thing ever to come into the world to heal anybody Every hospital is either a Christian institution or an inspired copy of a Christian hospital. There is no account of any hospital of any sort in Jerusalem until Christ's religion put one there China, Japan and India, Asia and Africa got and get hospitals out of Christendom Who much cares even now but Jesus' folks? Yes, Jews have them in Christendom. Jews in Islam had none Some philanthropists pour out wealth for colleges, libraries art galleries and things that show big. Christian Philanthropists are pouring out their wealth to fight tuberculosis, cancer and all diseases. It is the Christ-touched heart that becomes sensitive to misery The man on the street you hear "cussin" the church will be the man you will see over yonder at the hospital without money and without price, under snowy sheets with white-capped nurses in attendance day and night Yes, there under the attendance of the best doctors in town he gets the blessing of the very religion he reviles. No churches, no hospitals, no doctors, no nurses, no healing Ask the heathen.

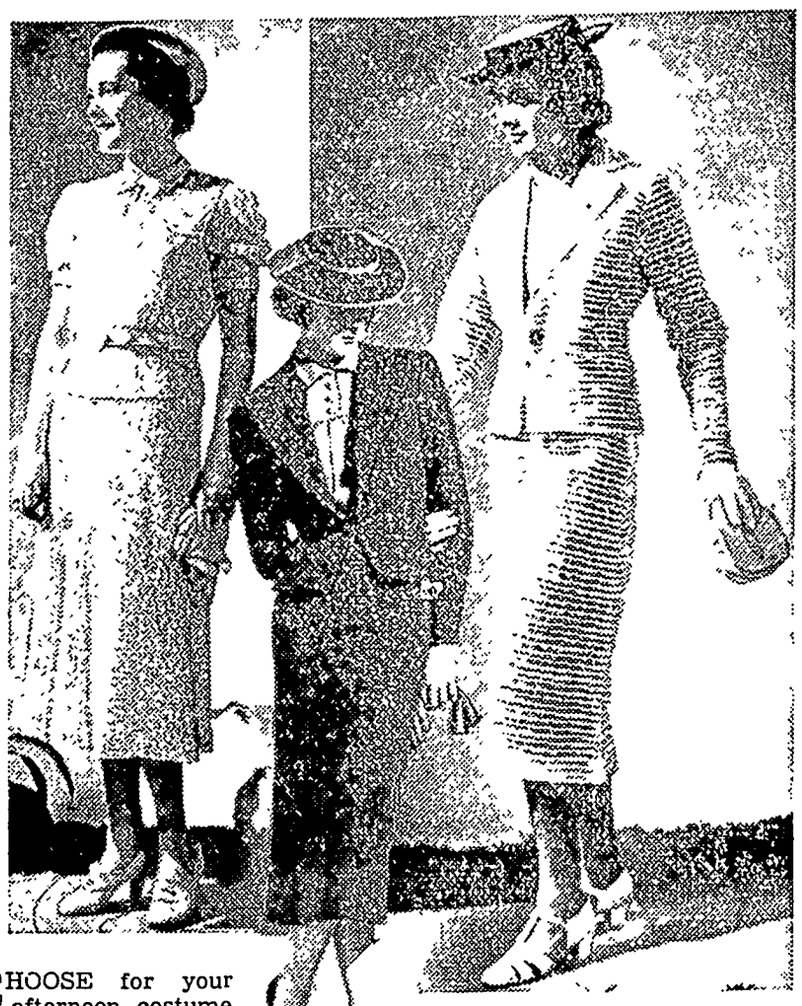
Lace Goes Style High for Day Wear

By CHERIE NICHOLAS



CHOOSE for your afternoon costume a suit tailored of lace and you will have arrived at the dizziest heights of fashion. We know of no more all-important, all-significant gesture that has to do with current costume design than this of tuning lace to general daytime wear.

The grand part of the existing enthusiasm for lace in the daytime is that it is revealing as it never revealed before the practical wearability for all hours and the assured adaptability of this feminine-beloved medium. Then, too, such wide use of lace as is now manifest, brings much anew of romance and loveliness into the afternoon hours of fashion.

Just recently a pageantry of lace was staged in the ballroom of one of the noted superb hotels in Miami which presented a most entrancing scene. At this gorgeous lace ball, which seemed almost as if it were a glimpse of fairyland, the program unfolded with breathtaking beauty with a promise of style futures that assured an unprecedented vogue for lace. Notwithstanding the lure of ravishing evening creations of shimmering filmy lace or of the very new printed laces or of crisp starched lace silhouettes, or of lace in the very new "pretty" colors (cyclamen pink, thistle, azure blue and such), not forgetting smart black or white, the big message comes to us of the importance of daytime lace fashions, such as, for example, the suit of dark lace centered in the accompanying illustration.

This model by Victor Stiebel (London designers are certainly coming to the front this season) is of navy wool lace lined with tile red crepe. The shirt blouse is in the same tile red crepe with pleats at the front from yoke to waist. The hat is designed especially to complement the suit, being of the identical wool lace worked with felt in the same colors.

Likewise, the daytime dress tailored of lace declares its practicality as well as its flattering, prepossessing looks. The two-piece model to the left in the picture, being smartly tailored, bespeaks all that one could wish for to wear to any afternoon occasion from spectator sports to the cocktail hour. Just now it is proving highly acceptable for cruise or resort wear. It is wearable, also, under the fur coat or a new spring topcoat, if you are faring north. It has puff sleeves and high pockets on the blouse, both of which features are pet topics with young girls this season.

The suit illustrated to the right speaks in dramatic terms of the use being made of val lace edgings this season. The shops are showing daintiest of blouses thusly fashioned of val and the neckwear departments are making a big showing of ravishing collar and cuff sets, bibs, vestees and the like of this type lace worked row-on-row on net foundations. In this model we see a winter resort fashion such as is to be taken seriously as a forerunner of a style-to-be when summer comes north. This stunning suit of shirred val lace on a net background tells better than words of the whole-hearted way in which designers are emphasizing lace this season.

And have you seen the new lace frocks with all-around pleated skirts! If not you have a revelation of super chic and charm awaiting you. There is a fabric type of lace suggesting eyelet embroidery that yields most graciously to this treatment. Printed laces are immensely important.

© Western Newspaper Union.

'TEEN AGE FROCK

By CHERIE NICHOLAS

Special emphasis is being put on dresses for the 'teen-age girl. Tailored girl fashions such as this are designed to avoid the "awkward age." They are youthful but not childish, simple but not plain. Here is a charming tailored girl dress. It is made of gaily patterned crinkled cloquassay cotton and is one of the many cunning models of this material that is being shown in the shops and 'teen-age dress sections this spring.

HAT CROWNS LOWER AS SKIRTS SHORTEN

Skirts are climbing higher and higher and now rest between 14 and 16 inches from the ground. In order not to present an awkward silhouette, the big couturiers are elevating waistlines and thus preserve symmetry. Daytime dresses have high waistlines and evening gowns go even higher with Empire or 1910 waistlines.

Hat crowns are tumbling as skirt lengths climb. The flowerpot crowns of last season have come back to normal in order not to look ridiculous with the shorter shirts. Many crowns are normally rounded while some are squared and others irregular in shape.

It is difficult to say what width and proportions spring skirts will take. Some houses show tight, narrow and short skirts, similar to that which was so popular earlier in the season. Still other houses show skirts that are slim and straight in front but leave much back fullness, inspired by the Directoire silhouette.

Hand Knit Goods Suited for Day or Night Wear

Expert workmanship has now made it possible for women to wear hand-knit clothes for every hour of the day or night. Knitted clothes being shown in Paris come in a variety of weaves and threads. Hand-knitted coats made of warm, heavy woolen threads are used for winter sports while lacy weaves of silk threads make cobwebby evening gowns. Some of the clothes are knitted directly on the needles to follow a certain pattern, but the greater part of the materials are knitted in great lengths so that the material can be cut, tailored and fitted more exactly to the styles of the day.

Black Still Leads

Black remains the popular choice for street wear, although colors are shown for sports or afternoon wear.

Keeping Up With Science

By Science Service

© Science Service.—WNU Service.

Air Moisture Causes Costly Losses in Power Transmission

Important Discovery Is Made at Harvard

Cambridge, Mass.—Losses in high-tension power transmission are expected to be considerably reduced through the discovery at the Harvard graduate school of engineering that moisture in the air is the hitherto unsuspected cause of the costly inefficiency of the porcelain and glass insulators used on the lines.

The discovery, made by Prof Chester L. Dawes and Dr. Reuben Reiter, was enabled by their perfection of a high-voltage bridge with which it is possible to detect the tiniest flaws in high-voltage insulation, a problem that has troubled electrical engineers for some time.

With the instrument, scientists can now enter an entirely new field of research in insulation and thus possibly bring man closer to his dreams of managing tremendous amounts of power safely and efficiently by revealing the causes of insulator "flashovers" which so frequently paralyze power lines.

Tentative findings also indicate that one of the causes of radio interference is due to high - voltage "static" discharges over the surface of these insulators.

Unknown for Thirty Years.

That moisture in the air could cause such flashovers and shortcircuits was unknown during the 30 years that insulators of this type have been in use until the two Harvard scientists began a series of delicate measurements with the Dawes bridge. These showed that atmospheric humidity, or moisture in the air, produces not only a pronounced power loss over the insulator but that the loss is greater over a period of time than if the scientists began with a clean insulator. The greater the moisture in the air, it was found, the greater is the loss. Cleaning the insulator by vigorous rubbing with a chamois cloth, however, was found to return the power to its initial value.

This led to the assumption that a permanent deposit forms on the surface of the insulator and decreases its efficiency, an assumption later confirmed by observations through a special "dark-field" microscope which readily reveals minute surface irregularities. The deposit, it was found, takes the form of millions of tiny islands which, because of difficulties of observation, are not visible with an ordinary microscope.

What Causes the Leakage.

The islands are formed, the two scientists believe, by the activating effect of high-voltage corona, or electrical discharge, on the air and the moisture contained in it. This action causes the nitrogen in the air and the moisture to form nitrous and nitric acid, which, acting with the metal of the insulator cap and tin, form the deposit. The exact composition of the islands is being further investigated, however, by chemical, X-ray and microscopic means.

Under normal conditions of the corona and atmospheric humidity, the resulting power leakage probably amounts to only a watt or so per hour for each insulator. With the accumulation of deposit, however, this loss increases with time, and for some systems may amount to a tremendous number of kilowatt-hours per year.

More important, however, according to Prof. Dawes, is the fact that the deposit is semi-conductive, and reduces the length of the insulating path over the insulator surface.

Natural Acid May Be Used to Protect Plants

London.—Arsenic, lead, copper and other mineral poisons now used to protect plants against fungus, bacterial and insect enemies may find practicable and harmless replacement in an acid naturally formed by living plants, suggests Maurice Copisarow, Manchester biologist.

The substance is known as maleic acid. Experiments have shown that it exercises an inhibitory effect on the growth of micro-organisms of decay, and Mr. Copisarow suggests that its effect may extend also to viruses hidden in dormant seeds and to insects in early stages of development This same natural inhibitor, he adds, is probably transformed into the natural accelerator of fruit ripening, ethylene, by a chemical change involving the liberation of carbon dioxide.

'Parapsychology' New Approach to Old Scientific Problem

Search for Truth of Thought Transmission

PARAPSYCHOLOGY! A new scientific term to describe a new scientific approach to an old subject.

Making its bow at Duke university, a new journal, and the first in its field to appear under the sanction of a recognized university, will be devoted to clairvoyance, telepathy and other arts of mind-to-mind communication without benefit of the inventions of science

"Para" means beside. In the Greek from which it comes, it also had such meanings as "amiss, faulty, irregular, disordered, improper, wrong," according to the Oxford dictionary These latter meanings are probably not intended by the sponsors of the new journal devoted to parapsychology, however, for the editors, Prof. William McDougall and Dr. J. B. Rhine, are convinced that men can transmit ideas without recourse to wires, radio, postal facilities or even speech—"extra-sensory perception" they call the art.

Man Seeks to Pierce the Veil.

For many centuries man has sought the means for looking into the minds and hearts of his fellow men. Perhaps it is because communication arts, amazing as the radio and telephone, telegraph and television are today, lag still behind the fleetness of human thought. Perhaps it is because of the truth of the saying that words are but a cloak to hide thoughts. Man has need to supplement the clumsy inadequacy of his language skill; he needs also to pierce the veil of human deception.

Science Must Decide It.

Science is always the balance wheel that can protect men against wishful thinking and what the mental physician calls a flight from reality. Scientific research, careful and unemotionally conducted, should set aside doubts and blast unfounded hopes in this emotionally charged field just as it has to so large an extent in the physical and biological sciences.

If there exists a way to reveal our thoughts to others without the medium of voice or post or printing press, then the persistent conscientious research of enthusiasts in the field of parapsychology should demonstrate it.

Brain Keeps Growing but "Brains" Don't, Says Dr. Hrdlicka

Washington.—The brain inside your head continues to grow until the age of fifty or sixty years.

Evidence for this invisible growth, detected by measurements of great numbers of human heads, is reported here by Dr. Ales Hrdlicka, noted anthropologist of the United States National museum.

That the human head continues to grow, until old age sets in, is demonstrated by Dr. Hrdlicka's own measurements of American heads. Foreign scientific studies reveal the same growth phenomenon in other peoples.

Dr. Hrdlicka has concluded the most logical cause for this head growth is that the brain itself is growing, since there is no evidence that the scalp or bones of the vault thicken with age. The chance that frontal sinuses would account for the enlargement is also discounted, since Dr. Hrdlicka explains that they attain their full growth when the adult is still fairly young.

Continued slight growth of the brain does not serve to improve intelligence in adults, so far as is known. That is, the new idea of a growing adult brain does not, so far, alter psychological views, that only in exceptional individuals does absolute intelligence increase after about twenty years.

New Type of Human Skull Is Found in Germany

Stuttgart, Germany.—A skull of an entirely new type of ancient human being, older than Neandertal man, has been discovered in a gravel pit at Steinheim, near here It has been subjected to critical scientific examination by Dr. Fritz Berckhemer of the Wurttemberger Museum of Natural History.

The skull was very little broken, and lacks only the lower jaw and a few fragments of the facial bones. It resembles the Neandertal type especially in the characteristic pronounced eyebrow ridges, the wide nasal opening, the massive upper jaw, and the rather low cranial arch. It is markedly different in being shorter, relatively wider, and much more rounded off at the back, and in having considerably less back-slope to face and forehead In these respects it is more like modern man.

UNCOMMON AMERICANS

By Elmo Scott Watson

© Western Newspaper Union

Schoolmaster of a Nation

HE WAS "the most popular American of the Nineteenth century, the man who had the largest influence in determining the thoughts and ideals of the American people during that period and the man to whose work many great Americans of the present day pay tribute as being the fountain of their inspiration to aspire and to achieve." He was William Holmes McGuffey, the "Schoolmaster of a Nation."

Born in Pennsylvania in 1800, McGuffey became a pioneer teacher in Kentucky after his graduation from a little college in his native state and later was offered a position on the faculty of Miami university in Ohio. Recognizing the lack of good reading material in the common schools of those days, McGuffey resolved to do something about it.

The result was the publication in 1836 of the first and in 1837 the second of a graded set of readers. The next year he published a third and a fourth reader. Then, with the help of his brother, Alexander McGuffey, who aided in the revision of the earlier works and collected much of the material for the next two, he issued his fifth and sixth Eclectic Readers.

McGuffey not only had a keen literary sense but he was also able to select from the world's best literature selections that appealed to children. That fact, combined with the high moral tone of the selections, which recommended them to parents trying to bring their children up in the way they should go, gave his readers great popularity. They sold by the millions in this country and were translated into many foreign languages so that the McGuffey influence was extended into other lands

How great that influence was—especially in this country—it is impossible to estimate. But there is no doubt that the serious purpose of the McGuffey Eclectic Readers, their kindly spirit and their teachings of the essential virtues made children of an earlier generation better men and women today. At least, that is the unanimous testimony of many American notables—authors, educators, industrialists, statesmen — not to mention thousands of "just plain folks" who belong to the numerous "McGuffey Societies" scattered all over the United States. At regular intervals they gather together to read again their favorite selections from the Eclectic Readers and to the end of their days they cherish in their hearts the lessons they once learned from this "Schoolmaster of a Nation."

He Saved an Empress

IF IT had not been for the resourcefulness and courage of an American dentist, the last empress of the French might have met death at the hands of an infuriated mob of revolutionists and another tragic chapter might have been written in the history of deposed royalty in that country. The empress was Eugenie, wife of Napoleon III, and the man who saved her was a Dr. Thomas W. Evans.

Not long after Louis Napoleon became emperor, Dr. Evans was made court dentist of the second empire. At that time dentistry was not the respected profession that it is today. But such was the genius of this former Philadelphian that he was held in equal esteem with all of Napoleon's ministers.

So on September 2, 1870, when news of the disaster at Sedan reached Paris and a bloodthirsty populace began clamoring at the gates of the Tuilleries and threatening the life of the empress, she said to the officers of the palace guard "I will go to Dr. Evans. He is an American. I am sure he will render us every assistance we require." With only a veil as a disguise and accompanied by one of her servants, the empress fled by a secret passage to where a carriage was waiting for her. Then she was driven in safety to Dr. Evans' home, only to find him absent.

When he returned, he realized that it would be dangerous for the empress to try to escape then, so she and her servant spent the night there. Meanwhile Dr. Evans had engaged a private carriage and the next morning he started out with the royal fugitive on a perilous journey

Everywhere soldiers were on the look-out for the empress but the quick-witted action and ingenious ruses of the American, more than once prevented their capture. By spending his own money freely he brought Eugenie in safety to the coast and there he persuaded the owner of an English yacht to take her to England.

Dr. Evans continued his practice in both France and America, and his inventions in his profession made him world famous. He later became one of the founders of the Red Cross society, and upon his death in 1896 he bequeathed his entire fortune of some twelve millions to American institutions.

Household Questions

If a hot cinder falls on your carpet and damages it, repair with wool. Buy skeins of wool to match the colors in your carpet. Fill in the damaged part with loops of the various wools, following the pattern as nearly as possible. The loops should be tightly packed together and made slightly higher than the pile of the carpet

* * *

To keep the crease in men's trousers, turn them inside out and soap down the crease with a piece of dry soap, then turn back to the right side and press, using a damp cloth. The crease will remain for a long time.

* * *

Filling for a sponge cake may be made by creaming three ounces of fresh butter and six ounces of sifted icing sugar, adding two ounces of chopped pineapple and a little pineapple syrup.

* * *

If sirup for hotcakes is heated before serving it brings out the flavor of the sirup and does not chill the hotcakes.

* * *

Your doughnuts will have a different flavor if one half stick of bark of cinnamon and four whole cloves are added to the fat used in frying them.

* * *

Stockings can become a very expensive item for the mother of school-children—who are always falling down and tearing big holes in the knees. Try this way of repairing an outsize hole: Take a piece of strong net to match the stocking and place over the hole on the inside of the stocking. Then darn the hole with wool that exactly matches the stocking on the right side of the stocking through the net. The repair, you will find, will be scarcely visible.

* * *

When the frying pan becomes slightly burnt, drop a raw potato into the pan for a few minutes. Then remove it, and all traces of burning will have disappeared.

WNU Service.

Fortitude Shown by Refugee Wasn't Sectional

For three years no water flowed through the irrigation ditches of a certain rancher's fields lay untilled and barren. The rancher's shallow well went dry and for several months he hauled water for his stock and household purposes from a neighbor's well five miles distant. One day without warning a cloudburst rushed down out of the hills and the rancher and family fled to higher ground for safety. From there they stood watching their buildings being swept away, the rancher turned to his son Jo and said: "Well, anyway, we'll have come Saturday night, no need to wash all over."—Kansas City Star.

POULTRY

EGG FERTILITY IS EASILY INCREASED

Over-Use of Males Is Not Good Judgment.

By Dr. W. C. Thompson, Professor of Poultry Husbandry, New Jersey College of Agriculture.—WNU Service

While a poultryman cannot always be sure that every egg selected from his breeding stock will hatch, he can achieve greater economy in chick production by taking steps to reduce the number of infertile eggs produced by his breeding flock.

There are several factors which result in infertility of hatching eggs. One is an inherently selective tendency on the part of certain male birds. Poultrymen should watch breeding males to make sure they are active and non-selective as breeders.

Over-use of males is another reason why some eggs are infertile. Sometimes too many hens are allowed per male or else the breeding males are not given a rest period during spring. One way to avoid this is to remove the breeding males for two days after they have been running with the hens for three or four days. Another way is to have alternate lots of breeding males, using one lot for a week and resting the other during that week, but this method cannot be used where pedigree breeding is being done.

When the weather is cold male birds stand around inactive and useless. This can be avoided by removing choice males from the breeding pens in the late afternoon, keeping them in protected quarters for the night and returning them to the pens the following day.

When these suggestions and other schemes which may occur to the experienced poultry breeder are properly worked into the management of the breeding flock, a considerable increase in the percentage of egg fertility can be brought about. Fertility is probably affected only in a small part by inherited characteristics. One of the most important steps is keeping the breeding males healthy, strong, vigorous, well fed and not over-used during the spring season. Allow only one male for every 10 hens at the most. This often involves having more males than one may have planned for, but an extra male bird or so may more than make up for the cost by the increased fertility obtained.

Battery Plan for Hens Still Up to Pioneers

It is certainly practicable to keep laying hens in batteries. This is being done both experimentally and commercially with results that seem to please many who are practicing it. Whether or not it will be profitable in any given case cannot be foretold; only a trial can determine this. Those who go into it states a writer in the Rural New-Yorker, must do so with the consciousness that they are entering a new field in poultry-keeping and must expect to serve among the pioneers.

It is obvious that costs of housing, installation of batteries, etc., will vary, not only with the choice of equipment—cages may vary from one to three dollars each in price—but with the facilities already at hand. Both the Ohio Agricultural station, at Wooster, and the New Jersey station, at New Brunswick, have published complete data with regard to experimental work with this use of batteries which is available to residents of these states.

Cornish Chickens

There are three recognized varieties of Cornish chickens: The dark, white and white laced reds. The dark variety is preferred. It is an extremely hardy bird; a fast grower. It has no difficulty in holding its own until maturity. Although it seems not to be ravaged by poultry diseases it is necessary for breeders to follow the rules of sanitation required by all fowls. Regardless of its weight when matured, the Cornish chicken consumes about one-third less feed than do other large-type chickens.

In the Henyard

The usual number of males used in breeding flocks is one male to 15 hens, or six to 100 is the usual number in commercial hatching egg flocks of White Leghorns.

* * *

In buying baby chicks, investigate the average production of the parent flock and whether the birds were selected for production, size, freedom from breed defects, and other points. The lowest acceptable flock record is 180 eggs.

* * *

The poultry population of Massachusetts increased 30.7 per cent between 1930 and 1935.

* * *

Furnish the layers sufficient room in laying houses so that they may exercise adequately and not be in too close contact, one with the other.

* * *

The principal poultry-producing states are in the Middle West. Iowa has led for several years with about 30,000,000 birds. Illinois, Missouri, Kansas and Ohio are other leading states.

Harmonizing With Spring

THIS week's crop of fashions seem fully as sweet and gay and long-awaited as lovely Spring—with which they're meant to harmonize. Mary, Sue and Emily, three charming standees, know how to have day in day out chic without forfeiting that pretty silver lining in their new Spring purses.

Hints From Mary's Boudoir.

"I'm especially fussy about the slip I wear, perhaps that's why I always sew-my-own! I never miss the few hours it takes, and I can spend the difference for a finer, better-wearing fabric. A slip that's well-behaved is a joy to yourself—others as well—and just as easy to have. So take a tip from one who knows: choose this model and a good fabric and you'll have no further slip troubles."

A Lift for M'Lady.

"A new frock means more to me than a new fabric and a change of color—it means a lift, a new lease on life!" So says Miss Sue, a snappy sophomore who sews. "I decided 1252 had the kind of newness I want: the clever cut of the waistcoat bodice first caught my fancy and the saucy swing skirt made me sign on the dotted line. I go for simple necklines, and I like lots of buttons too. You should see my version in royal blue silk crepe—really, it's something to be proud of."

Designers Win Praise.

"Smart Matron your granny," retorts Emily to an intended bit of flattery regarding her new welcome-to-spring frock. "If I look as young as I feel I'll be mistaken for a Laf-a-Lot! But honestly, this new dress gives me a more dressed-up feeling than any I can remember in Springs gone by. I think Sew-Your-Own designers are smart to give us '40's' some of that swing the youngsters rave about. Do you suppose they sympathize with the poor young men who are urged nowadays to 'Swing, Swing, dear Mother-in-law'?"

Pattern 1909 is for sizes 14 to 20 (32 to 46 bust). Size 16 requires 2¾ yards of 39 inch material.

Pattern 1252 is for sizes 12 to 20 (32 to 38 bust). Size 14 requires 3⅞ yards of 39 inch material plus ½ yard contrasting.

Pattern 1233 is for sizes 34 to 52. Size 36 requires 5⅝ yards of 39 inch material plus ⅝ yard contrasting.

New Pattern Book.

KLEMME MEN RUN AMUCK OF LAW, ONE IN JAIL, OTHER GETS FINE

Last week Monday night Sheriff "Dutch Brouwer and State Highway Patrolman Claude Benedict arrested Marvin Hanson and Alvin Larson, both of Klemme, after a chase on the highway

Hanson pleaded guilty to County Attorney W. D Daly's information last Tuesday morning on charges of driving while intoxicated He was taken before Judge M F Edwards in Mason City and given a 90 day sentence m the Winnebago County jail. Larson was taken before Justice of the Peace H V Reed at Garner and pleaded guilty to intoxication charges. He was fined $15 and costs.

CHICKS NEED, COD-LIVER OIL, YELLOW CORN, ALFALFA MEAL

Chick feeds must be well supplied with vitamins A, D and G R. M. Bethke, animal nutritionist at the Ohio Agricultural Experiment Station, in speaking at Iowa State College, declared that if feed contains 50 per cent or more of yellow corn and 5 per cent of alfalfa leaf meal, the chicks will be assured of a plentiful supply of vitmin A, which is so essential for growth and as a preventative of nutritional roup. This vitamin may be supplied wih fish oils. Vitamin D may also be supplied by these oils

An amount of oil equal to 1 per cent or more of the total ration should adequately protect chicks Vitamin G, which is essential for growth, may be supplied by adding 5 per cent of dried milk(or all the liquid milk chicks want to drink) and 5 per cent of alfalfa leaf meal to the ration. There is no need to feed yeast to supply this vitamin

If chicks are being fed an all-mash ration, vitamins A and D may be supplied by feeding cod-liver oil at the rate of one-half of one per cent of the ration This would be equivalent to 10 pounds of oil to a ton of mash. If the ration consists of equal parts of grain and mash, 20 pounds of cod-liver oil should be fed per ton of total feed.

And We Hope He Chokes On Snoose!

IT'S THE SWEDE'S MISTAKE BUT THE DANE'S ERROR

Wherein We Call Our Readers' Attention To Error In Dates

"Happy" Johnson can't read his own writing so how can he expect the Dane's printer's devil to translate a mess of hieroglyphics descended from the land of Swedes!

At any rate the date on the big flour special in Larson's ad last week was wrong, in fact the dates were a month wrong. However, the flour prices were RIGHT. . .nothing wrong about them. . .and they are so right that you can't afford to pass them up.

To appease the wrath of the Swede butcher we are reprinting the ad again this week with the dates extended for another week, and this time the dates are RIGHT . .so are the flour prices RIGHT . . .and you will be wrong if you don't steal some of that good flour at the prices they are quoting.

We Danes claim there ought to be an open season on Swedes. . . especially Swede butchers!

Shamrock Squad Presented Letters Earned In Basket Ball

BASKET BALL SQUAD HONORED AT BANQUET LAST MONDAY EVENING

Coach "Judge" Grimsley of Mason City Gave Talk Following Dinner

The members of Coach A. L. Kingery's basket ball squad were given a banquet at the high school Monday evening in celebration of their successful season just closed.

The banquet was perpared by the mothers of the boys and was served at a table arranged in a "U" on the high school stage The table was decorated in green and white, the school colors, and the two high school yell leaders, Carmen Kluckhohn and Nora Wellemeyer waited on tables.

Following the banquet Supt W H Galbreth took charge of the progran and acted as toastmaster Billy Lemke, Senior, spoke on the subject "Each Man on the Job" R A Jorgenson spoke on his observations "Along the Side lines" Ted Kaduce, captain of the championship team, told about the imporance of "Team Work" and Rev Grosshuesch talked on "Excercise or Education"

Coach "Judge" Grimsley, of Mason City, the outstanding coach m Iowa and whose teams have made more records than any team in the state, was the principal speaker on the program He gave his observations on a "Visiting Coach's View" His talk was very interesting and instructive to the boys.

Coach A. L. Kingery summed up the year's work in his talk on "Making The Grade," after which he awarded the letters to the squad.

Coach Chris Johnson, of Clear Lake, was a guest. Mr. Johnson invited the squad to again come to Clear Lake next fall and winter to use the gym there and to practice with the Clear Lake Lions.

EIGHT TABLES OF BRIDGE PLAYED AT GALBRETH HOME WEDNESDAY EVENING

Mr and Mrs. P. M. Wilson and Mr. and Mrs. Henry Galbreth entertained at eight tables of bridge at the Galbreth home last Wednesday evening. The games were played in the recreation room in the basement of their home. High scores were won by Mrs. F. J Arnold and A. L. Kingery; travel prize by Mrs. R. A. Jorgenson and low prizes by Mrs. Jim Reed and Dr. W. F. Missman. Lunch was served after the games.

HAVING SPROUTS ON POTATOES STARTED WILL SPEED THEM UP

"Warm up" your seed potatoes and get the sprouts started before you put them in the ground if you want them to come up early.

This is the suggestion of E. S Haber, associate professor of vegetable crops at Iowa State College, Ames.

If the potatoes have been held in storage at under 40 degrees the sprouts will not have started. It will be advisable to hold these at a temperature of 60 to 70 degrees up to 2 weeks before they are planted But if the sprouts have already started, then there is no point in warming them up

KLEMME FIRE COMPANY HELD ANNUAL BANQUET LAST WEEK FRIDAY

The members of the Klemme Volunteer Fire Company held their annual dinner last Friday evening at the Wiles Cafe The men had a chicken dinner and consumed thirty-five pounds of chicken as well as huge quanitys of other good foods.

At their recent election the fire company named the following officers:

Chief, Martin Brinkman
Asst. Chief. Fred Bell
President, John Etchen
Vice-Pres., George Lawhorn
Sec. Treas., W C. Keraus.

Other members of the fire company for the coming year are Erwin Lau, Lloyd Lau, Faye Smock, Roy Smock, Paul Mueller, Harland Trees, Herman Paul and Carl Anderson. The last three named are new members, and were appointed in place of Ed. Jacobs and Arley Blickenderfer, who resigned.

Never allow the roots of nursery stock to become dried out as this means death to the plants.

Senior Class Play Will Be Given On Two Nights

DRIVER'S LICENSE TAKEN AWAY FROM FORMER KLEMME RESIDENT

Sheriff "Dutch" Brouwer deprived Gilbert Schaper, Kanawha, of his driver's license Friday following a crash west of Klemme in which Schaper was involved.

Schaper, formerly of Klemme, was driving a Chevrolet coach of about a 1929 model when he crashed into a gravel truck operated by Francis Lawhorn of Garner. The Chevrolet was badly smashed while the gravel truck suffered to the extent of a bent fender and door.

Sheriff Brouwer, after investigating the wreck, deprived Schaper of his license to operate a motor vehicle.

LANDSCAPE EFFECT DEPENDS ON WHAT PLANTS ARE USED

The home surroundings may be dressed up in silks and satins or calicoes and ginghams even as can the "body beautiful" declare landscape architects at Iowa State College, pointing out that the choice of plants has much to do with the personality of the home .

Each plant has certain characteristics which will determine the part it plays in the final landscape Height, size and shape of the plant are primary considerations An American elm is vase-shaped, a Norway spruce cone-shaped, while Japanese barberry is a rounded mass. Some plants have a rigid, stiff appearance, while others give a graceful arching effect to the landscape The weeping willow and the American linden contrast in this respect.

Color and texture are also important considerations in the choice of a plant. The catalpa has large leaves, while the maple and elms have medium-sized leaves and the willows fine leaves. Too gaudy foliage is to be avoided if the effect of a quiet background is desired

In combining plants which will give a pleasing combination several pointers may be followed· Place the higher and usually coarser plants at the back of the border where height is needed Build up the corners The lower growing, finer textured plants should be placed before the taller material. Do no use to many different kinds of plants. Do not arrange the shrub border plants in tiers or rows, but stagger them in all directions Leave a grass strip of at least two feet between the shrubs and the walks.

SPRING IS HERE AT LAST, SO THINKS YE SCRIBE!

Spring officially began about March 21st but Ye Scribe did not become over enthusiastic about it when there was still plenty of snow and cold weather.

When we saw two striped gophers, several meadowlarks and a couple of robins last Thursday, we were then ready to think it was spring . but we are not saying it out loud yet!

A few early gardeners started work the latter part of the week and the rain early Monday morning made the grass look quite green

SENIOR CLASS PLAY TO BE GIVEN THURSDAY AND FRIDAY APRIL 22 AND 23

With a cast of fifteen characters working every day, the senior class play, "New Fires," is rapidly rounding into shape. This lively comedy, which also has some serious parts, will provide a full evening of entertainment for all who can arrange to see it at the Klemme High School auditorium next Thursday and Friday, April 22 and 23.

In this play, the audience will see Harold Abele as a Chicago author who orders his family to move to a farm in the Ozark Mountains of Missouri. His wife, played by Marjorie Wicks, and his children, Earl Reitz, Carmen Kluckhohn Nora Wellemeyer, and Paul Lau, offer plenty of opposition to the idea but are finally persuaded to go.

While the family is there, a neighbor girl, played by Wilma Swalve, brings scarlet fever to the house, and the family is quarantined. The young country doctor, Billy Lemke, attends to the family's needs and becomes very friendly wih one particular member of the family. An interesting part of the plot grows out of this situation.

Oher members of the cast who contribute toward the interest and comedy are Dorohy Greimann, Arlene Kraus, Velda Schaeffer, Ted Kaduce, Raymond Keeper, Evelyn Arnold, and Avis Barz. The play is under the direction of Miss Agnes Galbreth.

FOUR KLEMME LADIES ENTERTAINED AT TEN TABLES OF BRIDGE

Mrs. P. M. Wilson, Mrs. C. G. Waterman, Mrs A H Dulmes and Mrs. R. A. Jorgenson entertained Garner and Klemme ladies at a one o'clock luncheon at the R. A Jorgenson home last Thursday.

After lunch bridge was plaved at ten tables and high score was won by Mrs. E. F. Jacobs; second high by Mrs Roy Strate, Garner; travel prize by Mrs. Frank Clark, Garner; door prize by Mrs Jim Reed and low prize by Mrs. W. F. Missman.

Girl Scouts Advance To Next Scout Degree

KLEMME GIRL SCOUTS GIVEN FIRST AWARD IN SCOUTING

Tenderfoot awards were presented to twelve members of the Klemme Girl Scouts at a meeting held Tuesday evening at the high school gym, which was attended by mothers of the girls and by members of the Legion Auxilliary Mrs Ernest Lewis is captain of the troop and is assisted by Mrs Earl Schaeffer, Mrs Orville Stokesbary and Miss Novella Bredbenner

The following parts of the Scout program were presented by the girls· Jackie Kudie, "What is scouting?"· Gertrude Grosshuesch "Famous Trail Makers": Betty Etchen "Founder of Girl Scouts": Betty Reed, "What is a Patrol?": Ruth Stille, "Trefoil and it's Meaning": Ellen Kilgore, "Laws": Lorraine Buntenbach and Shirley Johnson, "Trail Signs": Colleen Gram and Phyllis Klotzbach, "Knots and Their Uses": Marjorie Lemke, "A Pet Story": Arlene Buseman, "Flag Etiquette."

Games were played and lunch was served by the scouts.

Economismts predict higher hog prices this summer.

Washington Digest

National Topics Interpreted
By WILLIAM BRUCKART
NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington—Throughout history, unsound economic policies have had a way of demonstrating their unsoundness by the results that eventually become understandable to the rank and file of the people. Likewise, throughout history the rank and file of the people have learned their lesson each time and have avoided burning their fingers a second time. That is, fingers were not burned a second time until a new generation came along and refused to examine and take into account the lessons of experience.

Experience as a Teacher

Lately, we have seen another such demonstration. We have seen both the results and the refusal of current leaders to profit by experiences of the past.

I refer particularly to conditions involving United States bonds, Those who have followed market quotations must recognize that United States bonds and other securities issued by the treasury have suffered from fluctuations in prices that portend, if, indeed, they do not prove that federal financial policies of the last four years were unsound. There was propaganda from official quarters during one of the periods of sagging prices that the condition resulted from market manipulations and the activities of "tipsters." Stories to this effect came directly out of the treasury although they did not carry the identity of the official who made the statements.

The whole circumstance must be considered together, however, if one is to arrive at any sort of a conclusion concerning the true state of affairs. One must think of the total amount of government securities outstanding — something like thirty-four-billions—and one must recognize as well what is going on in commerce and industry. In addition to these factors, attention must be given to conditions of the last several years when the Roosevelt administration was engaged — and still is engaged — in the greatest orgy of spending that our nation ever has known. When you add up these various factors, you get an answer which seems to me to be irrefutable.

In the first place, no nation nor any of its individuals can go on indefinitely spending money when it does not have that money. That is, it cannot spend more than its income over any extended period without suffering bad results. Our nation did that. It made up the difference between its income and its spending by borrowing. It gave government bonds to those from whom it borrowed, evidence of its debt. The immediate result of this condition was that there are millions upon millions of government bonds held by banks, corporations and individuals. These bonds bear an exceedingly low rate of interest.

It is only natural that anyone with money to lend will look for the highest interest rate they can get. If they happen to hold government bonds, those bonds will be dumped in favor of securities paying higher returns. That has happened to some extent already.

* * *

It is to be remembered as well that these bonds were issued in the currency of the devalued dollar, the fifty-nine cent dollar as measured by the value of gold.

Supply and Demand

Now, the law of supply and demand that has always operated and which always will operate places a basic value upon commodities, upon the services of labor. It is operating again and has brought about a greater demand for commodities, the things we need to eat or to wear and the countless items of modern day living. The prices of these, measured in present currency, are higher because it takes almost two of the present day dollars to buy the same quantity as formerly could be purchased with the dollar that was good for one-hundred cents in gold. The answer to this is that most of us can not help regarding gold as a commodity having a stable value. So, we see a result in this direction.

Labor, too, is demanding more of the fifty-nine cent dollars for its share of production. It has a right to do so. If you measure wages as you measure commodity values, and it seems to me there can be only one yardstick, then labor is justified in asking for higher pay Again, a result of tinkering with the currency becomes evident because labor is forced to pay more for what it buys as a result of the reduction in the dollar's gold value.

Then, finally, I am quite convinced that in addition to the factors I have discussed as having weight in causing fluctuation of government bond prices, no one can deny the influence that is being exerted by the radical labor element throughout the strikes that have been promoted.

These strikes have done more than just violate law by unjustified and unwarranted seizure of the property of other persons. They have developed among the strikers themselves a resentment against everyone who owns a farm or a home or a business.

The tragedy of this condition, to leave the subject of currency for a moment, is that the strikes show how little respect for law and order exists among a segment of our population. It is not only a tragedy. It is a dangerous sign and unless somewhere in our nation, government asserts its authority and protects rights, we may possibly be faced with a circumstance in which our nation will be held together again only by use of army guns.

* * *

To get back then to the bond market it seems to me there is a closely knit skein of conditions that prove where our government has gone into unsound ground. It can be pointed out how the tinkering with the currency has carried through to the ultimate consumer and the wage worker. It can be shown how the national government has disregarded the rights of part of the population and favored another part of the population and in doing so has created a class hatred which is liable to cause trouble in the nation for the next fifty years.

Unsound Ground

Notwithstanding the lessons to be learned from these experiences we observe how the same mistake is being made in another way. I refer now to the attitude of administration leaders who are supporting President Roosevelt's program to add six justices of his own choosing to the Supreme court of the United States. Throughout the argument that has come from proponents of the President's packing plan there runs a constant and recurring appeal that if we can only have six new justices in the Supreme court we can do all of the things that are necessary to bring about labor peace and complete business recovery.

Disregarding the merit or demerit of this argument, it seems to me one cannot help looking somewhat into the future and determining on the basis of experience of the past what may happen if the Supreme court is emasculated as the President proposes.

I said earlier in this article that there has grown up a tremendous disrespect for law. The continued prattle about the necessity for "new blood" in the Supreme court is simply and frankly another step in the direction of a government by men and not a government by law.

It is to be recalled that Mr. Roosevelt was given by his rubber stamp congress more power than any President of the United States ever has exercised before. I do not make the charge that the difficulties that I have attempted to analyze above resulted directly from according the Chief Executive so much power. But history surely teaches the lesson that where one man has so much power available he always makes more mistakes than where that power is exercised by the properly appointed or elected representatives of the masses of the people. I recall a homely saying, often heard in my youth, that two heads are better than one even though one may be a cabbage head. I am quite convinced that the 435 members of the house of representatives and the 96 members of the senate have more wisdom collectively than one man.

Adverting again to the questions of currency and prices, we have only to look across the Atlantic ocean and see what happened in Italy, in Russia and in Germany where one man attempted to establish his own ideas on the currency. From what I have heard from official sources, it must be true that in those three countries I mentioned, there are billions of pieces of paper money that are worth altogether little more than the cash value of the paper on your walls. It always has worked out that way.

* * *

Some of the business interests of the country apparently are taking time by the forelock and adjusting themselves to conditions where the government is by men and not by law. A few days ago the distilled spirits institute announced that it had elected W. Forbes Morgan as its president. Mr. Morgan, an uncle by marriage of Mrs. Franklin D. Roosevelt, resigned as treasurer of the Democratic National committee to enter the employment of the liquor interests. While there was no official announcement concerning Mr. Morgan's salary, the gossip persists that he is to be paid something like five-hundred-thousand dollars for five years' work in his new job.

Take Time by Forelock

His election raises two questions: What can Mr. Morgan do for the liquor industry that is worth so much money and, secondly, whether the selection of Mr. Morgan does not show how stupid business interests can be.

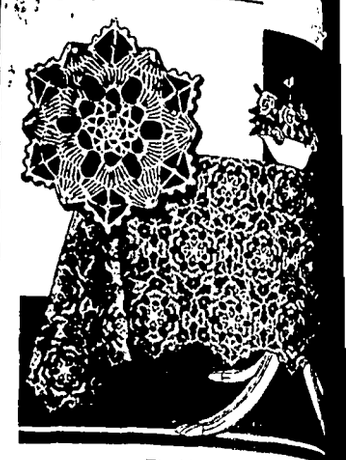
Enchanting Gifts of Lacy Crochet



Pattern 1345

A chance at rare beauty—fine luxury—is yours in this lacy crocheted lace cloth! Just inch medallion crocheted in string forms it—you'll have a quantity of them together in no time. Think what lovely gifts you can make of them—chair sets, scarfs, pillows, buffet sets are but a few suggestions. They cost you next to nothing and are something that will last and be cherished indefinitely. Pattern 1345 contains directions for making the medallion and joining it to make various articles; illustrations of it and of all stitches used; material requirements.

Send 15 cents in stamps or coin (coins preferred) for this pattern to The Sewing Circle Needlecraft Dept., 82 Eighth Ave., New York, N. Y.

Write plainly pattern number, your name and address.

My Favorite Recipe

By Irene Rich, Film Actress

Chicken Stew

Divide a chicken, stew until tender, and remove to hot platter. To the stock add one-half cupful of rice and dumplings made as follows:

Beat one egg, add one-half cupful of water, pinch of salt, and sufficient flour to make a thin batter; drop by spoonfuls into the stock and cook about ten minutes. If rice is uncooked it should be boiled twenty minutes before dumplings are added.

So scornfully she bangs around,
What little things I've got.

President vs. Supreme Court—An Ancient Feud

By ELMO SCOTT WATSON

FROM the nation-wide furore over President Roosevelt's plan for judicial reform, including the so-called "packing" of the Supreme court, one might assume that all this were something new in our history. But the fact is that the issue of President vs. Supreme court is an ancient feud which began during the earliest days of the republic and has flamed up at one time or another during the last century and a quarter.

There is a curious analogy between the first of these instances and the latest. The first was back in when Thomas Jefferson was elected President as the can- ate of the Republican party (the ancestor of the present nocratic party) and was preparing to give the country the "New Deal" administra- after eight years of rule the Federalists.

those days the Supreme rt consisted of a chief ice and five associate ices, provided for under judiciary act of 1789 ch also prescribed the

JOHN MARSHALL

ties and jurisdiction of the bunal. It also provided for ree circuit courts to be held ice a year, each composed two justices of the Su- eme court sitting with one strict court judge, and for federal district courts. hen members of the Su- eme court protested against ese circuit riding duties, e house of representatives dered an investigation of e situation.

Edmund Randolph, Washing- n's attorney-general, conducted and reported against the cir- it riding duty, so in 1793 con- ess provided that only one jus- e need attend each circuit, thus aking six justices available for rcuit riding duty. Although this nproved the situation somewhat still worked a hardship on the stices. In 1799 President John dams again brought the matter efore congress. The result was e second judiciary act, passed n February 13, 1801 which elim- ated entirely circuit riding by embers of the Supreme court, reated 16 new circuit judges for e six circuits and expanded the ower of the federal courts to eir full constitutional limit. It lso provided that after the next eath of a member of the Su- reme court, the membership of hat body should not be more han five.

The Republicans Protest.

Immediately the Republicans aised a terrific uproar. They aw in the bill an attempt by he Federalists, who had lost the residency and congress in the lection of 1800, to entrench themelves firmly within the judiciary, especially in the provision for imiting the membership of the upreme court to five. Sixty-nine- ear-old Justice William Cushing was in poor health and not ex- pected to live. If he didn't, Jeffer- on, under the provisions of this ew act, would not be able to ppoint his successor, thus keep- ng the membership of the court olidly Federalist.

During the next 13 days, dams sent to the senate nomina- ions for the new judgeships. They were chosen almost entirely rom among the Federalists and many of them for purely political easons. By March 2 the senate had confirmed the last name of hese "Midnight Judges," as the Republicans called them because many of their commissions were filled out by Adams on the last day of his term in office.

Two days later Jefferson was sworn into office by his fellow-Virginian but political enemy, John Marshall, who had been Adams' secretary of state and whom the President had appointed Chief Justice of the Supreme court late in January.

One of the bitter issues of the campaign had been the Alien and Sedition laws, passed during the Adams administration to restrain the vicious attacks of Republican editors on the President and his followers. These laws were now made an issue in the fight on the Supreme court. The Republicans declared that the court should have declared the Sedition act unconstitutional as a violation of free speech. Jefferson first proposed to declare it null and void in a message to congress. Finally, however, he just decided not to enforce it against offenders arrested before the expiration of the act on March 3, 1801 and to pardon prisoners then in jail for violating it.

But his followers were not content with this example of the Chief Executive taking upon himself the function of the Supreme court. They had been enraged by the stump speeches delivered by Federalist judges when instructing juries and they were especially bitter against Justice Samuel Chase of the Supreme court who had been especially severe in denouncing Republican principles from the bench. "The modern doctrines . . . that all men in a state of society are entitled to enjoy equal liberties and equal rights" he had said, "will . . . certainly and rapidly destroy all security to personal liberty"—this from a man who, as a delegate to the Continental Congress from Maryland, had signed the Declaration of Independence!

A Vote to Impeach.

The house of representatives voted his impeachment and John Quincy Adams said that it "unquestionably intended to pave the way for another prosecution which would have swept the judicial bench clean at a stroke." "Now we have caught the whale, let us have an eye to the shoal" said Jefferson, indicating that Adams' change was a valid one. But in the senate, where the impeachment trial was held, the Federalists were strong enough with their nine senators out of the total membership of 34 to

SAMUEL CHASE

prevent the necessary two-thirds vote for Chase's removal.

Although defeated in their attempt to oust Chase, the Republicans moved at once to repeal the odious "Midnight Judges bill" of March 13, 1801 and thus get rid of the new district judges appointed by Adams. Of course, the Federalist senators raved against this "assault upon the judiciary." They declared that judges were entitled to a life tenure and that the repeal of the law would wreck the Constitution. But the Republican majority nevertheless repealed the law on March 8, 1802, thus guaranteeing six judges on the Supreme court bench. Then, ironically enough, the Supreme court, composed almost entirely of Federalist judges, upheld the constitutionality of the repeal act which had the effect of restoring the much disliked circuit riding system. Incidentally, Justice Cushing did not die, as had been expected. He continued to serve until 1810, so Jefferson did not have an opportunity then to appoint a justice.

His opportunity did not come until 1807. In that year the demand for another circuit in the rapidly-growing new West led to the establishment of one comprising Kentucky, Tennessee and Ohio and the addition of a seventh associate justice on the Supreme court bench. Then Jefferson had an opportunity to appoint three justices, two for vacancies and one for the newly-created associate justiceship. But he soon found himself balked by his own appointees. One of them, Justice William Johnson, rebuked him for his embargo acts and the others joined with Chief Justice Marshall in strengthening the federal government in opposition to Jeffersonian ideals.

A cartoon in Frank Leslie's Weekly printed at the time of Grant's alleged "packing" of the Supreme court.

For it was during this period that John Marshall, with his interpretations of the Constitution, increased the authority of the judiciary and elevated the Supreme court to the prestige which it has enjoyed ever since. In the celebrated Marbury vs. Madison case in 1803 he laid down for the first time in the name of the entire court the doctrine that the judges have the power to declare an act of congress null and void when, in their opinion, it violates the Constitution.

Jefferson Views With Alarm.

This doctrine caused consternation among Jefferson and his supporters. Exclaimed the President: "If that idea is sound, then indeed is our Constitution a complete felo de se (legally a suicide). For, intending to establish three departments, co-ordinate and independent, that they might check and balance one another, it has given, according to this opinion, to one of them alone the right to prescribe rules for the government of the others, and to that one too, which is unelected by and independent of the nation . . . The Constitution, on this hypothesis, is a mere thing of wax in the hands of the judiciary which they may twist and shape in any form they please ... A judiciary independent of a king or executive alone is a good thing; but independent of the will of the nation is a solecism, at least in a republican government." But Marshall's idea prevailed and in this first feud between the President and the Supreme court, the latter was completely victorious.

In 1837 two more justices were added to the Supreme court. Soon after Lincoln became President there were three vacancies in the Supreme court—two resulting from death and a third from the resignation of a Southern sympathizer. At first the new President did not seem to be in a hurry to fill the vacancies. But with cases challenging the North's blockade of Southern ports coming up, it seemed advisable to do so. Then on March 3, 1863 congress added Oregon to California to form the tenth circuit and provide an additional justice for the Supreme court.

Three days later Lincoln appointed Stephen J. Field to the new post and on that day the court upheld the legality of the federal government's blockade. It is not clear whether there was any connection between the doubt over what the court's decision would be in this case and the appointment of the tenth justice. But as it turned out, Field's vote wasn't needed. For the court, by a five to four vote, upheld the government.

Then in 1864 Chief Justice Roger Brooke Taney died and Lincoln named Salmon P. Chase, his secretary of treasury, as Taney's successor. This appointment had an interesting aftermath.

In 1866 the number of justices was reduced to eight. In April, 1869, the house passed a bill providing for a ninth. It had originally included in this bill a provision similar to that proposed by President Roosevelt for the appointment of additional justices for incumbents over seventy years of age. This was inspired in part by the fact that Justice Grier, then seventy-six years old, was in a feeble condition, mentally as well as physically. In the fall of 1869 the other justices of the court sent to Grier a suggestion that he should retire.

The senate, however, refused to concur in the house proposal for appointment of additional judges and as a compromise it was provided that any federal judge who wished to retire after reaching the age of seventy years and serving 10 years on the federal bench could do so with pay.

This bill would have permitted President Grant to make only one appointment to the Supreme court — since the membership had not fallen below eight since the passage of the 1866 act. When it became effective in December, 1869, the Supreme court was engaged in deliberating on the legal tender cases. The first conference of the court on the case resulted in a four to four decision. Grier suddenly shifted his position, after an inconsistency was pointed out to him, and the court ruled five to three adversely on the legal tender acts.

Rejecting His Own "Baby".

One of the justices who voted against the act was Chief Justice Chase. As secretary of the treasury in Lincoln's cabinet he had inaugurated the policy of issuing paper money and now as Chief Justice he held that his own "financial baby" was illegal!

On December 15, 1869 Grier submitted his resignation to take effect on February 1. Meanwhile President Grant nominated Ebenezer Hoar, his attorney general, to one of the Supreme court vacancies. But he was rejected by the senate—before the legal tender decision became known. Grant also named Edwin M. Stanton, his secretary of war, to Justice Grier's place but Stanton died four days after the nomination was sent to the senate.

On February 7, 1870, as the Supreme court was announcing its adverse decision in the legal tender cases, Grant sent to the senate the names of William Strong of Pennsylvania and Joseph P. Bradley of New York for the two vacancies on the court. It was this coincidence, plus the subsequent events which gave rise to charges that Grant had "packed" the court to get a reversal of the legal-tender decision. Four days after the confirmation of Strong and Bradley, Attorney General Hoar moved for argument of two other legal-tender cases and the earlier decision finally was reversed by a five-to-four vote on May 1, 1871, Strong and Bradley voting with the previous minority.

Although Grant has been charged with deliberately "packing" the court, historians gen-

SALMON P. CHASE

erally absolve him from that charge. They point out that Grant had no advance knowledge of the nature of the decision, and that, since virtually every state court (except Kentucky) and every prominent Republican lawyer held the view that the legal-tender act was constitutional it would have been impossible for the President to find any state judge or any lawyer of his own party who differed from Strong and Bradley in the view which they later expressed on the Supreme bench.

UNCOMMON AMERICANS

By Elmo Scott Watson

© Western Newspaper Union

Christmas Flower

WHEN you buy one of those scarlet-petaled flowers called the poinsettia to add to the festive appearance of your home at Christmas time, you are helping perpetuate the fame of an American who little realized that his name would become associated with one of the symbols of the Yuletide. For Joel R. Poinsett had so many other claims to distinction that it seems curious he is best remembered because a flower bears his name!

Born in South Carolina in 1779, he studied both medicine and military science abroad but his father induced him to abandon his intention of entering the army and to become a student of law. Poor health forced him to give that up and he asked President Madison for a commission in the army. He was about to be appointed quartermaster-general when the secretary of war objected.

Instead he was sent on a diplomatic mission to South America where he mixed in the politics of Chile, and fomented revolution until he became known as "the scourge of the American continent" and was recalled. Next he was sent to Mexico. Always interested in botany, he brought back from that country the flower which was given the scientific name of "Poinsettia Pulcherina."

Just as he had been a stormy petrel in international politics, so he was a disturbing element in the politics of his native land. During the Nullification controversy in South Carolina he organized and led the Unionist forces. By doing that he won the esteem of the national government and President Van Buren made him secretary of war.

Poinsett improved and enlarged the army, organized a general staff, built up the artillery, directed the Seminole war and managed the removal of some 40,000 Indians to Indian Territory. In the midst of this activity his scientific interests were not neglected. He experimented with scientific agriculture, sent out the Wilkes expedition into the Antarctic and was largely instrumental in founding the National Institute for the Promotion of Science and the Useful Arts which later was merged with the Smithsonian Institution. His busy career came to an end in 1851 while he was living in retirement as a plantation owner in his native state.

Brooklyn Bridge Jumper

BACK in the eighties the Brooklyn bridge was one of the wonders of the modern world. Its dedication on May 24, 1883 was an event of nation-wide interest but three years later it was even more in the news because of a man with whose name that great span has been linked in popular memory ever since.

He was Steve Brodie, bootblack, street car conductor, sailor and worker around the docks who became a professional walker as a means of earning some easy money. But he was never better than a second-rater and none of his walking matches ever benefited him greatly. In the summer of 1886 he was nearly "broke."

One day in July he heard some of his friends talking about the latest casualty among the men who had tried for fame and fortune by diving from the Brooklyn bridge to the river, 135 feet below. Seven of them had tried it and all of them had been killed.

"Huh, I bet you I could do it and not be killed," boasted Brodie. "Bet you $100 you can't!" replied a friend. "You're on!" was Brodie's answer. But he was evidently none too confident that he could make good on his boast for he took out a life insurance policy for $1,000 as a protection for his wife, just in case . . .

On July 23, 1886 Brodie jumped off the bridge and came up without a scratch. Officials of the life insurance company were furious because he had risked $1,000 of their money to win $100. They returned his premium and cancelled his policy—which was foolish, for he lived to a ripe old age!

His successful jump was widely publicized. It won him an engagement in a melodrama called "Blackmail" in which he had to dive off a great height into a net—a feat which, he declared, was even more dangerous than his jump from the bridge—and his performance in this (at $100 a week) made "Brodie, the Brooklyn Bridge-Jumper" famous all over the country. His achievement encouraged imitators and during the next few years no less than 11 others tackled the nation's most spectacular high dive. Although the first seven had perished in their attempts, Brodie seemed to have broken the jinx, for every one of the 11 survived. By that time the novelty of such a feat had somewhat worn off. But Brodie's fame as the first to make a successful jump was secure. Moreover, he contributed another picturesque phrase to the American language, for "doing a Brodie" is still a synonym for a spectacular jump or plunge from a height.

Household Questions

Making a Footstool — Do you know that you can make unique footstools out of the single spring seats of an old automobile? Cover the old seat with upholstery and attach castors at the four corners. This will give you a comfortable seat or footstool for your summer cottage.

* * *

Cooking Vegetables — A small piece of butter added to the water in which vegetables are to be cooked will prevent them from boiling over.

* * *

Flavoring Gravy — Half milk and half water makes the best colored and best flavored gravy.

* * *

Suede Shoes — Rain spots can be removed from suede shoes by rubbing with fine emery board.

* * *

Boiling Cabbage — When you cook cabbage, put a small handful of breadcrumbs tied in muslin into the pan. The bread absorbs all the bitter juices and makes the vegetable more digestible.

* * *

Worn Socks —Children very often get enormous holes in the heels of their socks. This is often due to the lining of the shoe which has worn rough. If the ragged bits are cut off and the inside of the shoe covered with adhesive tape, many a large "hole" will be prevented.

* * *

Cocoa Egg Cake Filling — White of one egg; one cup icing sugar; two teaspoons cold water; four tablespoons cocoa; half teaspoon vanilla. Beat white of egg until stiff and dry. Mix cocoa and sugar, add cold water. Add gradually to egg white until thick enough to spread.

Money As a Power Not to Be Abused

Money in our day means power, and if a man uses that power to buy off men so that they betray their homes, friends, or country, or for purely selfish purposes, he is abusing his power.

Money is to be used for food, clothing, shelter, education, amusement and creation. It is to be saved—not hoarded—for sickness, old age, investment, and service to others. It is to be given away to relieve suffering, for study, for welfare work, for anything that will make the world a better and happier place to live in. The problem is not "How much money have you?" Did you earn it? How do you use it?

Dr. Pierce's Favorite Prescription is a tonic which has been helping women of all ages for nearly 70 years. Adv.

A FAMOUS DOCTOR

As a young man the late Dr. R. V. Pierce practiced medicine in Pa. After moving to Buffalo, N. Y., he gave to the drug trade (nearly 70 years ago) Dr. Pierce's Favorite Prescription. Women who suffer from "nerves," irritability and discomforts associated with functional disturbances should try this tonic. It stimulates the appetite and this in turn increases the intake of food, helping to upbuild the body. Buy now! Tabs. 50c, liquid $1.00 and $1.35.

Radiant Sunshine

Those who bring sunshine to the lives of others cannot keep it from themselves.—J. M. Barrie.

Watch Your Kidneys!

Help Them Cleanse the Blood of Harmful Body Waste

Your kidneys are constantly filtering waste matter from the blood stream. But kidneys sometimes lag in their work—do not act as Nature intended—fail to remove impurities that, if retained, may poison the system and upset the whole body machinery.

Symptoms may be nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of pep and strength.

Other signs of kidney or bladder disorder may be burning, scanty or too frequent urination.

There should be no doubt that prompt treatment is wiser than neglect. Use *Doan's Pills*. *Doan's* have been winning new friends for more than forty years. They have a nation-wide reputation. Are recommended by grateful people the country over. *Ask your neighbor!*

Miss Anna Trampel was a Thursday afternoon caller at the Mrs. August Trampel home

Mr and Mrs Albert White and family were entertained as dinner guests at the Mrs Ethel White home in Goodell Sunday.

Mr and Mrs. John Lass and Betty were Sunday visitors at the parental Pete Merkel home near Rockwell.

HOLSINGER LISTS BEST VEGETABLE VARIETIES

What varieties of garden seeds should I plant this month?

Every family gardener—Whether on the farm or in town—is voicing this question now as Iowa's gardening season moves from the hot bed and cold frame stage to the freshly plowed ground

C. V Holsinger, Iowa State College extension horticulturist, says there are many varieties of vegetables which have proved successful in this state. For gardeners who will be buying seeds for planting during the next three weeks he has listed a few:

Radishes—Scarlet Globe, Crimson Giant, White Icicle, Scarlet Turnip and Rose Chinese.

Leaf Lettuce—Grand Rapids

Peas - Alaska, Little Marvel, Gradus, Thomas Laxton, Admiral, Perfection and Telephone

Carrots—Chantenay, Ox Heart, Danver's Half-long and Amsterdam Coreless.

Parsnips—Hollow Crown and Guernsey

Spinach — King of Denmark Bloomsdale and New Zealand.

Onions —Southport Globe, Yellow Prizetaker, Red Globe, Crystal White, Wax Bermuda, and Yellow Bermuda

Vegetables recommended for planting in May and June include:

Bush Beans—Pencil Pod, Black Wax, Wardwell's Kidney Wax, Bountiful and Stringless Green Pod

Pole Beans—Kentucky Wonder Wax, and Kentucky Wonder.

Lima Beans-Fordhook Bush, Henderson's Bush, Early Leviathan Pole and Carpenteria Pole

Early Cabbage — Copenhagen Market, Golden Acre, and Early Jersey Wakefield.

Late Cabbage—Late Flat Dutch and Danish Ballhead.

Sweet Corn—Sunshine, Golden Bantam, Stowel's Evergreen and Country Gentleman.

Cucumbers—White Spine, Chicago Pinkling and Davis Perfect.

Squash — Summer Crookneck, Table Queen, Chicago Warted Hubbard, Banana and Marblehead.

Pumpkins — Connecticut Field, and Sugar Pie.

Muskmelons — Hearts of Gold, Pollock 10-25, Hale's best and Tip Top.

Watermelons — Kleckly Sweet, Pride of Muscatine, Tom Watson, Iowa Belle and Iowa King

Tomatoes — Earliana, Stone, Marglobe and Greatimore.

Potatoes—Cobbler

Sweet Potatoes Nancy Yellow Jersey, Red Jersey Prolific.

Farmers in doubt about well their seeds will germ should get in touch with county agent at once or send ples of seed direct to the seed oratory at Iowa State College

SCHOOL NEWS

Grades 7 and 8

Those who have a perfect attendance this last six weeks are: Garland Brinkman, Lorraine Buntenbach, Billy Zabilka, Duane Trees, Keith Stille, Jacqueline Kudje, Fritz Gobeli, and Dorothy Baack.

The seventh grade arranged alphabetically the books in our library Friday afternoon.

Grades 5 and 6

Six weeks tests are over now and we have begun work on the last six weeks of the year.

Eugene Haberkamp and Collene Gram were each absent a day last week because of illness.

In fifth grade language we have completed our workbooks.

Grades 1 and 2

Joyce Beatty is visiting in first grade for two weeks. She is Roger Ridders cousin.

Some of the second graders have new readers.

We have a first and second grade newspaper tacked to our bulletin board.

The second grade girls have nearly finished their rag dolls and the boys are busy sawing out their toys.

The counter in our toy shop is painted and we can soon begin playing store.

On Friday the second graders made up bear stories They read them to the first graders.

Ruth Smith had a "pretend birthday party" on Wednesday. Her birthday really comes in June, after school is out.

Public invited to all these services.

"Some folks are like rowboats—they have to be pulled wherever they go. Others are like sailboats—if the wind blows east they go east. That's their direction. If it blows west they go west. They go with the wind. Others still are like power-boats who drive against the wind or tide and in the face of great difficulties keep their course.."

"Come thou with us and we will do ye good"

CANNED FOODS ARE SAFE

Canned foods are among the safest foods that come to our table.

Spoilage of food in in containers is easily detected says Miss Bella Lowe, professor of foods and nutrition at Ia State College. Before the can is opened, niether end of the can should be bulged or swelled; after it is opened, the contents may be judged as readily as any other food.

Dented or rusted cans are not always a sign of spoilage, explains Miss Lowe. If the dents are to deep, however, or the rust has so penetrated the can as to cause a leak, spoilage will result.

Freezing of canned goods does not harm them or detract from their appearance. With some foods of creamy consistency, freezing may cause a curdling or separation of water from the food. The normal appearance of such products is usually restored by heating, she explains

Contrary to the belief of most housewives, it is safe to leave food in an open can. Food spoils no faster or no slower in the open can than in any other open container, although the same care should be taken to keep it cool and covered Some labels suggest removing the contents from the can as soon as it is opened because food in an open can, when partly consumed, presents a less attractive appearance than when transferred to a dish of suitable size.

Canned foods are best stored in a moderately cool, not refrigerated temperature—a cool, dry cellar, or closet is suitable. Storage near steam pipes, radiators, furnaces, kitchcen ranges should be avoided.

Mrs. Walter Beatty and daughter, Joyce. of Chicago, are here for a visit at the home of her parents, Mr. and Mrs. Fred Ridder.

Hunting for a frozen cave-man in Siberian marshes which have not thawed out in 30,000 years. Read about this Russian expedition in the American Weekly, the magazine distributed with next SUNDAY'S CHICAGO HERALD AND EXAMINER.

New Suits Stress Contrast Wools

By CHERIE NICHOLAS

ALMOST any suit is trumps in spring fashions. The great variety of wool fabric has been an inspiration to the designers, who have outdone themselves in creating irresistible suits ranging in type from the most casual sports model to the most formal dressmaker suits.

The outstanding appeal of suits this spring is their ingenious play of contrast—the most fascinating contrasts in weaves and in patternings, some plaided, some striped, others such as bright tweeds with multi-colored nubbings and other amazing novelty woolens, these contrasted with plain most fetchingly.

The old story of mannish tailored suits is given several brand new twists this season, greatly due to revived fashion interest in fabrics that were your grandmother's favorites when she was a girl.

The old-fashioned, now new-fashioned twills which are showing such strong revival are as adaptable to dressmaker suits, which are femininity itself, with their quaint peplums and soft stitched lapels as they are to strictly classic tailleurs. Gray, beige, postman blue and navy are favorites in twills.

Sheer wools and wool crepes in solid or novelty patterned fabrics answer to the call for bolero and eton jacket suits. Often the bolero, or some such jacket type, is of the novelty wool topping a suit or tailored dress of monotone weave. These feminine devices in refreshingly versatile moods will be flourishing the entire season through and we've seen them with linings and blouses in bright or pastel taffeta with either swing or full-pleated skirts.

For planning a spring wardrobe, the three-piece suit is a logical beginning. By three-piece we mean any type suit or tailored wool dress you may choose plus a weather-resisting topcoat or a debonair cape (capes are so very smart) in a gorgeous woolen that accents color glory and weave to an exciting degree.

Your suit choice may be delightsomely frivolous and youthful, stressing a perk jigger coat, (the young set adores this new type) especially if it is of gay tapestry plaid woolen in colors of saddle-tan and brown as centered in the group pictured. Note the small pointed collar and diagonal slash pockets. The skirt in saddle-tan shetland-type tweed has three stitched gores in front, and the matching border-stitched tuxedo of the coat buttons down on either side of the collar.

Perhaps you prefer to top a lustrous fleece wool in saddle-tan with a finger-tip swagger coat that fastens high at the neck wih an unusual leather clasp, as illustrated to the left. The suit itself has five leather buttons down the front of its jacket, because leather trimmings are quite the rage this season.

In the model to the right the color contrast theory is worked out stunningly in that the collarless cutaway jacket worn with this smart finger-tip jacket-suit of men's wear flannel, is of gray and red check woolen with a red belt and ascot for accents. Topped with its jaunty swagger coat in a gray herringbone wool the idea of using three contrasting wool weaves is demonstrated to a nicety. And so in conclusion, whatever system you use, in a swank suit, you'll lead in fashion-rightness —and with finesse.

© Western Newspaper Union.

TAFFETA WITH NET

By CHERIE NICHOLAS

Net enters into many phases of the mode this season, not the least important of which is its use for daytime dresses and for tailored themes, in contrast to its sprightly bouffancy for full-skirted party frocks. The very goodlooking tailored afternnon dress here shown is of black net of bemberg yarn banded with black taffeta. You'll find this gown a friend indeed all spring and all summer. Just now it is ideal to wear under your coat. Top with a gay little chapeau and you will be ready to go anywhere social appointments may call.

ACCESSORY NOTES ON SPRING STYLES

Some of the trimmed sports frocks this spring are made of men's shirting. Chambrays in dusty roses, blues and olive greens, brown cottons splashed with small white figures and gray and white striped silks make both dresses and play suits combining skirt, blouse and shorts (longer than last year). Tucked bosoms and vests and pocket accents whose stripes run contrary to those in the blouse are among the mannish accents which have been borrowed for these feminine frocks.

Accessories hold a bright spot in the spring style spotlight. Several Fifth avenue shops display entire accessory ensembles in patent leather. Big patent leather bags, patent leather daisy boutonnieres and black suede shoes tipped with the same shining leather are designed to wear with suits.

Other accessory notes are twin boutonnieres to be worn on each lapel of a suit jacket. Sometimes they are rich carnations of the same color, again feather butterflies with bright spots on their wings and again gay feather fancies like those worn in Tyrolean hats.

Romantic Motif Marks New Gowns for Evening Wear

Embodying the glamour of the era when Vienna danced to the rhythms of Johann Strauss' immortal melodies, the new evening gowns recapture the flowerlike grace of a romantic century.

Starched nets and chiffons, white and pastel colored organzas and stiffened laces are the most important fabrics and pastel colorings are stressed.

Bodices for the most part are simple, many being adorned with big clusters of chiffon flowers in contrasting shades. Girdles are narrow and emphasize slender waist lines.

Spodumene Now Made Available for Many Uses in Industry

Method for Reduction Devised by Scientists

New York.—Few people probably ever heard of the little-known, little-used lithium mineral called spodumene, but through a process which United States bureau of mines experts described here the mineral may soon help cool your home, improve the dishes from which you eat, improve the production of lithia water you may drink, help start your motor car and make a special extra tough glass.

At the annual meeting of the American Institute of Mining and Metallurgical Engineers, Oliver C. Ralston and Foster Fraas of the bureau's scientific staff told of the simple method by which spodumene can be separated from other minerals with which it is associated in nature. Lack of use of the mineral has, in the past, been due to the absence of such a separating process.

Easily Reduced in Lime Kiln.

Heating the mineral in a lime kiln, it has been found, reduces the spodumene to a chalky white mass which can be crumbled in the fingers while the remaining minerals in the ore remain strong. Even farmers and miners with home-made kilns can use the method with considerable success.

The fine dust resulting from this treatment is about 80 to 90 per cent pure, and from many localities this product will be of acceptable purity. It is much better adapted to use in making lithium chloride than the original hard, dense spodumene. It is also ready to be used in a glass batch, unless nature happened to put magnetic iron minerals in the ore, in which case a preliminary removal of iron minerals would be needed.

The pottery makers have desired to use spodumene, but it has been unacceptable because of the fact that at the temperature of a lime kiln it tended to expand and tear pottery to pieces. The beta spodumene formed by the heating and now to be sifted out of the heated ore has already been expanded and does not have this disadvantage. Therefore potters are urged to forget ordinary spodumene and to try beta Spodumene.

Temple Carved in Solid Rock Is Found in Mexico

MEXICO CITY. — Buildings chopped from a single piece of solid mountain form the strangest ancient ruins ever found in Mexico.

They cover an entire summit overlooking the present town of Malinalco, whose name means Place of Twisted Grass, and which is in the state of Mexico, westward from Mexico City.

One structure completely excavated now—the usual temple - topped pyramid—has broad stairs on one side, the steps and wide stone balustrades likewise part of a single piece. Only here and there, where the rock would not reach some far corner of the projected building, did the ancient mason have to fill in nature's lack with artificially cut stone block.

Door Is a Snake's Mouth.

A number of features make this building unique. One walks into the temple on top through an uninviting door formed by the yawning mouth of a giant stone snake. The temple itself is round, a shape rare in Mexico and one generally associated with the Wind God. A low stone bench follows the wall around inside. The roof, probably of perishable stuff like wood, is gone.

For trimming, this one - piece structure has mainly tigers, snakes and eagles. A carved stone tiger sits on a pedestal by the side of the stairs, his head missing. On either side of the snake-mouth door are carved eagle and tiger-knights, such as represented the two old Mexican Indian military orders. The one is on a huehuetl, or wooden war drum; the other, on a snake's head. In the middle of the round room inside are eagle-head carvings.

Further excavations are now being made at this novel site of Malinalco. These are under the direction of Jose Garcia Payon, Mexican archeologist, who is finding various other buildings like this one. Some of the stairways still have traces of ancient paintings.

Source of Prophecy Lies in Careful Study of Nature

Example Is Found in Chemical Reactions

VARIED, indeed, are the ways in which man's appetite for prophecy manifests itself. The gypsy fortune teller, the spiritualistic seance, the scientific laboratory, all are motivated in part by man's desire to lift that persistent veil which obscures the future.

Gradually man has come to realize that the only reliable source of prophecy lies in the disinterested study of nature herself. Laboriously collecting facts, he formulates laws.

As to Chemical Reactions.

One of the more difficult realms of scientific prophecy is that of chemical reactions. A chemist knows that if certain chemicals can be made to react a needed substance will be created. But will the chemicals react? Usually no one knows until someone tries it.

Now the chemicals have a quality which is analogous to un-happiness in the romantic illustration. The chemist calls it "free energy" and knows that if a reaction between two chemicals will lessen their free energy ("thermodynamic unhappiness") then and only then will the reaction occur.

So, in order to make a prophecy concerning the likelihood of a chemical reaction, a chemist has to calculate the free energy of the components before and after the reaction. If it turns out that the free energy is greater in the combined state it means that the chemicals are happier single, and can never be induced to unite.

Calculating Free Energy.

The calculation of the free energy of a substance is sometimes no easy task. Often involved is the "third law of thermodynamics," a law whose validity is still subject to discussion. Recently, however, two scientists at the University of California, Drs. C. C. Stephenson and W. F. Giauque, have published results which prove that for certain substances the third law is accurately valid.

In order to know how much free energy a substance has, another abstract quality called "entropy" must be known first. The third law states that, at the absolute zero of temperature, any crystalline solid has zero entropy. Knowing this, the chemist can calculate how much entropy the substance accumulates as its temperature rises to the value he is concerned with.

Odd Statistics About Widowed and Divorced

New York.—Widowed and divorced men are more likely, on marrying again, to marry spinsters than widowed or divorced women are to marry bachelors.

These observations, which do not necessarily imply personal preferences, are based on a study of marriage data collected in New York state exclusive of New York City for the years 1932, 1933, and 1934. Analysis of the marriage figures appears in the statistical bulletin of the Metropolitan Life Insurance company.

Divorced persons, more often than widows or widowers, take for second consorts persons not previously married.

Divorced men who do not take spinsters for second wives are more apt to marry divorcées than widows. Divorced women, on the contrary, if they do not marry bachelors are more apt to choose a widower than a divorced man.

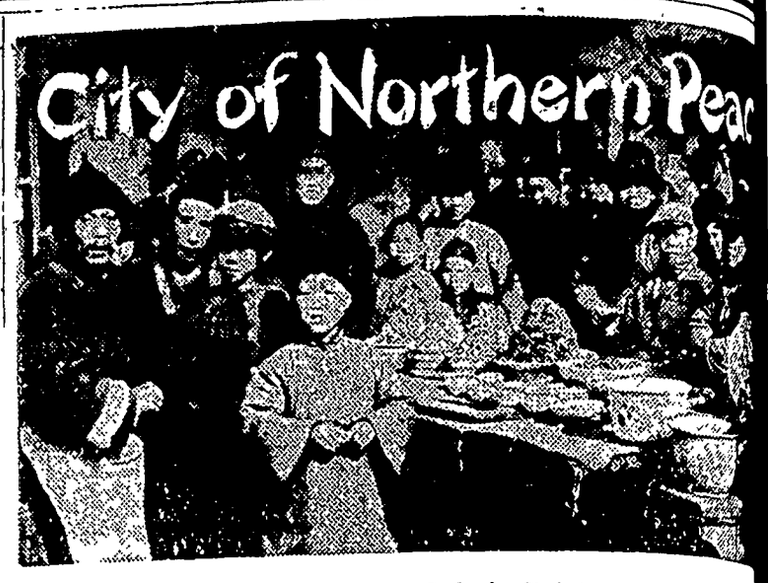
Those who go in for many marriages are distinctly less likely to marry a single person than are those who have been married only once before.

Causes of Plant Cancer Are Sought in Bacillus

New York.—A phosphorus-containing material, relatives of which are found in the human brain and liver, has been isolated by Drs. Erwin Chargaff and Michael Levine of the College of Physicians and Surgeons at Columbia university and Montefiore hospital from the body of a bacillus that causes tumors in plants.

In plants there is a well-known disease, the crown-gall, which bears a slight resemblance to tumors in animals. It is produced by the bacillus tumefaciens.

Using the chemical methods developed by Dr. R. J. Anderson of Yale university, who recently purified an acid from tubercle bacilli which produces symptoms of tuberculosis itself when injected into an animal, they are engaged in analyzing the crown-gall germ. Their first results show that it contains a phosphatide which stimulates rapid cell multiplication in plants.



City of Northern Peace

An Open-Air Cafe in Peiping.

Prepared by National Geographic Society, Washington, D. C.—WNU Service.

ALL the roads in farther Asia lead to Peking, and its name throughout the East is rich as Troy's. You may approach it along the imperial highway, from the southwest, over flagstones rutted by the cart wheels of a thousand years. The other end of that road is in Istanbul; it was the route Marco Polo followed, visiting the Grand Khan in the courts of the sunrise.

You may come down to the city, now called Peiping, from the north, through Kalgan gate in the Wall and Nankow pass, as the Tatar conquerors came, trotting on shaggy ponies behind their yak-tail standards. Or you may enter by the railroad, from the sea, as travelers arrive these latter days.

In any case, nothing warns you of this city; nothing that you have heard prepares you. You proceed over a flat country, khaki-colored in winter, variegated green in summer, which looks the same in every direction. It is not that the view is without incident; every yard of land is cultivated, and people in blue coolie cloth, with their small industrious beasts, move like ants across it. Roads and footpaths connect group after group of huddled mud buildings, each unit behind its wall.

Punctuating the fields are mounds ranging in size from very small humps to impressive hillocks framed in striking architectural conceptions. These are graves, for the dead are not segregated in China. Trees stand in thinnish clumps and straggling lines, trimmed thriftily of all superfluous branches, and there are dark clusterings of evergreens, planted in formal groves, to shield important ghosts from the rude north winds.

Among the grave mounds and the villages you see tablets of remembrance, upright plinths of carved marble set upon immemorial tortoises, facing south; and shrines to gods and princes, long forgotten, standing starkly in the furrows.

But each incident of landscape repeats itself to monotony, and there is a confusion, rather than a dearth, of landmarks. South and east the great sky borders the hollow land, and north and west the hills circle, their contours lifting sharp and brittle through the clear air, remote and inconsequent as painted scenery on a screen.

Many Smells and Many Walls.

Ahead, the horizon takes on regularity. A long gray wall, spaced by unusual towers, rises suddenly as thunder. Your road enters a malodorous suburb, and crosses a canal of yellow, viscous water, bordered by willow trees and washerwomen and populous with squadrons of clamant snow-white ducks. Complicated and violent smells assail the nostrils. Before you opens the dark cavern of a gate, where bored soldiers in gray uniforms, and police in dingy black, armed with rifles watch a press of man traffic and animal traffic that flows without ceasing, to the accompaniment of unimaginable noise. You enter Peiping, and at the end of every vista stands a wall.

There has been a city hereabouts for three thousand years. Historians locate a town of the Yin dynasty, called Chi, on a site near the northwest corner of the present Tatar city in the Twelfth century B. C. The Manchu emperor, Chien Lung, marked the place where one of its gates stood with a tablet, which you may see to this day, on the ramp part called the Mongol Wall, a short distance north of Peiping, beside the road to the Bell Temple.

However, the mutations of Peiping's history have been many times told; volumes have been taken in the telling.

The Ming, which is to say, the Bright, dynasty, built Peiping on a grand scale. Yung Lo, third emperor of the line, moved his court up from Nanking in the early four-teen-hundreds, and created a capital worthy of his greatness.

The Bell Tower, which was in the center of Khanbaligh, visited by Marco Polo in the reign of Kublai Khan, stands now in the upper third of Peiping; and the Observatory is north of the present southeast angle. You can ride the line of Kublai's walls to the north, and they are formidable earthen ramparts; but goats graze upon weed-grown mounds that were the guard towers on the gates.

Big Wall of Yung Lo.

Yung Lo's wall, called the Tatar Wall for no good reason, is immense. Its circuit is some 14 miles, and its outline is almost square, rounded slightly at the northwest angle, where a stream enters the city. It has a core of earth and rubble, faced with heavy masonry. Its width at the base is narrowing to about 50 feet top, or the width of the chariots driven abreast, more than 40 feet high.

Bastions thrust out at intervals, and the top is once affording shelter to Wide ramps lead up to gates: three on the south for each of the other faces every gate stands a guard with quarters for the garri formerly these were curtain walls enclosing where travelers were exam duty assessed and goods coming in.

Peiping is no longer From 1912 to 1928 the in the dismantled pavilions housed the emperors. Then ernment moved to Nan edict the name of the was abandoned; Peking, ern Capital," became Peiping, "City of the Plains," or "Northern Pe said the People's party, authorities, and the offic But to the residents and eigners who love it, the mains Peking. From the within the walls one may the city.

Climb Coal hill. It is an eminence, rising 210 feet town, lying east and west tours following the conven form of the breaking wave tral pavilion crowns it, four smaller pavilions to right as the slopes descend and white pines and spar clothe it sketchily.

There is a legend thrifty emperor created it up a reserve supply of coal a seige, covering the fuel by way of camouflage—but no coal here and never businesslike people would it at a reasonable profit turies ago. More likely it of the dirt excavated from of artificial lakes which inhabitants call the "Three lying in the old Imperial C

Poultry

MOIST-MASH FEED GOOD FOR PULLETS

One Aid to Production in Cold Weather.

By H H Alp, Extension Poultryman, College of Agriculture, University of Illinois.—WNU Service.

Relationships between prices for eggs and prices for feed call for all the skill that can be used in poultry feeding on farms.

Moist-mash feeding of pullets during cold months is one aid to production The usual practice of many successful poultry producers is to moisten some of the regular laying mash with milk. Amounts fed are never large, only about what the flock will eat in five or ten minutes.

Exact hour of day for moist-mash feeding is probably immaterial.

However, the one thing to keep in mind is that it pays to feed the moist-mash at a time when not too many hens are on the nest. All birds in the flock should have a chance to get some of the mash.

By heating a few pounds of dry wheat bran, taking care not to burn it, cod liver can be added rather easily This concentrated mixture may then be included in the mash mixture. One quart of oil to each 100 pounds of mash is a common recommendation.

Shelled corn and four gallons of skim milk a day for each 100 hens with alfalfa hay fed in racks would make a fairly good production ration to be supplemented by the moist-mash.

Find Semi-Scald Method Best for Dressing Birds

The semi-scald method as practiced by Iowa poultry-producers has resulted in cleaner, more appetizingly dressed birds. It is also claimed that birds so dressed will keep better.

The method, states Successful Farming, consists of placing the bird in water heated to from 126 to 129 degrees Fahrenheit for about 30 seconds. For broilers, a temperature of 126 to 127 degrees is suggested, while for heavy hens a temperature of from 128 to 129 degrees is best. After being immersed, the bird should be moved through the water till it reaches the skin. By proper picking and temperatures, the dressed bird will show a complete absence of skin blemishes and tears.

Too high a temperature will cause the outer skin to burn off, producing the scald spots condition often found when the hard-scald method is used. Too low a temperature will not loosen feathers.

When the feathers have been picked, the carcass can be placed in cold water for 15 to 20 minutes. The cold water will help remove some of the body heat and also improve the keeping quality.

"Hen Language"

A "hen language" of nine "words," all essential to her "social life," was described by Dr. David Katz, formerly professor of psychology at Rostock university in Germany, when he lectured to a child-audience at the Royal Society of Arts in London. Dr. Katz said scientists have found that hens have one "word" for danger, another to brow-beat a rival, and a third to encourage her family to feed. In addition, they have a song of triumph to sing over a new-laid egg, and the cocks have another song which they sing at dawn.

Salt Additions Desirable

Good chicks have been grown with rations that did not contain any common salt (sodium chloride) addition. Rations that carried as much as 5 per cent of common salt appear to be mildly injurious. It is true, says the Wisconsin Agriculturist, that generous supplies of chlorine are needed to make hydrochloric acid in the stomach which aids in protein digestion. The results secured seem to show quite definitely that it is well to add from one-half to one pound of salt to each hundred pounds of chick mash.

How Many Eggs to Set

For those who will do their own hatching, the question arises—how many eggs to set. The answer to this is, for all practical purposes, five eggs should be set for every pullet one wants next fall. Some of the eggs set may be broken, some will be infertile, some will not hatch, and some that do hatch may be cripples and have to be killed. When they do hatch, half will be cockerels, some will die, while culling should be practiced from start to finish.

Pullorum in Turkeys

Turkeys have been tested for pullorum disease but we have not found very many reactors. It is a new subject and we do not know just how important it is to test the turkey breeders or whether they carry pullorum infection, says a writer in the Boston Globe. It seems more important at the present time to be very careful in hatching turkey eggs. They should be hatched in incubators where only tested eggs are hatched.

From Perfectly Cut Patterns

"I'M GLAD I'm not on the serving committee this week," muses Mrs. Smith of Walnut street, as she takes stock of herself in the mirror preparatory to leaving for the church supper. "I look entirely too swell for me—why, I'm almost excited! I always knew surplice waists were becoming, but how becoming I never knew till now. That little deceptiveness is just what I need, and these sleeves are the most comfortable things! If about half our circle wore dresses like this it would be better for all concerned; so many of us have outgrown the tailored streamlined styles. Now, Mrs. White for instance—"

Enter an Admirer.

"Why Mother, you look de-lovely in that shade of blue! And you look real stylish, too—you ought to be going to a Coronation."

"Oh, I'd much prefer the church supper, dear. I'll be a somebody there in my new dress but at a Coronation I would be little potatoes. By the way, what did they say about your new jumper at school?"

"Mother, I meant to tell you. Mary Jane and Betty are both going to coax their mothers to make one just like it. I said maybe you would loan them the pattern, would you?"

"Why of course. Did you tell them it took me only two afternoons to make yours including two blouses?"

Enter "The Duchess."

"Sis, you're pretty young to be talking about clothes so intelligently. When you get a figure that clothes really count on—ahem, like Yours Truly's for instance; then it might be different —oh Mother, how nice! I'm crazy about it. Gee, such smart lines! Remember, you promised to help me with a new party frock next week if I did well with this shirtwaister. I wish all dresses were as easy to sew and as swell to wear as it is."

"Perfectly cut patterns spell success for any frock, Kay; your party dress is as good as made right now. But I must be on my way or I'll be more than fashionably late for the affair. Bye, bye —be good girls and see that Daddy gets something to eat."

The Patterns.

Pattern 1268 is for sizes 36 to 52. Size 38 requires 5¼ yards of 39 inch material.

Pattern 1996 is for sizes 6 to 14 years. Size 8 requires 1¾ yards of 39 inch material for the jumper and 1⅛ yards for the blouse. Armscye and neck edges of jumper require 2⅛ yards of 1½ inch bias facing.

Pattern 1226 is for sizes 14 to 20 (32 to 42 bust). Size 16 require 3¾ yards of 35 inch material.

Send for the Barbara Bell Spring and Summer Pattern Book. Make yourself attractive, practical and becoming clothes, selecting designs from the Barbara Bell well-planned easy-to-make patterns. Interesting and exclusive fashions for little children and the difficult junior age; slenderizing, well-cut patterns for the mature figure; afternoon dresses for the most particular young women and matrons and other patterns for special occasions are all to be found in the Barbara Bell Pattern Book. CLEAN UP NOTICE

Residents of Klemme who have been using the alleys for rubbish and ashes during the winter are requested to clean up and have ashes and rubbish hauled away within the next week.

PAUL GRANGE,
Mayor Town of Klemme

FEEDING ANY HOGS?

THERE'S a handy way to stretch your feed out and make it go a sight farther. All you have to do is just add Dr. Hess Hog Special to your regular ration. In one test conducted by Dr. Hess & Clark, Hog Special saved 2881 pounds of feed in fattening twenty shoats (maybe you read about this in your farm journal). Anyway, we say, and Dr. Hess & Clark back us up in this, add Hog Special to your ration and get quicker and cheaper gains. We have Hog Special on hand now, so come around and see us.

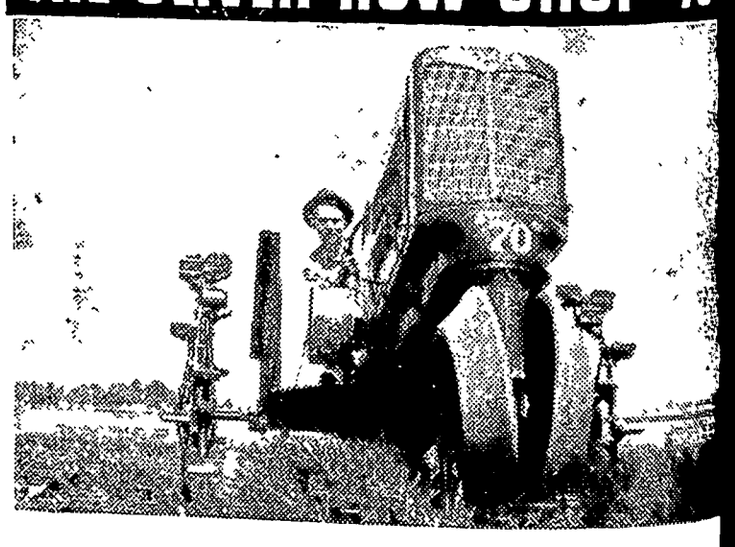
THE OLIVER ROW-CROP "70"



Finger-Tip Control—For An Easier—Quicker Job

Sit in the comfortable new spring-and-hammock seat of the new *Row Crop* "70"—and every control is right at your finger tips. You have automotive type steering and gear shifting! "Steering-braking" assures short turns. The brakes also operate from the heel, for quick action and powerful leverage. Fully enclosed and streamlined, the "70" is as easy to handle as an automobile.

You'll want to come in and see this new 6-cylinder tractor at once. There are two "70's"—one designed to get greater economy out of regular gasoline—and the other especially built for kerosene or distillate. Both have great power with light weight. Both are smooth and easy-running—with greater speed. You'll get the work done quicker—with more spare time for other things. See the "70's"—with a complete line of mounted listing, busting, planting and cultivating equipment.

THE KLEMME TIMES

VOLUME 41 — KLEMME, IOWA, WEDNESDAY EVENING, APRIL 21, 1937 — NUMBER 48

Tax Exemptions Must Be Filed By June 1st

OME OWNER MUST PUT IN HIS APPLICATION FOR HOMESTEAD TAX REFUND

Though the daily papers have eported it, it may still be news many taxpayers living in their wn homes that a new law prodes for allocation of part of the ate sales tax receipts to credits refunds of taxes against homeeads.

This law operates against this ear's taxes, meaning the taxes vied in 1935 and now payable, t the credit or refund will be ade only on the second half; at is the persons who have paid e first half, or who may yet pay, ill get nothing off or back at this me.

Probably the credit or refund ill not be enough to exceed the cond half and so apply on the rst half It may be considerably ss than the second half. It is not own yet how the law will work t. The taxpayer must pay the rst half in full, if he wishes to cape penalty, and take his ances on credit or refund when pays the second half.

Nobody can get a credit or rend without first filing with the unty auditor an application for mestead tax credit, and this ust be done on or before June 1. ilure to do it will prevent alwance of the exemption.

The state board of assessment d review has prepared an ofual form for use in claiming the edit or refund, and the same can obtained from the county audir, who will shortly have a supply the forms are not already here. It will be noted that the taxpay must swear to his claim and at it must be attested by two eeholders who live in his taxing strict. It should be understood at "freeholders" are not just o persons who happen to be ndy A "freeholder" is a person o owns real estate.

The law is somewhat obscure on nether the real estate of the eeholders must be in the same xing district as the claimants, t they must live in the same xing district.

The taxpayer will be subjected a fine up to $100 and|or to a il sentence up to 30 days in case deliberate falsification of his im.

The board of supervisors must over all claims and allow or allow the same and must estabh the homesteads assessed vaue here the homestead has been inuded in descriptions embracing her real estate. In case of disalwance the board must notify the imant by mail. Some observers e grief for the board in cases here claims are disallowed or sessment values are disputed by imants.

The law defines a homestead as llows·

"The homestead must embrace e dwelling house in which the wner claiming a mileage credit refund under the act actually es six (6) months or more in year."

The homestead may include one more adjoining town lots if bitually used as part of the mestead, but not more than a lf acre altogether; but if there more than a half acre, and the sessment of the half acre is less an $2500, enough more of the nd may be included to bring the sessment up to that figure.

In case of a farm homestead not ore than 40 acres may be claimas a homestead. Where there more than one dwelling house a farm homestead the house ot occupied by the owner must be gured out.

"Owner" means whoever has the tle; or a surviving spouse; or one ho holds a contract of purchase nd has paid ten per cent or more, the contract has been recorded; a devisee under will; or one ho has inherited or other interst.—Kossuth County Advance.

SEVERAL CAUGHT IN IOWA PATROL DRAGNET DURING PAST WEEK

State highway patrolmen made a drive in this community last week and several were hailed into Justice Henry Suckow's court on various charges of highway violations.

C. A. Ambrose, of Forest City was apprehended by Patrolman West and was given a 15 days sentence in jail for overloading his truck

Frank DeMars, of Maple City, Minn., was brought to Suckow's court by Patrolmen Sterzing and West, charged with failure to observe a stop sign His fine was $3.00 and costs.

Wilbur C. Hanson, Klemme, was fined $25.00 and costs for overload on truck.

Norman Zlolkin, Britt, was brought into Suckow's court by Patrolman Benedict charged with improperly displaying license plates on his truck. His fine was $5 00 and costs.

Earl E. Jacobs, Mason City, appeared in court for not having his drivers license. He appeared again a few days later and produced his license and was not fined for the offense.

Albert Rhoades, Kanawha, was brought into court by Patrolmen West and Sterzing and fined $25.00 and costs for overloading his truck

Oscar Durhan, Liberty township farm hand, appeared in Suckow's court on a larcency charge. This case is pending according to Justice Suckow.

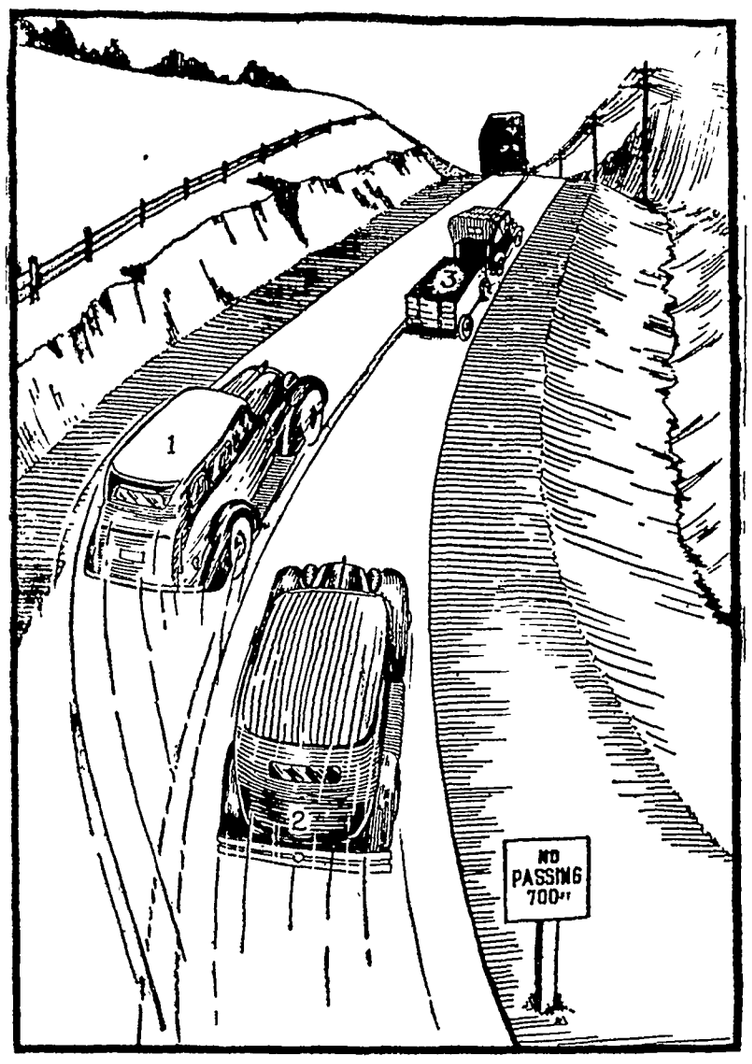
LEONARD LAU IS MECHANIC AT NORTHERN'S WOOD-WORK SHOP

Leonard Lau began work Monday at the Northern Lumber Co Mr. Lau will devote all of his time turning ou mill work in the woodworking shop, which has been equipped with a complete line of power wood-working machinery including a table saw, band saw, jointer, drill press and shaper Mr Lau is an experienced man in wood-working and should be a valuable aid to the Northern Lumber Co.

The Northern Lumber Co will manufacture nearly all of their mill work in the future and are also specializing in turning out made-to-order kitchen cabinets and other built-in features for the modern home.

Why little Miss "Fragrant-Peony" killed herself. Distressing tragedy that ends Japan's queer first "Sit-Down" strike of her Geisha girls. In the AMERICAN WEEKLY, the magazine distriubted with Next Sunday's CHICAGO HERALD AND EXAMINER.

DEATH LURKS ON EVERY HILL



How many times have you been guilty of the extremely hazardous and foolhardy violation shown in this illustration? Despite all that can be done to safeguard traffic by erecting warning signs, proper design of curves, decreasing grades, and removing obstacles that obstruct vision, some drivers will persist in gambling not only their own lves, but endangering the lives and property of all other motorists on the highway by attempting to pass other traffic on hills and curves. Plainly visible at every hill and curve that presents a traffic hazard is erected a sign, "No Passing- -700 Feet." Disregard for these regulatory signs spells pain, death, and heartaches. Forty-nine serious accidents were caused in the state of Iowa alone during the past eleven months simply because some driver had no respect for regulations or regard for the safety of others.

Traveling at high rates of speed, 700 feet is all to short a distance to attempt to pass another vehicle Assume car No 1 is traveling at a speed of 60 miles per hour, car No. 2 at 40 miles per hour, and car No 4 at 50 miles per hour. If an accident is to be averted there must be 970 feet of clear roadway between car No 1 and car No 4 Few drivers realize that two cars aproaching each other at 60 miles per hour occupy 176 feet of roadway each tick of the watch. In this type of traffic condition, your life hangs in the balance. Split seconds reckon your chances THINK OF THE CHANCES BEFORE YOU ATTEMPT TO PASS ANOTHER CAR.

No one operating a motor vehicle on public highways can possibly be in such a hurry that the few seconds he might loose in the course of his trip could compensate for the havoc and destruction he might cause. But, is the effort of lifting your foot from the accelerator much of a sacrifice compared to weary pain-wracked months in a hospital? Or would a lifetime erase from your mind the picture of a broken, mangled, bloody body of some innocent party, the victim of your thoughtlessness? Think it over, driver. If you want your name in the paper, keep up the practice of passing cars whenever you overtake them, regardless of whether or not you can see over the hill or around the curve. Copyright, 1937, P. L. Cummings, Des Moines, Iowa

QUESTIONS

1. What charges should be filed against the driver of car No. 1?
2. Is driver of car No. 3 liable should the trailer cause an accident?
3. Why is 700 feet specified as a safe passing distance?
4. How can a driver be sure he can safely pass another vehicle
5. What could be done to eliminate violations of this type?
6. If you were driving vehicle No. 4, what would you do if faced with the same traffic condition?
7. What penalties are provided for passing where view is obstructed?
8. Is the sign "No Passing- 700 Feet" a regulatory or a warning sign
9. If you are blinded by the lights of an approaching car, what should you do?
10. What is the legal maximum height and width of vehicles?

ANSWERS TO QESTIONS ON PAGE FOUR

KLEMME MAN COTINUES TO MAKE RECORD IN MUSIC EVENTS

Earl Josten, who has charge of the various musical organizations in the Valley Junction high school, a school of some five hundred students, spent Saturday visiting in Klemme with his father, John Josten. Earl's musical organizations have in the past won many state honors. This year one of Mr. Josten's students, Charles Buchanan, won a superior ranking in baritone solo in the first round of the National Contest. In this contest Buchanan sang against twenty-nine others and eight states were represented. The final national contest will be held at St. Louis in a few weeks.

"Green paint," says George, "can be easily removed from the seat of a pair of white trousers. All you need is some turpentine, a good brush, and a pair of shears."

There is no shortage of ideas but at times we feel that there is a shortage of men able to put them into effect.

Seniors To Present Play Two Nights This Week

WALLER AND SANDBERG PLEDGE VOWS APRIL 5

Miss Gertrude Waller, daughter of Mr. and Mrs. I. J. Waller of Omaha and Carl R. Sandberg, son of Mr. and Mrs. O. Sandberg of Goodell were united in marriage at Omaha, Nebr., Monday, April 5.

They were attended by Mr. and Mrs. C. W. Cochenouer of Omaha, a brother-in-law and sister of the bride.

Mrs. Sandberg was graduated from the south high school in Omaha and was employed in the South Omaha State Bank and the Federal Land Bank She has recently been employed in the Citizen's State Bank at Iowa Falls.

Mr. Sandberg was raised in Goodell and was graduated from the Goodell high school with the class of 1923 Following his graduation from high school, he entered the Iowa State College at Ames, where he was graduated from the electrical engineering department in 1927 Carl was electrician for the Quaker Oats Company at Cedar Rapids for four years and since 1932 has been an electrical contractor in Iowa Falls.

Following a two weeks wedding trip, they will be at home in Iowa Falls, but will spend part of the summer in Jefferson, here Mr. Sandberg has a contract for the electrical equipment for the new hospital being erected at Jefferson.

RESERVE SEATS FOR SENIOR CLASS PLAY AT WILSON DRUG STORE

Bleacher Seats Are Few

A full house is expected at the senior class play, "New Fires," to be given Thursday and Friday of this week, April 22 an 23. The advance ticket sale has been going strong, and the Wilson Drug Store reports a steady demand for seat reservations.

People buying tickets from students pay fifteen cents for student admissions and twenty-five cents for adult admissions. An added charge of five cents per ticket is being made to get these seats reserved. A reservation will prove to be very much worth while, as the bleacher seats are limited.

The new cyclorama has been hung for the background of the stage. It will make a decided improvement in the appearance of the interior setting.

Emily Paul is acting as property manager for the play this year. She has been busy this week lining up stage equipment.

Special music for the play will be furnished by the high school orchestra under the direction of Mr. Elstad.

STATE PARKS READY FOR USE

About this time of the year one's thoughts turn to the great open spaces. It seems that almost everyone wants to go places and enjoy the warm spring air, the budding trees, wild flowers and Nature in her glory. Iowa's state parks and preserves will satisfy that urge. That is the reason for their establishment, so you will have a place to go and satisfy that desire.

Iowa's 71 state parks and preserves are now ready for he visiting public Some of these areas are not complete with picnic areas, tables and other facilities but most of them are ready for your enjoyment.

You should write at once relative to cabin rental rates, camping facilities and reservations. You should also obtain information relative to the various recreational facilities to be enjoyed in the narks Your letter will bring this information. You should plan now for your vacation in one or more of Iowa's parks.

In the meantime visit Iowa's parks and see for yourself the cozy cabins which have been built by the CCC boys Note the many comforts afforded and the enjoyable surroundings A pleasant place for your family to spend it's vacation.

Visit these areas now, if only to see the flowers, trees and scenic beauty. It is worth your trip next Sunday See the lakes and streams while they sparkle in the warm sunshine. You have the urge to get outdoors and the Conservation Commission has provided places for you to go. They are your parks. use them to the fullest extent. Iowa is known throughout the United States as having the finest, most up-to-date and interesting state parks

Reformed Aid Wednesday

The regular meeting of the Reformed Ladies Aid will be held next week, Wednesday, April 28th at the church parlors. Mrs. Sumner Trumbell and Mrs. Martin Barz are hostesses.

Washington Digest

National Topics Interpreted
by William Bruckart

National Press Building Washington, D. C.

Washington.—Senator McKellar, Tennessee Democrat, arose in the senate recently to offer a bill that would repeal a provision of law prohibiting the employment of both man and wife by the government. It has been in effect since the summer of 1933. The provision ought to be and probably will be repealed because, as far as I can see, there is actually no sense in the national government refusing to employ efficient workers because a man's wife or a woman's husband already is on the federal pay roll.

Silly Law Doomed

It was not the importance of this particular repeal proposal, however, that interested me. Senator McKellar's action was significant and interesting only because when repeal of the so-called marriage clause and federal law was proposed, it marked the beginning of the end of one of the most abortive pieces of legislation that has been on our statute books. I refer to the so-called economy act of 1933.

I cannot refrain from recalling a prediction that I made when the economy act was before congress in 1933. It was introduced and supported by the New Deal legislature in an effort to carry out a campaign promise made when President Roosevelt was running for office in 1932. You will remember that he promised to reduce the cost of government twenty-five per cent, saying in many speeches that the cost of government was too high and that a reduction in taxes was necessary. It will be recalled likewise how he said that "Taxes come from the sweat of every man who labors."

Well, the economy act was driven through, despite declaration from many senators and many representatives that it was impossible to mutilate the structure of government as proposed in that bill and still have a government that would function properly. And here were some of the most ridiculous provisions in that legislation to come before congress in many years: They worked injustices on veterans of the World war, on farmers, on retired government workers, on the army and navy and marine corps, and hamstrung and handicapped government agencies in a manner I had not seen in my long experience as an observer of national affairs.

It was on that occasion that I made the prediction mentioned above, and to which I call attention because of the McKellar proposal for repeal of the marriage clause. I wrote at that time my definite conviction that the economy law was silly; that it would work hardships and that its basis was ninety per cent politics. I predicted further that within a year the politicians in the house and senate who had shouted so loudly about economy would begin to chisel various provisions out of that law. Each of those things has happened and now we see the end.

The end of the law has come but not the end of its effects. Practices in federal government administration that had been operating satisfactorily and efficiently throughout the years were thrown into the discard and new ideas substituted. The discarded methods were the development of experience and were serving the purposes for which they were intended. Some of them have been restored and are again functioning as they should but one can wander around through the maze of government corridors and find attempts still being made to make schemes work that are unsound in practice, schemes from the minds of theorists It will be a number of years before the effects of the economy act will be obliterated.

* * *

As the chiseling began and the economy act fell to pieces under sounder thinking, there was launched the greatest spending orgy any nation ever witnessed. It has continued with unabated peculiarity and is still continuing notwithstanding the fact that within the last few weeks we have heard statements from administration sources to the effect that administration expenditures will be cut. The fact is they have not been cut.

Spending Orgy

But the average person outside of Washington sees and hears only things related to large totals of government spending such as relief for the destitute and vast programs of public building. They do not hear nor do they see what is going on among agencies of the government that relate to comparatively small items of money outgo. It is these small items, when taken together, that bulk so large even though by comparison with relief the total appears insignificant

I am going to call attention to just one item, a small item as government expenses go, about which I suspect most persons who do me the honor to read these articles have had little information. They have had little information because they are in a position to see only isolated examples. I refer to government publications.

Representative Taber of New York called attention to the condition respecting government publications recently when the house appropriations committee was holding hearings on a bill appropriating funds for several government departments.

Mr. Taber estimated that government publications were costing in the neighborhood of twenty-million-dollars a year. He called them administration propaganda.

"Every organization in the government," Mr. Taber declared, "is sending out all sorts of propaganda, propaganda in fancy colors, pamphlets with pictures of resettlement projects, pictures of WPA propositions and all that sort of thing"

It was the first estimate I had been able to obtain of the cost of government publications for it is not easy to ascertain how much these beautifully done magazines cost each department or agency. Nor is it easy to determine how much is paid for the distribution of the countless thousands of statements issued for the press or mailed in millions of copies to voters. The whole thing constitutes a maze that is so complex that it is staggering. The government printing office lists 73 periodicals of the magazine type for which it will take subscriptions or sell individual copies. These, of course, are printed documents. They do not include the many pamphlets that are mimeographed or published otherwise by governmental agencies.

* * *

I mentioned the distribution of official statements for the press and to voters throughout the country. There is no way, as far as I can see, to calculate the total, but one Washington correspondent recently took occasion to weigh the output of press statements from the Department of Agriculture for one week. His curiosity had been aroused by the tremendous volume that had been delivered to his office—both by mail and by special messenger—and so he weighed the week's grist. It totaled more than three and one-half pounds. This, as I said, was from only one department and the weight was the weight of the paper alone.

Weighing the Cost

One need not employ a great deal of imagination to think of the cost involved. First there was the paper itself. In the second place there was the cost of typing the material and then of mimeographing it. But before it reached either one of these stages, it was necessary that a vast amount of work be done by well paid men and women writers and research workers who prepared the material that was used whether in mimeographing or in printing.

There are two publications that come to my desk regularly that strike me as being extraordinarily expensive. The "Consumers' Guide," a product of the Agriculture Adjustment administration and the "Electrification News," published by the Rural Electrification administration, are the two most expensive and most elaborate periodicals that I regularly see. They are sent out free not only to the Washington correspondents but to thousands upon thousands of voters—to any voter whose name either agency obtains. And they are paid for out of taxpayers' money.

Typographically, each of these periodicals is exceptionally well done from a magazine standpoint. They are replete with pictures, and copper engraving is expensive.

And so it is throughout the government. Everywhere a correspondent goes among government offices he meets "federal workers," among the government personnel, engaged in preparing and distributing the government's stories for public reading.

* * *

Now, let me touch on another phase of the cost of government publications. I refer to the use of the franking privilege. As everyone knows, government mail goes through the United States mails without the payment of postage. That does not mean, however, that the railroads or the airplanes or the steamships haul that mail free. The only difference between that mail and the letters you write or receive is that the government pays the transportation lines on a pound basis and no stamps are used. It is bulk transportation whereas when you and I mail letters we pay the cost of transportation on those letters to the government by means of a postage stamp.

Franking Abuse

It is entirely proper and reasonable that government mail should not require postage stamps. It would simply be taking government money out of one pocket and putting it in another. Yet, in the end you and I, as taxpayers, pay for the transportation of the government mail and we pay for the millions of pieces that are sent out from the various government departments.

Father of the Cattle Trails

IF IT had not been for Joseph G. McCoy, there might never have occurred that epic migration over the cattle trails from Texas to the north during the seventies and eighties. In that case the history of the Lone Star state—and the whole West, for that matter—might have been very different McCoy, a native of Springfield, Ill., was a stockman and cattle buyer who went to the raw little frontier town of Abilene, Kan., soon after the Civil war was over.

That conflict had ruined the cattlemen in Texas. Shut off from the Northern markets by the Union control of the Mississippi river, their herds had increased enormously, but without a place to sell the animals, they were comparatively worthless. Then the Kansas Pacific railroad, which was building west, reached Abilene and McCoy was inspired with a wonderful idea.

If he could get the Texas drovers to drive their herds north across Indian territory to Abilene, grazing them on the rich prairie grass as they came, Abilene would be the market place and shipping center where Texas sellers and Chicago and Kansas City buyers could meet. Despite many obstacles, including the prevalent belief that Texas beef was not as good as that grown in the Middle West, McCoy went about the job of making his dream come true.

In July, 1867, he began raising money to build a "shipping yard," a barn and office and to begin the construction of a large, three-story frame hotel for the accommodation of Texas drovers and eastern buyers. His next task was to get word to the cattlemen more than 400 miles away to the south. Although the time was short he managed to persuade enough of them to make the experiment so that they marketed 35,000 head of cattle in Abilene that fall and received approximately $15 a head for their steers. Previous to that time steers were selling for $5 a head in Texas.

The next year more than 75,000 cattle were marketed there. By 1871 that number had jumped to 120,000 and by the next year to 236,000. From that time on Texas cattle poured north by the hundreds of thousands over the original cattle trail from the Red river to Abilene and other trails which were laid out. Other Kansas "cow towns" began to boom with activity as the railroad was pushed farther west and southwest and there was added to our history that thrilling chapter when the cattleman was king. And all of this was due to the vision of one man—Joseph G. McCoy, the "Father of the Cattle Trails."

Mr. Currier and Mr. Ives

THEY gave Americans of their day the equivalent of the news reels of today. They were the pictorial historians of contemporary American life a century ago when newspapers contained little or no picture material except an occasional fashion print.

When a steamboat blew up, a great fire swept a city or some other disaster occurred, Mr. Currier and Mr. Ives immediately put out a colored picture of the event with plenty of action in it. When the United States was at war, they issued splendid battle pictures with plumed generals on prancing horses (and plenty of gory detail as to dead and wounded soldiers). There were pictures of horse races and other sporting events, there were pictures of swift clipper ships and pictures of the first transcontinental trains running amidst Indians and buffalo. There were highly moral pictures, there were even "comic strips"—caricatures of life among the negroes, called "Darktown Comics."

It all started back in 1830 when young Nathaniel Currier, working as an apprentice to John Pendleton, who had returned from Europe with the new art of lithography, began thinking of setting up his own business. So he went to New York and started as a lithographer in partnership with a young man named Stoddard. This partnership lasted only a year but in 1835 Currier began again. He soon built up a profitable business but it wasn't until 1850 when James A. Ives became his partner that fame and fortune came to them.

For 30 years Mr. Currier and Mr. Ives were "printmakers to the American people" and Currier and Ives prints of one sort or another were to be found on the walls of virtually every American home. In 1880 Currier retired with a fortune but the firm continued with a son of the founder in his place. In 1888 machine color printing was applied to their product and ever greater numbers of their pictures flooded the country.

In recent years Currier and Ives prints have become "Americana." Where once these prints sold from six cents to $3, they are now selling for anywhere from $20 to $50. And one of them recently brought $3,000!

A Memorial Forest in North Carolina Honors the Soldier-Poet Who Wrote "Trees"

By ELMO SCOTT WATSON

IT HAS been reprinted in newspapers and other publications hundreds of times.

It has been set to music and you've probably heard it sung as a solo or played on some musical instrument hundreds—yes, thousands—of times.

And, as the time for the celebration of Arbor day approaches, you will be hearing it again and again. For, of all the poems ever written on this subject, it is probably the best known and best loved.

It is Joyce Kilmer's "Trees."

If Joyce Kilmer had never done anything else but write that one poem his fame would be secure. But because he did write it, he has recently been honored with a memorial that is unique.

Down in Graham county, North Carolina, in the heart of the Nantahala national forest, there is a tract of 3,840 acres of one of the most beautiful remnants of our nation's virgin forests. Within its confines are magnificent examples of more than 100 species of trees native to that region.

Since last summer visitors to that tract have found there a plaque which reads:

JOYCE KILMER MEMORIAL FOREST
Dedicated July 30, 1936.

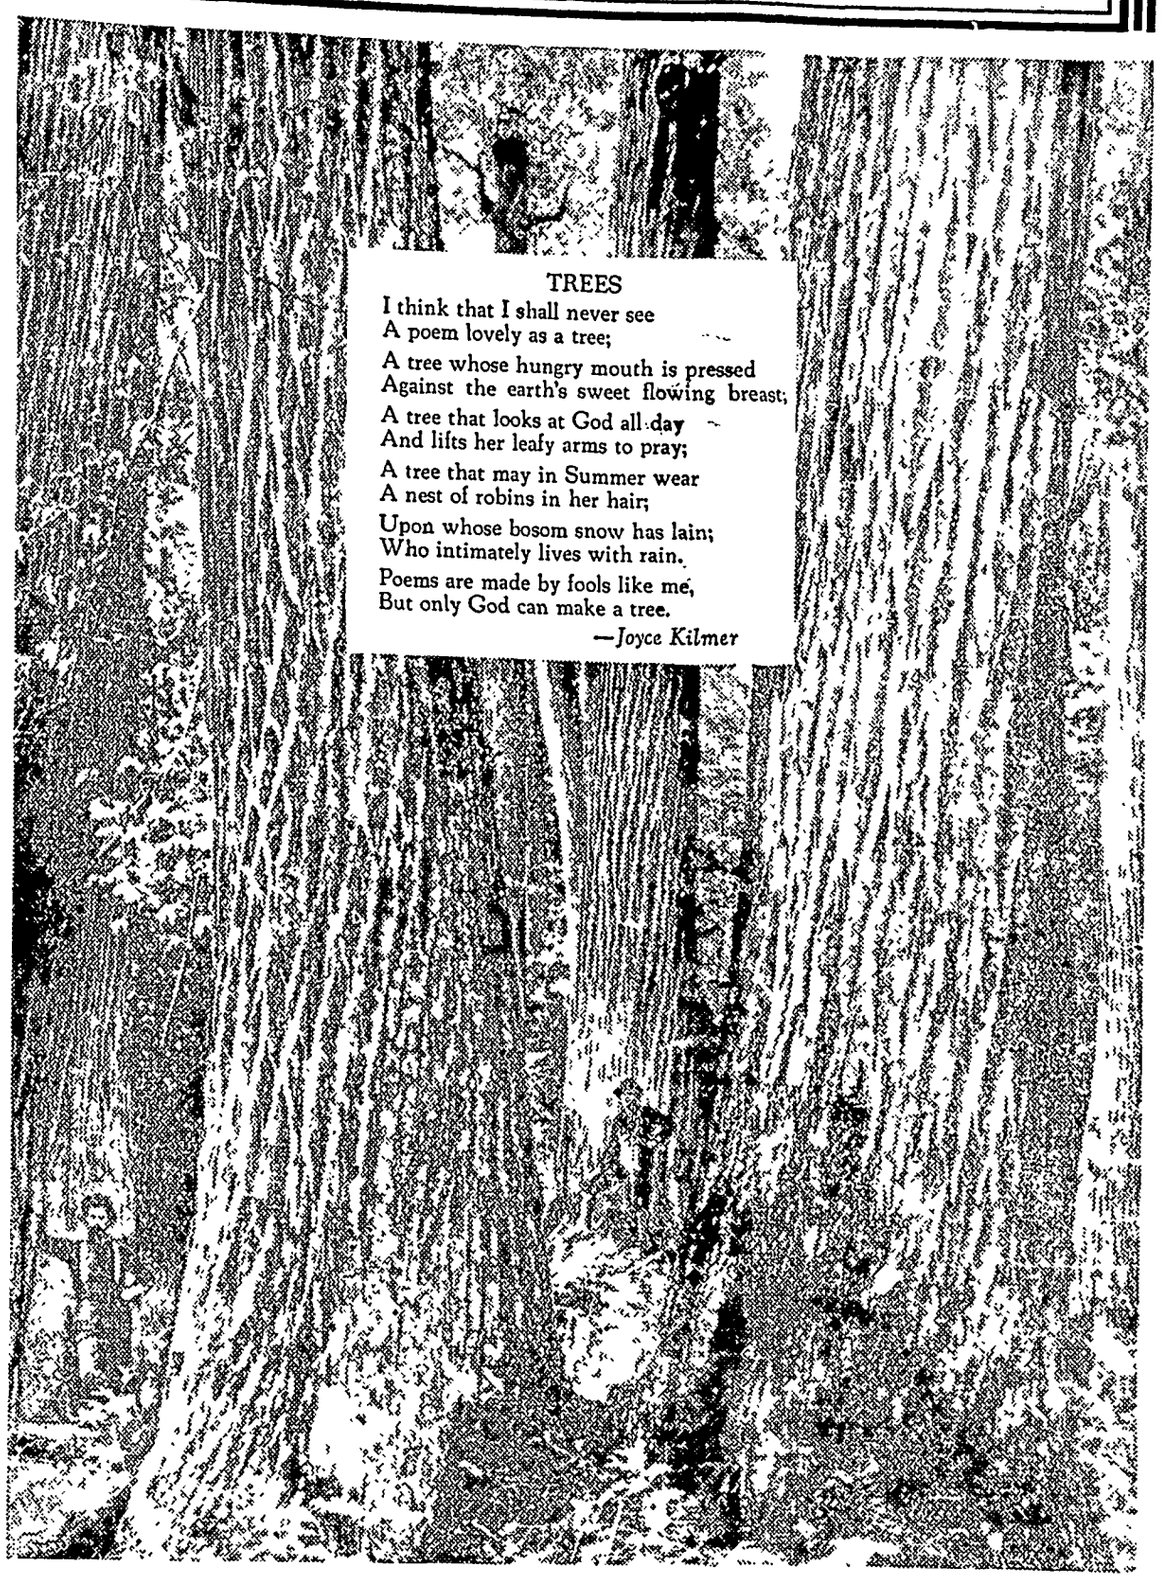
Joyce Kilmer, 165th Infantry, Rainbow Division, soldier and poet, author of "Trees," was born in New Brunswick, N. J. December 6, 1886; killed in action in France July 30, 1918.

This memorial was initiated by Bozeman Bulger Post, Veterans of Foreign Wars, and was selected by the United States Forest Service.

* * *

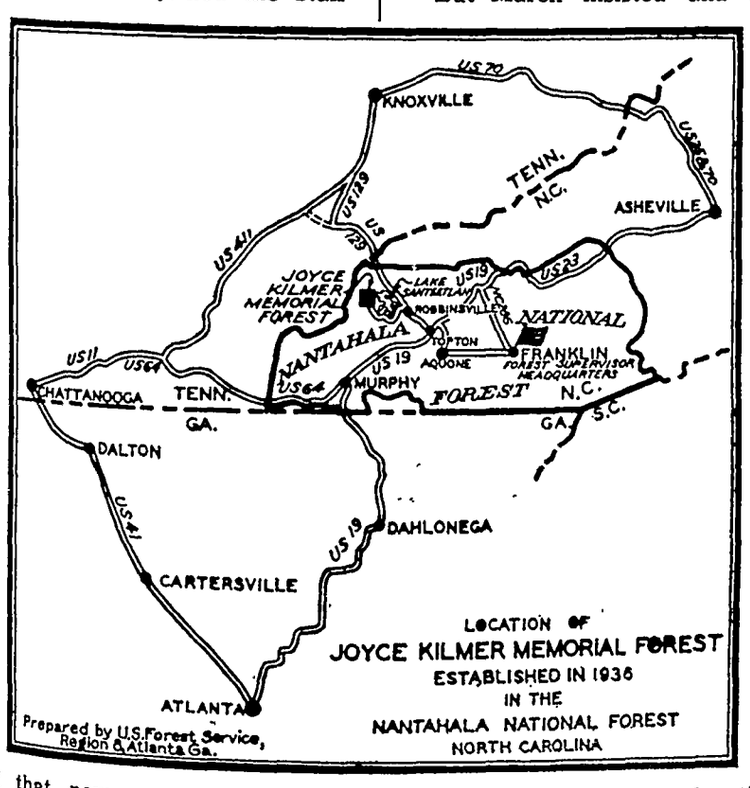
Twenty years ago Joyce Kilmer was a young writer on the Sunday staff of the New York Times. He had attended Rutgers college and Columbia university and had met and fallen in love with Aline Murray of Norfolk, Va., who shared his interest in poetry. They were married in June, 1908, and in that year he became instructor in Latin in the Morristown (N. J.) high school. The next year he became editorial assistant on the Standard Dictionary where he served for three years.

During this time Kilmer won considerable recognition as a poet and was a regular contributor to the Literary Digest, Book News Monthly and other literary periodicals. His first book of poems, "The Summer of Love," appeared in 1911 and the next year he became literary editor of the Churchman. For some time he had been a contributor of book reviews to the New York Times and in 1913 he joined the staff



TREES
I think that I shall never see
A poem lovely as a tree;
A tree whose hungry mouth is pressed
Against the earth's sweet flowing breast;
A tree that looks at God all day
And lifts her leafy arms to pray;
A tree that may in Summer wear
A nest of robins in her hair;
Upon whose bosom snow has lain;
Who intimately lives with rain.
Poems are made by fools like me,
But only God can make a tree.
—Joyce Kilmer

Virgin timber in the Joyce Kilmer Memorial Forest, Nantahala National Forest, North Carolina. (Photograph, courtesy United States Forest Service.)



his now-famous "Trees", which was written for his friend, Mrs. Henry Mills Alden, wife of the venerable editor of Harper's Magazine. It was published in book form under the title of "Trees, and Other Poems," in 1915.

Other poems were dedicated to his friend and "boss," Alden March, Sunday editor of the Times. On that April day in 1917 when the news of the sinking of the Lusitania was flashed across the Atlantic, March called Kilmer to him and said that he wanted a poem to be used as a page feature in the Sunday Magazine. At first Kilmer demurred, saying that he could not write anything good enough for such a subject, nor for such prominence.

But March insisted and the next morning Kilmer apologetically laid on his desk the manuscript of the poem "The White Ships and the Red." It was a brilliantly imaginative poem which was destined to be heard around the world and to stir the feelings of men in every land. In it Kilmer envisioned the wreck of the Lusitania, red from the horror of the deed, going down to the bottom of the ocean, there to join the ghosts of those which had been sunk by storm, shipwreck and iceberg.

But Kilmer did not limit his indignation against those responsible for sinking the Lusitania to writing poems. On April 23, 1917, just 17 days after the United States entered the World war, he left the Times and enlisted as a private in the Seventh regiment of the New York national guard.

A Front Line Fighter.

Shortly before the regiment left for Spartanburg, S. C., Kilmer was transferred to the 165th infantry at Camp Mills, Long Island, and he was senior regimental statistician when his outfit sailed for France in October, 1917. It was a job which would keep him close to regimental headquarters—what the army called a "soft berth." It was exactly for that reason that Kilmer was dissatisfied. He wanted to be in the front lines where there was action and his insistence led to his transfer to the regimental intelligence staff.

As sergeant on the intelligence staff he displayed the same fidelity and courage that he had shown as a newspaper man. On July 30, 1918, that fidelity and courage took him into the scarred and shattered timber which they still call the Wood of the Burned Bridge. His outfit was trying to locate enemy machine gun nests.

Not more than 30 feet away from Kilmer was Maj. William J. ("Wild Bill") Donovan, who later commanded the 165th. When it came time for them to move forward, Donovan called to Kilmer. There was no response. Donovan looked closer and saw Kilmer huddled on the ground. A sniper's bullet had stilled forever the voice of the man who had sung of "Trees."

* * *

They buried Joyce Kilmer among the war-blasted trees of Bois Colas—the kind of trees which were far different from those he had in mind when he wrote the poem that has been his memorial for nearly two decades. But now he has another memorial which will, literally and figuratively, "keep his memory green."

It is the memorial forest in North Carolina which was dedicated last summer with ceremonies at which the speakers included Joseph C. Kircher, southern regional forester of the United States Forest Service; Paul A. Williams, chairman of the Kilmer Memorial committee; Charles McDonald Puckette of the New York Times; Rev. John B. Kelly, chaplain, and Lieut. John McCloy, U. S. N., commander, of the Bozeman Bulger post of the Veterans of Foreign Wars; and E. A. Sherman, assistant chief of the United States Forest Service, who delivered the dedication address. In it he said:

"The Forest Service rejoices at this opportunity to co-operate with the Veterans of Foreign Wars in paying tribute to the memory of Joyce Kilmer. We may justly claim him as belonging to the veterans and foresters alike. On the field of combat he made the supreme sacrifice as a patriot; in 'Trees' he has bequeathed to humanity one of its rarest gems of human expression. It seems destined to rank with Longfellow's apostrophe to the 'forest primeval, the murmuring pines, and the hemlocks'. As his tree 'lifts her leafy arms to pray,' the poem moves in perfect cadence inspired by the same reverent spirit as Bryant's stately 'The groves were God's first temples,' where 'in the darkling wood amidst the cool and silence,' man first 'knelt down and offered to the Mightiest solemn thanks and supplication.'

"It is fitting that a monument to Joyce Kilmer should take this Wordsworthian form of 'A brotherhood of venerable trees,' such as distinguishes the area which we dedicate today. This monument is not needed to perpetuate the memory of Joyce Kilmer. Through his poem his name has become immortal and his memory shall abide on earth as long as the English language is a living speech. It is established primarily to show to all the world our nation's appreciation of one whose memory has become a priceless heritage of its people.

A Sylvan Cathedral.

"Such appreciation is best expressed in the form which he, living, loved most—no useless shaft of insentient stone; no shrine of personal glorification—instead we have this vast sylvan cathedral with the incomparable beauty of its changing lights and shadows in all their varying moods. Surely it would be his wish that it might serve the citizenship of the nation for which he died.

"Therefore, that this wish, though unexpressed, may be fulfilled, and to the end that this monument may serve our nation best, the Forest Service of the Department of Agriculture herewith reserves it as a primitive area, dedicates it to the spirit of Joyce Kilmer, and to the use of the people of the United States for their enjoyment, instruction, and inspiration until time shall be no more.

"Here, in these solemn shades, generation after generation of our people, imbued with reverent love for unspoiled Nature's charm, shall come to sacred ground, exempt from common use, and, with Shakespeare of old, find 'tongues in trees, books in running brooks, sermons in stones, and good in everything'."

"I have learned with much interest of plans for the dedication of the Joyce Kilmer Memorial Forest," wrote President Roosevelt in a letter which was read at the dedication. "It is particularly fitting that a poet who will always be remembered for the tribute he embodied in 'Trees' should find this living monument. Thus his beloved memory is forever honored and one of nature's masterpieces is set aside to be preserved for the enjoyment of generations yet unborn."

Smart, Flattering Dresses

MRS. DICK EVANS has come to town and brought Ann and Eddie LeRoy with her. She lives in Palm Beach in the wintertime and, of course, knows all about style. That's why she wears this directoire type frock that is both new and figure flattering In the floral print she has chosen she is perfectly gowned for the parties that will be given for her in the home town. The kiddies are wearing the simple styles appropriate to childhood and therein their smartness lies.

Auntie Rose Sews, Too.

Little Ann is asking Auntie Rose if she makes her clothes too. "Sure enough, dear," comes the reply. "I made this percale for mornings and have a beauty in yellow crepe cut from the same pattern to wear to the Bid-or-Bi meetings."

"I'll bet you can sew fast, too, the way Mother does. It only took her two mornings to make Eddie's suit and my dress. Won't you help me with my doll clothes now?"

"Indeed I will, Ann, and then we will have some of those oatmeal cookies you like for lunch."

The Patterns.

Pattern 1272 is available in sizes 14 to 20 (32 to 42 bust). Size 16 requires 4⅜ yards of 39 inch material and 2½ yards of ribbon for tie belt.

Pattern 1275 is for sizes 6 months to 4 years. Size 1 requires 1½ yards of 32 inch material.

Pattern 1403 comes in sizes 2, 4, and 6 years. Size 4 requires 1½ yards of 36 inch material.

Pattern 1212 is designed in sizes 34 to 48. Size 36 requires 5 yards of 35 inch material plus ⅓ yard contrasting for the collar.

CHICK ORDERS ARE FAR BELOW NORMAL TO DATE

Hatcheries Are Largely Overstocked; Poultrymen Should Not Delay Purchases Now

A below normal movement of chicks from hatcheries to individual poultry raisers is reported this spring by commercial hatcheries over the state According to a U S D A report from the Bureau of Agricultural Economics, advance orders of chicks over the U S as of April 1 were 31 percent less than those of the same period in 1936 Because of the sluggishness of chick demand, Iowa hatcheries are largely overstocked

H L Wilcke, head of poultry husbandry at Iowa State College, warns poultry raisers who are planning on raising the heavier breeds of chickens, as Plymouth Rocks, Rhode Island Reds or White Wyandottes, to delay no longer in ordering chicks For the best annual egg yield pullets should come into production between October 15 and the last of November.

Chicks of the heavy breeds must be hatched by March 15 or at least by April 1 to reach the egg-laying stage by the above time Chicks of the lighter breeds, as Leghorns, may be hatched from 4 to 6 weeks later than the heavy breed chicks (up to May 1 or 15) and still come into egg production in October or November Chicks which are hatched early grow more rapidly and are subject to lower mortality than those hatched later

Indications of a small crop of fall pullets and cockerels, as shown by hatchery reports this spring, may be explained by several conditions, Mr Wilcke believes First, the late spring may have been influential in delaying chick orders, and secondly, the price relationship between feeds and eggs and poultry meat have been unfavorable. High priced feeds at this time plus low egg prices and memory of the low prices paid for poultry last fall will be greatly instrumental in curtailing poultry production this year

In some cases, poultry raisers of southern Iowa are delaying their chick orders until they are reasonably sure of grain prospects

SPRAY BEFORE APPLE BUDS OPEN FOR SAN JOSE SCALE

Destructive infestations of oyster-shell and San Jose scale on Iowa apple trees can be brought under control now if dilute oil sprays are applied, says C H Richardson, Iowa State College entomologist The first two weeks in April are an ideal time to spray as the buds are not open and stronger sprays can be used

Trees heavily infested with oyster-shell scale can be most conveniently sprayed now with a commercial dormant oil spray diluted to contain 5 to 8 per cent oil Better control, however, can be gained if the trees are sprayed later when the insect eggs are hatching A commercial summer oil spray diluted to 2 per cent oil should be used for late sprayings

Trees only slightly or moderately infested may be successfully sprayed with a lime sulfur solution made by diluting 1 part of concentrate to 7 parts of water. If lime-sulfur is used during the summer, it should be diluted to 1 part concentrate to 49 parts water

San Jose scale, a species capable of killing any apple tree, can be brought under control if a commercial dormant oil spray diluted to 2 to 4 per cent oil is used before the buds open.

The oyster-shell scale can be recognized by its peculiar shape from which it gets its name This variety is gray in color The female is one-eighth inch long and considerably larger than the male. Only the eggs survive the winter to hatch early in June.

The female of the San Jose scale is the size of a pin head, round with a raised center The male is smaller and oval shaped Both adult and immature insects of this scale survive the winter

START TO RESEED LAWN NOW FOR BEST RESULTS

Shall it be a lawn or a patch of weeds.?

R. R Rothacker, Iowa State College landscape architect, declares it should be a lawn if homeowners will take immediate steps toward reseeding.

Grass is a cool-weather crop, he explains, and it may be planted at once A general purpose lawn mixture for Iowa soils may be made up as follows. 4 parts by weight of bluegrass, 2 parts red top and 1 part Pacey's perennial rye grass.

Prepare Seedbed Carefully

If the lawn is being reseeded to thicken the stand of grass, 40 pounds to the acre, or about 1 pound of seed to 1,000 square feet of lawn, may be sown For seeding new lawns this amount should be doubled

The seedbed should be carefully prepared The soil should be moderately compacted after the seed has been sown If a supply of fine, short bluegrass hay, or other chaffy material is available it should be spread loosely on the seedbed. This will shield the young grass plants from the direct rays of the sun and from the drying effect of winds.

Nitrogen Fertilizer Helps

The grass should be thoroughly established by the middle of June if it is to make a lawn, Mr. Rothacker warns. After June 20 the seasonal hot, dry spell that often lasts as long as 6 weeks will burn out the lawn if it is not well established The grass will make a faster, more luxuriant growth if a nitrogenous fertilizer as ammonium sulfate or nitrate of soda is added.

If the soil is clayey, an application of 6 to 8 inches of good, black top soil will eliminate much of the trouble of keeping a lawn established If the lawn slopes steeply the best practice will be to sod the slopes with pasture sod which is about 1½ inches thick and has all its roots The roots "catch" quickly, preventing erosion

Reed's Auto Hospital

Jim Reed, Prop., Goodell, Ia.

The number of Americans killed in traffic accidents during the last fifteen years exceeds by a wide margin the number of Americans killed in action or died of wounds during all the wars in which the nation has ever engaged This should cause us to do some real thinking.

Salt Lake City police are trying to find a woman from whom $15 and a watch were stolen a few days ago When arrested on suspicion Arthur Ellison confessed the theft but was unable to tell the name or address of his victim The lady had negleced to report her loss to the authorities

We read that Alice Forgenson, former North Dakota beauty parlor operator, is now running a barber shop in Bethel, Alaska, where she charges $5 to shave the "sourdoughs" In other words when Alice gets through with them they are not only shaved but skinned

A general rule to follow in the sowing of seeds is to plant them at a depth of four times the diameter of the seed However, seeds must be sown much shallower in heavy than in sandy soils

Death Lurks On Every Hill

ANSWERS

1. Careless and reckless driving, passing on a hill or curve
2. The operator of car No 3 is responsible for any damage.
3. Driving at 45 miles an hour, a motor vehicle can be safely stopped in that distance.
4. Think of the consequences and drive accordingly
5. Only by educating automobile drivers of the dangers involved
6. Stop your car as quickly as possible.
7. Fine or imprisonment and possible suspension or revocation of license
8. Regulatory sign, with penalties provided if violated
9. Pull to the shoulder of the road and stop.
10. Maximum height for vehicle and load 12 feet. Maximum width, 8 feet.

Notice To Home Owners In Hancock County

Who Occupy Their Own Homestead

Senate File 184 of the 47th G.A. recently passed and the act beame effecive by publication on March 26, 1937. This act provides that home owners in Iowa who occupy their own homesteads for at least six months of the year are entitled to a homestead credit against the last half of the 1936 tax and the 1937 tax on said homesteads.

To avail yourself of this credit it is necessary that the owners of homesteads (who are occupants) make application for said credit before June 1st, 1937, by filing application with the county auditor.

To expediate matters and save expense to homesteaders and the county, proper blanks may be had and applications made at the following named people in the several towns in the county.

GARNER	THE AUDITOR'S OFFICE
BRITT	OLE G. PETERSON
WODEN	J. H. BODE
CRYSTAL LAKE	RUSH GABRIELSON
CORWITH	GEO. H. OXLEY
GOODELL	OWEN F. CONWELL
KLEMME	HENRY SUCKOW
KANAWHA	FRED KNUDSEN

Important Read Carefully

Your deed or contract must be on file or recorded in the office of the county recorder. You should also bring your contract or deed and a copy of your 1937 assessment roll with you when making application.

Section 11 of the act provides that all claims for credit on the 1936 and 1937 taxes must be filed before June 1st, 1937, or no credit can be allowed and the claim of the owner must be supported by the affidavite of two or more free holders who are disinterested and reside in the taxing district in which the claimed homestead is located.

In summing up. Bring your deed or contract, your 1937 duplicate assessment roll together with your free holders to one of the hereinbefore named persons and make your claim for homestead credit before June 1st, 1937. Under no circumstances can credit be given if filed later.

FRED C. MISSAL
County Auditor

SCHOOL NEWS

Grades 7 and 8

Ellen Kilgore brought a lovely bouquet of pussy willows to school on Wednesday.

Wednesday night the grade boys began baseball practice Mr Galbreth is coaching them

Allen Barz, Shirley Johnson, Jacqueline Kudje and Keith Stille received 100 in spelling this week.

Grades 5 and 6

Julia Bell and Eugene Johnson have been absent part of this week because of illness

In fifth grade arithmetic we are learning how to make change We have some toy money and we play store. We are now able to do this quite rapidly.

Each day we spend a short time studying traffic problems. Of course we are to young to drive now but we feel that if we learn safety measures now we will have them well in mind when we are old enough to drive As a summary we are making a booklet.

We have some "pussy-willows" in our room That is the first sign of spring we have had to look at this season Now we are watching for dandelions

The sixth grade history class is much interested in the exploration map they are making Each day we add to the route taken by an explorer.

Grades 3 and 4

The third graders have finished their booklets about "The Story of Light."

Several of the fourth graders have made their original health posters Each child is required to make one before his years work is complete.

The fourth grade started to use the Child-Story Reader on Wednesday On Friday they took the first speed and comprehension test.

Several of our large free-hand drawings have been finished We are very proud of them

We completed our study of Norway this week. Four people made a perfect score in the test.

Mavis Myers' mother and sister visited in our room on Friday We are always glad to have visitors

Grades 1 and 2

The following people have been neither absent nor tardy during the last six weeks period. Willis Anderson, Elizabeth Goll, Edward Grosshuesch, Dean Jacobs, Ardel Rosendahl, Arlene Smock, Velma Tiggeman, Esther Mae Hartbeck, Melvin Howard.

Our Toy Shop is finished and now we are working on our toys.

We wrote letters to Clarence one day this week when he was sick.

We are making a new booklet about Color-Elves We are using our paints.

ITEMS OF INTEREST FROM AVERY TOWNSHIP

Miss Grace Barkema is assisting with the work at the Luke Wessels home near Belmond for a few weeks.

Mrs. August Trampel and family were Sunday afternoon visitors at the Peter Trampel hom.

Mrs. Fred Bachman and son, Wayne, and Mrs. Robert Roths were Wednesday evening visitors at the Bert Closson home in Mason City.

Mr and Mrs. Harlow Helps and family were business callers at Clear Lake Thursday afternoon

Mrs. Adolph Schlichting and son, George, were business callers at Mason City Thursday .

Miss Gertie Trampel who is assisting with work at the D A. and Herbert Marshall home, spent the week end with her mother, Mrs August Trampel.

Bill Pannhoff was a caller at the Harlow Helps home Friday afternoon.

Mr and Mrs. John Trampel and son, Melbourne, were Wednesday evening visitors at the Peter Trampel home.

Mr and Mrs Clarence Bachman and family and Irve Henry were visiting with relatives at Clear Lake Sunday.

Mr. and Mrs Adolph Schlichting and sons, George, Walter and Glenn, were Sunday visitors at the John Watermiller home.

Mr and Mrs. Herbert Marshall and Irene were visiting at the Harlow Helps home Sunday evening.

Sunday School 10:00 a.m.

Morning Worship 11:00 a. m.

Sermon Subject "The Lesson of the Deeper and Victorious Life." John 17:17.

Christian Endeavor 8:00. Subject. "Land and Life."

Bible questions that will be answered Sunday morning:—

1. Where is pride in good workmanship urged?
2. What preacher earned his living as a tent-maker
3. What two lawyers are mentioned by name in the Bible?
4. Where is an idol-factory described.

"Come thou with us and we will do ye good."

The Reward

You may have heard about it before but it bears repeating A sign in the office of a large industry for the benefit of the younger members of the staff reads. "Work hard for eight hours a day and don't worry, then in time you may become the boss and work 18 hours a day and have all the worry."

The other day we called at the home of Mrs. C. A. Arnold and thoroughly enjoyed seeing her beautiful Cloxinias. She had eight plants in bloom this week, ranging in color from white, to shades of pink, rose,, purple and lavender. She has them in a lovely bay window to the south, which must be an ideal place for flowers.

Butterfly Bridal Veil Is Lovely

By CHERIE NICHOLAS

THERE'S a spirit of romanticism and the prettily feminine being revived this season that affects the entire program of fashion for spring and summer. In no phase of the mode is this favor for the pretty-pretty type of dress and adornment so definitely emphasized as in the realm of bridal array.

If you are in quest of a veil and headdress that dramatically and picturesquely interpret a beguiling new theme just say "butterfly veil" to your milliner or utter the magic word in shop or salon where bridal array is made a feature and you'll forever after agree that dreams do come true. The bride centered in the illustration is wearing a most exquisite butterfly veil, so called because of the huge applique lace butterflies that flutter among the mists of tulle like butterflies winging their way in a garden of sweet scented flowers. The model pictured is a full, circular fingertip veil but if you prefer a long veil rather than short they are shown in either length. The tiara that makes this beautiful bride "look every inch a queen" is appliqued with princess lace.

The versatility of types in headdress makes it an easy matter for any bride-to-be to find a style tuned to her individuality. Note the variety shown in this group. In the upper right corner a Margot style cap declares romance and poetry in its quaint picturesque type. The pointed bonnet-like brim of stiffened tulle is appliqued with battenburg lace. A diadem of pearls and rhinestones is pictured above to the left. Her gown has a becoming latticed beadwork neckline.

If you covet a veil of Parisian chic note the classic cap in the panel below to the left. Hand-rolled satin rosettes trim this cap. The veil is cut to a double point in the back, finished all around with a four-inch hem. An exquisite veil and headdress are pictured in the right lower panel, featuring a most lovely halo of beautiful lace with quaint ruffle across the back.

Fashion this season is most kind to the individualistic bride who seeks outstanding originality. In the matter of color especially, exciting innovations are taking place. Many a bride will be a "perfect picture" in pale pink, or in an extremely delicate blue and the latest news for wedding gown and veil is beige so light it is just a degree or so from white.

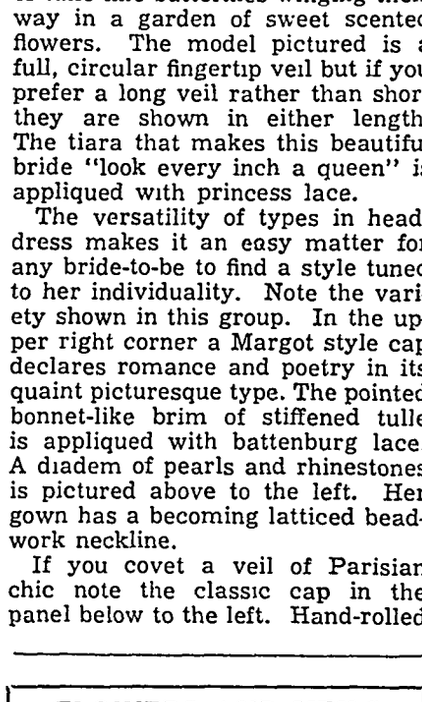
This pale beige for the bride invites dramatic color schemes for the attendants, one of which is rose tones for the bridesmaids, from pale pink to American beauty with arms laden with roses. A more daring color scheme includes yellow, apricot and flame sheer frocks for the maids contrasting the creamy beige of the wedding gown and veil.

And here's more news for brides-to-be who are planning a wedding scene that will ever linger in the memory of those who behold—the bridal veil fashioned of the identical chiffon or filmy mousseline de soie as that which makes the wedding gown; appliques of lace or flowers (either artificial or handmade) on satin or sheer gowns; net over silver lame for distinctive originality; wide use of the new summer velvets that pattern mousseline de soie of fragile beauty with tiny velvet motifs. The bridesmaids wear the same white fabric with the velvet motifs in delectable flower colorings.

© Western Newspaper Union.

FLOWERS AND VEILS

By CHERIE NICHOLAS



You can be just as piquant-minded and alluringly feminine in your choice of millinery as you care to be this spring. Fashion's mood is for pretty flowers and saucy veils in hilarious colors. The "first" hats have come out decked in flowers. For early wear the new little flower toques are making a great splurge. The model pictured is of bright red carnations. It would look fetching with a flare-around red veil bordered with big chenille dots. The new "beauty spot" veil is vastly becoming. See it shown here. Note the huge dot which comes at just the right place on the face to show off flirtatiously.

Dalmatian Styles

The new vogue of Dalmatian styles has brought another interest in velvet. Little waistcoat and boleros with berets to match are being adopted by the college set and by the sub-deb crowd.

REDINGOTE COATS LAUNCH NEW VOGUE

By CHERIE NICHOLAS

When a plain monotone crepe coat is worn over a print frock that is no longer news but when a coat of gaily colorful print crepe tops a somber black or navy frock—aye, there's news that is filling first page headlines. And it should! You get a perfectly new slant on fashion when you see these swanky costumes that seem to say a "turn about is fair play."

These fetching print-coat outfits take on added charm in that through the front fastening of the coat flutters a bright bi-color or tri-color, if you prefer, sash warranted to liven any black, navy or brown crepe frock even when the coat happens to be removed. However, we wager you won't be removing the coat oftener than absolutely necessary for it will prove too attractive to lose sight of at any time.

While the majority of these new print coats are styled in redingote fashion, there is also a trend to the shorter three-quarter loose-fitting types. Some few versions stress jackets of the print with handbags out of the same print.

Shoe Season Brightened by Addition of Novel Colors

Colored shoes have stepped back into the picture and add a bright touch to somber winter costumes. Schiaparelli touches up a black wool suit with a pair of scarlet kid shoes matched by scarlet kid gloves. For a navy blue outfit, this couturiere furnishes jade green shoes that match a twisted jade velvet roll on one of the new peaked and high-crowned hats. Patou uses much bronze this year. One gown of royal purple velvet is worn with a girdle that is studded in clear amber beads. The jewels in the belt are matched by slippers of glittering bronze. The same slippers are shown as a complement to a brown costume trimmed with bronze sea fur.

POULTRY FACTS

BABY CHICKS NEED PROPER ATTENTION

Feed Well-Balanced Starter. Specialist Advises.

By Roy S. Dearstyne, Extension Poultry Specialist, North Carolina State College.—WNU Service

Get your baby chicks off to a good start and you will be in a better position to make money with your poultry flock this year. The first step is to get only good chicks. Hatch eggs from birds of a good type that are high producers. Or buy chicks from reliable hatchers.

Don't let low prices fool you into thinking you can get a bargain by buying cheap chicks.

Then give the chicks a chance. Feed a well-balanced starter. Provide one mash hopper, five feet long, for each 100 chicks. Provide a half-gallon drinking fount for every 50 chicks.

Carefully figure the amount of floor space in the brooding house, and do not start more than two chicks for each square foot of floor space.

Check brooder house temperatures at frequent intervals. More chicks have been killed by overheating than by chilling. Protect the chicks from drafts, but see that they get adequate ventilation at all times.

Rigid sanitation will keep down disease. Do not let the chicks come in contact with anything that may have been infected by older birds. Don't drug the chicks unless an emergency arises.

If any chicks appear to be infected with disease, remove them from the brood at once. Investigate the trouble and see what can be done to eliminate it.

County farm agents and extension specialists will be glad to offer suggestions about disease control.

Many Little Turkeys Die for Lack of Enough Food

"It is a fact," says Prof. H. D. Munro, "that many little turkeys starve to death the first week they are in the brooder, and to prevent this the feeder must see to it that they all learn to eat.

"Place shallow feeders or boxes filled with reliable turkey starting mash before poults as soon as they are put in the brooder. Young turkeys do not eat mash as readily as baby chicks and must be taught to eat.

"Some growers put older poults with them to teach them. A moist mash with ground alfalfa leaves sprinkled over it will often attract the attention of the little birds and get them started. The patience of the man looking after them is the main factor. Stick with them until they are all eating.

"One hundred poults in a 10 by 12 brooder house is enough. A temperature of 90 degrees to 95 degrees Fahrenheit at the edge of the hover two inches from the floor is correct for the first week. Lower the temperature five degrees each week until 70 degrees Fahrenheit is reached."—Prairie Farmre.

Room for Layers

Now is a good time to check up on space per bird in the poultry house. Crowded laying quarters have an adverse effect upon health and production. When not enough space is provided for the pullet flock, says a writer in Wallaces' Farmer, serious losses are more apt to occur from cannibalism, roup, colds and other diseases prevalent during the winter months. There should be three square feet of space per bird of the light breeds and four square feet per bird of the heavy breeds. Roomy, comfortable quarters reduce labor of management. Where houses are overcrowded, more frequent removal of litter is necessary. The problem of ventilation also becomes more acute because of greater difficulty in removing the large amount of moisture given off by the birds, especially during cold weather.

Poultry Lore

Hatching eggs held longer than 10 days decrease in hatchability.

* * *

Poultry experts estimate a pullet eats 25 to 27 pounds of feed before reaching maturity.

* * *

Chicken canned on the bone is better flavored than chicken meat stripped from the bone and canned by itself. Frying chicken or any other meat before canning it is unsatisfactory.

* * *

Hens will not eat enough food, if they are uncomfortable, chilly, wet or subjected to cold drafts.

* * *

Be sure that a constant supply of clean, fresh water is at hand during every lighted hour so that the layers may eat and drink alternately.

* * *

Feed grain three times daily during cold days, one-quarter of the daily allowance (about 2½ to 3 pounds for each 100 hens) at breakfast time, in low troughs.

Keeping Up With Science

By Science Service

© Science Service.—WNU Service.

Indians of Arizona Learned to Live in Land of Contrasts

Hopi Most Advanced Tribe in Farming

Washington.—Indians in Arizona, and the white farmers who took over part of the land after them, have had to adapt themselves to many contrasts in living conditions, Dr. H. L. Shantz of the United States Department of Agriculture told an audience of his fellow-botanists in an address here.

Arizona is a land of many contrasts, he pointed out. Its "low spot" is only 137 feet above sea level; the peaks of its highest mountains rise above 12,000 feet. Its normally dry climate is broken into twice a year by well-marked rainy seasons, and sometimes punctuated with cloudbursts. Temperatures have ranged from 25 below zero to 127 above.

It's a World in Itself.

Of its total area, 42 per cent is desert, 23 per cent natural grassland, and 36 per cent is distributed among three types of forest. At the top of the San Francisco peaks there are tiny patches of real Alpine meadow. Of 18 great world types of vegetation, Arizona has 9; of 22 types distinguished in this country, the state has 12. It is a world in itself.

In this world dwell Indian tribes of most diverse agricultural abilities. Heading the list are the Hopi, who raise ample crops of corn, beans, melons, squashes, and other produce, irrigating them with mere cupfuls of water. They have developed a variety of corn able to sprout successfully if planted 14 inches deep, whereas the white man's corn dies if planted more than three inches deep.

Less careful farmers, but living by agriculture still, are the Pima and the Papago tribes. They are not nearly as systematic irrigators as the Hopi, and they raise their crops to some extent by dry-farming methods. They also make use of native food sources such as cactus fruits and mesquite beans.

Least agricultural are the Apache and Navajo. Originally roving, often predatory, in their habits, they have given up hunting and warfare only under white men's restraint. The Apache are learning to grow corn; the Navajo have become herdsmen, famous for their great flocks of sheep and for the beautiful rugs they weave from the wool.

Plants Need "Sleep" at Night to Have Normal Growth

Washington.—Nightly sleep, or something very like it, is as necessary to plants as it is to men and animals, recent researches at the Smithsonian institution indicate. The work was done by Dr. Earl S. Johnston of the Smithsonian institution and Dr. Paul R. Burkholder of Connecticut college.

It has to do with the physiological reaction to light on the part of auxins, the substances within plants that cause growth. Strong sunlight was found to be destructive to the auxins, while "controls" containing like amounts of the substances were left with much greater growth-promoting power after being "exposed" to darkness for equal periods.

The destruction or inactivation of the growth substances, the experimenters found, varied with the length and intensity of the illumination. It also varied, as might have been expected, with the species of plant. Some plants, such as the sunflower, are much more sensitive than others—so sensitive, in fact, that their movements seem superficially to be controlled by an animal-like intention.

Shelterbelt Trees Live Despite the Drouths

Washington.—Trees planted in the West's much-controverted shelterbelt area show high survival percentage despite two years of desperate drouth, the United States forest service reports. Survivals average 550 trees to the acre, out of an average of 740 planted.

Chinese elm and cottonwood that were 18 inches high when planted in the spring of 1935 are now 15 and 16 feet high. Species showing best growth include green ash, cottonwood, Chinese elm, red cedar and Ponderosa pine.

Life Is Longer and Better, Thanks to Work of Scientists

Dr. C. C. Furnas Tells of Big Improvements

LONGER life, biologically better life, and an easier life. That is science's gift to mankind. Dr. C. C. Furnas, Yale professor of chemical engineering and author of a stimulating book, "The Next Hundred Years," summarized in a recent address what science and technology are doing to us. The record is encouraging.

The expectancy of life at birth has risen from less than forty years in 1880 to almost sixty years at present. The expectancy for all ages up to sixty has increased. Of each one thousand people born this year, almost 30 per cent more will survive to age fifty than will survive in a similar group born in 1900.

Science is giving us a biologically better life as well as a longer one, Dr. Furnas contends. Most epidemics have been eliminated. Tuberculosis is on the run. Even cancer is beginning to think about slipping. Colds, influenza, infantile paralysis and the various diseases of senility are still to be touched but they will be, and perhaps surprisingly soon.

People Learning About Diet.

Dietary deficiency diseases are on their way out and will soon be a rarity. Dr. Furnas feels that the average diet is still very poor but it is improving. The public is learning, he said, that the over-purified foods such as granulated sugar and white flour are poor substitutes for food and that there is a great virtue in the protective foods: vegetables, fruits and milk. They are responding to the exhortations of science and the health of the next generation will show it.

The material side of life is improving. Dr. Furnas observes that the cave man expended almost 100 per cent of his efforts in getting his meals. By the time of a certain tea party in Boston that figure had dropped (for Americans) to 56 per cent. That is, in 1775 56 per cent of the average American income went for food. By 1931 that had dropped to 38 per cent. In other words the struggle to fill the stomach has steadily become less severe, which leaves a larger part of the average dollar to be spent for other things.

The item of "sundries" which includes education, travel, books, all recreation, rose from eight per cent of the average American income in 1775 to 24 per cent of the income in 1931. This is a three-fold increase and is tremendously significant. We now spend three times as much on the extra-curricular activities, which are the most pleasant part of life, as did the revolutionists. We are now spending five billion dollars per year on education and 10 billion for recreation. One would almost think we were leading a profitable and pleasant life. Despite this higher standard of living we are working less.

Between 1900 and 1930 the average real wage, in terms of standard commodities such as food, rose 48 per cent while the average working week dropped almost 15 per cent. The long time trend since the depression is not yet quantitatively discernible but it will undoubtedly be upward for wages and downward for hours.

"This is all to the good," says Dr. Furnas. "Note that I am not saying that life for the average man is good as yet, I am only saying that it is better than it was, much better."

Shortest of Radio Waves Being Used at Ann Arbor

ANN ARBOR.—The shortest continuous radio waves ever produced are being used in experiments at the University of Michigan here. They are only 6.4 millimeters (about one-quarter inch) in wavelength, report Drs. C. E. Cleeton and N. H. Williams of the department of physics.

So tiny is the tube used to generate the waves that it is assembled under a magnifying glass and its outside dimension is less than one quarter of an inch, state the scientists in their report to the Physical Review.

Radio radiation generated by the equipment is being used for studies of the molecular structure of gases including water vapor. The minute rays have many of the properties of light and travel in straight lines when focused by a concave mirror. Pieces of black paper, hard rubber and wood are transparent to the rays.

The possibility of using them for communication purposes is remote since they are rapidly absorbed by the water vapor in the atmosphere. It is by a study of this absorption, in fact, that scientists are learning new facts about the molecular makeup of water vapor.

The 6.4-millimeters radio wave represent about the limit of radio tion which can be produced from vacuum tube sources.

cene in a shipbuilding plant at Bath, Maine, showing the new American racing yacht, Ranger, rapidly g shape under expert shipbuilding hands. The possible America's cup defender is being built for Com- re Vanderbilt to participate in trials to be held off Newport this summer.

Household Questions

Removing Tea Stains—Tea and coffee stains can sometimes be removed from china cups by rubbing them with a damp cloth dipped in baking soda.

* * *

Cleaning Paintwork — Glossy paintwork should never be washed with soap and water, as it usually leaves a smeary surface. A teaspoonful of turpentine in warm water will make the cleaning a simple matter and will not scratch the paint.

* * *

Useful Velvet—If you are making anything of velvet do not throw away the pieces of material left over. Save them for using as polishers for your black-leaded stoves and for your shoes. You'll get a real mirror-like shine on both if you rub them with velvet after the usual polish has been applied.

* * *

A Supper Special—One cup leftover cooked vegetables, four eggs, half-teaspoonful salt, dash of pepper, half-cup grated cheese. Break the eggs and beat the yolks and whites together. Stir in the vegetables. Add pepper and salt. Put in greased baking dish. Cover with grated cheese and bake in hot oven ten minutes.

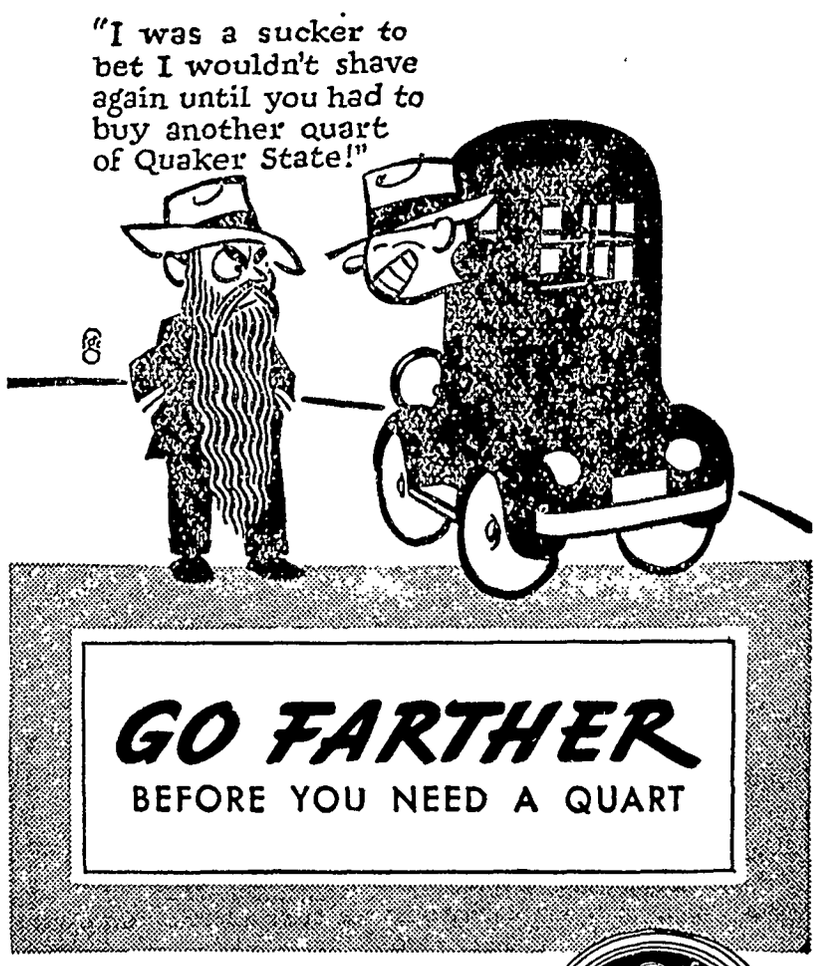
* * *

Shining Saucepans—Aluminum saucepans that have become discolored inside can be made to look like new by boiling in them water to which a tablespoonful of vinegar and some apple parings or lemon rinds have been added.

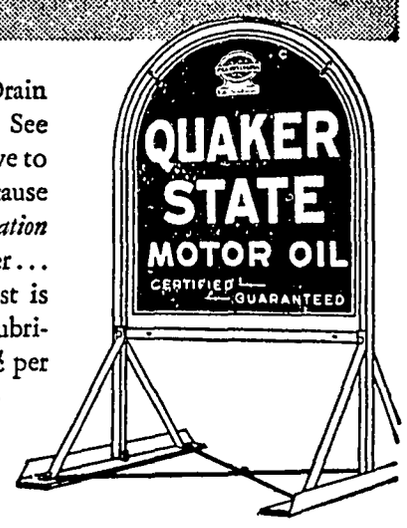
* * *

To Remove a Tight Lid—Tie a piece of string round the tin two or three times, just below the lid; then push a pencil between the string and the tin, twist the pencil over, and the resulting pressure will release the lid.

WNU Service.



"I was a sucker to bet I wouldn't shave again until you had to buy another quart of Quaker State!"
GO FARTHER
BEFORE YOU NEED A QUART



Try the "First Quart" test. Drain and refill with Quaker State. See how far you go before you have to add the first quart. That's because there's an *"extra quart of lubrication in every gallon."* And remember... the oil that stands up longest is giving your motor the safest lubrication. The retail price is 35¢ per quart. Quaker State Oil Refining Corporation, Oil City, Pa.

Why
Firestone
GROUND GRIP TIRES
GIVE MORE TRACTION
The patented two extra layers of Gum-Dipped cords hold the heavy tread to Gum-Dipped cord body
The body of patented Gum-Dipped High Stretch Cords which give greater adhesion, flexibility and strength to withstand pulls and strains

THE patented scientific arrangement and spacing of the deep, rugged bars of the tread make this tire self-cleaning. It will not clog or ball up, thus providing clean traction with every turn of the wheel. The deep rugged tread is held inseparably to the cord body because every cotton fiber in every cord has been soaked in pure liquid rubber by the Firestone Patented Process of Gum-Dipping. This gives the tire much greater strength to resist the strains of the extra "pull."

Ground Grip Tires save 25 per cent in time and 25 per cent in fuel. They give more traction and drawbar pull — ride easier and cut down repair bills. You can save time and money by equipping your tractors, trucks and farm implements with Ground Grip Tires. See your Implement Dealer, Firestone Tire Dealer or Firestone Auto Supply and Service Store today.

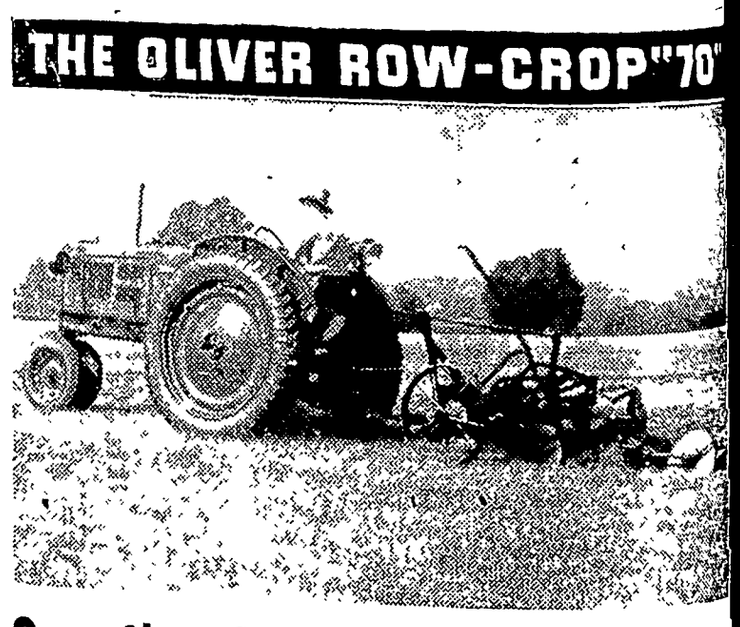
THE OLIVER ROW-CROP "70"



Smoother Power—Less Vibration—Easier Riding—A Pleasure To Drive

With its six cylinders giving *overlapping* power—and a decreased intensity of individual power impulses—the motor in the new *Row Crop "70"* runs more smoothly and with less vibration than a two or four-cylinder engine.

You'll really enjoy driving it. There's less wear and tear on both driver and tractor. With *finger-tip* control—planting and cultivating equipment mounted in full view of the operator—and plowing with two 14-inch bases, under ordinary soil conditions, *at over 4 miles an hour*—you'll get a big day's work done easier and *quicker.* There's more time left for other jobs—more hours to *live!*

There are two "70's"—one operating most economically on 70 octane gasoline—and the other on kerosene or distillate—neither a combination makeshift. Come in and see these sensational new *Row Crop "70's"*—with a complete line of mounted listing, busting, planting and cultivating equipment.

A heavy wind caused extensive damage in this community and North Iowa Friday night. In the vicinity of Klemme several silos, small buildings and windmills were blown down. The wind was accompanied by a heavy rainfall

SHOWER IN HONOR OF MRS. ELMER LARSON

Mrs. Verner Nelson was hostess to a large number of ladies at her home Saturday afternoon at a Post Nuptial shower in honor of her niece, Mrs. Elmer Larson, recent bride The afternoon was spent in giving the bride advice and also a favorite recipe A mock wedding was also a part of the entertainment. Mrs. Robert Roths and Mrs. Clarence Bachman asisten in serving a two course luncheon. Mrs. Larson received many beautiful gifts and an enjoyable time was reported by all present.

POST OFFICE COMES IN FOR A SPRING CLEANING

Postmaster John Day and his assistant, Milo Patet, have been doing things at the post office this pas week Milo is quite an artist with a paint brush and refinished all the mail boxes in gold. The woodwork has been givne a fresh coat of varnish and the place looks spic and span.

The Klemme post office, which is located in the old State Bank building, is one of the nicest in north Iowa.

W.F.M.S. Will Meet May 6th

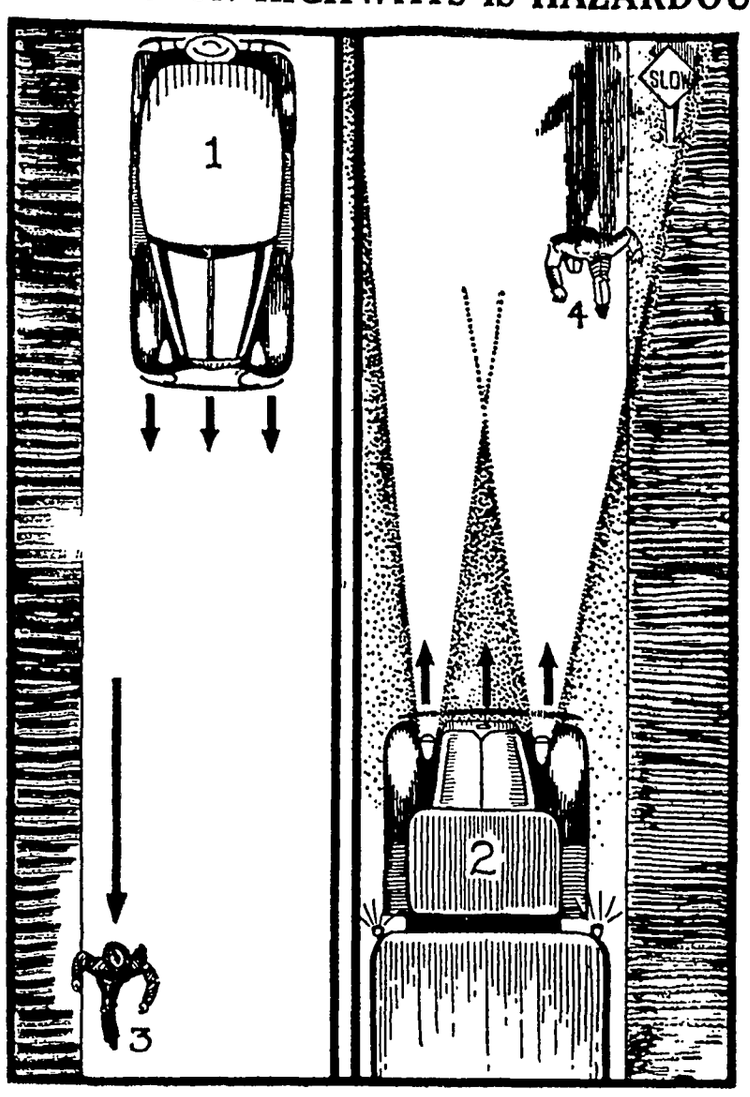
The W.F.M.S. of the Methodist church will meet at the home of Mrs. Frank Ward, Thursday, May 6th. Mrs. Herman Paul will be the leader, while Mrs. J. A. Chambers will have charge of the devotionals.

IN MEMORY OF DORIS GRANGE Who Died 15 Years Ago This Week

The golden gates were opened,
And heavenly Angels smiled,
And with their tuneful harp-strings,,
Welcomed the little child.
They shouted high and holy,
A child hath entered in,
And safe from all temptation,
A soul is sealed from sin.
They led her through the golden streets,
On to the King of Kings,
And a glory fell upon her
From the rustling of their wings
The Saviour smiled upon her,
As none on earth could smile,
And heaven's great glory shone around,
The little earth-born child.
On earth we miss the little one
We sigh and weep and sigh again,
And wonder if another such
As ours has ever died.
Oh! Had we seen through those high gates,
The welcome to her given,,
We never could wish our little child
Back from her home in Heaven.

Mr. and Mrs. Paul Grange and Dorance

WALKING ON HIGHWAYS IS HAZARDOUS



When walking along public highways, pedestrians should always follow the example as illustrated by No. 4 If facing traffic, a pedestrian can observe approaching cars, thus safeguarding himself against injury. Law states that the pedestrian does have an equal right on public highways with vehicular traffic. However, courtesy and the desire to live should direct the pedestrian to step off the roadway and permit the passage of motor vehicles The pedestrian as illustrated by No 3 is plainly at the mercy of the operator of car No. 1. State laws and traffic regulations govern the movement of vehicular traffic. They also govern the rights of pedestrians If a pedestrian violates these rules, he is subject to prosecution the same as a motor vehicle operator.

Never walk with your back to traffic. If you make a practice of this, and you are injured, you have but yourself to blame In the illustration, the driver of car No. 1 cannot be held liable in case of injury to pedestrian No. 3 unless he is operating his vehicle in careless and reckless manner, or is driving while intoxicated Motor vehicle regulations state that an operator of an auomobile shall reduce his speed when approaching or passing a pedestrian If the driver of car No. 1 does this, pedestrian No 3 has no legal recourse in case of an injury. In the event it is necessary that several people walk along the highways, walk in single file. Don't walk in groups, thus endangering your own lives as well as causing a hazardous trafifc condition

Good judgement, courtesy, and common sense are the requirements for traveling on the public highways in safety whether you are walking or driving a car. Copyright, 1937, P. L. Cummings, Des Moines, Iowa

QUESTIONS

1 What should the oerator of car No. 1 do when approaching pedestrian No. 3?
2. If the operator of car No. 2 strikes pedestrian No. 4, is he liable under law?
3 Why should pedestrians walk facing traffic?
4. What must the driver of a motor vehicle do when approaching or passing a pedestrian?
5. Why is it extremely hazardous to walk upon the paved portion of the highway at night?
6. Should or should not a pedestrian be prosecuted for violating a traffic regulation?
7 Why is it dangerous for a group of people to walk on public highways?
8. Under what conditions is the driver of car No. 1 liable in the event of an accident to pedestrian No. 3?
9 Does No 4 have a right to walk on the traveled portion of the highway
10 Why is hitch-hiking on a public highway a dangerous practice?

ANSWERS TO QUESTIONS ON PAGE FOUR

LOCAL BANKERS TO ATTEND MEETING AT MASON CITY

Over three hundred bankers from all over North Iowa will gather at the Hanford Hotel, Mason City, on Tuesday, May 4th, when groups 3 and 4 of the Iowa State Bankers association will hold their convention.

An all day program has been prepared and the convention will close with a banquet in the evening.

The employees of the First National Bank of Klemme will attend the afternoon and evening sessions. The bank will close at noon next Tuesday instead of at the usual hour. Customers who wish to do business on that day should call at the bank in the forenoon.

RAY JORGENSON JR. WINS IN KGLO RADIO AUDITION

Ray Jorgenson, Jr. who played an accordian solo in a radio audition over KGLO a couple of weeks ago, has been notified that he was selected as the winner for the week and will compete in another audition to be held at a later date. He was also invited to try out for a conract to play fifteen minute programs three times a week over KGLO.

TRAFFIC VIOLATERS FINED IN JUSTICE H. SUCKOW'S COURT

Monday Highway Patrolman West brought R. W. Hill, Mason City, into Justice Henry Sucow's court charged with failure to display license plates on his trailer house. Hill was fined $5.00 and costs. The fine was suspended providing Hill procured plates for his trailer.

Wm. Gallenger, of Emmetsburg, was brought into Suckow's court Monday afternoon by Patrolman West. He was fined $50 and costs for overloading his truck. $20 of the fine was remitted.

METHODIST CHURCH LANDSCAPED; MANY TREES AND SHRUBS PLANTED

A big crew of volunteer workers turned out last Thursday to assist in planting trees and shruts at the Methodist Church. The Ferris Nursery of Hampton landscaped the grounds and a man from the nursery was here to direcmt the planting.

An evergreen planting was placed at the front of the church and shrubs of various kinds are arranged around the other three sides of the building. A Privet hedge was planted along the south border of the grounds and at the rear of the grounds a honeysuckle hedge was planted with a Lombardy Popular as a background screen. Several trees were planted on the lawn at the south side of the building.

LARGE CROWDS PRESENT AT BOTH PRESENTATIONS OF SENIOR CLASS PLAY

The Senior class of the Klemme High School presented their class play, "New Fires" two nights, Thursday and Friday of last week. The auditorium was well filled with people both nights

The play was above the ordinary high school play and the various character parts were well played. Miss Agnes Galbreth, principal of the high school, directed the play.

GIRL SCOUTS HELD BI-MONTHLY MEETING

Troop 1 of the Girl Scouts held their bi-monthly meeting Monday evening in the basement of the bank. Each patrol chose its corner and spent the rest of the evening in it discussing ways of earning money and electing a few officers. The next meeting will be held in two weeks.

SUN. IS PROMOTION DAY FOR PUPILS IN REFORMED CHURCH SUNDAY SCHOOL

Sunday is the beginning of the new year at the Reformed Sunday School. Reports will be given by teachers and officers and pupils will be promoted.

The new officers elected last Sunday will take charge for the new year They are as follows:

Supt., Marvin Barz; Ass't Supt., Verner Priebe; Sec-Treas., Mitchel Bock; Sunday School Board, Mrs. Henry Barz, Mrs. Paul Goll, Mrs. Leslie Hartbeck, and Mrs. Ewald Josten.

IOWA DRIVER PERMITS TO BE RENEWED SOON

Motorists Will Have First Contact With New Law In May

DES MOINES—Iowa motorists will have opportunity, probably by the middle of May, to apply for renewal of drivers licenses, Lew Wallace, superintendent of motor vehicles said Wednesday.

This is the first contact the individual motorist will have with provisions of the new motor vehicle law passed by the 1937 legislature and signed by Gov. Nelson G. Kraschel last Monday.

Renewal applications will be available at the county treasurers' offices, banks, and other convenient places. They may be filled out and mailed to the motor vehicle department in Des Moines.

May Avoid Exam

Licenses will be renewed without delay for holders who have not lost a stub or suffered revocatino of their present licenses through infraction of the law, Wallace said. such persons will be required to take the examination again.

The important change in the license law is the increase in the fee from 25 cents to 50 cents for a license which is good for two years. Check or money order—not cash—must accompany the application for renewal.

The increase in the drivers license fee is to finance the 50 man increase in the size of the highway patrol, beginning July 4, when the new law goes into effect.

50 Patrolmen Added

The patrol now consists of 53 uniformed patrolmen and 25 license inspectors. Under the new law, the inspectors become part of the uniformed patrol and 50 men are added, giving a combined force of 128 men.

Other changes under the new law include:

1. Compulsory dimming of lights when approaching within 500 feet of another motor vehicle.
2. Walking on the left side of the road facing approaching traffic.

Zoned In Cities

3. Giving cities and towns the right to zone highways within their corporate limits in respect to speed limits.
4. Permitting speed limit in business districts to be increased from 15 to 20 miles per hour.
5. Increasing speed limit for trucks on highways from 35 to 40 miles per hour.
6. Raising minimum age for driving automobile from 15 years to 16 years, excepting under school permit, which is available at age of 14, or under instuction permit.
7. Providing minimum of two-day jail sentence as penalty for driving while driver's license is under suspension.

No Speed Limit

8. Requiring juvenile guilty of violation of traffic laws to be certified to the district court instead of the juvenile court.

The new law fixes no speed limit for passenger cars on the highway as advocated by the state safety council. Neither does it affect the present 45-mile-an-hour speed limit for buses.

The 1937 Iowa motor vehicle act, passed after weeks of work by the legislature and conference committee, brings the Iowa law into conformity with uniform national road laws, Wallace said.

Ouch

Waiter, by way of conversation: "You sometimes find a pearl in an oyster stew."

Grouchy customer "Maybe, but I'll be satisfied if I can find an oyster."

Clue in Geography to Tooth Decay Found by Research

Effects of Latitude and Drinking Water

Baltimore.—Dentists seeking ways to prevent caries or tooth decay took a lesson in geography at the meeting here of the International Association for Dental Research.

Latitude, hardness of drinking water and nearness to mining regions all seem to have an effect on tooth decay, Dr. Clarence A. Mills, professor of experimental medicine at the University of Cincinnati, told the dentists.

The amount of tooth decay in American school children increases steadily throughout the United States as the distance from the tropics increases, Dr. Mills said. The increase is roughly 15 more decayed teeth per 100 children for each added degree of latitude, "or well over 200 per cent from Gulf to Canadian border."

Effects of Ultra-violet Light.

Dr. Mills explains this as being due to the decreased amount of ultra-violet light reaching inhabitants of the more northern latitudes. The only exception to the increase of tooth decay toward the north is found in the northern plains section, where the sunlight is more plentiful than in other northern regions of the country The part played by ultra-violet light in stimulating development of strong bones and teeth has already been shown, Dr. Mills pointed out.

Hard water is good for the teeth, even though it makes dishwashing, laundering and other household chores more difficult and presents a serious problem to factories. Dr. Mills found almost 30 per cent more caries among the children of cities using river and lake water than among those using water from wells or springs, even though the mean latitude of the two groups was the same The reason for this, he believes, is the degree of hardness of the water. His data show that caries diminishes as hardness increases. Animal studies have already shown that the calcium and magnesium supply in the drinking water and food affect bone and tooth formation and tooth decay.

Caries and Soil Leaching.

Another relation between geography and tooth decay is the finding that children living near the headwaters of a river have less caries than those living near the same river's mouth. This is probably related to soil leaching, Dr. Mills suggests.

A high caries rate is found in mining regions in Pennsylvania and on down the Ohio river. This may be accounted for by the millions of tons of sulphuric acid which seep each year from the mines into Pennsylvania streams and on down the Ohio. Besides corroding boilers, metal pipes and river craft, Dr. Mills believes this acid may lead to tooth decay in persons drinking the water. Sulphuric acid will liberate calcium from bones and teeth in large amounts, studies on lead poisoning treatment have shown. This point and a possible relation between amount of tooth decay and amount of oxidized sulphur from coal combustion in the air of smoky cities need to be investigated further, Dr. Mills suggested.

Children's Problems Solved by Study of Puppet Shows

New York.—Children's worries about love, marriage and even sex are being solved for a group of little patients at Bellevue hospital here by puppet shows. These puppet shows represent for children the problem plays which parents see on Broadway.

This use of puppet shows was described to members of the American Orthopsychiatric association meeting here by Dr. Lauretta Bender and Adolph Woltman of the psychiatric division of Bellevue hospital.

Just as the grown-up audience discusses the problem of John and Mary on the stage, the children discuss with each other and the psychiatrist the problems of the puppet characters. Through such discussion, by children or grown-ups, comes better understanding of their own problems. With a little help from the psychiatrist, the children are then able to find the best way out of their difficulties. The puppet shows are designed to include all the problems that worry children and keep them from growing up happily.

Intermarriage for Generations Doesn't Weaken the Stock

Results of Study of Japan Fishing Village

INTERMARRIAGE for several generations is popularly supposed to weaken the stock and produce a race or people physically and mentally degenerate. Evidence to the contrary appears in a report to the American Medical association of a study of conditions in the small fishing village of Usuki on the coast of western Japan.

The inhabitants of this village have strictly kept the custom of intermarriage for hundreds of years. According to tradition the village was settled in 1605 by the descendants of a noble family forced to flee in a civil war. The biologic effect of intermarriage has been studied in the village since 1933 by Dr. Takeshi Ikemi. His findings are summarized in the following report:

"There are 135 families having 1,786 members in all (904 men and 882 women). They have never mingled with other villagers or townsmen except in business transactions; consequently their habits and customs are quite different from other Japanese.

Children Do Well at School.

"Although the children are not regular attendants at school, an investigation of the school records shows that they generally do well at school. Thus intermarriage never affected their intellectual faculties.

"Crime is rare. During the last ten years seven violated the fishing law, four injured others, four did some stealing, four broke the law of weights and measures, eight were charged with gambling, one cheated others, two were robbers, five interfered with government officials in the execution of their duty, and three other derelictions brought the total instances of malfeasance to thirty-eight Judging from this, it may be affirmed that intermarriage does not bring about the degeneration of mental control.

Normally Healthy and Strong.

"The sanitary knowledge of the people is meager, they have epidemic diseases, such as dysentery and cholera, but there is never any serious hereditary disease Leprosy, syphilis and elephantiasis at present are not seen among them. Neither color blindness nor insanity occurs. The constitution of the people is strong and they are good wrestlers in spite of their taking very simple food. In the physical examination for conscription, these villagers have always ranked first, in that prefecture, with respect to health and constitution.

"Divorce is rare. The birth rate, in comparison to that of the two neighboring villages, shows that intermarriage does not affect the birth rate Stillbirths are uncommon.

"There are now twenty-seven couples who married cousins."

Information about the offspring of these couples shows that "when the excellent are married, no bad results are to be found."

225,000,000-Year-Old Reptile Bones Found in Texas

Cambridge, Mass.—A complete fossil specimen of a long-spined Dimetrodon, one of the earliest of reptiles and apparently the commonest animal on earth about 225 million years ago, has recently been brought to Harvard university by Robert Witter of the Museum of Comparative Zoology.

It was found in the "red beds" of northwestern Texas, which have previously yielded numerous skeletons of the early Permian period, of which the Dimetrodon was characteristic This flesh-eating creature had its day and ceased to be, long before the rise of the dinosaurs.

Most spectacular feature of the eight-foot animal is a series of long, bony spines extending two feet upward from its back. There is evidence that in life these spines were connected by a web of skin to form a sort of sail along the middle of the back.

The function of this sail, if any, is still a scientific puzzle.

England Has Colored Fabrics of Asbestos

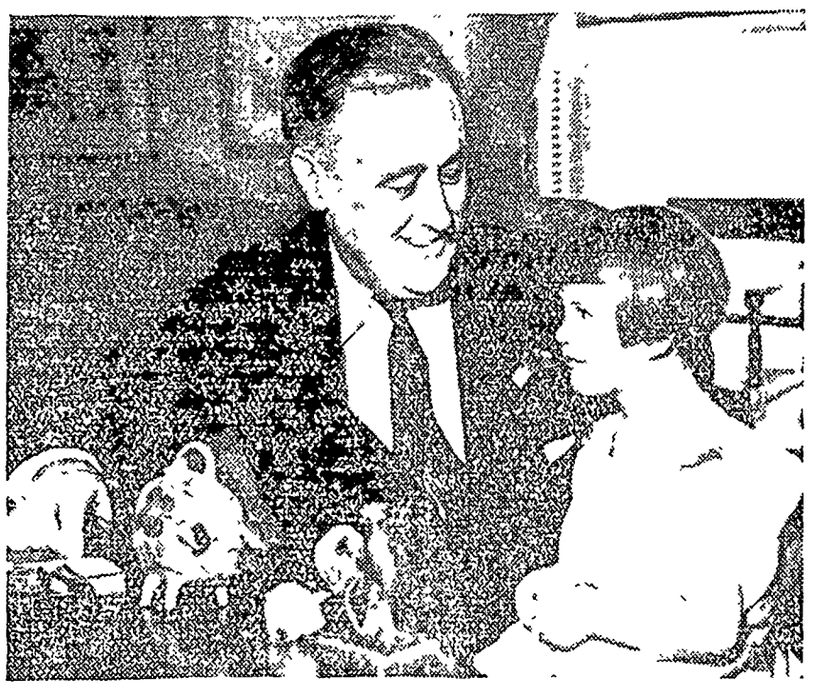
New York.—Vari-colored asbestos fabrics are now being produced in England with the aid of a new dye which gives fast colors, states a report to the American Institute of Mining and Metallurgical Engineers here.

The dye opens up a new field of fireproof cloths including aprons, rugs and table covers. Previous artificial dyes have not been successful on asbestos.

Storms and Hurricanes Are Nemesis of Mr. Purcell

Henry M. Purcell doesn't like storms. Three times in the last ten years he has been their victim. He went through the Miami, Fla., hurricane in 1926, moved to Palm Beach afterwards, but was caught in the "big blow" of 1928. Then he moved to Montgomery, Ala., but the storm which struck there recently wrecked his garage and blew it down on his car. He is undecided where to go next.

President Gets First Buddy Poppy



President Roosevelt shown receiving the first buddy poppy of the 1937 Buddy Poppy sale conducted by the Veterans of Foreign Wars, from little Ruth Joyce Bradish. Miss Bradish admires a part of the collection of animals on the President's desk, after the presentation.

OGPU CHIEF JAILED

Genrikh G Yagoda, former chief of the dreaded Russian OGPU (secret police), who is the latest celebrity accused of plotting against the life of Josef Stalin. Dismissed from his post of commissar of posts and telegraphs recently, he is reported now a captive in one of Moscow's grim prisons.

SHE USES 3,800 WORDS

Mary Christine Dunn, twenty-eight-month-old daughter of Mr and Mrs. Lawrence T. Dunn, of Bonne Terre, Mo., who, according to scientists of Washington university, has an intelligence quotient of 185. This is 45 points higher than the I. Q. normally attributed to genius. Mary's parents say she has a vocabulary of more than 3,800 words.

Pity the Man at the End!

Imagine the feelings of the man at the end of this recumbent line of members of the Royal Signal corps if the trick motorcyclist underestimates the length of the jump. It's the end man that's ridden over rough-shod. Everything turned out all right, however, in this test made near London.

Film Girls Attracted to California Beaches

With the coming of warmer weather many of Hollywood's starlets keep in trim by daily runs on the nearby beaches. Photograph shows, left to right, Lillian Porter Gloria Brewster, Marjorie Weaver, Barbara Brewster and Lynn Bari, taking their daily run on the nearby Santa Monica beach.

POULTRY

CHICKS AND HENS NEED VITAMIN

Poultry Scientists Stress Value of Diet.

Supplied by the New York State College of Agriculture.—WNU Service.

Chicks need vitamin G to grow and hens need it to produce eggs that will hatch, according to poultry scientists at the New York State College of Agriculture.

The scientists found that the developing chick embryo dies if there is not enough vitamin G is deposited in the egg; and that a much greater amount of this vitamin is required for egg production than for hatchability.

Their experimental work dealing with hatchability shows that the vitamin G content of eggs is determined by the amount of this vitamin in the hens' diet. Eggs with the greatest amount can be had only when hens are fed a diet rich in vitamin G. They say the degree of yellow coloration in the egg-white is evidence of the richness of the hen's diet in vitamin G.

Substances containing vitamin G and used in feeding poultry include dried yeast, dried whey, dried skim milk, dehydrated alfalfa meal, sun-cured alfalfa meal, and white fish meal. Other animal by-products contain appreciable amounts, but cereals have relatively little. The amount contained in cereals, however, is especially important, according to the research men, because grains compose such a large part of poultry rations

They also point out that the requirement of chicks for vitamin G is closely related to the rate of growth in weight of the chicks, indicating "that the vitamin is intimately connected with growth processes and is not required in any great extent for maintenance."

"Large End Up" Is Best to Save Hatching Eggs

Hatching eggs to be hauled or shipped to the hatchery should be packed snugly into the case with the large end up, says Berley Winton, in charge of the poultry work of the Bureau of Animal Industry, as hatching eggs are less likely to be broken when in this position than if they are packed with the small end up.

Each normal egg has an air cell at the large end, Winton explains, and it is necessary that the membrane separating the inner part of the egg from the shell membrane neither be broken or shaken loose. Research at the National Agricultural Research Center, Bellsville, Md., has shown that eggs with the vitalous air cells hatched only two-thirds as well as the eggs which had normal air cells Packing the eggs with the large end up relieves the pressure from the inner membrane.

Winton cautions that the eggs should never be placed on the bumper of an automobile, as the vibration at this point is possibly much greater than on the floor inside the car. If the hatching eggs are hauled in a wagon or truck the bed should be matted with straw which serves as a shock absorber.

In the early part of the hatching season it is necessary to gather eggs often as hatching eggs should not be allowed to chill. They should be stored at a temperature ranging from 50 degrees to 60 degrees Fahrenheit. A frost-proof cellar or basement is usually a good place for storage.

Exterminating Lice

Chicken lice may be exterminated by applying small pinches of sodium fluoride on the neck, wings, breast and vent of the birds, says a writer in Wallaces' Farmer. Another effective method is to paint a 40 per cent solution of nicotine sulphate on the roosts about one-half hour previous to the time the birds go to roost. The poultry house should be tightly closed and all birds should be on the roost.

The Leghorn

The Leghorn for years has been a widely known breed in the United States. Leghorns were brought into this country from Italy. The two varieties imported were the Single Comb Brown and the Single Comb White. There is every indication that this breed originated in Italy where fowls of a similar type have been kept for many years. The breed is noted for its alertness, stylishness of carriage, and the graceful blending of sections.

Broodiness Inherited

Where only an occasional bird in the flock is broody this can be remedied by using this bird on the home table, but if there is a large number of broody birds then the best thing to do is to dispose of the entire flock. These birds should not be used for breeding purposes as broodiness is an inherited trait and it will be best to start a new flock with baby chicks from a breeder whose flock shows satisfactory production.

...y It" With Frilly, Lacy Neckwear

By CHERIE NICHOLAS

...indeed, fashion is in an ut-...y feminine romancing mood ...ring. Hats gay with ribbons ...wers and laces, suits pretti-...th the daintiest frilliest lin-... blouses worn for years, ...s of prints so flowery and mul-...ful as to dazzle the eye and ...hich is a sure sign of the re-... romanticism in the mode—...ival of the laciest, the dain-...he most adorable fluffy-ruffle ...ear and dainty snowy lingerie ...s that even the wildest flights ...s imagination might ere de-...

...now that we know that frilly, ...eminine neckline and wrist-...ntasies are going to be the ...hing let's look up some of the ...cing things which shops are ...g this season. The group pic-...s typical of the many charm-...ttering jabots, collar-and-cuff ...nd "bibs" that smart women ...aring to give an extra spring-...uch to their tailored silk and ...heer wool dresses.

...he first place there's nothing ...r than finely pleated laces ...ckwear. The good-looking col-...d cuff set that gives so keen ...ion touch to the simple crepe ... worn by the young woman ...ng below to the left in the ...e is of a rather heavy lace ...ark shade of ecru. The V-...d collar is extremely flattering ...ogether with its wide cuffs ... a "picture." With this lace ...piece you can give infinite ...y to a winter-weary wardrobe ...ill enhance your newest frock ...lamorous degree.

...to the right above in the group ...ette Colbert wearing a stun-...collar made of an interesting ...rawn novelty lace fluted row ...row as you see. This actress favors a combination of the collar in Peter Pan effect, the jabot at the front and a tiny bow of dark plain material to match her lovely dress.

An entirely different type of lacy neckwear is the "bib" or yoke effect pictured left above. It is one of those exquisitely fine and beautiful accessories that you can wear with your very best gown in most ladylike fashion. The lace is a choice Alencon type with insets of hand-embroidered batiste as delicately sheer as chiffon. The lace is cut in a square with a circular lace ruffle at the top and another ruffle following the square outline of the bib.

Above to the right lavish embroidery edged with dainty val lace adds charm to a band collar with its tiered ruffles of permanent Swiss organdie beautifully flower-embroidered. Fine as a cobweb, this imported organdie is decidedly practical in spite of its fragile look.

Bows, too, are going to be worn a lot this season. In fact snowy, lacy lingerie accents are registering for a tremendous vogue, be they collars, cuffs, dainty gilets with waistcoat belts that button around the waist, "bibs," jabots or any accessory item made of lace, of Swiss organdie of washable mousseline de soie or of any delicate sheer and these will carry a wealth of embroidery or hand stitchery in many instances. The new bows now showing in endless variety are cunning on tailored dresses. If they are not of mousseline or organdie with lace edgings then they are apt to be entirely of heavy laces like Cluny or Irish.

SAILOR HATS AND TURBANS IN STYLE

By CHERIE NICHOLAS

Where there's new fashions there's always new thrills. Just about the most exciting thrills registering on the new season's program are the "nifty" little sailor hats and turbans that are made of bizarre plaid or stripe crepes or taffeta silk. These are the sort that the moment you see them you make up your mind in a flash that your happiness depends on acquiring just such a chapeau. The sailors are covered as smooth as glass with the striped silk (or the plaid) with perhaps a little whirligig of ribbon for a finish or a rakish wee feather; and then as if that is not enough to entice you, more than likely a matching scarf adds to the allure, or if not a scarf, one of the new romantic gypsy sashes that ties so nonchalantly about waistlines these days. Cast your plainest dark crepe frock under the witchery of these plaid or striped silk accessories and it will take on untold glory and glamor.

Tunic Dresses Are Worn for Daytime and Evening

Mainboucher, who first launched the tunic dress, makes use of them for every occasion in his winter collection.

One of the new Mainboucher tunic dresses is in black wool crepe. The top, which ends in a flaring basque at the hip, has been caught into a diamond-shaped pattern which is studded with brilliants. The skirt is of plain wool crepe.

Outstanding is a black satin tunic evening gown which comes to the knees in front but extends downward in back to form a train. The underskirt is black tulle, gathered very full.

Cattle Make Gain on Good Roughage

Well-Balanced Diet Found Profitable; Calves Also Benefit.

By E. T. Robbins, Live Stock Extension Specialist, University of Illinois. WNU Service.

Cattle feeders with limited grain supplies are finding that thin cattle make cheap and fairly rapid gains on plenty of good well-balanced roughage.

Profiting by their experience following the 1934 drouth, farmers went into the winter with a better supply of good roughage than they had that year. At meetings cattle feeders have told about the steady increase in flesh which yearlings and older cattle are making with practically no grain for the first few months, a practice which has been recommended by the extension service of the agricultural college for a number of years.

Even calves with just a little grain are gaining about 1½ pounds a day and putting on some fat, getting ready for a short full feed during the last few months before marketing.

Cattle which are getting much silage usually are receiving some cottonseed meal. Large steers on silage are doing well with an addition of three or four pounds of cottonseed meal a day. When some legume hay is included in the ration to supply protein, less cottonseed meal is fed.

Calves on silage with some legume hay, a little oats and one or two pounds a day of cottonseed meal are gaining nicely. It is suggested that these amounts of the high protein feed should balance the ration to meet fully the needs of the cattle. This is a good plan especially since such feeds are relatively cheap.

Soy bean oil meal is more suitable than cottonseed meal to use without silage.

Proper Care of Harness Will Lengthen Durability

Care of the farm harness greatly lengthens its durability. Wash and oil it occasionally, advises a writer in Wallaces' Farmer.

For washing, use tepid water, a neutral soap such as castile or white toilet soap, and a sponge or fairly stiff brush. A dull knife will remove hardened grease. Then rinse in the water and allow the harness to hang in a warm place until it is no longer wet, though still damp.

Next oil it and leave it in a warm place for twenty-four hours before using. Do the oiling or greasing while the leather is still damp; otherwise, it may take up so much grease that it will pull out of shape, or it may take up sand and grit. Harness should never look or feel greasy.

Neatsfoot or castor oil, or a mixture of these with wool grease, is preferred for treating driving harness. For heavy harness, use neatsfoot oil, a mixture of neatsfoot and tallow, or all of these wool greases, to make a paste having about the consistency of butter. Apply the oil or grease liberally to the work harness. Have the material warm to the hand, and rub it in thoroughly. After the harness has hung in a warm room overnight, remove the excess oil or grease with a clean, dry cloth. Too much grease darkens the leather and soils the clothing.

First to Grow Timothy

Historians tell us that timothy was first grown in the United States by one John Herd, about 1717, along the banks of the Piscataqua river between Portsmouth and Dover, New Hampshire. Whether he imported the seed from England or some other European country, or whether he found it growing wild, we are not certain, notes a writer in Hoard's Dairyman. About this time, Timothy Hansen introduced the crop into Maryland from somewhere in New England, and while Hansen does not appear to have been the first grower, he nevertheless bequeathed his name to the crop. However, in some parts of New England and New Hampshire in particular, "Herd's Grass" it is to this day.

Agricultural Hints

Grazing of woodlands destroys more woodlands than the forage is worth.

* * *

Rolling pastures in early spring is beneficial if heaving has been severe.

* * *

Horses usually need some grain each day to put them in condition for spring work.

* * *

The best time to set strawberry plants is in early spring, as soon as the ground can be prepared.

* * *

The United States acreage of fresh vegetables for market increased from 587,000 in 1919 to 1,548,000 acres in 1936.

* * *

As a substitute for chestnut, hemlock is recommended as the best native tree to plant for use in rough construction work on the farm.

* * *

Manure applied on wheat fields to be seeded to clover or alfalfa will provide extra plant food for the legumes and will act as a mulch to conserve moisture.

Washington Digest

National Topics Interpreted By WILLIAM BRUCKART

NATIONAL PRESS BLDG. WASHINGTON, D. C.

Washington.—Many spineless officials of the federal government were horribly shocked the other day when several hundred farmers took matters into their own hands and drove a bunch of sit-down strikers out of the great Hershey chocolate plants in Pennsylvania. They thought it was terrible that men who were striking for higher wages should be beaten and slugged as the farmers at Hershey, Pennsylvania, treated the sit-down strikers. The strikers had closed the chocolate plants, thus cutting off the daily market for thousands of gallons of milk.

Must Curb Lewis

Fortunately for the country the number of these spineless creatures, charged with official responsibility, is very few. But I mention the fact because therein is a key to some of the things that have been happening in the Roosevelt administration's treatment of the labor disturbances.

I believe no one can support violence but there can be no doubt that the federal government is charged with responsibility for protecting rights. Rights are possessed by everyone under our Constitution and under our form of government and when a handful of individuals assume to disregard the rights of others it becomes something more than a situation about which soft words and tears for the down-trodden worker are required.

The importance of the action of the farmers at Hershey, Pennsylvania, cannot be minimized. It is a straw that points which way the wind blows. It means that unless the headlong and unrestrained actions of John L. Lewis and his labor agitators are curbed, sooner or later we will pay with blood; we will pay with lives of citizens because the American people always have insisted and always will insist upon a square deal.

In treating of conditions within the country, it is well always to avoid inflammatory declarations. I hope I am never guilty of unfairness in anything I write. But the cold fact is that, in this country, the time has arrived when government must make a choice between its functions as government and allowing autocracy of labor leaders to destroy the rights and property of the other millions of our population. Labor has its rights and they must be protected, but it is equally important that the rights of those who are not members of any union, who want to work, who own property, be protected. Thus far in the present labor controversy, it must be said that the Roosevelt administration and the governors of most of the states have fallen short in their sworn duty.

There has been much praise accorded Governor Murphy of Michigan for "settling" the strikes in the automobile plants. Yet, I cannot help wondering whether the term "settlement" is correct when strikers thumbed their noses at the courts and when law enforcement officers were told by their superiors to hold off the execution of court decrees. It seems to me that we, as a nation, will have cause to regret "settlements" of that kind for a good many years to come.

* * *

I am inclining to the belief that there is only one word capable of describing the attitude of the Roosevelt administration in dealing with strikers of the sit down character. Labor has a weapon in the strike and it is entitled to use that weapon because too many business interests have refused to be fair. But when labor abuses, instead of uses, the weapon available to it, then the time has come to call them to account just as business interests are called to account when they violate laws. The difference is that the ranks of labor involve millions of votes whereas, the ranks of business involve only a comparatively small number of votes. Therefore, by any line of reasoning I have been able to follow through, it seems to me that the federal government's position thus far can properly be described as political cowardice.

Political Cowardice

There are a number of reasons why I think this term is appropriate. First, there was the famous night conference when Mr. Roosevelt returned from his Georgia vacation and talked things over with the house and senate New Deal leaders. They emerged from that meeting with the President, saying that the federal government could do nothing; that no federal laws had been violated and that no request had come from any proper authority for federal government intervention.

It makes one laugh, such statements as these. If President Roosevelt and his administration had desired to curb sit down strikes, does anyone believe that he could not have conveyed word to Governor Murphy of Michigan that he was willing to help? I think there are plenty of grapevines by which word could have been sent to the Michigan governor and, I truly believe, that if there had been a request for federal troops, there would have been a distinct change in the attitude of Labor Leader Lewis almost overnight.

Further, I have heard from plenty of lawyers in the house and senate that the decision that no federal law was being violated was wholly questionable. Those lawyers were quite convinced that Mr. Roosevelt had federal statutes at his command to use as the basis for action in the various sit down strikes—if he seriously wanted to get mixed up in the labor row.

Then, I am reminded of the very frequent attacks which were forthcoming from the White House and other New Deal spokesmen when employers and banks and business generally failed to measure up to New Deal demands in the recovery programs. The President spoke with emphasis on those occasions. He has been completely silent in the current situation.

* * *

And he has been able to maintain silence through protection given him by political maneuvering in the senate. As an instance of this, let me cite the efforts of Senator McNary of Oregon, the so-called Republican leader, in the senate, who attempted to put the question directly to the President. He sought, when the senate was floundering and dodging over a resolution condemning sit down strikes, to change the form of the resolution from one needing only concurrence of the house to a joint resolution which is a measure that requires the signature of the President. Majority Leader Robinson was quick to block that maneuvering. No one needs to tell you, of course, that Mr. Roosevelt did not want to have that resolution come to him.

Kept Silent

So, as a second instance of federal government sissiness, we see a subservient majority of New Dealers adopting a resolution which said in effect, "You naughty boys! You know it is wrong to indulge in sit down strikes, to take possession of other people's property, and we are going to slap you on the wrist for it." Well, that was a declaration of policy but when the resolution was before the senate they could not resist the temptation to denounce business because they charged it was unfair to labor.

Then, we have another circumstance. Representative Dies, a Texas Democrat, proposed a resolution in the house for an investigation of sit down strikes. Mr. Dies was willing to condemn sit down strikes but he wanted to know what the facts were. Very quickly, many of the weak-kneed boys on the floor of the house smelled a thorough-going inquiry into labor organizations generally, into political activities of labor groups, into racketeering where local labor organizations are in the hands of irresponsible or scheming radicals. So, the house sneaked out from under and, as painlessly as possible, dodged this issue by depositing the Dies resolution on the table from which, of course, it will never be withdrawn.

I called these policies political cowardice in an earlier statement in this article. All of the elements seem to me to be present to justify that description. But there is another phase of the whole situation. It concerns the future of the politicians who have run away from the real issue this time. I am quite convinced it will rise up to hold them in the not too distant future.

* * *

In the course of the discussion of the labor controversy, I adverted on several occasions to the politics that is imbedded in the situation. There is so much of politics in the picture that one hears in the under current around Washington a discussion of President Roosevelt's future plans. It is curious, but it appears possible, that Mr. Roosevelt may be forced to run for a third term. Such a course obviously would break all precedents, but Mr. Roosevelt likes to break precedents.

Talk of Third Term

He has stated on several occasions his ambition to leave the White House in 1940 with the nation at peace and economically prosperous. This observation has been repeated whenever the opportunity was propitious. On the last occasion, there were a number of observers in Washington who sustained the same reaction to the declaration, namely, that perhaps—and only perhaps—Mr. Roosevelt had a yearning in his heart to serve another four years after his present term expires. One writer, noted for his direct expressions, observed that only by constantly referring to his future retirement could the President invite groups to interest themselves in demanding him to run for a third term.

Ask Me Another

A General Quiz

© Bell Syndicate.—WNU Service.

1. What is a Dutch auction?
2. In what countries is slavery still practiced?
3. What is the world's record of weight carried by man?
4. Does a watch gain time at night?
5. What is the highest price ever paid for a book at auction?
6. In what part of the world does the least rain fall?
7. Of what famous beauty was Menelaus the husband?
8. What is an oligarchy?
9. What does "polytechnic" mean?
10. In American politics what is a "favorite son"?
11. What is an animalcule?
12. Who wrote the song "Carry Me Back to Old Virginny"?

Answers

1. It is an auction at which bids are decreased instead of increased until a minimum price is reached.
2. No nation formally indorses slave trading, but it is believed to exist in Abyssinia, China, Eritrea, Hedjaz, Kufra, Liberia, Morocco, South Morocco, Rio de Oro, East and West Sahara and South Tripoli.
3. A. P. McCarthy of St. Louis, Mo., carried 2,250 pounds on his back in 1898.
4. If the temperature is lower a watch will gain.
5. In 1927 Dr. A .S. Rosenbach paid $106,000 for a copy of the Gutenberg Bible, which is said to be the highest price ever paid for a book at auction.
6. Arica, Chile, has the minimum amount that has come under observation. The average rainfall for 17 years was only 0.02 inch a year and there were only 3 measurable showers within that time.
7. Helen of Troy.
8. A form of government in which power is restricted to a few.
9. Embracing many arts.
10. A candidate backed at a national convention chiefly by the delegation from his own state.
11. An animal of microscopic smallness.
12. James Bland, a negro poet.

My Favorite Recipe

By Helen Twelvetrees

Creamed Eggs With Chili and Rice

To two cupfuls of well-seasoned medium white sauce add one teaspoonful chili powder and six hard-cooked eggs, cut in quarters.

Meanwhile, cook one cupful of rice, season it to suit the taste and arrange in a border around a platter. Pour the egg mixture into the center. Serves six.

To Rachel L. Wilkins, the person to whom the hereinafter described is taxed and to Ida Bingham, Lester Wilkins, Chas L. Wilkins, Fred Wilkins, Elizabeth Knisley, Albert Wilkins, Erne Wilkins and Lula Wilkins, heirs at law of said Rachel L. Wilkins, deceased and to Albert Wilkins, Erne Wilkins and Lula Wilkins the parties in actual occupancy and possesion of the land hereinafter described.

You and each of you are hereby notified that on the second day of March A D 1936 at the adjourned tax sale begun and publicly held on the first Monday of January A D 1936 the following described real estate situated m the Town of Goodell, Hancock County, Iowa to-wit·

Lot thirty five in Block one, Cline's Addition to the Town of Goodell, Hancock County, Iowa, was sold at tax sale under the provisions of Section 7255 of the Code of Iowa, to Hancock County, Iowa, by the Treasurer of Hancock County, Iowa, and the tax certificate No. 1655 was duly assigned to Emmet Kearney and by him duly assigned to Lula Wilkins, who is now the lawful holder of said certificate of purchase, and that the right of redemption will expire and a Treasurer's Deed for said above described real estate be made unless redemption from such sale be made within ninety days from the completed service of this notice.

Dated this 24th day of April A D 1937.

LULA WILKINS,
Owner of said certificate of purchase at tax sale.

"TIE IN AND BUCK BACK" WORK HORSES SAYS CAINE

Working horses in the proper hitch arrangement not only means a more effecient use of each horse unit in the hitch, but it also allows the horses to work under more desirable conditions.

The multiple hitch, which is a system of "tieing in and bucking back" horses, has a number of advantages as listed by A. B Caine of the Animal Husbandry Department, Iowa State College. Side draft, common when horses are worked abreast on the plow or binder is easily reduced For effecient utilization of power the multiple hitch, becoming increasingly popular in Iowa, should be used for spring plowing.

It is easier to handle horses that are "tied in and bucked back," Mr Caine explains. All horses are required to do the same amount of work, the horses in front being driven, while by the "tieing in" system the back horses must keep pace with those in the lead.

A chain fastened to the halter ring of the rear horses and to the traces of the horses in front, and also a rope tied to the rear horses' halters or bits and fixed behind the chain which is fastened to one side of the evener on which the front horses pull, regulates equally the amount of work all horses do. The faster working horses are usually put in front.

The multiple hitch has an additional advantage over the 4-a-breast style of working horses in allowing the horses while working to stay cooler because they are less crowded Horses worked in a multiple hitch arrangement pull straight out and not away from the implement; thus no loss of energy results.

Multiple hitch units vary, although the 4, 5 and up to 8-horse units are common in Iowa. Often two operations, as discing and harrowing, may be combined economically through the use of a large hitch arrangement.

DENTIST PAUL REVERE

Paul Revere is known to fame chiefly ecause of his historic ride from Boston to arouse the "minute men" on the night of April 18, 1775, before the engagement with the British at Lexington and Concord But, aside from this notable exploit, he was an uncommonly active and versatile citizen.

He had taken part in the Boston Tea Party, and became a lieutenant-colonel during the Revolution after serving as a lieutenant of artillery in the Crown Point expedition of 1756, during the French and Indian War.

In civil life he displayed a variety of talents which a recent biographer thinks entitles him to be known as America's first "Jack of all trades." He was a goldsmith a copper roller, a dentist, an engraver, a powder manufacturer a maker of picture frames, a hardware merchant, and deplorable as it may seem, a seller of hard liquor

Documents recently made public by his great-grandson include bills of lading showing that Paul Revere sold a consignment of rum at 60 cents per gallon, also gin at a proportionately low figure. This same great-grandson now heads a copper business founded by his distinguished ancestor, which still bears the name of Revere, in Boston.

But Revere's chief pride seems to have been his dental skill, and he once sent out a circular to prospective clients, which would be considered highly unethical today, in which among other things he said, referring to human teeth "He fixes them in such a manner that they are not only an ornament, but of real use in speaking and eating."

Longfellow immortalized Paul Revere's ride, but he didn't tell the whole story.

ANSWERS

1. Reduce speed and drive carefully.
2. Absolutely Pedestrian No 4 was using the public highway under rules and regulations laid down to this type of traffic.
3. Pedestrians should walk facing traffic because they can see approaching cars and thus avoid injury
4. State laws say driver of a motor vehicle must reduce his speed when approaching or passing pedestrian
5. Traveling at a high rate of speed at night, a driver may not see the pedestrian in time to prevent an accident?
6. If a pedestrian violates a traffic regulation he should be prosecuted in the same manner as the motor vehicle operator
7. Confusion results in the face of an emergency when several people are grouped together.
8. Driving at an excessive rate of speed, or driving while intoxicated.
9. Pedestrian No 4 has an equal right on the public highways with vehicular traffic.
10. Hitch-hiking causes confusion; confusion causes accidents

If All Humanity Were Put In A Box

We never cease marveling at the forward in Hendrick Van Loon's geography which reads as follows:

"It sounds incredible, but nevertheless it is true If everybody in this world of ours were six feet tall and a foot and a half wide and a foot thick (and that is making people a little bigger than they usually are), then the whole of the human race (and according to the latest available statistics there are now nearly 2,000,000,000 descendants of the original Homo Sapiens and his wife) would be packed into a box measuring half a mile in each direction. That, as I just said, sounds incredible, but if you don't believe me, figure it out for yourself and you will find it to be correct

"If we transported that box to the Grand Canyon of Arizona and balanced it neatly on the low stone wall that keeps people from breaking their necks when stunned by the incredible beauty of that silent witness of the forces of Eternity, and then called little Noodle, the dachshund and told him (the tiny beast is very intelligent and loves to oblige) to give the unwieldy contraption a slight push with his soft brown nose, there would be a moment of crunching and ripping as the owoden planks loosened stones and shrubs and trees on their downward path, and then a low and even softer pumpity-bumpity-bump and a sudden splash when the outer edges struck the banks of the Colorado river

"Then silence and oblivion!"

To this amazing statement MacArthur M Nelson of the Fairmont, Minn, Sentinel adds this observation:

"All right Hendrick, you make the box and we'll do the packing"

Klemme Times -- "And we'll make the lid Before we nail it down we'll borrow some inhabitants from Mars and will chuck in an additional 44 406.000 to keep the people from rattling around in the box"

Public opinion is a great force for good—when it happens to be on that side

Cool comfort in a beautiful

CONCRETE HOME

Coolness is only one of the comfort features of the concrete home. It's a thrifty material that makes homes surprisingly moderate in first cost and lowest of all types in upkeep. Its permanence defies the attacks of fire and storm, of termites and decay. For generations of happy living, it remains free from annoying faults—sagging floors, cracked walls, sticking doors and windows.

Whatever size or style of home you want, whatever color or surface texture, you can build it economically with concrete

TELL YOUR ARCHITECT you want a concrete home. Before you build, ask a concrete contractor or concrete products man to estimate your house with firesafe concrete walls and floors. Be sure that your architect and builder are familiar with the new concrete technique.

You'll want the new, *free* book of beautiful designs!

SCHOOL NEWS

GRADES 7-8

Thursday afternoon we attended a program given by Miss Hansen's room Everyone enjoyed it very much.

The eighth grade class elected officers this week. Allen Barz was elected president; Duane Trees, vice president; and Keith Stille, secretary. Next week they plan to choose their colors, a flower and a motto

Tuesday we planned to take a hike but because of weather conditions we had to postpone it until later.

GRADES 5-6

Friday morning we went into the assembly and heard a very interesting talk on dry ice and liquid air We thank Mr. Galbreth for the invitation to come

We have about finished the receipt books that we are making for our mothers. We shall put them on display in our room at the exhibit

Monday afternoon Betty Jean Reed entertained the people in her room with candy treats. The occasion for the merry-making being her birthday. We wish her many more happy birthdays.

GRADES 3-4

Marvin Wade entered our room on Monday

We have been reviewing punctuation and correct usage of words in Language classes.

Music periods have been spent in Rythmic Band practice.

Several children have brought apple and plum twigs. We hope to force some blossoms from them

Duard Lewis brought a large dragon-fly to school one day this week Mr Elstad put it in the killing jar for us and is going to help us mount it

GRADES 1-2

We entertained our mothers at a tea party on Friday.

Thursday night after school the second grade girls made cookies for our tea party.

We made May Baskets for our spelling words this week. Only those words spelled correctly are put into the baskets.

NEW DISEASE IS THREAT TO SWINE

—Prepared by American Foundation for Animal Health

Another new and serious livestock disease has recently been recognized in this country, and American farmers will do well to be on their guard against it.

This disease is the virulent form of Swine Erysipelas. For many years it has been well-known in European and South American countries. In fact, Swine Erycipelas has outranked Hog Cholera in Europe in the destruction of swine. Knowing the deadliness of cholera, American farmers can judge from this fact the seriousness of this newer disease, and the ravages it might cause, if it were allowed to make headway.

There has been a mild or chronic form of swine erysipelas in this country for a long time. But the killing form of the disease has now appeared in recent years in widely separated parts of the country. A most confusing fact is that, in some forms of the disease, the symptoms and tissue changes are very similar to those of hog cholera. The animals run a temperature, lose appetite, sometimes have difficulty in moving about, and separate themselves from the herd.

Satisfactory control of the disease is possible when proper measures are promptly employed but, in many untreated herds, the losses have been very serious.

Another fact which swine raisers should note is man's susceptibility to the same germ which causes swine erysipelas. Handling swine affected with the disease, or products of swine which have the disease, may result in a person contracting it, with serious consequences.

The only safe course, where swine show evidences of any of the above symptoms, is to call a veterinarian for immediate and accurate diagnosis and treatment.

The similarity between swine erysipelas and hog cholera symptoms is very close, and delay in proper diagnosis may result in a heavy loss. Cholera of course, can be prevented by vaccination. The safest precaution is to have hogs immunized against cholera, and to procure a quick, accurate diagnosis of any herd disease affecting swine.

Lying Is A Serious Charge

Lying is a serious charge to make against anyone, and especially against a professing Christian. A man asked recently, "What do Christians lie about?" He answered his own question by saying, "About not going to church Not one excuse in ten given by people for not going to church is true They would not think of giving such excuses for staying away from business or for not filling a social engagement." Is what this man said true?—Presbyterian of the South.

Willard F Ice of Danville, a blind student at the University of Illinois, made the highest average in his first semester examinations in the freshman class in law, winning a Sigma Delta Kappa trophy.

OLDSMOBILE CHEVROLET

Once More the Guns Roar in Petersburg's Historic "Crater"

By Elmo Scott Watson

THE guns of the War Between the States have been stilled for nearly three quarters of a century, but on April 30 of this year the quiet little city of Petersburg, Va., will echo once more to their roar. There on that date blue-clad "Yank" and gray or butternut brown-garbed "Johnny Reb" will fight again one of the most spectacular engagements in the whole four years of the Civil war—the Battle of the Crater.

Of course, this time it will be only a sham battle, staged by the National Park Service, with the "Devil Dogs" of the United States Marine corps representing the Union troops and cadets from the Virginia Military institute and national guardsmen from the Old Dominion playing the part of the Confederates. But to the thousands of spectators who are expected to gather in Petersburg for the re-enactment of this battle there will be a thrill of reality to it as they see the 1937 prototypes of the 1861-65 warriors swing into action and hear the voice of Dr. Douglas Southall Freeman, editor, historian and biographer of "Marse Robert" Lee, describing through a loud speaker system the battle as it progresses.

With his description supplying such parts of the battle as must necessarily be omitted from the re-enactment, they will hear in memory the gigantic roar of the explosion of four tons of powder as it hurled a mountain of earth, artillery, planks of wood and other debris high up in the air, taking nearly 300 Confederate soldiers to their death. They will see the Union storm troops rushing down into the huge hole in the ground, and then, slipping and sliding, trying vainly to climb up the other side, while Confederate rifles and cannon reap their harvest of death in that inferno below them. And when the gray-clad soldiers with a series of brilliant charges recapture the broken lines, they will realize anew the full horror of this terrible fiasco which cost the lives of nearly 4,000 boys in blue and gained not a single yard of disputed terrain in the long-drawn-out fight for possession of Petersburg—"the longest siege on American soil."

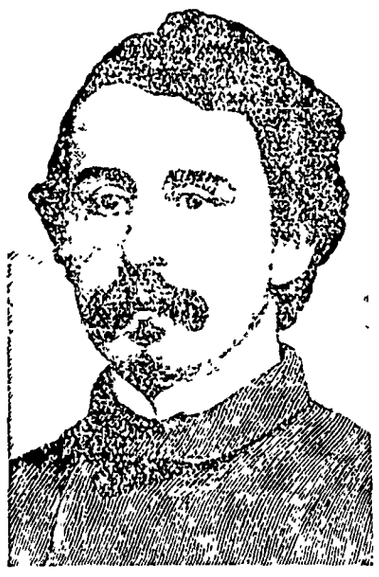
* * *

Back of the story of this engagement is the history of the stalemate which existed in the fourth year of the Civil war. The genius of Robert E. Lee had balked every attempt of Ulysses S. Grant with his host of bluecoats to crush the ragged men in gray in the long series of battles that had raged north and east of the Confederate capital So the Union commander decided to swing around that beleaguered city, cross the James river and strike Richmond from the south through Petersburg, "the back door of the Confederacy."

The result was a protracted siege of nine months. In this time skirmishes occurred almost daily, totaling some 150 minor engagements.

A Tragic Climax.

But all of them were leading up to a tragic climax—the Battle of the Crater. That it was to



Lieut. Col. Henry Pleasants.

turn out thus was no fault of the man who had the original idea for attempting the most spectacular coup of the whole war. He was Lieut. Col. Henry Pleasants of the Forty-eighth Pennsylvania Volunteers, a part of the Ninth corps, commanded by Gen. A. E. Burnside Pleasants had been a mining engineer and most of the men in his regiment were Pennsylvania coal miners.

During the attacks on Petersburg in June, 1864, Pleasants "sized up" the terrain with the practiced eye of the engineer The Union troops were behind high earthworks within 400 feet of the Confederates' defensive trench system and nearly opposite a strong point called Elliott's salient, which was well fortified and almost impregnable. Pleasants had noted, however, that although the Union earthworks were lower than the Confederate, the land sloped very sharply behind the position of the Ninth corps. Thus what went on behind their lines was concealed from Confederate observers over a considerable area.

So he conceived the idea of tunneling under the Union lines and the "no man's land" between them and the Confederates and laying a mine under the position held by the men in gray. His proposal was sent through the usual military channels to his division commander, Gen. Robert B. Potter, his corps commander, General Burnside, both of whom approved of it, to General Grant, who saw in it an opportunity to crack the Confederate line and pour enough troops through the crevasse to capture Petersburg. So he ordered Burnside to go ahead with the project.
